FOREWORD

by

Sao Htun Hmat Win

M.A., A.M., S.R.F. (Harvard)
Mahā Saddhamma Jotikadhaja
Adviser to the Ministry of Religious Affairs
Union of Myanmar.

The prophecy that an able person would soon appear to contribute to the world of knowledge in the field of Buddhist Psycho-ethical-philososphy, which we commonly appreciate as Buddha Abhidhamma, has now come true.

The prophecy was made by my revered old teacher, Bhaddanta Nărada Mahāthera (Aggamahāpandita) who was well-known as the original Patthāna Master. He made the prophecy in 1952 while I was studying Yamaka and Patthāna Treatises under his guidance. He assigned me and my colleague translator, Professor Thein Nyunt, to translate his writings on Abhidhamma. The task was never fully accomplished as I was occupied with teaching at the Pāli and Abhidhamma Department of the University of Yangon and later transfered to the International Institute of Advanced Buddhistic Studies at Kaba-Aye as Head of Research Department.

Thereupon my disappointed old teacher, Bhaddanta Nărada Mahăthera, with full expectation, prophesied that pretty soon an able scholar will emerge to accomplish the noble task of presenting Abhidhamma in English to the world. So now appears a novel and authentic treatise entitled "The Essence of Buddha Abhidhamma" by Dr. Mehm Tin Mon,

Dr. Tin Mon is a man of science for he was trained in the University of Illionis, U.S.A., for his

master degree and doctorate degree in chemistry and then he served his country for several years as Professor of Chemistry. He is also a man of arts as he has written several illustrative books on education as well as on Buddhism and his books are widely read by the public. So his approach to Abhidhamma is very scientific as well as artistic.

Dr. Tin Mon has been conducting long courses as well as short intensive courses on Abhidhamma in many towns throughout Myamnar. His Abhidhamma-classes draw the attention of large crowds as his unique ability to compare Abhidhamma with science as well as with western philosophy makes the subject very interesting and stimulating;

He emphasized the fact that the teachings of Lord Buddha in Abhidhamma are very scientific and that Abhidhamma goes much deeper than natural sciences encompassing a much wider field. As I was trained at the Harvard Divinity School and Harvard Graduate School of Atrs and Sciences three decades ago, and has engaged myself as a research scholar in the field of historical, philosophical and religious sciences for many years, I heartily agree with Dr. Tin Mon in regarding Abhidhamma as the Ultimate Science — the science of the Ultimate Truths.

Culture, Philosophy, History and many other common mundane subjects can be studied thoroughly through the media of natural and human sciences. But the divine elements in religious studies can be probed and realized only by means of Divine Science. However the ultimate supramundane things which are beyond divinity can be realized only thorugh the ultimate Science. So Abhidhamma or Ultimate Science surpasses all other historical, philosophical and religious sciences.

Philosophy is a noble science but it cannot be said to excel all other sciences because it does not embrace the whole universality of things in Abhidhamma. Abhidhamma analyses mind and matter in minute detail into ultimate realities and shows the way to eternal peace called Nibbana. These ultimate realities are unknown to philosophy and all other sciences.

Dr. Tin Mon enlightens the readers extremely well with his "Essence of Abhidhamma". A reader can derive more benefit from this book in one week than from a life-time of pondering the philosophies of others.

This treatise is really a new version of the Compendium of Buddhist Philosophy after the design of the well-known book called "The Abhidhammattha Sangaha - The Compendium of Buddhist Philosophy" written by U Shwe Zan Aung and published by the Landon Pali Text Society in 1910. Dr. Tin Mon perfected and augmented it still further by the extraordinary quality of his intellect and all the superb patrimony of wisdom which he inherited from his predecessors.

As a matter of fact, I have studied the subject in conjunction with the Ultimate Science at the Department of History and philosophy in Harvard University from the theological point of view. But I am more thoroughly convinced and lucidly enlightened in the conception and meaningfulness of the subject only now after I have read this new book presented by Dr. Tin Mon.

is really a very hard task to write than to read, such a profound work like this. May all scholars therefore unanimously and sincerely welcome this superb work on Abhidhamma and may Abhidhamma enlighten the whole world.

25 December, 1994

Sao Hun Hmat Win Yangon, Myanmar Mahā Saddhamma Jotikadhaja

Mental Science or Ultimate Science

Natural sciences investigate the basic principles and laws of nature to explain he physical phenomens that have been occurring for aeons. But they cannot probe the nature of the mind and they fail to explain the mental phenomena that have enormous influence on physical phenomena.

Lord Buddha, with His power of omniscience, knew the true nature of the mind and correctly described the causal relations that govern mind and matter and thus can explain all psycho-physical phenomena in the world.

His ultimate teaching, known as Abhidhamma, describes in detail the natures of the ultimate realities that really exist in nature but are unknown to scientists. His method of verification is superior to scientific methods which depend on instruments. He used His divine-eye to penetrate the coverings that hide the true nature of all things. He also taught others how to develop concentration and how to observe with their mind-eyes the true nature of all things and finally the four Noble Truths which can enlighten one to achieve one's liberation from all miseries for ever!

So Abhidhamma may be regarded as Mental Science or Ultimate Science—the science of the ultimate truths.

The Age of Analysis

Philosophers have now come to the age of analysis. But who can analyse mind and matter correctly and thoroughly as Lord Buddha has done more than 2500 years ago!

The correct analysis of mind and matter is the greatest achievement on earth and the discovery of the natural correlations between mind and matter is the most beneficial discovery ever achieved by man.

You will gain the greatest benefit if you strenuously study Abhidhamma which systematically describes the intrinsic natures of the ultimate realities comprising mind, matter and permanent peace (Nibbāna).

Mind Creates Miseries and Happiness

All mental phenomena have mind as their fore-runner; they have mind as their chief; they are mind-made.

If one thinks, speaks or acts with an evil mind, misery follows him just as the wheel follows the hoofs of the ox that draws the cart.

If one thinks, speaks or acts with a pure mind, happiness follows him like his shadow that never leaves him.

(Dhammapada, Verses 1+2)

ABHIDHAMMA CHARTS

ကျေးဇူးတင်လွှ:

PREFACE

Buddha's Teachings

The teachings of Lord Buddha in the course of 45 years of His Buddhahood have been divided into three collections called *Tipiṭaka* in *pāli*, meaning 'Three Baskets' literally.

The first collection is known as 'Sutta pitaka'. It is the conventional teaching (Vohāra desanā) in which Buddha used common vocabulary to explain His teachings. Practical aspects of tranquility- and insight-meditations are included in this collection.

The second collection is called 'Vinaya piţaka'. It is the authoritative teaching (Ānā desanā) in which Buddha used His authority over the monks to lay down rules and disciplines for them to follow. These disciplines embody the highest code of ethics and can surely purify one's action, speech and thought, thus making one noble and respectful.

The third collection is 'Abhidhamma piṭaka'. It is the higher teaching of the Buddha. Here Buddha employed abstract terms to describe the ultimate realities (paramatthas) in the Universe and Nibbāna which is the summum bonum and the highest goal of Buddhism.

So Abhidhamma may be regarded as the ultimate teaching (Paramattha desanā) of Lord Buddha.

The principles and the causal relations which Buddha expounded in Abhidhamma are so natural, so

logical and so beautiful that they can pin-point the root cause of miseries in the world and the ways to eradicate these miseries.

The most wonderful thing about Buddha's teachings is that the teachings contain both theory and practice, and they clearly and exactly define the human values, the best moral code, the eternal peace and the Noble Eightfold Path leading to that peace. All these valuable teachings have been verified time and again by millions of *Ariyās*, i.e., noble persons who had trodden on the path, and can still be verified at any time by any able person who will earnestly and steadfastly follow the path.

The Significance of Abhidhamma

Sutta pitaka and Abhidhamma pitaka are collectively known as Dhamma—a pāli word meaning 'the doctrine or the teaching' of the Buddha. Dhamma is the doctrine that can salvage persons who abide by Dhamma from falling into the four lower abodes (apāyas) and that can purify the mind from defilements so as to achieve lasting peace and happiness.

The prefix 'Abhi' is used in the sense of preponderant, great, excellent, sublime, distinct, marvellous, etc.

Abhidhamma pitaka is more preponderant, more sublime and more marvellous than Sutta pitaka in the sense that

(i) Abhidhamma pitaka contains more Dhamma groups (Dhammakkhandhas) than Sutta pitaka and Vinaya pitaka.

(Abhidhamma consists of 42000 dhammak-

khandhas whereas Sutta pitaka and Vinaya pitaka contain 21000 dhammakkhandhas each.)

- (ii) Buddha used more numerous methods in expounding Abhidhamma than when He taught Sutta Dhamma; and
- (iii) In Abhidhamma Buddha analysed mind and matter in minute detail in terms of the ultimate realities known as 'paramatthas'. These paramatthas will be explained in the 'Introduction'.

What is the Mind?

Philosophers used to refer to 'mind and matter' as the two basic principles of the world. But they fail to come to a unanimous conclusion as to what the mind is.

Psychologists began their task by probing the nature of the mind. But, when they cannot specify and characterize the mind, they turn to the behaviour of animals and men. Thus psychology becomes 'the study of behaviorism' rather than 'the science of the mind.'

Today's science possesses no instruments to detect the mind. So scientists tend to deny the existence of the mind and fondle the theory that the brain functions as the mind. This theory cannot explain the strange phenomena of telepathy, clairvoyance, extrasensory perception, psychokinesis, out-of-body experiments, life after death, etc., which cannot be denied by science to-day. Besides brain-research has revealed that, although the brain functions as a super-computer, it requires an external agent to run it just as ordinary computers need to be programmed by men. Isn't that external agent the mind?

Abhidhamma describes the mind as a combination of citta (consciousness) and cetasikas (mental factors or concomitants of the mind). There are 52 cetasikas or mental factors – some can defile the mind, some can purify the mind and some are neutral. The total number of possible combinations between citta and cetasikas is 121.

These combinations account for the various states of the mind. They explain fully why the mind is sometimes bad and sometimes good, sometimes sad and sometimes happy, sometimes wicked and sometimes noble, etc.

In the practical aspects of His teachings, Lord Buddha described several ways for developing samādhi (concentration). When the unwholesome mental factors such as lobha (greed), dosa (anger), uddhacca (restlessness), kukkucca (remorse), vicikicchā (doubt), thina-middha (sloth and torpor) can be calmed down not to arise in the mind, then the mind is in unperturbed, peaceful and lucid state. This is the state of upacāra-samādhi (neighbourhood- or access-conentration), meaning it is close to jhāna (absorption).

At the state of (upacāra-samādhi), since the defilements are absent from the mind, one enjoys tranquility and peace unmatched by sensual pleasure. A higher bliss is enjoyed when one can raise the degree of concentraction a litter higher to jhāna-samādhi.

After developing four rapa-jhānas (meditative absorptions of fine-material sphere) and four arapa-jhānas (absorptions of immaterial sphere), one can go a step further to develop abhiānā (supernormal knowledge). There are five mundane (lokiya) supernormal powers:

(1) divine powers (iddhi-vidha), (2) divine ear (dibba-

sota), (3) divine eye (dibba-cakkhu), (4) penetration of the minds of others (ceto-pariya-ñāṇa) and (5) remembrance of former existences (pubbe-nivasanussati).

These supernormal powers far surpass the powers of telepathy, clairvoyance, psychokinesis, etc. With iddhi-vidha abhiññā one can pass through walls and mountains without being obstructed, dive into the earth, walk over water and fly in the sky. With dibbacakhu abhiññā one can see the apāya (lower) abodes as well as the worlds of devās and brahmās and the beings being reborn in the thirty-one planes of existence according to their kamma (karma or action). With ceto-pariya-ñāṇa, one can see the minds of others and know their intentions.

The attainment of these supernormal powers is not, however, the goal of Buddhism. The penetrating power of the mind accompanied by upacāra-samādhi or jhāna-samādhi is utilised to observe the arising and the vanishing of nāma (mind and its concomitants) and rūpa (ultimate matter) in the body. These nāma and rūpa are invisible even under electronic microscopes, but they can be seen by the samādhi-mind!

By meditating on the three common characteristics of nāma and rūpa— namely impermanence (anicca), suffering (dukkha) and not-self (anatta) and also on the causal relations between nāma and rūpa, one is treading along the Noble Eightfold Path and will sooner or later attain the first Magga (Path) and Phala (Fruition). Then one becomes a sotāpanna ariya (noble person) and is fully guaranteed never to be reborn in the lower abodes again.

The sotapanna ariya can enjoy the transcendental peace of Nibbana whenever he chooses. If he continues

with his vipassanā (insight) meditation he will realize the three higher Maggas and Phalas (Paths and Fruitions) in due course and become an arahat (perfect one) in this very life. Even if he does not continue with his vipassanā meditation, the sotāpanna will automatically become an arahat in no more than seven lives.

In the arahat all the defilements are completely uprooted and destroyed. Since these defilements are the real causes of all miseries, their total destruction means complete happiness and eternal peace for the arahat.

Thus by purifying the mind from all defilements which cause miseries and debase a person, one can become an *arahat* who is among the noblest persons in the worlds of men and *devās* and who can enjoy the highest and lasting peace of *Nibbāna* for ever.

So to become an arahat is the correct goal for men and devās, and this highest goal in life is attainable only through the correct analysis and understanding of mind and matter as taught by Lord Buddha.

It should be emphasized here that whatever Buddha had taught us out of His omniscience and own experience can be tested and verified by any one with his own experience.

An Intellectual Treat

Abhidhamma deals with the realities that really exist in nature. It correctly and microscopically analyses both mind and matter which constitutes this complex machinery of man. It describes the six sense-doors in man, the six senses coming from outside and the arising of thought processes when the senses come into contact with the sense-doors.

Various mental states together with the causes of these mental states are vividly enumerated. Wholesome and unwholesome thoughts and their consequences are elaborated. Also the process of life and death and that of rebirth in various planes under the *kammic* force are clearly explained.

Rūpa; which comprises matter and energy, is subdivided and characterized to the ultimate states.

Both $n\bar{a}ma$ (mind and its concomitants) and $r\bar{u}pa$ (matter and energy) are very short-lived. They arise and dissolve in the order of a trillion (10^{12}) times per second. So the view that consciousness flows like a stream as propounded by some modern psychologists like William James becomes extremely clear to one who understands Abhidhamma.

The law of Dependent Origination and the Law of Causal Relations are treated systematically and thoroughly in *Abhidhamma*. These laws find no parallel in any other philosophy.

Finally the four great Noble Truths, i.e., the Noble Truth of suffering, the Noble Truth of the cause of suffering, the Noble Truth of the cessation of suffering and the Noble Truth of the path leading to the cessation of suffering, clearly come to light as one goes through Abhidhamma. These four Noble Truths are the ultimate truths that encompass all the causal relations in mundane as well as supramundane levels. Those who can vividly see these Noble Truths with their samādhimind or wisdom-eye will become enlightened as ariyās.

The Essence of Buddha Abhidhamma

Just as natural sciences investigate the natural laws that control natural processes, so also Abhidhamma

illustrates the natural truths that govern natural processes. But the levels of treatment are different.

All natural sciences, such as physics, chemistry, biology, geology, geography, engineering, electronics and medical sciences, deal with matter and energy—the physical aspects of nature. Even psychology, which goes after behaviorism, cannot pin-point the mind and analyse it.

But it is the mind which leads the world and the life of every-body. All sciences and philosophies are produced by the mind, governed by the mind and children of the mind. So the mind is undoubtedly the most powerful agent in the world!

Abhidhamma pin-points the mind, analyses and characterizes the mind, describes the functions of the mind and puts the mind in its proper place. The true ability of every person lies in his mind. So nobody need look up to the sky and ask for help from some supernatural forces for the most powerful force lies within himself!

Abhidhamma also tells about matter in relation to the mind. It also describes Nibbāna (Nirvāna) which is free from mind and matter. Natural sciences cannot turn a scoundrel to a noble man whereas Abhidhamma can. Scientists and philosophers cannot show the way to the cessation of suffering and to enternal peace whereas Abhidhamma can.

Scientists, philosophers, psychologists and every lover of truth will find Abhidhamma to be a special intellectual treat.

What knowledge is there in life which is more valuable than Abhidhamma which is the ultimate teaching of the fully enlightened One?

INTRODUCTION

A Fitting Introduction

The Abhidahamma pitaka consists of seven treatises—namely, Dhammasangani, Vibhanga, Dhātukathā, Puggalapañnatti, Kathāvatthu, Yamaka and Paṭṭhāna.

The subject matter of Abhidhamma is the four ultimate realities (paramatthas) and the causal relations between them. The treatment of the subject-matter is highly technical and remarkedly systematic making use of purely philosophical terms true in the absolute sense.

If one can patiently study the treatiscs on Abhidhamma, one cannot but admire the profound wisdom and the penetrative insight of Lord Buddha. But it is not easy to study Abhidhamma on one's own efforts as one may easily get lost in the wilderness of abstract terms and strange methodology.

There is, however, a well-known treatise called Abhidhammattha Sangaha, which is the most fitting introduction to Abhidhamma. This treatise, written by Venerable Anuruddha Thera, an Indian monk of Kancipura (Kanjeevaram), summerises all the important points of Abhidhamma very systematically.

The treatise, originally written in pāli, has been translated into several languages. In Myanmar the subject matter of this treatise is included in the course of study for novices and monks, and is also used as the course of Abhidhamma examinations held every year throughout Myanmar by the Ministry of Religious Affairs.

The present book, entitled 'The Essence of Buddha Abhidhamma', further elaborates the subject-matter presented in 'Abhidhammattha Sangaha' in a simple and systematic manner with certain collaboration with scientific views and practical aspects. It is written more or less in the form which is used by the author as lecture guides in conducting Abhidhamma short courses.

The courses prove to be very successful. So the reader will find this book to be thoroughly clarified and interesting to study the essential facts of Abhidhamma.

Abhidhamma is really the golden knowledge which will help one to discard wrong views and to acquire the right view for one's total liberation from all miseries.

Realities

There are two kinds of realities — apparent and ultimate.

Apparent reality is the oridinary conventional truth or the commonly accepted truth (sammuti-sacca). It is called paññatti in Abhidhamma.

Ultimate reality is the ultimate truth (paramattha-sacca). It is called paramattha in Abhidhamma.

In basic science we learn about the apparent depth of an object in water. The apparent depth is shallower than the real depth. It appears to be the true depth due to the deviation of light rays on passing from a denser medium (water) to a lighter medium (air). So if a fisherman throws a spear at a fish where he sees it under water, the spear will not hit the fish, because the fish is not really there.

In the same way paññattis or the apparent realities, though they seem to exist, do not really exist. What are the paññattis? Paññattis are the names of living- and non-living things; they also refer to the things and the persons themselves. Thus not only the names 'man, dog, table, house, etc.' are paññattis but the man, the dog, the table, the house, etc., are also paññattis.

It is apparent that 'names' are not the ultimate realities because a particular thing has been given different names in different languages. There is an interesting episode about giving names in Myanmar.

A lad by the name of Mr. Ba appeared for the matriculation examination. He failed in his first attempt. He appeared for the same examination again next year under the new name of Mr. Ba Hla. He failed again. In the third year he changed his name to Mr. Ba Hla Than and sat for the examination again. Again he didn't have a better luck. So to improve his luck he took the name of Mr. Ba Hla Than Tin in the fourth year. He failed in the examination again. Nevertheless he appeared for the examination again in the fifth year under a longer name of Mr. Ba Hla Than Tin Nyunt. Well, he passed the examination this time. So he was known as Mr. Ba Hla Than Tin Nyunt when he joined the University of Yangon.

The point is that, since names can be chosen at will to designate various things and persons, they cannot be ultimate realities. Yet we have to use these names in our everyday expressions and speeches to communicate with one another. Other people understand correctly what we mean and what we refer to. So these expressions and speeches with no intention of lying are called samuti-sacca or conventional truth.

Now according to Abhidhamma, not only the names but also the things and the persons the names refer to do not really exist. You may argue: "Why? We can see the table, the house, the man, the dog and we can also touch them and feel them. Why don't they exist?"

Well then—please show me the table. Isn't that wood that you are touching or pointing at? If you take out the pieces of wood from the table, does the table exist any more? It is similar with the house. If you pull down the four walls and take off the roof, the house will disappear.

What about the man and the dog? If you take each part such as hair, nails, skin, flesh, blood, bones, intestines, heart, liver, lungs, spleen, etc., in turn and ask the question: "Is this the man or the dog?" The answer is always 'No'. So the man and the dog do not really exist.

Again there is an interesting episode in the Buddhist chronicles between two wise persons — King Milinda and the arahat Rev. Nagasena.

The King asked, "By what name shall I know you, Sir?"

Rev. Nagasena answered, "My companions call me Nagasena. But the name and the person whom the name refers to do not really exist."

The King commented, "If Nagasena and the person do not exist, to whom do people offer alms and who receives these offerings? Since you receive them.

you really exist. Why did you tell a lie in spite of your higher nobility?"

Rev. Nagasena enquired, "Your Majesty, did you come to this monastery on foot or by chariot?"

The King replied, "I came by chariot."

Rev. Nagasena enquired further, "Well then, please show me your chariot. Is the horse the chariot? Is the wheel the chariot? Is the axle the chariot? Is the carriage the chariot?"

The King answerd "No" to all these questions.

Rev. Nagasena remarked, "Is there a chariot beside the horse, the wheel, the axle, the carraige, etc.?"

The King again said "No."

Rev. Nagasena commented, "Your Majesty, you said you came here by chariot; yet you could not show me the chariot! Why did you tell a lie inspite of your high honour?"

The King consented, "There is no chariot beside the horse, the wheels, the axle and the carriage. Just a combination of these things has been named the chariot."

Rev. Nägasena remarked, "Very well, your Majesty, you should understand Nägasena as you understood the chariot."

The important point is that by paramattha or ultimate reality we mean something which cannot be changed into another thing or divided up into other things. It can neither be created nor destroyed by man. It really exists in nature and it holds on its characteristics till it perishes. It can stand the tests or the investigation by any method about its reality and real existence.

Philosophers and scientists have been searching for the ultimate realities that really exist in the universe.

Philosophers could not agree on any ultimate reality—what was proposed by a well-known philosopher was disputed by another.

Scientists first regarded matter and energy as the two ultimate realities. Matter has been divided into 92 natural elements, which in turn have been divided into 92 kinds of natural atoms and their various isotopes. Now-a-days atoms are generally believed to be composed of protons, neutrons and electrons—the protons and the neutrons form the nucleus with the electrons revolving in orbits around the nucleus.

Although protons, neutrons and electrons may be regarded as the basic building blocks of atoms, they are not particles with definite forms and shapes since they can be emitted from atoms as rays. It is more appropriate to regard them as bundles of energy just as sun light is composed of photons—the basic bundles of light energy.

Scientists have detected more than 80 subatomic particles from the breakup of atomic nuclei. All these particles may also be regarded as bundles of energy as matter and energy are inter-convertible according to Albert Einstein's equation: $E = mc^2$, where 'E represents energy, m the mass of matter and c the velocity of light.

Thus from the point of scientific view, man, dog, table, house, all living and non-living things are not ultimate realities since they are composed of electrons, protons, neutrons and energy. Furthermore, since all the sub-atomic particles may be regarded as bundles of energy, only energy may be taken as the ultimate reality in science.

In Abhidhamma there are four paramatthas or ultimate realities. They are $r\bar{u}pa$, citta, cetasika and Nibbāna. In the analysis of $r\bar{u}pa$, it is found to comprise the principles of matter and energy.

Citta is consciousness, and cetasikas are mental factors or mental concomittants. As citta and cetasikas can pick up the senses and are aware of the senses, they are collectively known as nāma (mind).

A person is made up of *rūpa*, *citta* and *cetasikas*, or in other words just *rūpa* and *nāma*. These are the ultimate realities whereas the person is just an apparent reality.

Nibbāna—the principle of cessation of suffering and of lasting peace—always exists in nature. The only drawback is that we do not realize it. It can be realized only by magga-ñāṇa and phala-ñāṇa, i.e., the wisdom-eye accompanied by the Path and its Fruition.

The principles of citta, cetasika and Nibbāna are yet to be discovered by science. They are exactly specified and characterized in Abhidhamma and can be verified by samatha-vipassanā bhāvanā, i.e., tranquility and insight meditation.

The Four Paramatthas

(i) Citta = consciousness of the senses or awareness of an object.

Citta, ceta, cittuppāda, mana; mano, viññāna are used as synonymous terms in Abhidhamma. In casual speaking, the mind usually refers to citta or mano.

(ii) Cetasika = mental factors or mental concomitants.

Cetasikas arise and perish together with citta. They depend on citta for their arising and they

have influence on citta. There are 52 kinds of cetasikas. What we usually call 'mind' is actually a combination of citta and cetasikas. Neither citta nor cetasikas can arise independently.

(iii) **Rupa** = corporeality or material quality.

It may change form and colour on account of heat or cold. There are 28 kinds of rupa.

(iv) Nibbana = extinction of defilements and suffering; absolute lasting peace.

The defilements of citta are greed, hatred, delusion, etc.; they are the root cause of suffering and of the continuity of life. Thus absolute extinction of defilements means absolute deliverance from all future rebirth, old age, disease and death, from all suffering and misery. There is absolute lasting peace in Nibbāna.

The Sanskrit word 'Nirvana' literally means freedom from craving'.

"Extinction of greed, extinction of hatred, extinction of delusion; this is called Nibbana." (Samyutta Nikāya 38.1)

Each of the above four paramathas may be scrutinized for their real existence. Science may dispute the existence of the mind because it cannot detect it. But the existence of citta which is consciousness of the senses in man and animals cannot be disputed by anyone.

The existence of cetasikas such as lobha (greed), dosa (anger), māna (conceit), issā (jealousy), alobha (non-attachment), adosa (goodwill), etc., in men and animals is also apparent. But it is important to see them as separate entities and not as parts of the mind or different mental states. The unwholesome

cetasikas like lobha, dosa, māna and issā can be completely eliminated from the mind by means of insight meditation.

The existence of *rūpa* as matter and energy is easily seen. But *Nibbāna*, being supramundane, cannot be perceived by the oridinary mind, but it can be observed by *lokuttara* (supramundane) cittas.

It should be noted that all the paramatthas, in their ultimate sense, are formless and shapeless just as bundles of energy are formless and shapeless. They are invisible under the best microscope, but cittas, cetasikas and rūpas can be seen by the samādhi-eye. Nibbāna can be realized by the wisdom of the Four Paths.

Each paramattha will be treated at length in the following chapters.

Năma and Rũpa

Both citta and cetasikas are aware of the senses. They are always bent towards the senses in order to pick up the senses, and thus they are collectively called 'Nāma'.

A man is made up of nāma and rūpa (mind and body). Of the two, nāma is aware of the senses and rūpa is not. So nāma is the leader and rūpa, the follower. But in the sense sphere and the fine-material sphere, nāma needs the support of rūpa for its arising.

Nāma is similar to a man with good eye-sight but no legs whereas rūpa is like a blind man with good legs. A man without legs and a blind man meet outside a village and they hear the announcement on loud-speaker that food is being distributed inside the village. They want to get food from the place. How can they go?

Well, if the man with good eye-sight sits on the shoulders of the blind man, and the latter walks along the road as directed by the former, they will soon arrive at the desired place and enjoy food.

Nama and rupa work hand in hand like the

two men above.

The Purpose of the ultimate Analysis

To see things as they really are is the cherished goal of all lovers of truth including philosophers and scientists. When one cannot see the true picture of things, one sees the distorted picture and maintains the wrong view about them.

One basic wrong view which has plagued men for aeons of time is sakkāya-ditthi. It is 'personality-belief', interpreting the aggregates of rupa and nāma as an individual or "I' or 'atta'. Because of this sakkāyaditthi, everyone wants to be a very important person (VIP), wants to pile up possessions for the benefit of 'I' and behaves in a selfish way. In fact all sorts of troubles and miseries spring up from this wrong view.

Seeing others as a person, a man, a woman, an individual, etc., is also sakkāya-ditthi. Sakkāyaditthi gives rise to other wrong views which are uncountable in the world today.

The dreadful thing about sakkayaditthi is that it can couple with bad kamma to throw one down to the lower abodes (apāyas) once and again. According to Buddha's teachings, to get rid of sakkāya-ditthi is most important and most urgent. It is as urgent as putting out the fire on one's head when one's head is on fire. and as removing the spear and treating the wound on one's chest when the chest is impaled by a spear.

The study of Abhidhamma furnishes one with the right view that 'I' or 'atta' does not exist and what really exist in man are citta, cetasikas and rūpa. Understanding the mental states can help one to control one's temperament and to avoid unwholesome mental states, thus reducing mental tension and curing many mental diseases.

When one understands that the volitions (cetanā), that direct one's action, speech and thought, bear kammic properties which cause rebirth and shape the destiny of beings, one becomes mindful to avoid unwholesome volitions.

Furthermore, when one understands the causal relations described in *Abhidhamma*, one can get rid of all wrong views and hold a correct understanding of what is going on in the world.

When one decides to follow the Noble Eightfold Path to free oneself from all miseries, one begins with the right view and develops sīla (morality), samādhi (concentration) and paññā (wisdom) step by siep. In so doing one has to undertake samatha-vipassanā (tranquility and insight) meditation and try to observe how the cittas, cetasikas and rūpas are functioning, how they are being produced incessantly, how the causal relations really work and, in short, how all the phenomena described in Abhidhamma really take place.

So the ultimate analysis in Abhidhamma is not for the pleasure of reading nor for the sake of knowledge alone; it is also to be scrutinized by the samādhi-mind in order to develop insight wisdom leading to the Path and its Fruition (magga and phala.)

Chapter I

CITTA (Consciousness)

Four Classes of Cittas

"Citta" is defined as 'consciousness of the senses' or 'awareness of an object'.

Cittas may be divided into four classes in accordance with the four planes (bhūmi) or spheres (lokas):

- Kāmāvacara cittas consciousness mostly experienced in the sense sphere (Kāma - loka),
- 2. Rūpāvacara cittas consciousness mostly experienced in the fine-material sphere (Rūpa-loka),
- 3. Arūpāvacara cittas consciousness mostly experienced in the immaterial sphere (Arūpa-loka),
- 4. Lokuttara cittas consciousness experienced in the supramundane (transcendental) level.

The above four classes of cittas may be called in short, kāma cittas, Rūpa cittas, Arūpa cittas and Lokuttara cittas.

Kāmāvacara cittas are experienced not only in the sense-sphere but also in other spheres. The same thing is true with Rūpāvacara cittas and Arūpāvacara cittas.

The sense sphere refers to the four apaya abodes, the human abode and the six deva abodes. In all these abodes sensual pleasure is enjoyed.

The fine-material sphere refers to the sixteen planes populated by *Rūpa-brahmās*, i.e. Brahmas with forms or bodies.

The immaterial sphere refers to the four planes populated by *Arūpa-brahmas*, i.e., *Brahmās* without forms or bodies.

Brahmās are more powerful than devās. They enjoy greater peace and longer lives than devās.

Kamavacara Cittas

There are 54 Kāmāvacara cittas which may be divided into three classes:

- 1. Akusala cittas = immoral conscious ness (12)
- 2. Ahetuka cittas = rootless conscious ness (18)
- 3. Kāma-sobhana cittas = beautiful consciousness in the sense-sphere (24)

The total number of *Kāmāvacara cittas* is 12+18+24 = 54. They will be named and explained further below.

It is recommended that the reader or learner should become familiar with the *pāli* names mentioned in this book. They are short and precise and will help one to understand the translations or the writings in other text-books or treaties on Buddhism.

Akusala Cittas

(Immoral Consciousness)

'Akusala' means 'immoral'. People usually commit wicked and evil deeds with akusala cittas. So akusala cittas bear bad results.

The 12 akusala cittas may be further divided into three classes:

- 1. Lobha-mula cittas = (8) consciousness rooted in greed or attachment
- 2. Dosa-mula cittas = (2) consciousness rooted in hatred or illwill
- 3. Moha-mūla cittas = (2) consciousness rooted in delusion or ignorance

Lobha-mūla Cittas

The eight cittas rooted in lobha (greed) are given the following symbols in order to remember their names easily.

ditthi-sam	ditthi-vi	diṭṭhi-sam	ditthi-vi	
+ +	+ +			
a sa	a sa	a sa	à sa	

The '+' sign denotes 'somanassa- sahagatam'.

The '-' sign denotes 'upekkhā sahagatam'

What the other letters in the table refer to will be evident from the following names of the eight lobhs.

mula cittas.

,	CITTA (Consciousness) 25
1.	Somanassa-sahagatam ditthigata- sampayuttam asankhārikam ekam,
· 2. ·	Somanassa-sahagatam ditthigata- sampayuttam sasankhārikam ekam,
<i>3</i> .	Somanassa-sahagatam ditthigata- vippayuttam asankhārikam ekam,
4.	Somanassa-sahagatam diṭṭhigata- vippayuttam sasankhārikam ekam,
<i>5</i> .	Upekkhā-sahagatam diṭṭhigata- sampayuttam asankhārikam ekam,
<i>6</i> .	Upekkhā-sahagatam diṭṭhigata- sampayuttam sasankhārikam ekam,
<i>7</i> .	Upekkhā-sahagatam diṭṭhigatal - vippayuttam asankhārikam ekam,
8.	Upekkhā-sahagatam diṭṭhìgata - vippayuttam sasankhārikam ekam,
	Meanings
som	anassa = mentally pleasant feeling, joyful
	agatam = together with, accompanied by hi = wrong view taking that kamma

	Meanings
somanassa =	mentally pleasant feeling,
	joyful
sahagatam =	together with, accompanied by
ditthi =	wrong view taking that kamma
	and its effect do not exist
sampayuttam =	connected with, associated
Harvin Advisory of	together
vippayuttant =	disconnected with
asankhārikam =	
	automatic.
sasankhārikam =	prompted by oneself or others,
	volitionally inactive
upekkhā =	indifferent or neutral feeling
	· one

44 THE ESSENCE OF BUDDHA ABHIDHAMMA

The eight lobha-mula cittas may now be translated as follows.

- One consciousness, unprompted, accompanied by joy, and connected with wrong view.
- One consciousness, prompted, accompanied by joy, and connected with wrong view.
- One consciousness, unprompted, accompanied by joy, and disconnected with wrong view.
- 4. One consciousness, prompted, accompanied by joy, and disconnected with wrong view.
- 5. One consciousness, unprompted, accompanied by indifference and connected with wrong view.
- 6. One consciousness, prompted, accompanied by indifference and connected with wrong view.
- 7. One consciousness, unprompted, accompanied by indifference and disconnected with wrong view.
- 8. One consciousness, prompted, accompanied by indifference, and disconnected with wrong view.

Applications

From the time we are awake in the morning till the time we fall asleep at night we are always in contact with five senses (visual object, sound, smell, taste, touch) and with our own thoughts. If the sense or the thought is good, we like it, we feel attached to it and we wish to enjoy it some more. At this time lobha (greed or attachment or desire) arises in our mind and lobhamüla cittas will ensue.

If we also feel glad or joyful at the time, the lobha-mula cittas will be somanassa-sahagatam. If we feel indifferent at the time, the cittas will be

upekkhā-sahagatah. If we are not aware of the fact that akusala cittas are arising and they will bear bad results, then our lobha-mūla cittas will be ditthigata-sampayuttain. On the other hand, if we are aware that akusala cittas are arising and they will bear bad results, then our lobha-mūla cittas will be ditthigata-vippayuttain.

Moreover if we feel attached to the sense without being prompted by ourselves or others, then our lobha-mūla cittas will be asankhārikam. If we feel attached to the sense only after being prompted by some one, then our lobha-mūla cittas will be sasankhārikam. Asankhārika citta is stronger than sasankhārika citta and it arises spontaneously.

Now can you name the citta that is arising in a person listening to a pleasant song without giving any thought to kamma and its effect?

It is lobha-mula citta with the name:

"Somanassa-sahagatam ditthigata-sampayuttam asankhārika citta".

Now a man is stealing a handbag after much persuasion by himself because he is aware of the immoral kamma and its bad effect. What is his citta?

Again it is lobha-mula citta because lobha (greed) is the cause of stealing. The name of the citta is

"Upekkhā-sahagatam ditthigata-vippayuttam sasankhārika citta".

Other examples to illustrate the eight types of lobha-mula cittas are given below.

Type 1. A person is enjoying food and drinks without paying any attention to *kamma*.

26 THE ESSENCE OF BUDDHA ABHIDHAMMA

- Type 2. A person after being persuaded by his companion, watches a movie joyfully without any attention to kamma.
- Type 3. A lady delightfully puts on a new dress, but she is aware that attachment to the dress gives rise to lobha-mūla cittas.
- Type 4. A girl is aware-of *kamma* and its fruits, but she, in compliance with the request of her companions, listens to modern songs joyfully.
- Type 5: A boy is eating plain rice with salt with some attachment but without joy and knowledge of kamma.
- Type 6. A girl appreciates her new dress after being explained by her mother that the dress is beautiful. But she has neutral feeling and no knowledge of kamma.
- Type 7. Reasoning about *kamma*, you drink coffee with neutral feeling, but still you appreciate the taste.
- Type 8. A lady has knowledge of *kamma*. But after much persuation from a sales-woman, she reluctantly buys a new dress.

Dosa-mula Cittas

There are only two types of cittas rooted in *dosa* (hatred or illwill). The symbols and the names are as follows.

patigha-sam * * a sa

- 1. Domanassa sahagatam patigha-sampayuttam asankhārikam ekam,
- 2. Domanassa sahagatam patigha-sampayuttam sasankharikam ekam.

Meanings and Applications

Domanassa = mentally painful feeling, displeasure patigha = dosa = hatred, illwill, resentment

So the meanings of the two dosa-mula cittas are:

- One consciousness, unprompted, accompanied by displeasure, and connected with illwill.
- One consciousness, prompted, accompanied by displeasure, and connected with illwill.

Whenever we feel angry or displeased or sad or depressed, dosa-mūla cittas will arise. And whenever it arises, it is accompanied by illwill and mentally painful feeling. If it arises slowly after much prompting from oneself or others, it is sasankhārika.

Now a mother is worrying about her daughter. What citta will be arising in the mother?

It is dosa-mula città with the name:

Domanassa-sahagatam paţigha-sampayuttam asankhārika citta".

A father explained to his son that the son had been cheated. The son became sad. What type of citta would the son have?

It is "domanassa-sahagatam patigha-sampayuttam sasankhārika dosa-mūla citta".

28 THE ESSENCE OF BUDDHA ABHIDHAMMA

Moha-mula Cittas

Again there are two types of cittas rooted in moha (ignorance or delusion). Their symbols and names are as follows.

vici-sam	uddhac-sam
AICI-Saili	euchio, built
-	

- 1. Upekkhā-sahagatam vicikicchā-sampyuttam ekam,
- 2. Upekkhā-sahagatam uddhacca-sampayuttam ekam.

Meanings and Applications

vicikicchā = sceptical doubt about the Buddha, the Dhamma, the Sangha and the Training.

uddhacca = restlessness

The meanings of the two moha-mula cittas are:

- 1. One consciousness, accompanied by indifference, and connected with sceptical doubt.
 - 2. One consciousness, accompanied by indifference, and connected with restlessness.

As these two cittas are of equal strength, neither one being more spontaneous than the other, they are not differentiated by asankhārika and sasankhārika.

A person who is having doubt about kamma and its effect will have a moha-mūla citta by the name:

"Upekkhā-sahagatam vicikicchā-sampayutta citta".

A person is listening to a lecture, but he does not understand a word because his mind is restless. What is his citta?

It is a moha-mūla-citta. The name is "Upekkhā-sahagatam uddhacca-sampayutta citta".

Taking Stock in a Day

Although immoral cittas number only twelve in types, they occur much more frequently than moral cittas in a person every day. This is because the mind is under the influence of lobha, dosa and moha most of the time. These three immoral cetasikas are known as akusala-mūla, i.e., originators of immorality.

Because of moha and lobha, we want to enjoy pleasure all the time, and during this enjoyment, lobhamula cittas will be arising at the rate of many billions per second. At the time we are dressing with pleasure, at the time we are enjoying food and drinks, at the time we are listening to music and watching TV programmes, at the time we are reading novels, at the time we are thinking of our earnings and possessions, lobha-mula cittas will be arising by many billions.

When we are not pleased with the senses or the scences we encounter, dosa-mūla cittas will be arising by billions again. Sometimes when the senses are not appealing, we feel indifferent and distracted in mind. Moha-mūla cittas will arise during this time:

So if we take stock of moral cittas and immoral cittas in a day, immoral cittas will out-number the moral cittas by many million times. Since the immoral cittas leave seeds of un-wholesome kamma which will bring about unfavourable results and unhappy destiny

30 THE ESSENCE OF BUDDHA ABHIDHAMMA or rebirth, it is unwise to let the mind take its course freely.

When we can differentiate the moral cittas from the immoral cittas, we can control them towards our own benefits.

Ahetuka Cittas (Rootless Consciousness)

Hetu = mula = cause or root-condition

Akusala-hetu = unw olesome roots (lobha, dosa, moha)

Kusala-hetu = wholesome roots (alobha adosa, amoha)

Consciousness without concomitant root-conditions is known as a-hetuka citta whereas consciousness with concomitant root-conditions is called sa-hetuka citta.

There are 18 ahetuka cittas. They may be classified into three groups as follows:

- 1. Akusala-vipāka cittas(7) = unwholesome resultant cittas that arise as the inevitable results of akusala cittas.
- 2. Ahetuka kusala vipāka cittas (8) = wholesome and rootless resultant cittas that arise as the inevitable results of kusala cittas.
- 3. Ahetuka kiriya cittas (3) = rootless functional consciousness.

Note: Vipāka = kamma-result

Kiriya = Kriya = functional

Vipāka citta and kiriya citta are kammically (karmically) neutral cittas that are kammically ineffective, .e., they produce no kammic result.

Akusala Vipāka Cittas

The seven akusala vipāka cittas are given the following symbols and names.

į				· · · ·			
	cak		ghã		kā	ti	
•	. 2	_ 3	<u></u>	-	Λ -		-
į		SO		ii ·	saı	ng signi na M	
		4 1	•		- Jaj		- 1

- Upekkhā sahagatarh cakkhuviññānarh (eye-consciousness accompanied by indifference)
- 2. Upekkhā sahagatam sotaviññānam (ear-consciousness accompanied by indifference)
- 3. Upekkhā sahagatam ghānaviñnānam (nose-consciousness accompanied by indifference)
- 4. Upekkhā sahagatam jivhāvinnānam (tongue-consciousness accompanied by indifference)
- Dukkha sahagatam kāyaviññānam (body-consciousness accompanied by painful feeling)
- 6. Upekkhā sahagatam sampaticchana-cittam (receptive-consciousness accompanied by indifference)
- 7. Upekkhā sahagatam santirana-cittam (investigating-consciousness accompanied by indifference)

Of the seven cittas mentioned above, the first five are known as pañca-viññāna, i.e., five cittas that are conscious of the five senses.

32 THE ESSENCE OF BUDDHA ABHIDHAMMA

The last two, i.e., sampatichana-citta and santirana-citta, represent two connecting stages in the process of cognition (awareness of an object).

For example, when a visual object appears in the eye, a series of consciousness has to arise and dissolve in order to see the object. First pañca-dvārāvajjana (five-door advertence) adverts the consciousness towards the object. Then cakkhu-viññāṇa (eye-consciousness) makes the sense-impression. Then sampaticchana (receptive consciousness) receives the sense-impression. Then santiraṇa (investigating consciousness) investigates the sense-impression. Then mano-dvārāvajjana (mind-door advertence) determines the sense-impression whether it is good or bad. We are aware of the object roughly at this stage.

Similarly, when an audible voice strikes the eardrum, a series of consciousness, i.e.; pañcadvārāvajjana, sotaviññāṇa, sampaṭicchana, santiraṇa, manodvārāvajjana, etc., have to arise and fall before we can hear the voice.

Thus sampaticchana-citta, santirana citta together with pañca dvārāvajjana citta and manodvārāvajjana citta are essential for cognition of the senses at the five sense-doors (eye, ear, nose, tongue and body).

Ahetuka Kusala Vipāka Cittas

This class comprises eight cittas whose symbols and names are similar to those of akusala-vipāka cittas we have just described adove.

cak		ghã		kã	ii
• • • • • • • • • • • • • • • • • • •	so	-	ji	sam	ti

- 1. Upekkhā sahagatam cakkhu viñnānam (eye-consciousness accompanied by indifference)
- 2. Upekkhā sahagatam sotaviññāṇam (ear-consciousness accompanied by indifference)
- 3. Upekkhā sahagatam ghānavinnānam (nose-consciousness accompanied by indifference)
- 4. Upekkhā sahagatam jivhāvinnānam (tongue-consciousness accompanied by indifference)
- Sukha sahagatam kāyaviññānam (body-consciousness accompanied by indifference)
- 6. Upekkhā sahagatam sampaticchana-cittam (receptive-consciousness accompanied by indifference)
- 7. Upekkhā sahagatam santirana-cittam (investigating-consciousness accompanied by indifference)
- 8. Somanassa sahagatam santirana cittam (investigating consciousness accompained by joy)

According to Abhidhamma, one is in contact with disagreeable senses on account of one's own past akusala-kamma (unwholesome deeds) and at these instances akusala vipāka cittas will arise in the cognition process.

On the other hand one is in contact with agreeable senses on account of one's own past kusala-

34 THE ESSENCE OF BUDDHA ABHIDHAMMA

kamma (wholesome deeds), and at these instances kusala-vipāka cittas will arise in the cognition processes.

Therefore there are a pair of cakkhuviññāṇa (eye - consciousness), a pair of sotaviññāṇa (ear-consciousness), a pair of ghānaviññāṇa (nose-consciousness), a pair of jivhāviññāṇa (tongue-consciousness) and a pair of kāyaviññāṇa (body-consciousness). These five pairs together are called 'dvipañcaviññāṇa'.

There are of course two sampaticchana cittas and three santirana cittas.

All the akusala-vipāka cittas and ahetuka kusala vipāka cittas, being comparatively weak as they are not aware of the senses as good or bad yet, are accompanied by neutral feeling; the exceptions are that the two body kāyaviññāna cittas are accompanied by either painful or pleasant feeling and the somanassa-santirana citta, which arises when the sense is excellent, is accompanied by joy.

Ahetuka Kiriya Cittas (Rootless Functional Consciousness)

The three ahetuka kiriya cittas are given the following symbols and names.

pañcadvã	manodvā	hasi
.	= 1	#

 Upekkhā- sahagatam pañcadvārāvajjana-cittam (five-door adverting consciousness accompanied by indifference) Upekkhā- sahagatam manodvārāvajjana-cittam (mind-door adverting consciousness accompanied by indifference)

3. Somanassa-sahagatam hasituppāda-cittam (smile-producing consciousness accompanied by

joy.)

The functions of the two avajjana-cittas, i.e., no. 1 and no. 2 above, in the processes of cognition have been described above. If the sense-object appears at one of the five sense-doors, it is pañca-dvārāvajjana which adverts consciousness towards the sense. Pañcadvārāvajjana citta works like a wave-length selector of a radio. Because of it, we can take note of the senses one after one.

When the sense or thought-object appears at the mind-door, it is manodvārāvajjana which adverts con-

sciousness towards the sense.

Hasituppāda-citta can arise only in Buddha and arahats when they smile. Note that it is accompanied by joy whereas the two avajjana cittas are accompanied by neutral feeling.

Kāma-sobhana Cittas

(Beautiful Consciousness of the Sense Sphere)

There are 24 kāma-sobhana cittas. They are divided into three classes:

- 1. Mahā-kusala cittas (8) = great moral consciousness
- 2. Mahā-vipāka cittas (8) = great resultant consciousness
- 3. Mahā-kiriya cittas (8) = great functional consciousness

Here 'mahā = great' means 'greater in number'. Mahā - kusala citta is also known as kāmāvacara-kusala citta. As there are 8 kāmāvacara-kusala cittas, 5 rūpāvacara-kusala cittas, 4 arūpāvacara-kusala cittas and 4 lokuttara (supramundane) kusala cittas, the number of kāmāvacara-kusala cittas is greatest. The same is true for mahā-vipāka cittas (also known as kāmāvacara-vipāka cittas) and mahā-kiriya cittas (kāmāvacara-kiriya cittas). 'Sobhana = beautiful' implies that sobhana cittas yield good qualities and they are connected with wholesome roots such as alobha (generosity), adosa (goodwill) and amoha (knowledge).

Mahā-kusala cittas arise when ordinary worldlings (puthujjanas) and ariyās with the exception of grahats perform meritorious deeds such as dāna (almsgiving), sīla (morality) and bhāvanā (meditation).

Mahā-vipāka cittas are the kamma-results of mahā-kusula cittas of past lives. They function as patisandhi-citta (rebirth consciousness), bhavahga-citta (subconsciousness or life-continuing consciousness) and cuti-citta (death consciousness) in human beings and devās in their present lives.

Mahā-kiriya cittas arise in arahats when they perform wholesome deeds. Arahats have no attachment to anything. They expect no rewards from their wholesome deeds. So their kiriya-cittas are just functional and will not bear any kamma-results in future. lives. Arahats do not have any future life.

Mahā-kusala Cittas

The eight mahā-kusala cittas are designated with symbols and names which resemble those of the eight lobha-mūla cittas.

	ñãṇasam	ñãṇavi	ñāṇasam -	ñãṇavi

ñāṇa-vippayuttam

Meanings

The above eight cittas can be translated in the same way as we have translated the eight lobhamula cittas; the only change necessary is to replace ditthi = wrong view with 'nana = knowledge or insight.'

This knowledge basically means the knowledge of knowing the existence of *kamma* and *kamma* - result. So now we go:

- 1. One consciousness, unprompted, accompanied by joy, and associated with knowledge.
- 2. One consciousness, prompted, accompanied by joy, and associated with knowledge.
- 3. One consciousness, unprompted, accompanied by joy, and dissociated with knowledge.
- 4. One consciousness, prompted, accompanied by joy, and dissociated with knowledge.
- 5. One consciousness, unprompted, accompanied by indifference, and associated with knowledge.
- 6. One consciousness, prompted, accompanied by indifference, and associated with knowledge.
- 7. One consciousness, unprompted, accompanied by indifference, and dissociated with knowledge.
- 8. One consciousness, prompted, accompanied by indifference, and dissociated with knowledge.

Applications

There are only two types of cittas which bear kamma-seeds and will give rise to kamma-results. They are akusala cittas and kuasla cittas. Thus if we can control our mind to be free from the influence of lobha (greed)., dosa (hatred) and moha (delusion), we will have kusala cittas.

When we give alms, we have non-attachment (alobha) to the alms and goodwill (adosa) for the welfare of the person who receives the alms. Moreover, if we also have knowledge (amoha) of kamma and kamma-result at the time of giving, we have all three

wholesome roots to accompany our cittas. Wholesome roots will always give rise to sobhana cittas.

If we offer alms without being prompted by anyone and if we also feel glad at the time of offering, the kusala citta will be

". Somanassa-sahagatam nāna-sampayuttam asankhārika mahā-kusala citta."

If young children, without knowledge of kamma and kamma-result pay hom age joyfully to a monk or a Buddha's immage after being prompted by their parents, "somanassa - sahagatam ñana - vippayuttam sasankhārika mahā-kusala citta" will arise.

The eight types of kusala cittas may be illustrated further by the following examples.

- Type 1. A lady with the knowledge of kamma and with joy offers flowers to a pagoda on her own accord.
- Type 2. A girl, after being persuaded by her companion, goes to listen to a *Dhamma* talk with joy and with the knowledge of *kamma*.
- Type 3. A boy spontaneously gives some money to a beggar with joy but without the knowledge of kamma.
- Tpye 4. A man, after being requested by the headmaster to donate some money to the school, donates one hundred dollars joyfully without knowing kamma and its result.
- Type 5. A girl sweeps the floor with neutral feeling but knows it is a wholesome thing to do.
- Type 6. A man, prompted by a monk, chop wood with neutral feeling but knowing it to be a meritorious deed.

- Type 7. A woman reads a *Dhamma* book on her own accord without understanding the meaning and without knowing *kamma* and its result.
- Type 8. A girl, prompted by her mother, washes her parents' clothes without joy and without thinking about *kamma* and *kamma*—result.

Mahá-vipāka Cittas and Mahá-kiriya Cittas

The eight mahā-vipāka cittas as well as the eight mahā-kiriya cittas are named in the same way as the eight mahā-kusula cittas. When one wishes to differentiate between the three classes of cittas, one may say like this:

- (1) somanassa-sahagatam nana-sampayuttam asahkharika maha-kusala citta,
- (2) somanassa-sahagatam ñāṇa-sampayuttam asahkhārika mahā-vipāka citta,
- (3) somanassa-sahagatam ñāṇa-sampayuttam asankhārika mahā-kiriya citta.

Generally it may be said that the first mahā-kusala citta gives result to the first mahā-vipāka citta, and the second mahā-kusala citta to the second mahā-vipāka citta, etc..

Conditions for the arising of the mahā-kiriya cittas in arahats are the same as those described for mahā-kusala cittas.

Normal Cittas in a Person

Although all the 54 types of kamāvacara cittar can arise in persons in the human abode, hasituppāda

citta and the eight mahā-kiriya cittas can occur only in arahats. So only 45 types of kāmāvacara cittas arise in ordinary persons who are not arahats.

A person may further acquire 5 rūpāvacarakusala cittas (rūpa-jhānas) and 4 arūpāvacara-kusala cittas (arūpa-jhānas) if he is able to by undertaking samatha-bhāvanā (tranquility meditation).

Rüpävacara Cittas (Consciousness mostly experienced in Rüpa-loka)

There are 15 rūpāvacara cittas which are divided into three classes in the same way as the kāmāvacara-sobhaṇa cittas are equally divided into kusala, vipāka and kiriya cittas.

- 1. Rūpāvacara kusala cittas (5) = rūpa-jhāna moral consciousness
- 2. Rūpāvacara vipāka cittas (5) = rūpā-jhāna resultant consciousness
- 3. Rūpāvacara kiriya cittas (5) = rūpa-jhāna functional consciousness

A person, with *ñāṇā-sampayutta* rebirth consciousness and who is not yet an *arahat*, may develop the five *rūpāvacara kusala cittas* one after another by undertaking the *samatha-bhāvana* such as meditating on *kasiṇa* or on respiration.

Rūpāvacara vipāka cittas are the kamma resultants of rupāvacara kusala cittas. They are the rebirth-consciousness of rūpa-brahmas. A person, who has acquired the first rūpāvacara kusala cittas and

maintaines it till his death, will be reborn in the first rūpa-jhāna level of rūpa-loka with the first rūpāvācara vipāka citta as his rebirth-consciousness.

Arahats, by undertaking samatha bhāvanā, may develop- the five rūpāvacara-kiriya cittas one after another. Note that kiriya cittas arise instead of kusala cittas in arahats.

Hence rūpāvacara-kusala cittas and rūpāvacara-kiriya cittas are experienced in the sense sphere as well as in the fine-material sphere whereas rūpāvacara-vipāka cittas are experienced only in the fine material sphere.

What is Jhana?

Jhāna is a state of wilful concentration or absorption on an object. It is a combination of factors of absorption (jhānanga). These factors number five in total. They are:

- (1) Vitakka = initial application that directs the mind towards' the object,
- (2) Vicăra = sustained application that examines the object again and again,
- (3) Prii = joy or pleasurable interest in the object,
- (4) Vedaná = feeling, sensation

(Two kinds of vedanā that occur in jhāna are:-

- (a) sukha = pleasant or agreeable feeling, bliss
- (b) upekkhā = neutral feeling, equanimity
- (5) Ekaggată = one-pointedness, samādhi (concentration).

Vitakka, vicāra, pīti, sukha or upekkhā, and ekaggatā are cetasikas that can influence the mind to

be fixed on an object. They can be developed and strengthened by samatha-bhāvanā which is actually a form of mental training.

Our mind is normally not tranquil or calm. It is constantly agitated by five hindrances (nivaranas); namely, sensuous desire (kāmacchanda), illwill (vyāpāda), sloth and torpor (thina-middha), restlessness and remorse (uddhacca-kukkucca) and sceptical doubt (vicikicchā).

Sensuous desire influences the mind to be wandering about sensuous objects which it has enjoyed before. Illwill agitates the mind by taking notice of disagreeable things. Sloth and torpor, restlessness and remorse, and sceptical doubt blind the mental vision and disturb the concentration.

Lord Buddha compared sensuous desire with water mixed with manifold colours, illwill with boiling water, sloth and torpor with water covered with mosses, restlessness and remorse with agitated water whipped by the wind, sceptical doubt with turbid and muddy water. Just as in such water one cannot perceive one's own reflection, so in the presence of these five hindrances, one cannot clearly see one's own benefit, nor that of others, nor that of both.

These hindrances can be overcome and temporarily dismissed by tranquility-meditation (samathabhāvanā). We may choose pathavī-kasina (earth-circle) as an object of meditation. A tray of about one span and four fingers (about one foot) in diameter is filled evenly with dawn-coloured clay or earth. This object is placed on a suitable stand so that one can look at it comfortably.

Sitting at ease two and a half cubits (3.75 ft) away from the earth-circle one concentrates on it, saying mentally, "pathavi, pathavi or "earth, earth..." The hypnotic circle that one is seeing is known as parikamma-nimitta (preparatory image).

Now the five factors of *jhāna* are being developed slowly. The initial application (vitakka) directs the mind towards the object (earth-circle); it temporarily inhibits sloth and torpor. Sustained application (vicāra) sustains the mind on the object by examining the object again and again; it temporarily inhibits sceptical doubt (vicikicchā).

Piti develops joy or pleasurable interest in the object; it temporarily inhibits illwill. Piti is also a precursor of sukha (pleasant feeling). Piti creates an interest in the subject while sukha enbales one to enjoy the object. Sukha holds the mind to stay longer on the object by its bliss; it temporarily drives away restlessness and remorse.

Ekaggatā gathers the citta and its concomitants on the object to reach the state of one-pointedness; it temporarily inhibits sensual desire.

When the hindrances subside temporarily, the mind does not wander away from the object as frequently as before and a weak degree of concentration is attained. At this stage one can see the earth-circle with closed eyes as one has seen it with open eyes. This visualised image is called uggaha-nimitta (acquired image).

Now one meditates on this acquired image with closed eyes, saying mentally "pathavi, pathavi" as before. When one reaches a higher degree of

concentration, the image suddenly changes its colour and appearance. It becomes many times brighter and is as smooth as the surface of a mirror. The change is like taking a mirror out of its rough leather case. This new image is also known as patibhāga — nimitta (counterimage).

The difference between the two images is very distinct. Uggaha-nimitta is an exact mental replica of the original object; it contains all the defects present in the original object. Patibhaga-nimitta is free from all defects; it is very bright and smooth. The latter may not possess a definite form or colour— "It is just a mode of appearance, and is born of perception."

As soon as the patibhāga-nimitta arises, the concentration (samādhi) reaches a state known as upacāra-samādhi, i.e., neighbourhood (or access) concentration. At this stage the five jhāna- factors become distinct and strong; pīti and sukha are so predominant that the meditator experiences ecstatic joy and bliss which he has never experienced before.

He now let the patibhāga-nimitta spread endlessly in all directions by his will power, and meditates "pathavī, pathavī" as before. Eventually he gains jhāna-samādhi or Appanā-samādhi (absorption concentration). At this stage, he can enjoy the calmness, serenity, joy and bliss of the jhāna again and again as much as he wishes. If he practises well, he can remain in absorption or trance for an hour, two hours, a day, two days or up to seven days. During this absorption, there is a complete, though temporary, suspension of fivefold sense-activity and of the five hindrances; the state of consciousness is, however, fully alert and lucid.

Those, who want to enjoy ecstatic bliss greater than sensual pleasure, should undertake tranquility-meditation. There are some meditation centres in Myanmar—Pa-auk Forest Meditation Centres where proper and systematic guidance is available for developing concentration up to the *jhana* level.

In the first jhāna, all the five jhāna-factors are present. Then by meditating on the patibhāga-nimitta of pathavi-kasiṇa further and eliminating the lower jhāna-factors one by one, a person can attain the higher jhānas. He attaines the second jhāna when vitakka is eliminated, the third jhāna when vicāra is further eliminated, the fourth jhāna when pīti is also eliminated, and finally the fifth jhāna when sukha is replaced by upekkhā.

Rűpávacara Kusala Cittas

(Fine-material Sphere Moral Consciousness)

The five rūpāvacara kusala cittas are designated by the following symbols and names.

tak	ca	pī	su/up	ek
· +	+	+	+	:
pa	du	ta	ca	pañ

- 1. Vitakka, vicāra, pīti, sukh'ekaggatā sahitam pathamajjhāna kusala-cittam.
- 2. Vicāra, piti, sukh'ekaggatā sahitam dutiyajjhānà kusala-cittam.
- 3. Pili, sukh'ekaggatā sahitam tatiyajjhāna kusalacittam.,

- 4. Sukh'ekaggatā sahitam catutthajjhāna kusala-cittam.
- 5. Upekkh'ekaggatā sahitam pañcamajjhāna kusalacittam.

Meanings

- 1. First *jhāna* moral consciousness together with initial application, sustained application, joy, bliss and one-pointedness.
- 2. Second *jhāna* moral consciousness together with sustained application, joy, bliss and one-pointedness.
- 3. Third *jhāna* moral consciousness together with joy, bliss and one-pointedness.
- 4. Fourth *jhāna* moral consciousness together with bliss and one-pointedness.
- 5. Fifth *jhāna* moral consciousness together with equanimity and one-pointedness.

Note that the first four cittas bear '+' symbols because they contain 'sukha' which is the same as 'somanassa'. The fifth citta bears a '-' symbol because it contains 'upekkhā'.

Rūpāvacara Vipāka Cittas (Fine-material Sphere Resultant Consciousness)

The five rūpāvacara vipāka cittas are designated by the same symbols and similar names às the five rūpāvacara kusala cittas.

tak	cã	, pi	su/up	ek
+	+ .	+	+	
pa	du	ta	ca	рап

In naming the rūpāvacara vipāka cittas, just change 'kusala' (moral) in the names of the rūpāvacara kusala cittas into 'vipāka' (resultant).

Rūpāvacara Kiriya Cittas (Fine-material Sphere Functional Consciousness)

The five rūpāvacara kiriya cittas are again designated by the same symbols and similar names as the five rūpāvacara kusala cittas. Here 'kusala' (moral) should be changed to 'kiriya' (functional).

Arūpāvacara Cittas (Consciousness mostly experienced in Arūpa-loka)

There are 12 arūpāvacara cittas which are equally divided into three groups of kusala, vipāka and kiriya cittas.

- Arūpāvacara kusala cittas = arūpa-jhāna moral consciousness (4)
- 2. Arūpāvacara vipāka cittas = arūpa-jhāna resultant consciousness (4)
- 3. Arūpāvacara kiriya cittas = arūpa-jhāna functional consciousness (4)

The four arūpāvacara kusala cittas may be acquired by persons who are not yet arahats whereas the four arūpāvacara kiriyā cittas can arise only in arahats. These two types of arūpāvacara cittas are experienced in the sense sphere as well as in the immaterial sphere.

The four arupavacara vipaka cittas are experienced in the immaterial-sphere only. They are the

kamma-resultants of arūpāvacara kusala cittas. A person who acquires arūpa-jhāna and maintains it till his death will be reborn in the immaterial sphere.

Arūpa Jhānas

The person who has developed the five rūpa; jhānas may go up the ladder of concentration to arūpa-jhānas. In doing so he uses the concentration associated with the fifth rūpa-jhāna as his base.

Also he has to reason about the unsatisfactoriness of the physical body and the troubles it develops on account of heat and cold, insect-bites, hunger and thirst, diseases, old age and death.

When he feels detached from the physical body and rūpa, he first develops the fifth jhāna by meditating on the paṭibhāga-nimitta of pathavī-kasiṇa. He then comes out from the fifth jhāna and, though the paṭibhāga-nimitta exists in his vision, he neglects it and tries to concentrate on the infinite space (ākāsa) beyond it and meditates "Ākāsa, ākāsa" repeatedly.

When his mild attachement (nikanti) for the patibhāga-nimitta disappears, the nimitta also suddenly disappears unfolding endless space. Concentrating his mindfulness on this endless space, he goes on meditating "Ākāsa, ākāsa" till he reaches the first arūpa-jhāna. The jhāna is called "ākāsānancāyatana kusala citta" because it focusses on ākāsa.

He then continues his meditation by concentrating his mindfulness on the ākāsānancāyatana kusala citta, meditating 'Viññāna, viññāna' repeatedly till he reaches the second arūpa-jhāna. This jhāna is called 'viññānancāyataña kusala citta'.

To develop the third arupa-jhāna he focusses his attention not on the ākāsānancāyatana kusala citta but on nothingness, meditating "Nathi Kinci" (there is nothing whatsoever) repeatedly till he reaches the jhāna. This jhāna is called 'ākiācaāāāyatana kusala citta'—'akiācaāāa' also means 'nothingness'.

By taking the third arūpa-jhāna consciousness as the object of meditation, he can further develop the fourth arūpa-jhāna. This jhāna is called 'neva-saññā-nāsaññāya-tana' literally means that 'perception neither exists nor does not exist'. It refers to the fact that the fourth arūpa-jhāna consciousness is so subtle and refined that one cannot definitely say whether there is a consciousness or not. Consciousness is no longer noticeable at the stage of this jhānā.

All the four arūpa-jhānas belong to the category of the fifth jhāna because they are based on the fifth rūpa-jhāna. They all have only two jhāna-factors, namely upekkhā and ekaggatā.

It should be noted that the five rūpa-jhānas differ from one another in the number of jhāna factors whereas the four arūpa-jhānas differ from one another in the objects of meditation.

Arūpāvacara Kusala Cittas (Immaterial Sphere Moral Consciousness)

The four artipavacara kusala cittas are designated by the following symbols and names.

ākā viññā ākiñ n'eva

- 1. Upekkh'ekaggatā sahitam ākāsānancāyatanakusala-cittam.
- Upekkh'ekaggatā sahitam viññānañcāyatanakusala-cittam.
- 3. Upekkh'ekaggatā sahitam ākincaññāyatana-kusala-cittam.
- 4. Upekkh'ekaggatā sahitam n'eva sannā n'sannāyatana kusala-cittam.

Meanings

- 1. Ākāsānancāyatana moral consciousness together with equanimity and one-pointedness.
- 2. Viññānañcāyatana moral consciousness together with equanimity and one-pointedness.
- 3. Akicnannayatana moral consciousness together with equanimity and one-pointedness.
- 4. N'eva-saññã n'saññãyatana moral consciousness together with equanimity and one-pointedness.

Arupavacara Vipaka Cittas (Immaterial Sphere Resultant Consciousness)

The four arūpāvacara vipāka cittas are designated by the same symbols as the four arūpāvacara kusala cittas. The names are also similar, the only change necessary is to put 'vipāka (resultant) in place of 'kusala' (moral).

Arūpāvacara Kiriya Cittas (Immaterial Sphere Functional Consciousness)

Again the symbols are the same and the names are similar, the only change necessary is to put 'kiriya'. (functional) in place of 'kusala' (moral).

Lokuttara Cittas (Consciousness experienced

in Supramundane Level)

Lokuttara cittas may be acquired by vipāssanā (insight) meditation. There are two ways of getting to the path-consciousness (magga-ñāṇa). They are:

- (1) Vipassanā -yānika = taking insight meditation as the vehicle,
- (2) Samatha -yanika = taking tranquility meditation as the vehicle.

A person may first develop the neighbourhood concentration (upacāra-samādhi) by tranquility meditation (samatha bhāvanā) and then proceed to insight meditation (vipassanā bhāvanā). Here the person is using 'upacāra-samādhi' as the base of his wisdomeye for looking into the ultimate nāma and rūpa and their common characteristics of impermanence (anicca), suffering (dukkha) and not-self (anatta). This person, if successful to the end, will acquire the 4 Paths and the 4 Fruitions. So in this route there are only 8 supramundane cittas; namely, the four lokuttara kusala cittas (supramundane moral consciousness) and the four lokuttara vipāka cittas (supramundane resultant consciousness).

Now in the second route, a person first develops a jhāna-samādhi (ecstatic concentration) by tranquility meditation and uses this 'jhāna-samādhi' as the base of his wisdom-eye in insight meditation. If he uses the first jhāna-samādhi as his base, his first path-consciousness is also accompanied by the first jhāna-samādhi; so it is known as the first jhāna sotapatti path-consciousness.

Similarly for a person who uses the second jhāna-samādhi as his base for insight meditation, his first path-consciousness is known as the the second jhāna sotapatti path-consciousness. In the same-way for persons who use the third jhāna-samādhi, the fourth jhāna-samādhi and the fifth jhāna-samādhi, respectively, as the base for their insight meditation, their first path-consciousness will be known as the third jhāna sotāpatti path-consciousness, the fourth jhāna sotāpatti path-consciousness, respectively.

So there are 5 sotāpatti path-consciousness. In other words we are multiplying sotāpatti path-consciousness with 5 rūpāvacara jhānas. In the same way there are 5 sakadāgāmi path-consciousness, 5 anāgāmi path-consciousness and 5 arahatta path-consciousness.

Thus the total number of path-consciousness is 20.

As the fruition immediately follows the path without any lapse in time, there are also 20 fruition-consciousness.

Thus in the samatha-yānika route there are altogether 40 types of supramundane consciousness.

Lokuttara Kusala Cittas (Supramundane Moral Consciousness)

Basically there are four lokuttara kusala cittas as acquired in the vipassanā-yānika route. They are:

- 1. Sotāpatti-magga-cittam,
- 2. Sakadāgāmi-magga-cittam,

4 THE ESSENCE OF BUDDHA ABHIDHAMMA

- 3. Anāgāmi-magga-cittam,
 - 4. Arahatta-magga-cittam.

Meanings

- Sotāpatti path- consciousness
 (consciousness belonging to the path of stream-entry)
- Sakadāgāmi path- consciousness
 (consciousness belonging to the path of once-returning)
- 3. Anāgāmi path-consciousness (consciousness belonging to the path of never-returning)
- 4. Arahatta path-consciousness (consciousness belonging to the path of arahatship)

Since each of these four basic path-consciousness can associate with five rupāvacara jhānas in turn, there are 20 jhāna path consciousness which are realized in samatha-yānika route.

Five Jhana Sotapatti Magga Cittas

tak	cā	pi	su/up	ek
+	+	+ •	+	·- ·
pa	du	ta	ca·.	pañ

- Vitakka, vicāra, pīti, sukh' ekaggatā sahitam pathamajjhāna sotāpatti-magga cittam.
- 2. Vicāra, pîti, sukh'ekaggatā sahitam. dutayajjhāna sotāpatti-magga cittam.

- 3. Piti, sukh'ekaggatā sahitam tatiyaj jhāna sotāpatti-magga cittam.
- 4. Sukh'ekaggatā sahitam catutthajjhāna sotāpatti-magga cittam.
- Upękkh'ekaggatā sahitam pañcamajjhāna sotāpatti-magga cittam.

Meanings

- 1. The first jhāna sotāpatti path-consciousness together with initial application, sustained application, joy, bliss and one-pointedness.
- 2. The second *jhāna sotāpatti path-consciousness* together with sustained application, joy, bliss and one-pointedness.
- 3. The third jhāna sotāpatti path-consciousness together with joy, bliss and one-pointedness.
- 4. The fourth jhāna sotāpatti path-consciousness together with bliss and one-pointedness.
- 5. The fifth jhāna sotāpatti path-consciousness together with equanimity and one-pointedness.

The five sakadāgāmi path-consciousness, the five anāgāmi path-consciousness and the five arahatta path-consciousness are named similarly.

Lokuttara Vipāka Cittas (Supramundane Resultant Consciousness)

Basically there are four lokuttara vipāka cittas as the fruitions of the four lokuttara kusala cittas. These

56 THE ESSENCE OF BUDDHA ABHIDHAMMA

four types of supramundane resultant consciousness are realized in the vipassanā-yānika route.

- 1. Sotāpatti-phala-cittam,
- 2. Sakadāgāmi-phala-cittam,
- 3. Anāgāmi-phala-cittam,
- 4. Arahatta-phala-cittam.

Meanings

1. Sotāpatti fruit-consciousness

(consciousness belonging to the fruition of streamentry)

2. Sakadāgāmi fruit-consciousness

(consciousness belonging to the fruition of once-returning)

3. Anāgāmi fruit-consciousness

(consciousness belonging to the fruition of never-returning)

4. Arahatta fruit-consciousness

(consciousness belonging to the fruition of arahatship)

Again each of these four basic fruit-consciousness can associate with five *rùpāvacara jhānas* in turn, giving rise to 20 fruit-consciousness in all. These are realized in *samatha-yānika* route.

The names of five jhāna arahatta fruitconsciousness are described below as examples.

Five Jhana Arahatta Phala Cittas

tak	cā	pi	1	su/up	ek

pa	du	ta	J.	ca	pañ

- 1. Vitakka, vicāra, pīti, sukh ekaggatā sahitam pathamajjhāna arahatta-phala cittam.
- 2. Vicāra, piti, sukh' ekaggatā sahitam dutiyajjhāna arahatta-phala cittam.
- Pīti, sukh' ekaggatā sahitam tatiyajjhāna arahatta-phala cittam.
- 4. Sukh' ekaggatā sahitam catutthajjhāna arahatta-phala cittam.
- 5. Upekkh' ekaggatā sahitam pancamajjhāna arahatta-phala cittam

Meanings

- 1. The first jhana arahatta fruit-consciousness together with initial application, sustained application, joy, bliss and one-pointedness.
 - 2. The second jhana arahatta fruit-consciousness together with sustained application, joy, bliss and one-pointedness.
 - 3. The third jhana arahatta fruit-consciousness together with joy, bliss and one-pointedness.

58 THE ESSENCE OF BUDDHA ABHIDHAMMA

- 4. The fourth jhana arahatta fruit-consciousness together with bliss and one-pointedness.
- 5. The fifth jhana arahatta fruit-consciousness together with equanimity and one-pointedness.

Quick Review Over Cittas

A reader or learner should use Chart No. 1 entitled: "The Complete Chart on Cittas" which is attached at the end of this book.

1. Akusala cittas (12)

They are 8 lobha-mula-cittas, 2 dosa-mula cittas and 2 moha-mula cittas.

2. Ahetuka cittas (18)

They comprise 7 akusala vipāka cittas, 8 ahetuka kusala vipāka cittas and 3 ahetuka kiriya cittas.

3. Käma-sobhana cittas (24)

They are divided into 8 mahā-kusala cittas, 8 mahāvipāka cittas and 8 mahā-kiriya cittas.

- Kāmāvacara cittas or kāma cittas (54)
 They comprise 12 akusala cittas, 18 ahetuka cittas and 24 kāma-sobhana cittas.
- 5. Mahaggata cittas (27)

The 15 rapavacara cittas and the 12 arapavacara cittas are collectively known as mahaggata cittas.

'Mahaggata' literally means grown great', i.e., developed, exalted or supernormal. Mahaggata citta is the state of 'developed consciousness' attained in the fine-material and the immaterial absorptions. Mahaggata cittas are more developed or more exalted than kāma cittas.

6. Lokiya cittas (81)

The 54 kāmāvacara cittas and the 27 mahaggata cittas are collectively known as 81 lokiya cittas.

Lokiya = mundane or associated with the three spheres of existence—namely, the kāma-sphere, the rūpa-sphere, and the arūpa-sphere (the sense sphere, the fine-material sphere and the immaterial sphere).

7. Lokuttara cittas (8) or (40)

The A magga-cittas (path-consciousness) and the 4 phala-cittas (fruit-consciousness) constitute 8 lokuttara cittas. When they are multiplied by 5 rūpāvacara jhānas, we get 40 lokuttara cittas.

Lokuttara = supramundane or beyond the three spheres of existence.

The 8 lokuttara cittas together with Nibbāna constitute the '9 supramundane dhammas' (nava-lokuttara-dhamma).

8. Total number of cittas (89) or (121)

The 81 lokiya cittas together with 8 lokuttara cittas (vipassanā-yānika way) make up 89 cittas in all.

Or if we combine 81 lokiya cittas with 40 lokuttara cittas (samatha-yānika way) we get 121 cittas in all.

9. Asobhana cittas (30)

They comprise 12 akusala cittas and 18 ahetuka cittas. The akusala cittas are not 'beautiful' (sobhana) because they are associated with evil roots—namely lobha (greed), dosa (natred) and moha (delusion).

The ahetuka cittas are regarded as 'not beautiful' (asobhana) because they are not associated with wholesome roots, namely alobha (generosity), adosa (goodwill) and amoha (wisdom).

10. Sobhana cittas (59) or (91)

If we subtract 30 asobhana cittas from 89 cittas, we obtain 59 sobhana cittas.

Or, if we subtract 30 asobhana cittas from 121 cittas, we get 91 sobhana cittas.

Sobhana cittas are associated with wholesome roots.

11. Jhana cittas (67)

The 27 mahaggata cittas are known as the lokiya jhāna cittas. Combining these with the 40 lokuttara jhāna cittas we get 67 jhāna cittas.

Among these, there are 11 first jhāna cittas, 11 second jhāna cittas, 11 third jhāna cittas, 11 fourth jhāna cittas, and 23 fifth jhāna cittas. These can be easily counted from the Chart No. 1. Note that there are 3 first jhāna cittas in the mahaggata cittas and 8 first jhāna cittas in lokuttara cittas; together they make up 11 first jhāna cittas. The second, the third and the fourth jhāna cittas are counted in the same way. In counting the fifth jhāna cittas, all the 12 arūpāvacara cittas are included in the count—thus we get 11 + 12 = 23 fifth jhāna cittas.

12. Division according to Jati (birth)

The cittas are divided into 4 classes according

to jāti-viz., akusala, kusala, vipāka and kiriya cittas.

By looking at Chart No. 1, we can divide the 54 kāmāvacara cittas into 12 akusala cittas, 8. kusala cittas, 23 vipāka cittas and 11 kiriya cittas. The 23 vipāka cittas are collectively known as kāma - vipāka cittas, and the kiriya cittas are known as kāma - kiriya cittas.

Furthermore the 27 mahaggata cittas can be divided into 9 kusala cittas, 9 vipāka cittas and 9 kiriya cittas. These groups of cittas are also referred to as 9 mahaggata kusala cittas, 9 mahaggata vipāka cittas and 9 mahaggata kiriya cittas.

The 81 lokiya cittas can be divided into 12 akusala cittas, 17 kusala cittas, 32 vipāka cittas and 20 kiriya cittas. The latter groups of cittas, being lokiya, are respectively known as 17 lokiya kusala cittas, 32 lokiya vipāka cittas and 20 lokiya kiriya cittas, respectively.

Now the 89 cittas (brief total) can be divided into 12 akusala cittas, 21 kusala cittas, 36 yipāka cittas and 20 kiriya cittàs.

The 121 cittas (broad total) can be divided into 12 akusala cittas, 37 kusala cittas, 52 vipāka cittas and 20 kiriya cittas.

13. Division according to Vedana (feeling)

There are five types of vedanā which are designated by separate symbols in Chart No. 1 as:

(i) Somanassa (+) = joy, mental pleasure or mentally agreeable feeling,

- 62 THE ESSENCE OF BUDDHA ABHIDHAMMA
- (ii) Domanassa (*), = mental displeasure or mentally disagreeable feeling,
 - (iii) Sukha (v) = physical happiness,
 - (iv) Dukkha (1) = physical pain,
 - (v) Upekkhā (-) = indifference or neutral feeling.

In Chart No. 1 we shall notice that the 8 lokuttara cittas (i.e., 4 maggas and 4 phalas) are designated by the dual symbol ±, indicating that they may be associated with either somanassa or upekkhā. The 40 lokuttara cittas can be, however, differentiated by vedanā.

We can make a table (see Table 1.1) for dividing separate groups of cittas according to vedanā.

In the 54 kāmāvacara cittas, there are 18 somanassa, 2 domanassa, 32 upekkhā, 1 sukha and 1 dukkha cittas.

In the 81 lokiya cittas, there are 30 somanassa, 2 domanassa, 47 upekkhā, 1 sukha and 1 dukkha cittas.

Finally in the 121 total cittas, there are 62 somanassa, 2 domanassa, 55 upekkhā, 1 sukha and 1 dukkha cittas.

Table 1.1. Classification of Cittas according to Feeling

_		reenng		•
Dukkha	1 `-			_
Sukkha				-

Name of citta	Akusala 12 Ahetuka 18 Kāma so- bhaņa 24	Kāma citta 54 Mahaggata 27	Lokiya 81 Lokuttara 40	Total citta 121

Chapter II

CETASIKAS

(Mental Factors)

Characteristics of Cetasikas

Cetasikas are mental factors or mental concomitants that arise and perish together with citta, depend on citta for their arising and influence the mind to be bad, good or neutral as they arise.

A cetasika has the following four characteristic properties:

- (i) It arises together with citta (consciousness).
- (ii) It perishes together with citta.
- (iii) It takes the same object (arammana) which citta takes.
- (iv) It shares a common physical base (vatthu) with citta.

Which is more powerful?

When we say that the mind is the most powerful agent in the world and it leads the world, it is not the performance of citta alone, but the performance of citta and cetasikas together that makes the mind most powerful.

Now which is more powerful—citta or cetasikas? Citta is no doubt the leader of the group,

but cetasikas influence the citta and direct the citta to perform actions, speeches and thoughts either morally or immorally. These actions, speeches and thoughts change the world every day and their kammic forces will create new worlds in the future.

To decide which of the two — citta or cetasikas— is more powerful, let us consider two similes.

- (1) In a family the father is the leader, but the mother has complete influence on the father, and he does what she asks him to do. Now who is more important—father or mother?
- (2) In a saw-mill an elephant moves logs as directed by its rider. The elephant cannot work alone, neither does the rider. The elephant has strength to move the logs; the rider cannot move the logs, but he can command the elephant to work. Who is more important—the elephant or the rider?

It may be noticed that both the father and the mother in simile (1) and both the elephant and the rider in simile (2) are indispensable. So aren't they equally important?

Citta is like the elephant and cetasikas are analogous to the rider. No citta exists apart from its concomitants and no cetasikas exist apart from citta. They function together. They are our true strength and ability. The more we can develop them, the more powerful shall we grow.

66 THE ESSENCE OF BUDDHA ABHIDHAMMA

Classification of Cetasikas

	Cetasikas (52)	
Aññasamãna (13)	Akusala (14)	Sobhana (25)
(1) Sabba - citta sādhāraņa (7) (2) Pakiņņaka	(1) Moha - catukka (4) (2) Lobha - tri (3)	sādhāraņa (19) (2) Virati (3)
(6)	(3) Dosa-catukka (4) (4) End - tri (3)	(3)Appamaññā (2) (4)Paññindriya (1)

There are 52 cetasikas in all. They are first divided into three classes as follows.

- 1. Aññasamána cetasikas = general mental concomitants (13)
- 2. Akusala cetasikas = immoral mental concomitants (14)
- 3. Sobhana cetasikas = beautiful mental concomitants (25)

Aññasamána Cetasikas (General Mental Concomitants)

The 13 aññasamāna cetasikas can associate both with sobhaņa and asobhaņa cittas. They are neutral and they enhance the properties of the cetasikas with which they associate.

They are again divided into two sub-groups.

- (1) Sabbacitta-sadharana (7) = Essentials which associate with all cittas.
- (2) Pakinnaka (6) = Particulars which selectively associate with some sobhana as well as with some asobhana cittas.

Sabbacitta - sadharana Cetasikas

(Essentials or Primary Ones - 7)

Sabba = all; sadharana := associate with

The 7 sabbacitta - sādhāraņas associate collectively with all cittas. Consciousness of an object by citta is accomplished with the help of these cetasikas.

- 1. Phassa = contact or mental impression
- 2. Vedaná = feeling
- 3. Saññã = perception
- 4. Cetaná = volition or intention
- 5. Ekaggata = one pointedness, concentration (samādhi)
- 6. Jivitindriya= vitality or psychic life
- 7. Manasikāra = attention or advertence

Explanation

1. Phassa

Phassa furnishes the contact between the sense object, the sense organ and the citta. For example, the contact between visual object, visual organ (eye) and eye-consciousness (cakkhu-viññāṇa) is accomplished by phassa. Without phassa, there will be no sense impression and consequently no cognition.

2. Vedanā

Vedanā enjoys the taste of the sense-object. It is like a king who enjoys a delicious dish.

Feeling is very important to worldly people. People are struggling day and night for the enjoyment of sensual pleasure which is nothing but pleasant feeling.

In the cause - effect relations of the Law of Dependent Origination (paticca-samuppāda), contact is the condition for the arising of feeling, and feeling is the condition for the arising of craving (tanhā).

The whole group of feelings — past, present, future, one's own and external — is designated as vedanakkhandha, one of the five groups of existence.

3. Šaññã

Saññā takes note of the sense - objects as to colour, form, shape, name, etc. It functions as memory. It is saññā that enables one to recognize an object that has once been perceived by the mind through the senses. Without saññā, we would not remember our names, our parents, our wives and children, our houses, etc. So it would be impossible to live in the community.

The whole group of perceptions—past, present, future, one's own and external—is designated as saññākkhandha, which is also one of the five groups of existence.

4. Cetaná

Cetanā co-ordinates the mental states associated with itself on the object of consciousness like a chief disciple, or like a farm - owner who fulfils his duties

and regulates the work of others as well. Cetanā fulfils its function and regulates the functions of other mental concomitants associated with it.

Cetanā acts on its concomitants, acts in getting the object, and acts on accomplishing the task; thus it determines action.

According to Anguttara Nikāya (VI. 13),

Buddha remarked: "Volition is action (kamma), thus I say, O monks; for as soon as volition arises, one does the action, be it by body, speech or mind."

So cetanā plays an important role in all actions—it determines whether an action is moral or immoral. It is the most significant cetasika in mundane (lokiya) consciousness whereas paññā (wisdom) is the most important cetasika in the supramundane (lokuttara) consciousness.

Excluding vedanā and saññā, all the remaining fifty cetasikas, with cetanā as the foremost, is designated as sankhārakkhandha (formation - group), which is also one of the five groups of existence.

5. Ekaggatá

Ekaggatā focusses the citta and its concomitants on one object. It prevents its adjuncts from dissipation and fixes them on the one object. It is similar to water that binds together several subtances to form one concrete mass. It is like a firmly fixed piller that cannot be shaken by the storm.

Ekaggatā is one of the five jhāna factors. When developed and cultivated by meditation, it is known as samādhi. It is the seed of all attentive, selected, focussed of concentrated consciousness.

6. Jivitindriya

Jivitindriya is a combination of 2 terms:

Jivita + indriya = life + controlling faculty.

It is called *jīvita* because it sustains its concomitants. It is called *indriya* because it controls its concomitants.

Just as lotuses are sustained by water, and an infant by a nurse, so are mental concomitants sustained by jivitindriya.

Although cetanā determines the activities of all mental concomitants, it is jīvitindriya that infuses life into cetanā and other concomitants.

7. Manasikāra

Manasikāra is the mind's first 'confrontation with an object' and 'directs the associated mental concomitants to the object'. It is, therefore, the prominent factor in the two avajjana - cittas — namely, pañcadvārāvajjana - citta and mano - dvārāvajjana - citta, i.e., advertence at the five sense - doors and advertence at the mind - door. These two states of consciousness, breaking through the life - continuum (bhavanga), form the first stage in the cognition process.

As the rudder of a ship directs her to her destination, so manasikāra directs the citta and its concomitants towards the sense object. Without manasikāra, the mind is like a rudderless ship and it cannot be aware of an object. We have a saying in Myanmar that runs like this: "If we are not attentive, we shall not see a cave."

In a more general sense, manasikāra appears trequently in the suttas as yoniso-manasikāra (wise

- attention or wise - reflection) and ayoniso - manasikāra (unwise - attention or unwise - reflection). Wise - attention leads to moral consciousness whereas unwise - attention leads to immoral consciousness.

Significance of Sabbacitta - sadharana

As described above, all the 7 essential cetasikas perform important tasks and they are essential for the awareness of an object by the mind. *Manasikāra first* confronts with the object and directs the *citta* and the mental concomitants associated with it towards the object.

Cetanā acts on the citta and the mental concomitants associated with it to perform their respective duties efficiently until the task of getting or knowing the object is completed.

Phassa let the citta and its mental concomitants be in contact with the sense-object. Vedanā enjoys the taste of sensation which arises from the contact (phassa). Sanīnā takes note of the object and helps to recognise the object.

Ekaggatā focusses the citta and its concomitants on the object; it binds the mental concomitants with citta together to be at a state of one-pointedness on the object—a condition which is also essential for the awareness of the object.

Jivitindriya sustains the vitality of the citta and the mental concomitants so that they will remain alive and active to their full life. Otherwise, they will perish before the task of getting or knowing the object is completed.

72 THE ESSENCE OF BUDDHA ABHIDHAMMA

Pakinnaka Cetasikas

(Particulars - 6)

These six cetasikas may associate both with sobhana and asobhana cittas, but not with all of them. They associate only with those cittas with which they should associate.

1. Vitakka = initial application or thought conception

2. Vicăra = sustained application or discursive thinking

3. Adhimokkha = decision or determination

4. Viriya = effort or energy or exertion

5. Piti = rapture or interest

6. Chanda = wish, desire or will

Explanation

1. Vitakka

Vitakka applies the citta and its concomitants onto the sense-object. As the king's favourite courtier introduces someone to the king, likewise vitakka introduces the citta and its concomitants to the object.

As explained above, mānasikāra directs the citta and its concomitants to the object whereas vitakka applies them onto the object.

Vitakka, manasikāra and cetanā may be differentiated further by comparing them with different persons in a boat racing to a flag. Manasikāra is like the rudder-controller of the boat, vitakka is like the rowers in the hull of the boat, and cetanā is like the foremost rower who not only rows the boat himself but also urges others to row to their best and then plugs the winning flag when the boat gets to the destination

As vitakka applies the citta and its

concomitants to various objects leading to various thought processes, it is also known as thought conception.

Vitakka is one of the five jhāna - factors. It inhibits sloth and torpor (thina-middha). When it is developed and cultivated, it becomes the foremost factor of the first jhāna. It is also the second factor known as 'sammā - sankappa' (right - thought) in the Noble Eightfold Path.

2. Vicăra

Vicāra sustains the citta and its concomitants on the object by letting them examine the object again and again. Like vitakka, it is a jhāna factor. It inhibits vicikicchā (doubt).

Vitakka is the fore-runner of vicāra. The two should be distinguished thus: like the flappings of a bird about to fly is vitakka, like its planning movements in the sky is vicāra; like the beating of a drum or bell is vitakka, like its reverberation is vicāra.

3. Adhimokkha

Adhimokkha makes the decision with respect to the sense-object. It is like a judge who decides a case. It is also compared to a firm pillar owing to its unwavering state in making the decision. It is opposed to vicikicchā—doubt or indecision.

4. Viriya

Viriya is more or less equivalent to effort, energy, exertion, virility, manliness or heroism. It may be defined as the state of being energetic or courageous

74 THE ESSENCE OF BUDDHA ABHIDHAMMA

It has the characteristic of supporting, upholding or sustaining its concomitants. As a leaning old house, supported by new pillars, may not fall, so also concomitants, supported by viriya, will not give way.

Just as a strong reinforcement would help an army to hold on instead of retreating, even so viriya upholds or uplifts its concomitants.

Viriya is regarded as a spiritual faculty (Indriya) because it controls and overcomes idleness. It is also one of the five powers (Bala) because it cannot be shaken by its opposite idleness. It also serves as one of the four means of accomplishing one's ends (Iddhipāda).

According to Atthasalini, viriya should be regarded as the root of all achievements.

5. Piti

Pīti is generally translated as rapture, joy, happiness, interest or enthusiasm. It is related to pāmojja (gladness) and to sukha (pleasant feeling), but it is not a feeling or sensation, and hence it does not belong to the Feeling-group (vedanakkhandha). Pīti is the precursor of sukha. Like the sight of a pond to a weary traveller is pīti, Like drinking water and bathing there is sukha.

Creating a joyful interest in the object is the characteristic of pīti. Pīti is a jhāna - factor. It inhibits vyāpāda (illwill or aversion).

There are five stages of pīti;

- (i) Khuddaka pīti = the thrill of joy that causes the flesh to creep,
- (ii) Khanika piti = instantaneous joy like a flash of lightning,

- (iii) Okkantikā pīti
- = the flood of joy like the breakers on a seashore,
- (iv) Ubbega piti
- = up-lifting joy which may lift one to float in the air,
- (v) Pháraná piti
- = suffusing joy which pervades the whole body like
 a full blown bladder or like
 a lump of cotton moistened
 in oil or like a flood
 overflowing creeks and
 ponds.

6. Chanda

Chanda has been translated as conation, intention, wish, desire or will by several authors. The chief characteristic of chanda is the wish to do !. It is like the stretching of the hand to grasp an object.

Also 'a desire for something without any attachment to the thing is chanda. Chanda is an ethically neutral psychological term. It should be differentiated from immoral lobha which is 'a desire with attachment'.

In kāmacchanda (sensuous desire) and chanda - rāga (lustful - desire), chanda is coupled with lobha; these two compound words actually represent lobha.

Every action begins with chanda. For example, the act of standing up begins with the wish (chanda) to stand up. It is evident that the journey of a thousand miles begins with the first step, and that first step is chanda. We cannot go without the wish to go, and we cannot get to a place without the wish to be there.

When intensified, chanda becomes 'will' and leads to success as 'there is a way if there is a will'.

76 THE ESSENCE OF BUDDHA ABHIDHAMMA

So, like viriya, chanda is included in the four mean of accomplishing one's ends (Iddhipāda).

Akusala Cetasikas

(Immoral Mental Concomitants)

There are 14 cetasikas which are ethically immoral. They may be divided into four sub-groups as follows.

- 1. Moha catukka = akusala sādhāraņa (4)
- (A group of four cetasikas headed by Moha)
- (1) Moha = $avijj\bar{a}$ = delusion, ignorance, dullness
- (2) Ahirika = lack of moral shame, impudence
- (3) Anottappa = lack of moral dread, recklessness
- (4) Uddhacca = unrest, restlessness, distraction.
 - 2. Lobha-tri = papañca-dhamma (3)
 (A group of three cetasikas headed by lobha)
- (5) Lobha = $r\bar{a}ga = tanh\bar{a} = greed$, attachment, sensuous desire
- (6) Ditthi = wrong view, evil opinion
- (7) Mana = conceit, pride
 - 3. Dosa catukka = Hateful ones (4)
 - (A group of four cetasikas headed by dosa)
- (8) Dosa = patigha = hatred, anger, aversion
- (9) Issū = envy, jealousy
- (10) Macchariya = avarice, stinginess, selfishness
- (11) Kukkucca = worry, scruples, remorse
 - 4. End tri = dull and wavering ones (3) (The last three immoral cetasikas)
- (12) Thina = sloth
- (13) Middha = torpor
- (14) Vicikicchá = sceptical doubt, perplexity.

Explanation

(1) Moha

Moha is the ignorance of the true nature of sense-objects. All living and non-living things are made up of nāma and rūpa (mind and matter) which are endowed with the four common characteristics of anicca (impermanence), dukkha (suffering), anatta (non-self) and asubha (loathsomeness).

As moha veils our mental eyes and shields us from seeing the true nature of things, we cannot see the extremenly-rapid and incessant arising and dissolving of nāma and rūpa and the consequent four characteristics mentioned above. When we cannot see the true nature of things, we get confused and take the opposite characteristics to be true. So we see things as nicca (permanent), sukha (pleasant), atta (self or person) and subha (beautiful).

On account of this wrong vision of moha, a chain of undesirable consequences including sufferings and miseries arises one after another. Thus moha is like the director of a movie-film; it directs everything but we are not aware of it as we cannot see the director on the movie-screen. It is indeed the primary root of all evils and sufferings in the world.

Moha is the leader of all the immoral cetasikas. Moha and its three compatriots (ahirika, anottappa and uddhacca) associate with all immoral consciousness. So they are known as 'akusala sādhārana'.

Because moha is opposed to insight or wisdom, it is known as 'avijja'. Moha clouds our

78. THE ESSENCE OF BUDDHA ABHIDHAMMA knowledge with regard to *kamma* and its consequences and the four Noble Truths.

(2) Ahirika

Ahiraka urges a person not to be ashamed of committing immoral actions, speeches and thoughts.

In Puggala pañnatti (para 59) it is stated thus: 'Not to be ashamed of evil or unwholesome things: this is called lack of moral shame. As a village-pig does not feel loathsome in eating night-soil, so ahirika does not feel loathsome in committing evil deeds.

(3) Anottappa

Anottappa urges a person not to be afraid of committing immoral actions, speeches and thoughts.

In Puggala - paññatti (para. 60) it is stated: "Not to dread what one should dread, not to be afraid of evil, unwholesome things: this is called lack of moral dread."

Anottappa is compared to a moth that is singed by fire. The moth, being unaware of the consequences, gets attracted by fire and plunges into the fire. In the same way anottappa, being unaware of the consequences, gets attracted by evil, unwholesome things and plunges into evil deeds.

It is mentioned in Anguttara Nikāya (II. 6): "There are two sinister things, namely lack of moral shame and moral dread, etc." It should be noted that the recklessness due to ahirika and anottappa arises as a consequence of moha which clouds the mind and blinds the eye from seeing the results of evil deeds (kamma).

(4) Uddhacca

Uddhacca is the restless state of the mind which is compared to the disturbed state of a heap of ashes when hit with a stone.

As we cannot see our face in boiling water, a restless mind will not see the consequences of evil deeds. *Uddhacca* is also a follower of *moha* which makes the mind confused and let distraction (*uddhacca*) arise consequently.

(5) Lobha

Lobha is a strong desire for sensuous objects or jhāna happiness. It will never give up this intrinsic nature of desiring however much one may possess. Even the whole wealth on earth cannot satisfy the desire of lobha. It is always on the look-out for something new. Thus one cannot be truely happy if one cannot eliminate lobha.

The second nature of *lobha* is attachment or clinging to sensuous objects or to *jhāna* and *jhāna* happiness. This nature of attachment is compared with the sticky nature of monkey-catching glue. This glue is prepared by heating several kinds of sticky gum available in the forest to form a sticky paste.

The monkey-catcher applies this sticky mass of gum on the trunks of several trees. When sun-rays fall on the gum, spectra of various colours appear. A

monkey, being curious, touches the gum with one paw which becomes firmly attached to the gum. In struggling to pull out this paw, the monkey pushes the tree with the other paw and also kicks the tree with both legs. So both paws and both legs are stuck to the gum.

Then the monkey tries to pull itself out by pushing the tree with its head. So the head is also stuck to the gum. The monkey-catcher may now come out from his hiding place and catches or kills the monkey easily.

Remember that worldly people are being attached firmly by *lobha* to sense-objects as well as to their possessions. They cannot renounce the world and their worldly possessions, including wives or husbands, sons and daughters. So they are being caught up by old age, disease and death life after life.

Lobha, together with its two great followers, i.e., ditthi (wrong view) and māna (conceit), is responsible for extending the life cycle or the round of rebirth that is known as samsāra. On account of this fact, lobha, ditthi and māna are collectively called 'papañca dhamma'.

(6) Ditthi

Ditthi is usually translated as view, belief, opinion, etc. Sammā-ditthi means right view and micchā-ditthi means wrong view. Here, as an immoral cetasika, ditthi is used in the sense of wrong view.

It has been explained above that moha clouds the mind and blinds the eye not to see things as they really are. It makes one see things as nicca (permanent), sukha (pleasant), atta (self or person) and subha (beautiful). Because of this wrong vision, lobha clings or attaches to this 'self or person' and ditthi takes the wrong view that 'self' and 'person' really exist.

The most basic and universal wrong view is the 'personality-belief' (sakkāya-ditthi) or 'ego-illusion' (atta-ditthi). Sakkāya-ditthi believes that this combination of mind and body is 'I', 'you', 'he', 'she', 'man', 'woman', 'person', etc. Atta-ditthi believes in the existence of an 'atta or soul' or 'ego' or 'life-entity' in the body.

From this sakkāya-diṭṭhi or atta-diṭṭhi as well as from the ignorance due to moha there spring up thousands of wrong views. Sakkāya-diṭṭhi is one of the ten fetters binding to existence. It is eliminated only on reaching the path of stream-winning (sotāpatti-magga).

(7) Mäna

Māna (conceit), like ditthi, is also a by-product of moha and lobha. Moha gives the wrong vision that 'persons' exist and that they are permanent, pleasant and beautiful. So lobha clings to these persons, especially the one represented by oneself.

Māna looks on this self-person as 'I am the best, I know most, I have no equals in the world'.

This conceit or pride is of three kinds: the equality-conceit (māna), the inferiority-conceit (omāna) and the superiority-conceit (atimāna). As the saying goes: 'pride will have a fall', pride or conceit is not a virtue to be proud of.

Māna is one of the ten fetters binding to

(8) Dosa

Dosa is translated as hatred, anger or aversion. It is the most destructive element in the world. It is more frightful than the atomic weapon. Of course, when someone pulls the trigger on the atomic weapon, he does so under the influence of dosa.

Normally, when one encounters with a desirable sense-object, clinging or attachment (lobha) arises, and when one encounters with an undesirable object, anger or aversion arises. The anger (dosa) destroys one first before it destroys others.

Not only inflated dosa as the one present in an angry person but also depressed dosa as the one felt by a sad or depressed person are destructive. According to Abhidhamma the one who retaliates an insult is more foolish than the one who starts the insult.

(9) Issã

Issā has the characteristic of envying others' success and prosperity. As such it is objective, i.e., it looks not to oneself but to others.

(10) Macchariya

Macchariya has the characteristic of concealing one's property. It does not appreciate to share one's property or special privilege with others. It takes the form of stinginess when one is reluctant to give money for charity.

As mentioned in Anguttara Nikāya (IX, 49), there are five kinds of stinginess with respect to dwelling

, place, families, gain, recognition and knowledge.

Contrary to issā, macchariya is subjective. Issā and macchariya make one unhappy without any inducement from others. One shall feel immediately happy if one can drive them away from one's mind.

(11) Kukkucca

Kukkucca has the characteristic of grieving over the evil that is done and the good that is not done.

As it is useless to cry over spilt milk, it is of no use to repent or feel sorry about wrong doings.

Issā, macchariya and kukkucca are three companions of dosa. They arise separately because their lines of reasoning are different, but when one of them arises, it is always accompanied by dosa.

(12) Thina

Thina is the shrinking state of the mind like a cock's feather before fire. When one is idle due to lack of viriya (effort), one is under the influence of thina. It is the sickness of citta.

(13) Middha

Middha is the morbid state of mental concomitants. When one feels inactive or inert, one is being influenced by middha. It is the sickness of cetasikas.

Both thina and middha are opposed to viriya. Where there are thina and middha, there is no viriya.

(14) Vicikicchã

Vicikicchā is sceptical doubt about the Buddha, the Dhamma, the Sangha, the Training; about things in

past lives and future lives; about the Law of Causal Relations; and finally about the four Noble Truths.

Vicikicchā is one of the five Hindrances and is also included in the ten Fetters to existence. It disappears completely and for ever at Stream - entry.

Sobhana Cetasikas (Beautiful Mental Concomitants)

There are 25 sobhana cetasikas which may be divided into 4 sub-groups for convenience.

- 1. Sobhana sadharana (19) = those which associate with all sobhana cittas.
- 2. Virati (3) = those connected with abstinence from immoral actions, speeches and livelihood.
- 3. Appamañña (2) = those connected with 'Boundless states'.
- 4. Paññindriya (1) = that connected with wisdom or insight.

Sobhana-sádhárana Cetasikas (Beautiful Ones — 19)

These 19 mental concomitants associate with all beautiful consciousness collectively.

- 1. Saddha = faith, confidence
- 2. Sati = mindfulness, attentiveness
- 3. Hiri = moral shame
- 4. Ottappa = moral dread
- 5. Alobha = non-attachment, greedlessness, generosity
- 6. Adosa = hatelessness, goodwill
- 7. Tatramajjhattatā = equanimity, mental balance
- Kāya-passaddhi = tranquility of mental concomitants

- 9. Citta-passaddhi = tranquility of consciousness
- 10. Kāya-lahutā = agility or lightness of mental concomitants
- 11. Citta-lahutā = agility or lightness of consciousness
- 12. Kāya-mudutā = elasticity of mental concomitants
- 13. Citta-mudută = elasticity of consciousness
- 14. Kāya-kammañĥatā = adaptability of mental concomitants
- 15. Citta-kammaññata = adaptability of consciousness
- 16. Kāya-paguññatā = proficiency of mental concomitants
- 17. Citta-paguññata = proficiency of consiousness
- 18. Käyujjukatä = uprightness of mental concomitants
- 19. Cittujjukatā = uprightness of consciousness.

Explanation

1. Saddhä

Saddhā is well-established confidence or faith in the Three Jewels (ti-ratana); namely, the Buddha, the Dhamma and the Sangha.

When a Buddhist takes refuge in the Three Jewels, his faith should be reasoned and rooted in understanding, and he is asked to investigate or test the object of his faith. A Buddhist's faith is not in conflict with the spirit of enquiry; any doubt about dubious things is allowed and inquiry into them is encouraged.

Saddhā is compared to the unique emerald of the universal monarch. This emerald, when placed in warm dirty water, causes all the dirt to subside and all the heat to escape, thus leaving a cool and purified water. In the same way when saddhā associates with

86 THE ESSENCE OF BUDDHA ABHIDHAMMA, the citta, all the defilements such as lobha, dosa, moha disappear with the result that the mind becomes cool and clear.

Saddhā is also compared with the hand which can grab jewels if one is lucky enough to be on a mountain full of jewels. Actually one is more fortunate to be in contact with Buddha's teachings (sāsanā) than to be on the mountain of jewels, because one with saddhā can acquire a lot of merit which is more precious than jewels. As a man without hands cannot grab jewels, so a man without saddhā cannot acquire good merit.

As moha is the leader of the immoral cetasikas, so saddhā is the leader of sobhana cetasikas. It is the most precious treasure and also one of the five spritual faculties (Indriya) as well as one of the five spiritual powers (Bala).

2. Sati

Sati is mindful of things that are taking place. Its chief characteristic is 'not floating away', i.e., not to let things go unnoticed. When one is not mindful enough, one does not remember what one sees or hears; it is like empty pots and pumpkins floating away on the water current.

One can recall past events with sati, and sati can be developed. When it is highly developed, one acquires the power of remembering past births. So sati can function as memory.

Buddha reminded His disciples every day not to forget wholesome deeds and to be always mindful to fulfil one's pledge to strive for the liberation from all miseries.

If one is mindful at the six sense-doors to note

what one observes just as 'seeing, seeing' or 'hearing, hearing', etc., one can stop defilements from entering the mind. In this sense *sati* is compared to a gate-keeper who stops thieves and robbers from entering the city.

Sati is also a member of the five spiritual faculties as well as a member of the five spiritual powers. It is also one of the seven factors of Enlightenment (Bojjhanga) and the seventh link of the noble Eightfold Path.

3. Hiri

Hiri makes a man recoil with moral shame from committing immoral deeds. A person, who has hiri, recoils from evil just as a cock's feather shrinks in front of fire.

"To be ashamed of what one ought to be ashamed, to be ashamed of performing evil and unwholesome things: this is called moral shame." (Puggala - pañnatti, para. 79)

Hiri opposes ahirika which would commit any evil without the least compunction.

4. Ottappa

Ottappa is moral dread or fear to do evil, because it is aware of the manifold evil consequences.

As hiri is different from ordinary shyness, ottappa is different from ordinary fear of an individual. A Buddhist is not expected to be afraid of any individual, even a God, for Buddhism is not based on the fear of the unknown.

"To be in dread of what one ought to be in

dread, to be in dread of performing evil and unwholesome things: this is called moral dread." (Puggala-paññatti, para. 80)

Ottappa opposes anottappa and can drive away the latter. Hiri arises with respect to oneself whereas ottappa arises with respect to others. Suppose there is an iron rod, one end of which is heated till red-hot and the other end smeared with filth. The filthy end one would not touch owing to disgust, and the red hot end one would not touch due to dread. Hiri is compared to the former instance and ottappa to the latter instance.

Hiri and ottappa differentiates man from beast not to indulge in immoral acts such as sexual relations between mother and son or between father and daughter even at the time of very low civilization. So hiri and ottappa are known as Lokapala Dhamma, i.e. the Guardian of the worlds.

5. Alobha

Non-attachment 'to sense-objects and greedlessness is the chief characteristic of alobha. As water drops run off a lotus leaf without adhering to it, alobha runs off sensuous objects without adhering to them. In this sense alobha is like an arahat who has no lobha at all.

When one is not attached to one's possession, one can give away money and things in charity. Here alobha manifests itself in the form of generosity.

Alobha is opposed to lobha and it can overcome lobha. It is one of the three roots of good. It is a positive virtue involving active altruism.

6. Adosa

Adosa is opposed to dosa and it can overcome dosa. It is not mere absence of hatred or aversion, but is a positive virtue.

Dosa has the characteristic of roughness and cruelty whereas mildness and forgiveness is the chief characteristic of adosa. Dosa is like an enemy whereas adosa is like an agreeable good friend. Adosa is also reflected as goodwill for its nature of kindness and helpfulness.

When adosa turns its attention to living beings wishing them to be happy, it is known as metta, i.e., loving-kindness.

Adosa is also one of the three roots of good.

7. Tatramajjhattatä

The chief characteristic of tatramajjhattatā is impartial view of objects, i.e., 'keeping in the middle of all things'.

It is compared to a charioteer who drives two horses to run at equal pace. It also acts like the chairman of a meeting giving equal chance to its associates to act. It balances the *citta* and the mental concomitants to function together at equal pace, preventing any excessiveness or deficiency.

In the sense of equanimity, it is mostly known as upekkhā. This upekkhā is the state in the middle between karunā (compassion) and muditā (sympathetic joy). It is this upekkhā (i. e., tatramajjhattatā) which is raised to the dignity of a Bojjhanga, one of the seven factors of Enlightenment. It is different from hedonic upekkhā which is indifferent feeling.

8, 9. Kāya-passaddhi and Citta-passaddhi

Here 'kāya' does not mean 'body'; it refers to the 'group' of mental concomitants.

Passaddhi is tranquility, calmness, quietude or serenity.

So kāya-passaddhi is tranquility of mental concomitants whereas citta-passaddhi is tranquility of citta or consciousness.

From passaddhi to ujjukatā there are 6 pairs of cetasikas which go by kāya and citta. The reason they were described in pair by Buddha is that they occur together and together they oppose their opponent.

In the case of saddhā, sati, hirt, etc., they are described as singles because individually they can oppose their opponents.

By citta-passaddhi, only citta is tranquil. By kāya-passaddhi, not only are the mental concomitants tranquil, but also the body is tranquil due to the diffusion of wholesome cittaja-rūpa, which is mind-produced corporeality.

Passaddhi has the chief characteristic of suppressing or allaying of feverishness of passions. It serves as the cool shade of a tree to a person affected by the sun's heat,

Passaddhi is opposed to kukkucca (worry). When highly developed it becomes a factor of Enlightenment (Bojjhanga).

10, 11. Käya-lahutä and Citta-lahutä

Lahutā is lightness of bouyancy or agility. Suppressing the heaviness of the mental concomitants is the chief characteristic of kāya-lahutā; suppressing

the heaviness of the citta is the chief characteristic of citta-lahutā. It is the laying down of a heavy burden.

Kāya-lahutā and citta-lahutā are opposed to thina and middha (sloth and torpor) which cause heaviness and rigidity in mental concomitants and consciousness.

12, 13. Käya-Muduta and Citta-Muduta

These two cetasikas refer to the elasticity of mental concomitants and the elasticity of consciousness, respectively. They remove the stiffness in mind caused by immoral cetasikas such as ditthi (false view) and mana (conceit).

Mudutā is compared to a skin that is pliable because it has been well moulded by applying oil, water, etc. Mudutā is opposed to false view and conceit.

14, 15. Käya-kammaññata and Citta-kammaññatā

These two cetasikas refer to the adaptability of mental concomitants and consciousness and the goodness in carrying out their duty.

Their chief characteristic is the suppression of unserviceableness or unworkableness of citta and its concomitants.

It is stated in Atthasālini that these two cetasikas produce serenity (pasāda) in propitious things, and are adaptable like pure gold for beneficial works.

16, 17. Kāya-pāguññatā and Citta-pāguññatā

They refer to the proficiency or skilfulness of mental concomitants and consciousness in doing their work. Their chief characteristic is the suppression of sickness in the mental concomitants and in the consciousness.

18, 19. Käyujjukatä and Cittujjukatä

They refer to the uprightness or straightness in the mental concomitants and in the consciousness, respectively. Thus they are opposed to crookedness, deception and craftiness due to illusion or deceit (mäyā) and treachery (sātheyya).

20. The 19 beautiful concomitants mentioned above become prominent in people who regularly perform the act of alms-giving, morality and meditation. As they associate together in all sobhana cittas, they are known as sobhana-sādhārana cetasikas.

Virati Cetasikas (Abstinences — 3)

The three virati-cetasikas are known as the sila-maggangas (morality components of the Path). They constitute the sila-sikkhā (morality-training) which is the foundation of the noble Eightfold Path. They are:

- 1. Sammā-vāccā = right speech
- 2. Sammā-kammanta = right action
- 3. Sammā-ājīva = right livelihood

Explanation

1. Sammā - vācā

The right speech is fourfold, i.e., abstaining from:

- (1) Musāvādā = lying
- (2) Pisunavācā = slandering
- (3) Pharusavācā = harsh speech
- (4) Samphappalāpa = frivolous talk

When one comes face to face with the situation to commit one of the above four false speeches, and one abstains from saying it, then one acquires sammā - vācā at the instant of abstinence.

2. Sammã - Kammanta

The right action here means the bodily action which is abstinence from:

- (1) Pānātipātā = killing
- (2) Adinnādānā = stealing
- (3) Kāmesu micchācārā = sexual misconduct

Again when one is in the situation about to commit one of the above immoral actions, and one abstains from committing it, then one acquires sammā - kammanta at the moment of abstinence.

3. Sammá - ájiva

The right livelihood means abstaining from a livelihood that brings harm to other beings, such as trading in arms, living beings, intoxicating drinks and polson as well as slaughtering, fishing, soldiering, deceit treachery, soothsaying, trickery, etc.

Appamaññā Cetasikas

(Illimitables — 2)

1. Karuná = compassion

2. Muditá = sympathetic joy

There are four illimitables or boundless states. To mention them in the order they are usually practised, they are mettā (loving - kindness), karunā (compassion), muditā (sympathetic joy) and upekkhā (equanimity).

It has been described above that mettā is included in adosā, and upekkhā in tatramajjhattatā.

So only the remaining two are described here.

In practising any one of the four illimitables, we may concentrate our attention on a single person or on all the living beings in the whole world. So they are named 'illimitables'

In practising loving-kindness, we meditate: "May all be happy." In culthivating compassion, we meditate: "May all be free from miseries." For exercising mudita, we rejoice on the prosperity of beings and meditate: "May their gain be with them for a long time". In practising upekkha, we maintain a balanced mind and meditate: "All beings are as they are conditioned by their kamma".

Anyone who is pervading the whole world with loving - kindness, compassion, sympathetic joy or equanimity is said to be living in the 'sublime abode' or 'Brahma abode'. So the four illimitables are also known as "Brahma - vihāra", i.e., sublime modes of living.

Metta is the sincere wish for the good and welfare of all. It discards illwill which is its direct enemy. Its indirect enemy is affection (pema). Benevolent attitude is its chief characteristic.

Karunā makes the hearts of the good quiver when others are afflicted with sorrow. The wish to remove the sufferings of others is its chief characteristic. It discards cruelty or wickedness (himsa) which is its direct enemy. Its indirect enemy is grief (domanassa).

Muditā is not mere sympathy but appreciative joy. Its chief characteristic is to rejoice in others' prosperity. Its direct enemy is jealousy (issā) and its inderect enemy is exultation (pahāsa). It discards dislike (arati).

Upekkhā views living beings impartially, i.e., neither with attachment nor with aversion. It is the balanced state of mind. Its direct enemy is passion (rāga), and its indirect enemy is unintelligent indifference. Impartial attitude is its chief characteristic.

Paññindriya

Pañña is wisdom or insight, and indriva is the controlling faculty.

Paññindriya has the control over the understanding of things as they really are, i.e., in the light of anicca (impermanence), dukkha (suffering) and anatta (notself). Because it overcomes ignorance, it is called amoha (non-delusion or wisdom). Because it can remove the veil of moha from clouding man's mental eyes and throws away the darkness cast by moha (avijjā), it is called vijjā (higher knowledge).

Paññindriya is normally called 'paññā cetasika'. In abbhidhamma, paññā, ñāṇa and amoha are synonyms. Amoha is one of the three moral roots. As one of the four means of accomplishing one's ends (Idāhipāda), paññā takes the name of vimamsa (analytical wisdom).

When purified and cultivated by samādhi, paññā assumes the powerful role of abbhiññā

96 THE ESSENCE OF BUDDHA ABHIDHAMMA (supernormal knowledge). When highly developed, paññā becomes a factor of enlightenment (Bojjhanga) under the name of dhamma-vicaya (investigation of the truth), and also a component of the Noble Eightfold Path under the name of sammā-ditthi (right view). The culmination of paññā is the omniscience of a Buddha.

Association of each Cetasika with different Cittas

In general we can say that:

(i) The 7 sabbacitta - sādhāranas (Essentials) associate with all cittas:

(ii) The 6 pakinnakas (Particulars) associate with certain sobbhana and asobhana cittas.

(iii) The 14 akusala cetasikas (Immorals) associate only with immoral cittas.

(iv) The 4 akusala sādhāranas are linked with all immoral cittas.

(v) The 19 sobhana sādhāranas are linked with all sobhana cittas.

(vi) The remaining 6 sobhana cetasikas (Beautiful ones) associate only with sobhana cittas.

For a detailed survey of the combination of each cetasika with different cittas, the chart on Sampayoga method (i.e., Chart No.2 at the back of this book) should be consulted. The readings of the chart go as follows.

Union of Aññasamana Cetasikas

1. The 7 sabbacitta - sādhāranas associate with all cittas.

2. Vitakka associates with 55 cittas comprising 44 kāma-cittas (the 10 dvipānca-vinnānas being excepted) and 11 first - jhāna cittas.

- 3. Vicāra associates with 66 cittas comprising 44 kāma cittas (the 10 dvipanca vinnāna being excepted), 11 first jhāna cittas and 11 second jhāna cittas.
- 4. Adhimokkha associates with 78 cittas in brief or 110 cittas in broad total with the exception of 10 dvipañca-viññānas and vicikicchā-sampayutta citta.
- 5. Viriya associates with 73 cittas in brief or 105 cittas in broad total with the exception of 10 dvipanca viññāṇas, 2 sampaṭicchana-cittas, 3 santiraṇa cittas and 1 pañcadvārāvajina citta.
- 6. Pīti associates with 51 somanassa—sahagata cittas comprising 4 lobha mula somanassa—cittas, 1 somanassa—santiraņa citta, 1 hasitup—pāda—citta, 12 kāma—sobhaņa somanassa—cittas, 11 first-jhāna cittas, 11 second-jhāna cittas and 11 third-jhāna cittas.
- 7. Chanda associates with 69 cittas in brief or 101 cittas in broad total with the exception of 2 mohamila cittas and 18 ahetuka cittas.

Union of Akusala Cetasikas

- The 4 alasala sādhāranas nāmely, moha, ahirika, anottappa and uddhacca – associate with all the 12 akusala cittas.
- Lobha associates with 8 lobha mūla cittas.
 Ditthi associates with 4 ditthigata-sampayutta cittas.
 Māna associates with 4 ditthigata vippayutta cittas.
- 3. Dosa, issā, macchariya and kukkucca associate with 2 dosa mūla cittas.
- 4. Thina and middha associate with 5 akusala sasankhārika cittas.

5. Vicikiochā associates with moha - mūla vicikiochā - sampayutta citta.

Union of Sobhana Cetasikas

- 1. The 19 sobhana sādhārana cetasikas associate with all the sobhana cittas numbering 59 in brief and 91 in broad total.
- 2. The 3 virati cetasikas, namely, sammā vācā, sammā kammanta and sammā ājivā, associate intermittently and individually with 8 mahākusala cittas and unfailingly and unitedly with 8 lokuttara cittas.
- 3. The 2 appamaññā cetasikas namely, karunā and muditā associate intermittently and individually with 28 cittas comprising 8 mahā kusala cittas, 8 mahā kiriya cittas and 12 mahaggata cittas excluding 15 fifth jhāna cittas.
- 4. Paññindriya, i.e., paññā cetasika, associates with 47 cittas comprising 12 kāmma sobhana nāṇa sampayutta cittas, 27 mahaggata cittas and 8 lokuttara cittas.

Different Combinations of Cetasikas with Different Cittas

The reader is advised to consult the Cetasika Chart on Sangaha method (i.e., Chart No. 3 at the back of this book). The readings of the chart are described below.

Concomitants of Akusala Cittas

The name of each citta in pāli should be consulted before enumerating the concomitants associated with the particular citta.

If the citta is somanassa-sahagatam, all the 13 aññasamāna cetasikas will associate with the citta. If the citta is upekkhā-sahagatam or domanassa-sahagatam, pīti must be excepted from the 13 aññasamānas.

- 1. The first lobha mūla asankhārika citta is associated with 19 cetasikas namely, 13 aññasamāna cetasikas, 4 akusala sādhārana cetasikas, lobha and ditthi.
- 2. The second lobha mūla asahkhārika citta is associated with 19 cetasikas namely, 13 aññasamāna cetasikas, 4 akusala sādhāraņa cetasikas, lobha and māna.
- 3. The third lobha milla asahkhārika citta is associated with 18 cetasikas namely, 12 aññasamāna cetasikas (pīti being excepted), 4 akusala sādhāraņa cetasikas, lobha and dithi.
- 4. The fourth lobha mūla asahkhārika citta is associated with 18 cetasikas namely, 12 aññasamāna cetasikas (pīti being excepted), 4 akusala sādhūraņa cetasikas, lobha and māna.

Note that the 4 lobha-mūla sasahkhārika-cittas are associated with the same cetasikas as the corresponding asahkhārika cittas plus thina and middha.

- 5. The first lobha mūla sasahkhārika citta is associated with 21 cetasikas namely, 13 aññasamāna cetasikas, 4 akusala sādhārana cetasikas, lobha, ditthi, thina and middha.
- 6. The second lobha mūla sasahkhārika citta is associated with 21 cetasikas—namely, 13 aññasamāna cetasikas, 4 akusala sādhārana cetasikas, lobha, māna, thina, and middha.
- 7. The third lobha mūla sasankhārika citta is

- 100 THE ESSENCE OF BUDDHA ABHIDHAMMA associated with 20 cetasikas—namely, 12 aññasamāna cetasikas (pīti being excepted), 4 akusala—sādhārana cetasikas, lobha, ditthi, thina and middha.
- 8. The fourth lobha mūla sasankhārika citta is associated with 20 cetasikas namely, 12 aññasamāna cetasikas (pīti being excepted), 4 akusala sādhāraņa cetasikas, lobha, māna, thina and middha.
- 9. The dosa-mūla asankhārika-citta is associated with 20 cetasikas namely, 12 annasamāna cetasikas (piti being excepted), 4 akusala-sādhāraņa cetasikas and 4 dosa-catukka cetasikas.
- 10. The dosa mūla sasankhārika citta is associated with 22 cetasikas namely, 12 aññasamāna cetasikas (pīti being excepted), 4 akusala sādhāraņa cetasikas, 4 dosa catukka cetasikas, thina and middha.
- 11. The moha mūla vicikicchā sampayutta citta is associated with 15 cetasikas namely, 10 aññāsamāna cetasikas (adhimokkha, pīti and chanda being excepted), 4 akusala sādhāraņa cetasikas and vicikicchā.
- 12. The moha mūla uddhacca sampayutta citta is associated with 15 cetasikas namely, 11 aññasamāna cetasikas (pīti and chanda being excepted) and 4 akusala sādhārana cetasikas.

Concomitants of Ahetuka Cittas

- 1. The 10 dvipanca vinnana cittas are associated with only 7 sabbacitta sadhārana cetasikas.
- 2. The somanassa santirana citta is associated with 11 aññasamāna cetasikas (viriya and chanda being excepted).
- 3. The manodvārāvajjana citta is associated with

- 11 aññasamāna cetasikas (pīti and chanda being excepted).
- 4. The hasituppāda citta is associated with 12 aññasamāna cetasikas (chanda being excepted).
- 5. The pañcadvārāvajjana-citta, the 2 sampaticchana cittas and the 2 upekkhā santiraņa cittas are each associated with 10 aññasamāna cetasikas (viriya, pīti and chanda being excepted).

Concomitants of Mahakusala Cittas

- 1. The first pair of mahākusala cittas is each associated with 38 cetasikas namely, 13 aññasamāna cetasikas and 25 sobhaņa cetasikas.
- 2. The second pair of mahākusala cittas is each associated with 37 cetasikas namely, 13 aññasamāna cetasikas and 24 sobhana cetasikas (paññā being excepted).
- 3. The third pair of mahākusala cittas is each associated with 37 cetasikas namely, 12 aññasamāna cetasikas (pīti being excepted) and 25 sobhana cetasikas.
- 4. The fourth pair of mahākusala cittas is each associated with 36 cetasikas namely, 12 aññasamāna cetasikas (pīti being excepted) and 24 sohbana cetasikas (paññā being excepted).

Note that thina and middha, being immoral cetasikas, do not associate with sasankhārika sobhana cittas. Thus the concomitants associated with the asankhārika and the sasankhārika in each pair are the same; the difference in intensity of the two cittas is due to the difference in strentgth of the two cetanās.

102 THE ESSENCE OF BUDDHA ABHIDHAMMA Concomitants of Mahávipáka Cittas

The vipāka - cittas, being the resultants of past kamma, do not perform any meritorious deed. Thus they are not associated with the 3 virati cetasikas and the 2 appamaññā cetasikas as these cetasikas give rise to meritorious deeds.

1. The first pair of mahā - vipāka cittas is each associated with 33 cetasikas — namely, 13 aññās amāna cetasikas and 20 sobhana cetasikas (viratis and appamaññās being excepted).

2. The second pair of mahā - vipāka cittas is each associated with 32 cetasikas — namely, 13 aññasamāna cetasikas and 19 sobhana sadhārana

cetasikas.

3. The third pair of mahā - vipāka cittas is each associated with 32 cetasikas — namely, 12 aññasamāna cetasikas (pīti being excepted) and 20 sobhana cetasikas (viratis and appamaññās being excepted).

4. The fourth pair of mahā - vipāka cittas is each associated with 31 cetasikas — namely, 12 añāasamāna cetasikas (pīti being excepted) and

19 sobhana - sādhārana cetasikas.

Concomitants of Mahakiriya Cittas

The three virati cetasikas, being kusala - dhammas, do not associate with mahākiriya cittas which are avyākata - dhammas. (avyākata = kammically neutral.)

The two appamaññā cetasikas, however, associate with mahākiriya cittas, because arahats meditate on karunā and muditā.

1. The first pair of mahākiriya cittas are each

associated with 35 cetasikas — namely, 13 aññasamãna cetasikas and 22 sobhana - cetasikas (viratis being excepted).

2. The second pair of mahākiriya cittas are each associated with 34 cetasikas — namely, 13 aññasamāna cetasikas and 21 sobhana - cetasikas (viratis and paññā being excepted).

3. The third pair of mahākiriya cittas are each associated with 34 cetasikas — namely, 12 aññasamāna cetasikas (pīti being excepted) and 22 sobhana - cetasikas (viratis being excepted).

4. The fourth pair of mahākiriya cittas are each associated with 33 cetasikas — namely, 12 aññasamāna cetasikas (pīti being excepted) and 21 sobhana - cetasikas (viratis and paññā being excepted).

Concomitants of Mahaggata Cittas

In enumerating the cetasikas which associate with mahaggata cittas, the jhāna factors must be taken into consideration: vitakka is eliminated starting from the second jhāna, vicāra from the third jhana, and pīti from the fourth jhāna. In the fifth jhāna, by substituting upekkhā for sukha, there is no change in the number of cetasikas, because both upekkhā and sukha represent vedanā cetasika.

Furthermore the three virati cetasikas do not associate with mahaggata cittas, because these cittas concentrate on the patibhāga - nimitta of kasina, etc., and as such they cannot take the objects connected with the three viratis.

Karunā and muditā may associate with the first to the fourth jhānas, because these jhānas can be developed

104 THE ESSENCE OF BUDDHA ABHIDHAMMA by meditating on karunā or muditā. In the fifth jhāna the concentration is on upekkhā, so both karunā and muditā should be eliminated.

- 1. The 3 first-jhāna mahaggata cittas are associated with 35 cetasikas— namely, 13 aññasamāna cetasikas and 22 sobhana cetasikas (viratis being excepted).
- 2. The 3 second-jhāna mahaggata cittas are associated with 34 cetasikas—namely,12 aññasamāna cetasikas (vitakka being excepted) and 22 sobhaņa cetasikas (viratis being excepted).
- 3. The 3 third-jhāna mahaggata cittas are associated with 33 cetasikas— namely, 11 aññasamāna cetasikas (vitakka and vicāra being excepted) and 22 sobhana cetasikas (viratis being excepted).
- 4. The 3 fourth-jhāna mahaggata cittas are associated with 32 cetasikas—namely, 10 aññasamāna cetasikas (vitakka, vicāra and pīti being excepted) and 22 sobhana cetasikas (viratis being excepted).
- 5. The 15 fifth-jhāna mahaggata cittas are associated with 30 cetasikas—namely, 10 aññasamāna cetasikas (vitakka, vicāra and pīti being excepted) and 20 sobhaņa cetasikas (viratis and appamaññās being excepted).

Concomitants of Lokuttara Cittas

The 40 lokuttara cittas are also jhāna cittas; so the jhāna - factors should be eliminated as mentioned above.

The three virati cetasikas, being factors of the noble Eightfold Path, associate collectively with all the lokuttara cittas.

The two appamaññā cetasikas, however, do not

associate with lokuttara cittas which concentrate on Nibbana and as such cannot take the objects connected with karuna and mudita.

1. The 8 first-jhāna lokuttara cittas are associated with 36 cetasikas— namely, 13 aññasamāna cetasikas and 23 sobhana cetasikas (appamaññās being excepted).

 The 8 second-jhāna lokuttara cittās are associated with 35 cetasikas— namely, 12 aññasamāna cetasikas (vitakka being excepted) and 23 sobhana

cetasikas (appamaññās being excepted).

3. The 8 third-jhāna lokuttara cittas are associated with 34 cetasikas—namely, 11 aññnasamāna cetasikas (vitakka and vicāra being excepted) and 23 sobhana cetasikas (appamaññas being excepted).

4. The 8 fourth-jhāna lokuttara cittas are associated with 33 cetasikas— namely, 10 aññasamāna cetasikas (vitakka, vicāra and pīti being excepted) and 23 sobhana cetasikas (appamaññās being excepted).

5. The 8 fifth-jhāna lokuttara cittas are also associated with 33 cetasikas—namely, 10 aññasamāna cetasikas (vitakka, vicāra and pīti being excepted) and 23 sobhaņa cetasikas (appamaññās being excepted).

Niyata-yogis and Aniyata-yogis

Of the 52 cetasikas, 41 are called niyata - yogis (fixed cetasikas) and the remaining 11 are called aniyata-yogis (unfixed cetasikas).

Niyata- yogis invariably associate with the cittas with which they are known to associate. Aniyata-yogis

106 THE ESSENCE OF BUDDHA ABHIDHAMMA do not always associate with the cittas they are known to associate; they arise only when they should.

The 11 aniyata - yogi cetasikas are: issā, macchariya, kukkucca, māna, thina, middha, three viratis and two appamaññas. The ways they associate with cittas will be described below.

1. Though it is mentioned in Chart No. 3 that issā, macchariya and kukkucca associate with the two dosa-mūla cittas, they do not arise whenever dosa-mūla citta arises.

Issã arises only when one envies others' success or prosperity; otherwise it does not. When issã arises, macchariya and kukkucca do not arise. Macchariya arises only when one conceals one's property or when one feels stingy; otherwise it does not. When macchariya arises, issã and kukkucca do not arise. Kukkucca arises only when one is grieving over the evil that is done or over the good that is not done; otherwise it does not. When kukkucca arises issã and macchariya do not arise. So issã, macchariya and kukkucca do not arise simultaneously; they arise separately and only when the conditions are met with. This way of association by cetasikas is known as nānā-kadāci.

- 2. Although māna is said to associate with the four lobha-mūla ditthigata-vipayutta cittas, it does not always arise when these cittas arise. It arises only when one thinks highly of oneself or having a low opinion of others. It does not arise when one is having no conceit.
- 3. Although thina and middha are said to associate with the five akusala-sasankhārika cittas, they associate with these cittas only when these cittas

and their concomitants are dull, inert and morbid; otherwise they do not arise.

- 4. The three virati cetasikas— namely, sammā-vācā, sammā-kammanta and sammā-ājīva— also arise in the nānā-kadāci way. Sammā-vācā arises only when one is abstaining from false speech; otherwise it does not. Sammā-kammanta arises only when one is abstaining from wrong action; otherwise it dose not. Sammā-ājīva arises only when one is abstaining from false livelihood; otherwise it does not.
- 5. The two appamaññā cetasikas namely, karunā and muditā— also arise in the nānā-kadāci way. Karunā arises only when one is having compassion for someone; otherwise it does not. Muditā arises only when one is rejoicing over someone's success or prosperity; otherwise it does not.

Applications

1. A man is angry because the food served by his wife is not good. What is the type of this man's citta and what are the cetasikas that associate with that citta?

Since the man is angry, he is having dosa-mūla citta. The name of this citta is

"Domanassa-sahagatam patigha-sampayuttam asankhārika citta".

The cetasikas that associate with this citta are 12 aññasamāna cetasikas (pīti being excepted), 4 akusala-sādhāraņa cetasikas and dosa. Issā, macchariya and kukkucca do not associate with this citta.

2. One feels bad because another person gets a better job than oneself. What is the type of this-citta

and what are its concomitants?

The name of the *citta* is the same as above. But now one is envying another's success, so *issā* will also associate with the citta in addition to the 17 cetasikas mentioned above.

3. One feels uneasy because one does not want to share one's office with a new comer. What is the type of this citta and what are the cetasikas that associate with the citta?

Again the citta is "domanassa-sahagatam patigha sampayuttam asankhārika dosa-mūla citta."

The cetasikas that associate with this citta are 12 annasamana cetasikas (piti being excepted), 4 akusala-sadharana cetasikas, dosa and macchariya (total = 18).

4. A lady is paying homage to a pagoda with joy and with knowledge of *kamma*. What are her *citta* and the concomitants associated with it?

Her citta is 'somanassa-sahagatam ñānasampayuttam asankhārika mahā-kusala citta'.

The cetasikas associated with the citta are 13 aññasamāna cetasikas, 19 sobhaṇa-sādhāraṇa cetasikas and paññindriya.

(Viratis and appamaññas do not associate with this citta.)

5. A little girl unwillingly admits to her mother that she has taken 5 kyats from the mother's purse; she has no joy and no knowledge of kamma at that instant. What are her citta and the cetasikas associated with it?

The girl's citta is " upekkhā-sahagatam nānavipayuttam sasankhārika mahā-kusala citta".

The cetasikas are 12 aññasamãna cetasikas (pîti

being excepted), 19 sobhana-sādhārana cetasikas and sammā-vācā (total = 32).

6. On knowing kamma and its result, a fisherman stops fishing for his livelihood, though reluctantly. What are his citta and the concomitants?

His cittais 'upekkhā-sahagatam nāna-sampayuttam sasankhārika mahā-kusala citta.

The cetasikas are 12 aññasamāna ccetasikas (pīti being excepted), 19 sobhana-sādhārana cetasikas, paññindriya and sammā-ājīva (total = 33).

7. A child feels pity for a dog which has been hit by a car. The child has no joy and no knowledge of *kamma* at the time.

So the child's citta is 'upekkhā-sahagatam nānavipapayuttam asankhārika mahā-kusala citta.

The cetasikas associated with the citta are 12 aññasamāna cetasikas (pīti being excepted), 19 sobhaṇa-sādhārana cetasikas and karunā (total = 32).

8. A father gladly congratulates his son for the son's success in the examination. The father does not think of *kamma* and its result at that instant.

So the father's citta is somanassa-sahagatam nāṇa-vippayuttam asankhārika mahā-kusala citta.'

The cetasikas are 13 aññasamāna cetasikas, 19 sobhana-sādhārana cetasikas and muditā (total = 33).

9. A man is being absorbed in the fourth jhāna by meditating on the patibhāga-nimitta of pathavī kasina. What are the names of the citta and the corcomitants associated with the citta? The citta is rūpāvacara fourth-jhāna kusala-citta.

It may be also called ' sukh'ekaggatā sahitam catutthajjhāna kusala citta'.

The cetasikas associated with the citta are 10 aññasamāna cetasikas (vitakka, vicāra and pīti being excepted), 19 sobhana-sādhārana cetasikas and paññindriya (total = 30).

10. What are the cetasikas that associate with the sotāpatti-phala citta which is accompanied by the first jhāna?

The cetasikas are 13 aññasamāna cetasikas, 19 sobhana-sādhārana cetasikas, 3 virati cetasikas and paññindriya (total = 36).

Doing the Impossible

In Abhidhamma Buddha has analysed the mind to its ultimate components called citta and cetasikas. These components are the ultimate realities known as paramatthas. They are so subtle that they have no form and shape and thus they cannot be seen even under the most powerful electronic microscope.

We now know that citta is an ultimate entity with the characteristic of awareness of an object. The 52 cetasikas are also different ultimate entities with different characteristics. By the various but systematic combinations of cetasikas with citta, 89 types of consciousness in brief or 121 types of consciousness in broad total come into existence.

The original citta is like a glass of pure water. When a drop of red ink is added to the water, the whole glass of water becomes red. When a drop of black ink is added, the whole mass of water becomes black. In the same way when the citta is associated

with immoral cetasikas, the whole mass — i.e. the mind — becomes immoral and ugly. When the citta is associated with beautiful cetasikas, the mind becomes beautiful and wholesome.

Now the combination of cittas and cetasikas arise and dissolve at a tremendous speed — more than one thousand billion times per eye - wink as stated in the Abhidhamma commentary. How can one know the components of these rapidly changing combinations?

For illustration, let us take a cup of water from a river. Would it be possible to differentiate the water drops from different rivulets and streams that have flown into the river? This job would be much easier compared to the analysis of the invisible and rapidly changing combinations of cittas and cetasikas.

So Buddha has done the impossible in the ultimate analysis of the mind. Now, it may be asked: "What is the purpose of this analysis?"

It is done for the sake of seeing things as they truely are in the ultimate sense. If one can see the functions of these ultimate things, one can understand that there is no self nor soul nor person, and thus can discard the false view of 'personality-belief' (sakkāya-ditthi). If he proceeds on the Noble Path he will soon realize Nibbāna.

Now another question: "Can these combinations of cittas and cetasikas be seen and differentiated as they dissolve as soon as they arise?" The answer is "yes". How can we see?

We have to develop our concentration (samādhi) first. When accompanied by upacāra samādhi or jhāna samādhi, the inner mind (mano-viñāna) can see the

112 THE ESSENCE OF BUDDHA ABHIDHAMMA combinations of cittas and cetasikas and analyse them.

The methods of analysis are described in the Buddhist canons such as Samyutta Nikāya (2, 12), Samādhi Sutta, Visudhi Magga (2, 222), Bodhipakkhiya Dipani and Kammathan Kyangyi by the Ledi Sayadaw of Myanmar, etc. These methods are being practised successfully in certain meditation centres in Myanmar such as International Pa-auk Forest Meditation Centres in Yangon, Mandalay, Mawlamyine, etc.

So Abhidhamma knowledge is neither speculative knowledge nor higher knowledge for knowledge sake. Abhidhamma knowledge is to be learned, digested and practised for the sake of enlightenment and liberation from all miseries.

Chapter III

PAKINNAKA

Miscellaneous Section

We have seen that citta and 52 cetasikas are 53 different ultimate entities with different but definite characteristics. Their classifications according to feeling, roots, function, doors, objects and bases will be dealt with in this chapter.

The title of this chapter 'Pakinnaka' means Miscellaneous or Mixed'. We shall also see the inter-relations between nāma and rūpa (mind and matter) in this chapter.

Vedana Sangaha

'Sangaha' means 'summary'. Here cittas and cetasikas will be compiled briefly in accordance with feeling (vedanā).

First, feeling is classified in two ways.

- (a) Classification according to sense objects:
- 1. Sukha vedaná = pleasant feeling experienced when in contact with agreeable objects.
- 2. Dukkha vedanā = painful feeling experienced when in contact with disagreeable objects.
- 3. Upekkha vedanā= Indifferent feeling or neutral feeling which is neither pleasurable nor painful. It is experienced when in contact with neither agreeable nor disagreeable objects.

- (b) . Classification according to Indriya (Faculty):
- 1. Somanassa vedana = pleasant feeling in mind
- 2. Domanassa vedaná = painful feeling in mind
- 3. Sukha vedanā = pleasant feeling in body
- 4. Dukkha vedanā = painful feeling in body
- 5. Upekkhā vedanā = indifferent or neutral feeling
 In classification (a) sukha implies pleasant
 feeling either in mind or in body while dukkha implies
 painful feeling either in mind or in body.

In classification (b) sukha is divided into somanassa and sukha whereas dukkha is divided into domanassa and dukkha. So it should be noted that the feelings in the mind and the feelings in the body are different and that a person can be happy even if his body is in pain.

Classification of Cittas according to Feeling.

In the Chart of Cittas, cittas are designated with five kinds of symbols according to the five types of feeling. And in Table 1.1 (page 63) we have already classified the cittas in accordance with the five types of feeling.

By looking at the table, the following statements can be made.

- 1. Sukha vedanā is associated with only one cittanamely, ahetuka kusala - vipāka sukha-sahagatam kāya-viññāna citta.
- 2. Dukkha vedanā is also associated with only one citta namely, akusala-vipāka dukkha-sahagatam kāya-vināna citta.

- 3. Domanassa vedanā is associated with two dosa-
- 4. Somanassa vedanā is associated with 62 cittas—namely, 18 kāma-somanassa cittas, 12 mahaggata somanassa cittas and 32 lokuttara somanassa cittas.
- 5. Upekkhā vedanā is associated with 55 cittasnamely, 32 kāma - upekkhā cittas, 15 mahaggata upekkhā cittas and 8 lokuttara upekkhā cittas.

Note: - The above classification of cittas may be assumed to include the classification of cetasikas according to feeling as well. The reason is that the cetasikas that associate with the sukha-sahagatam citta will be associated with sukha vedenā, the cetasikas that associate with the dukkha-sahagatam citta will also be associated with dukkha vedanā, the cetasikas that associate with the domanassa citta will also be associated with domanassa vedanā, and so on.

Hetu Sangaha

Here cittas and cetasikas will be compiled briefly according to hetu (roots).

There are 6 types of hetu or roots:

- 1. Akusala hetu (3) = lobha, dosa, moha
- 2. Kusala hetu (3) = alobha, adosa, amoha
- 3. Avyākata hetu (3) = alobha, adosa, amoha

Akusala hetu are the roots that associate with akusala cittas. Kusala hetu are the roots which associate with kusala cittas. Avyākata hetu are the roots which associate with vipāka cittas and kiriya cittas. The avyākata roots are the same as the kusala roots.

'Avyākata' - means 'indeterminate - i.e, neither determined as kammically 'wholesome' nor as 'unwholesome'. Vipāka cittas and kiriya cittas together with their concomitants are termed as avyākata, because they are kammically neutral.

Classifications of Cittas according to Roots

1. Ahetuka cittas (18) = 18 cittas without roots.

They are 7 akusala-vipāka cittas, 8 ahetuka-kusala-vipāka cittas and 3 ahetuka-kiriya cittas.

- Sahetuka cittas (71) = 71 cittas with roots.
 These cittas are further divided as follows.
- (a) Ekahetuka cittas (2) = 2 cittas with one root.

 They are the 2 moha-mūla cittas which have only moha as root.
- (b) Dvihetuka cittas (22) = 22 cittas with two roots.

 They are 8 lobha-mūla cittas containing lobha and moha as roots, 2 dosa-mūla cittas containing dosa and moha as roots and 12 kāma- sobhaņa nāṇa-vipayutta cittas containing alobha and adosa as roots.
- (c) Tihetuka cittas (47) = 47 cittas with three roots.

 They are 12 kāma-sobhana

 ñāṇa-sampayutta cittas, 27

 mahaggata cittas and 8

lokuttara cittas. These cittas have alobha, adosa and amoha as roots.

Note: The cetasikas associated with the respective cittas will belong to the same class as the cittas. Readers may refer to the Chart on Hetuka (Chart No. 4.1) attached at the back for a quick review of the classification based on hetu.

Kicca Sangaha

Here cittas and cetasikas will be compiled briefly according to their functions (kicca).

There are 14 kinds of functions performed by various cittas. It is remarkable to note that every citta performs at least one type of function.

1. Patisandhi-kicca

= rebirth function linking the past life with the present life.

2. Bhavanga-kicca

life-continuum or to continue the formation of life-stream incessantly till death.

3. Avajjana-kicca

= apprehending or to advert consciousness towards the object.

4. Dassana-kicca

= seeing the object,

5. Savana-kicca

= hearing the sound, = smelling the object,

6. Ghāyana-kicca

= tasting the object.

7. Sāyana-kicca

Phusana-kicca

= touching the object,

- 9. Sampaticchana-kicca = receiving the object,
- 10. Santirana-kicca = investigating the object,
- 11. Votthapana-kicca = determining the object,
- 12. Javana-kicca = apperceiving or enjoying the taste of the object,
- 13. Tadalambana-kicca = registering or to continue enjoying the taste of the object,
- 14. Cuti-kicca

= death function.

The Cittas performing the respective Functions

Please refer to Chart No. 4.2 at the back for a quick view of the *cittas* performing their respective functions.

- 1. There are 19 cittas which perform rebirth function.

 They are 2 upekkhā-santiraņa cittas, 8 mahāvipāka cittas and 9 mahaggata-vipāka cittas.

 These cittas are known as 'rebirth consciousness'
 (paṭisandhi-cittas) while they perform rebirth
 function.
- 2. There are 19 cittas which perform life-continuum process. They are the same as the 19 patisandhicittas. They are known as bhavanga-cittas (subconsciousness) while they perform the life-continuum process.
- 3. There are 2 cittas which perform the avajjanakicca. They are pañcu-dvārāvajjana citta and mano-dvārāvajjana citta
- 4. There are 2 cittas which perform the seeing function. They are dvi-cukhuviññāna cittas.

- 5. There are 2 cittas which perform the hearing function. They are dvi-sotaviññana cittas.
- 6. There are 2 cittas which perform the smelling function. They are dvi-ghānaviñāna cittas.
- 7. There are 2 cittas which perform the tasting function. They are dvi-jivhāviññāna cittas.
- 8. There are 2 cittas which perform the touching function. They are dvi-kāyaviññāna cittas.
- 9. There are 2 cittas which perform the receiving function. They are dvi-sampaticchana cittas.
- 10. There are 3 cittas which perform the investigation function. They are the three santirana cittas.
- 11. There is 1 citta which performs the votthapanakicca (determining function). It is manodvārāvajjana citta.
- 12. There are 55 cittas which perform the javana-kiccu. They are 12 akusala cittas, 21 kusala cittas, 4 phala-nāna cittas and 18 kiriya cittas (the two avajjana-cittas being excepted). These cittas can easily be remembered by the phrase: 'ku-ku-kri-phala'.

Kāma-javana cittas (29) = 12 akusala cittas + 8 mahā-kusala cittas + 8 mahā-kiriya cittas + 1 hasituppāda citta.

Appanā-javana cittas (26) = 9 mahaggata kusala cittas + 9 mahaggata kiriya cittas + 4 magga-ñāṇa cittas + 4 phala-ñāṇa cittas.

- 13. There are 11 cittas which perform tadālambanakicca (registering function). They are 3 santirana cittas and 8 mahā-vipāka cittas.
- 14. There are 19 cittas which perform cuti-kicca (death function). They are 2 upekkhā-santirana citta 8. mahā-vipāka cittas and 9 mahaggata-vipāka cit. 15.

For Cross-examination

- 1. There are 68 cittas which perform a single function each. They are 10 dvi-pañcaviññāna cittas, 3 manodhātu cittas and 55 javana-cittas. Manodhātu cittas consist of pañca-dvārāvajjana citta and 2 sampaticchana cittas.
- There are 2 cittas which perform two functions. They are somanassa-santirana cittas and manodvārāvajjana citta.
- 3. There are 9 cittas which perform three functions. They are the 9 mahaggata-vipāka cittas that perform patisandhi-, bhavanga- and cuti-kiccas.
- 4. There are 8 cittas which perform 4 functions. They are the 8 mahāvipāka-cittas that perform paṭisandhi-, bhavanga-, cuti-, and tadālambana-kiccas.
- 5. There are 2 cittas which perform 5 functions. They are the 2 upekkhā-santiraņa cittas that perform patisandhi-, bhavanga-; cuti-, santiraņa- and tadālambana-kiccas.

Thána

'Thāna' means 'functioning place'. As we need a place or office to carry out a particular job, so cittas need places to perform their functions. It is the body-substance of each citta which serves as the place of performing its function.

The 'body-substance of each citta' refers to the citta itself. So the place of function of each citta is the same as the citta.

There are 10 thānas because 5 related functions (i.e., 5 sense-impressions) are performed in turn in a

single thana called 'panca-vinnana thana'.

The ten thanas are:

1. Patisandhi-thana = 19 patisandhi cittas

2. Bhavanga-thana = 19 bhavanga cittas

3. Avajjana-thāna = 2 avajjana cittas

4. Pañca-viññana-thana = 10 dvi-pañcaviññana cittas

5. Sampaticchana-thana = 2 sampaticchana cittas

6. Santirana-thána = 3 santirana cittas

7. Votthapana-thana = mano-dvārāvajjana cittas

8. Javana-thāna = 55 javana cittas-

9. Tadālambaņa-thāna = 11 tadālambaņa cittas

10. Cuti-thana = 19 cuti cittas

Dvara Sangaha

Here cittas and cetasikas will be compiled briefly based on the six sense-doors.

'Dvāra' means 'door'. There are six doors in our body through which outside senses can enter.

1. Cakkhu-dvara = eye-door (cakkhu-pasada)

2. Sota-dvara = ear-door (sota-pasada)

3. Ghána-dvára = nose-door (ghāna-pasāda)

4. Jivhá-dvára = tongue-door (jivhá-pasāda)
 5. Káya-dvára = body-door (káya-pasāda)

6. Mano-dvara = mind-door (19 bhavanga-cittas)

Note: - The names in brackets described the essential element of each door. 'Pasāda' is 'sensitive corporeality' at which the sense impression takes place.

The first five dvāras are rūpa-dvāras whereas the sixth door is a nāma-dvāra.

The Cittas in each Door

Readers may refer to Chart No. 4.3 at the back for a quick overview.

_						
1.	Forty-six	cittas	arise	at	the	eye-door:

(a)	pańca-dvārāvajjana	1 (apprehendin	g)
(b)	cakkhu-viññāṇa	2 (seeing)	
(c)	sampaticchana	2 (receiving)	•
(d)	santirana •	3 (investigatiin	σì

(e) votthapana or

(f)

` mano-dvārāvajjana	1 (determining)
kāma-iavana	29 (apperceiving)

(g) tadālambaņa 8 (registering)

Total 46

Note:- Of the 11 tadālambana cittas, 3 santiranas are already counted in 1(d). So only the 8 mahāvipāka cittas are counted in 1(g).

- Forty-six cittas arise at the ear-door.
 The cittas are as in (1)-just change cakkhu-viññāna to sota-viññāna.
- 3. Forty-six cittas arise at the nose-door.

 The cittas are as in (1)—ghāna-viñnāna is substituted for cakkhu-viñnāna.
- 4. Forty-six cittas arise at the tongue-door.

 The cittas are as in(1)-jivhā-viññāna is substituted for cakkhu-viññāṇa.
- 5. Forty-six cittas arise at the body-door.
- The cittas are as in (1)-kāya-viññāna is substituted for cakkhu-viññāna.

Sixty-seven cittas arise at the mind door.

(a) mano-dvārāvajjas) mano-dvārāvajjana 1		
(b) kāma-javana (c) tadālambaņa	55 11	determining) (apperceiving) (registering)	
Total	67		

Notes: -1. The total number of cittas that arise at the five pañca-dvāras or rūpa-dvāras is 54—namely, pañca-dvārāvajjana 1, dvipañca - viññāna 10, sampaticchana 2, santiraṇa 3, voṭthapana or mano-dvārāvajjana 1, kāma-javana 29 and tadālambaṇa 8. These are the 54

kāmāvacara cittas.

- The cittas that can arise at the five pañcadvāras are pañca-dvārāvajjana and 2 sampatīcchana cittas, these 3 cittas being collectively known as mano-dhātu (mindelements).
- 3. The cittas that always arise at the 6 doors are somanassa-santirana, mano-dvārāvajjana and 29 kāma-javana cittas (total = 31).
- The cittas that sometimes arise at the 6 doors and sometimes do not arise at the 6 doors are 2 upekkhā-santirana cittas and 8 maḥā-vipāka cittas (total = 10).
- 5. The cittas that always arise without a door are 9 mahaggata-vipāka cittas.
- 6. The 19 patisandhi-cittas, the 19 bhavangacittas and the 19 cuti-cittas are called dvāravimuti (1.e., door-freed) because:

- (i) they do not arise in any of the sense doors such as eye-door, etc.,
- (ii) bhavanga-cittas themselves serve as the mind-door, and
- (iii) they exist without receiving any new external object pertaining to the present life.

Alambana Sangaha

Alambana or ārammana means sense-object. Cittas and cestasikas will be compiled briefly here in accordance with the six sense-objects.

- 1. Rupā-rammaņa = visible object (rūpa or vanna)
- 2. Saddá-rammana = sound (sadda)
- 3.Gandhā-rammana = smell (gandha)
- 4. Rasā-rammana = taste (rasa)
- 5. Photthabba-rammana tangible object (pathavi, vayo and tejo)
- 6. Dhamma-rammana = mind-object

The mind-object is sixfold:- (i) 5 pasāda rūpas (sensitive parts of organs), (ii) 16 sukhuma rūpas (subtle matter), (iii) 89 cittas (consciousness), (iv) 52 cetasikas (mental concomitants), (v) Nibbāna and (vi) concepts such as kasiņa nimitta. The mind-object cannot arise at the five pañca-dvāras.

Note:- The names in brackets for the first five senses are the essential elements of the senses. For the mind-object, the sixfold objects mentioned above are the essential elements.

Cittas and Sense-objects according to Doors

1. The 46 cittas that arise at the eye-door are known

- as cakkhu-dvārika cittas; they are aware of the present visible object only.
- 2. The 46 cittas that arise at the ear-door are known as sota-dvārika cittas; they are aware of the present sound only.
- 3. The 46 cittas that arise at the nose-door are known as ghāna-dvārika cittas; they are aware of the present smell only.
- 4. The 46 cittas that arise at the tongue-door are known as jivhā-dvārika cittas; they are aware of the present taste only.
- 5. The 46 cittas that arise at the body-door are known as kāya-dvārika cittas; they are aware of the present tangible object only.
- 6. The 67 cittas that arise at the mind-door are known as mano-dvārika cittas; they are aware of all the six sense-objects, which may be present, past, future or independent of time.

Individual Cittas and Sense-objects

Please refer to Chart No.5.1 at the back of this book for a quick review.

- 1. Cakkhu-viññāna-dvi are aware of the present visible object only.
 - Sota-viññāṇa-dvi are aware of present sound only. Ghāna-viññāṇa-dvi are aware of present smell only. Jivhā-viññāṇa-dvi are aware of present taste only. Kāya-viññāṇa-dvi are aware of present tangible object only.
- 2. The 3 mano-dhātu (pañca-dvārāvajjana and sampatichanna-dvi) are aware of the above five senses pertaining to the present.
- 3. The 11 tadālambana and hasituppāda are aware of

six kāma - objects comprising 54 kāma-cittas, 52 kama-cetasikas and 28 types of rūpa.

- 4. The 12 akusala cittas, the 4 ñāṇa-vipayutta mahā-kusala cittas and the 4 ñāṇa-vipayutta mahā-kiriya cittas are aware of six lokiya (mundane) sense-objects comprising 81 lokiya cittas, 52 lokiya cetasikas, 28 types of rūpa and concepts.
- 5. The 4 nāṇasampayutta mahā-kusala cittas and rūpa-kusala abhināṇa are aware of all six sense-objects except arahatta magga and phala. These objects comprises 87 cittas (arahatta magga and phala being excepted), 52 cetasikas associated with the 87 cittas, 28 types of rūpa, concepts and Nibbāna.
- 6. The 4 nānasampayutta mahā-kiriya cittas, kiriyaabhinnāna and mano-dvārāvajjana citta are aware of all the six sense-objects comprising 89 cittas, 52 cetasikas, 28 types of rūpa, concepts and Nibbāna.
- 7. The 15 rupāvacara cittas, with the exception of abhinnāna-dvi, have concepts as their objects.
- 8. The 3 ākāsānancāyatana cittas and the 3 ākincannāyatana cittas have ākāsa (infinite space) and ākincanna (nothingness) respectively as their objects.
- -9. The 3 yiññānañcāyatana cittas and the 3 nevasaññā-nāsaññāyatana cittas have ākāsānancāyatana kusala / vipāka citta and ākincaññāyatana kusala / vipāka citta respectively as their objects.
- 10. The 8 lokuttara cittas have Nibbana as their object.
- 11. The 19 patisandhi-cittas, the 19 bhavanga-cittas

and the 19 cuti-cittas have maranasanna-nimitta as their object. This nimitta may be in the form of 'kamma', 'sign of kamma' or 'sign of destiny'.

. Vatthu Sangaha

'Vatthu' means 'physical base' depending on which the various cittas and the associated cetasikas arise. There are six such physical bases.

- 1. Cakkhu-vatthu = cakkhu-pasada = eye sense-organ
- 2. Sota-vatthu = sota-pasāda = ear sense-organ
- 3. Ghāna-vatthu = ghāna-pasāda = nose sense-organ
- 4. Jivhā-vatthu = jivhā-pasāda = tongue sense-organ
- 5. Kāya-vatthu = $k\bar{a}ya$ -pasāda = body sense-organ
- 6. Hadaya-vatthu = physical base that exist in the blood of the heart = heart-base.

Thus the first five physical bases are the five sense-organs whereas the sixth is the heart-base.

There is a simile of 'striking a match'. The match is the striking element, the rough surface of the match-box is the receiving element, and the flame is the resultant element. Now the flame does not exist anywhere before striking the match. When the conditions for its arising are fulfilled, the flame arises.

In the same way the visible object is the striking element, the sense-organ is the receiving element, and the eye-consciousness is the resultant element. The eye-consciousness does not exist before or after the contact between the visible object and the sense-organ; it arises just at the time of contact.

Now the eye-organ, i.e., cakkhu-pasada, is the door through which the visible object enters the mind.

So cakkhu-pasāda is called cakkhu-dvāra, i.e., the eye-door.

Then the eye-consciousness together with its seven concomitants arise at the point of contact, i.e., on cakkhu-pasāda depending on cakkhu-pasāda as the physical base. Thus cakkhu-pasāda is also known as cakkhu-vatthu.

The same thing is true for the other four senseorgans or pasada rupas.

Vatthu and Bhūmi

'Bhūmi' means 'plane of existence'.

- 1. In the eleven kāma-planes, i.e., the sense-sphere, all the six bases (vatthu) exist.
- 2. In the fine-material sphere (Rūpa-loka), only three physical bases—namely, cakkhu-vatthu, sota-vatthu and hadaya-vatthu exist. During the samatha-bhavanā (tranquility-meditation) to enter the rūpa jhāna, the meditator has to eliminate the enjoyment of sensual pleasure by controlling his mind not to wander around sense objects. So when the jhāna-kusala kamma conditions him to be reborn in the rūpa-loka, he is not endowed with ghāna-vatthu, jivhā-vatthu and kāya-vatthu as no enjoyment of sensual pleasure exists there. Brahmas are happy with jhāna-sukha. However, they need eyes to see Buddha, ears to listen to the Dhamma and hadaya-vatthu for the arising of mano-viñāna cittas and the associated concomitants.
- 3. In the immaterial sphere (Arūpa-loka) no vatthus exist because no corporeality exists there again due to the meditation power of samatha-bhāvanā to enter arūpa-jhānas.

Viññāna-dhātu

'Viññana' means 'citta' (consciousness) whereas 'dhānu' means 'element' or that which carries its own characteristic mark.

The cittas, as *dhātu* or elements, are divided into 7 classes.

- 1. Cakkhu-viññāna-dhātu = cakkhu-viññānadvi
 They depend on cakkhu-vatthu for their arising.
- 2. Sota-viññāna-dhātu = sota-viññānadvi
 They depend on sota-vaithu for their arising.
- 3. Ghāna-viñnāṇa-dhātu = ghāna-vinnāṇadvi
 They depend on ghāna-vatthu for their arising.
- 4. **Jivhā-viññāṇa-dhātu** = jivhā-viññāṇadvi
 They depend on jivhā-vatthu for their arising.
- 5. Kāya-viñirāna-dhātu = kāya-vinnānadvi
 They depend on kāya-vatthu for their arising.
- 6. Mano-dhātu = pañca-dvārāvajjana and sampaticchanadvi

They depends on hadaya-vatthu for their arising.

7. Mano-viññana-dhatu = The remaining 76 cittas. They depend on hadaya-vatthu for their arising.

Classification of Cittas according to Vatthu

Please refer to Chart No. 5.2 at the back of this book for a quick review.

- 1. There are 10 cittas which always depend on pañcavatthu (cakkhu-vatthu, sota-vatthu, ghāna-vatthu, jivhā-vatthu, kāya-vatthu). They are dvi-pañca-viññāna i.e., the ten sense-impressions.
- 2. There are 33 cittas which always depend on hahaya-vatthu for their arising. They are 2 dosamula cittas, 3 mano-dhātu cittas, 3 santirana cittas,

hasituppāda citta, 8 mahā-vipāka cittas, 15 rūpāvacara cittas and 1 sotāpatti-magga citta.

3. There are 42 cittas which sometimes depend on vatthu and sometimes do not depend on vatthu for their arising. They are 10 akusala cittas (2 dosamūla cittas being excepted), 8 mahā-kusala cittas, 8 mahā-kiriya cittas, 4 arūpāvacara kusala cittas, 4 arūpāvacara kiriya cittas, 7 lokuttara cittas (sotāpatti-magga being excepted) and mano-dvārāvajjana citta.

These cittas depend on vatthu when they arise in the material spheres. (Kāma-planes and Rūpa-planes), and they do not depend on vatthu when they arise in the immaterial sphere (Arūpa-planes).

- 4. There are 4 cittas which never depend on vatthu for their arising. They are 4 arūpāvacara vipāka cittas which arise only in the Arūpa-planes.
- Note: There are 46 cittas (as mentioned in No. 3 and No. 4 above) which arise in the Arūpa-planes.

Chapter IV

VİTHI

Process of Consciousness

'Vithi' means a chain of consciousness or cognitive series that arises when a sense object appears at one of the sense-doors in order to be aware of the object.

As the road passes one village after another without skipping any nor changing the order of the villages, so also the cittas (consciousness) arise one after another in the order they should according to the law of cittas (citta-niyāma).

The Life-time of Citta

Cittas arise and dissolve in a person at a tremendous rate of more than a thousand billion (10^{12}) times per eye-wink, and there are about 250 eye-winks in a second. So the life-time of a citta (consciousness) is less than one-thousand billionth of a second.

The life-time or duration of a citta (consciousness) is measured by three short instants of the distinct features in the arising and passing away of a citta. These are:

- (i) Uppada = the genetic instant
- (ii) Thiti = the existing instant
- (iii) **Bhanga** = the dissolving instant.

 These three short instants (khanas) are said to

132 THE ESSENCE OF BUDDHA ABHIDHAMMA be equal to one moment of consciousness or conscious-

moment (cittakkhana).

So the life-time of a citta is equal to the three short instants of arising, existing and dissolving of the citta or it is equal to one conscious-moment or one cittakkhana. One cittakkhana is better represented by one conscious-moment rather than 'a thought-moment' which is coined by some translators.

The duration of one cittakkhana (i.e., one conscious-moment) will be hard to be verified by science. But we ourselves know from experience that it is possible within one single second to dream of innumerable things and events.

The Life-time of Rupa

The life-time of rupa or corporeality is 17 times longer than that of *citta*. So we can say that the life-time of rupa is equal to 17 *cittakkhanas* or 17 consciousmoments or $17 \times 3 = 51$ short instants as there are 3 short instants in a moment of consciousness.

Thus $r\bar{u}pa$ also arises and dissolves at a tremendous rate of more than 58 billion times per second. The difference between citta and rapa is that citta arises one after another whereas $r\bar{u}pa$ arises by thousands of units at a small instant and it goes on arising incessantly at every small instant. Therefore $r\bar{u}pa$ may be piled up to large masses which are visible to the naked eye whereas the fleeting stream of consciousness is invisible to the naked eye.

Six Types of Viññana

Viññāna cittas (consciousness) may be classified as follows according to the six sense-doors and the six

physical-bases (vatthu):

- 1. Cakkhu-viññāna = 2 eye-consciousness
- 2. Sota-viññana = 2 ear-consciousness
- 3. Ghána-viñnána = 2 nose-consciousness
- 4. Jivhā-viñnāṇa = 2 tongue-consciousness
- 5. Káya-viňňána = 2 body-consciousness
- 6. Mano-viññana = 79 mind-consciousness

Please note that eye-consciousness arises at the eye-door depending on the eye-base (vatthu) and so on. The mind-consciousness arises at the mind-door depending on the heart base (hadaya-vatthu) in the heart.

The first five viññānas' comprise of 2 senseimpressions each whereas mano-viññāna comprises of 79 types of consciousness.

Six Types of Vithi

Vithi or the congitive series of consciousness is also divided into six classes which may be named according to either the six sense-doors or the six types of vinnana as follows:

- 1. Cakkhu-dvāra-vīthi = cakkhu-viñnāna-vīthi

 It is the cognitive series of consciousness connected with the eye-door or with the eye-consciousness.
- 2. Sota-dvära-vithi = sota-viññāṇa-vithi

 It is the cognitive series of consciousness connected with the ear-door or with the ear-consciousness.
- 3. Ghána-dvára-víthi = ghána-viñnána-víthi
 It is the cognitive series of consciousness connected with the nose-door or with the nose-consciousness.
- 4. Jivhā-dvāra-vīthi = jivhā-viññāṇa-vīthi
 It is the cognitive series of consciousness connected
 with the tongue-door or with the tongue-consciousness.
- 5. Káya-dvára-víthi = káya-viñňána-víthi

It is the cognitive series of consciousness connected with the body-door or with the body-consciousness.

6. Mano-dvara-vithi = mano-viññana-vithi
It is the cognitive series of consciousness connected
with the mind-door or with the mind-consciousness.

The Causes for the Arising of Vithi

- 1. Four conditions must meet for the arising of cakkhu-dvara-vithi. These are:
 - (i) Cakkhu-pasāda (eye-door) must be good,
 - (ii) Rūpā-rammana (visible-object) must be present,
 - (iii) Aloka (light) must be present, and
 - (iv) Manasikāra (attention) must be present.
- 2. Four conditions must meet for the arising of sota-dvara-vithi. They are:
 - (i) Sota-pasada (ear-door) must be good,
 - (ii) Saddā-rammana (sound) must be present,
 - (iii) Ākāsa (space) for the passing of sound must be present, and
 - (iv) Manasikāra (attention) must be present.
 - 3. Four conditions must meet for the arising of ghāna-dvāra-vithi. They are:
 - (i) Ghāna-pasāda (nose-door) must be good,
 - (ii) Gandhā-rammana (smell) must be present,
 - (iii) Vāyo (air-element that carries smell) must be present, and
 - (iv) Manasikāra (attention) must be present.
- 4. Four conditions must meet for the arising of jivhā-dvāra-vithi. They are:
 - (i) Jivhā-pasāda (tongue-door) must be good.
 - (ii) Rasā-rammaņa (taste) must be present.

- (iii) $\bar{A}po$ (liquid-element such as saliva) must be present, and
- (iv) Manasikāra (attention) must be present.
- 5. Four conditions must meet for the arising of kaya-dvara-vithi. They are:
 - (i) Kāya-pasāda (body-door) must be good,
 - (ii) Photthabbā-rammana (touch) must be present,
 - (iii) Thaddha-pathavi (firm solid element) must be present for transmittance of the touch,
 - (iv) Manasikāra (attention) must be present.
- 6. Four conditions must meet for the arising of mano-dvara-vithi. They are:
 - (i) Mano-dvāra (mind-door) must be present,
 - (ii) Dhammā-rammana (mind-object) must be present,
 - (iii) Hadaya-vatthu (heart-base) must be present,
 - (iv) Manasikāra (attention) must be present.

Note: -Of the four causes which are required for the arising of each type of vithi, the first three more or less parallel the requirements known by science. The fourth cause, i.e., manasikāra, is unknown in science. But many instances may be quoted that this cause is indispensable for the awareness of a sense-object.

For illustration, a mother with a young baby has to get up several times every night to nurse her baby. After losing sleep for several nights, she may, sometimes, fall so soundly asleep that even a loud thunder that shakes the house may not awake her. Yet, if her baby cries very softly, she will be immediately awake. This illustrates how important manasikara is.

Six Types of Visayappavatti

'Visayappavatti' means 'the presentation of sense-objects at the sense-doors'. There are six types of visayappavatti — four at the five sense-doors and two at the mind-door.

- (a) Visayappavatti at Pañca-dvāras
- (Presentation of sense-objects at the five sense-doors)
- 1. Atimahanta-rammana = 5 sense-objects with very great intensity causing a very long cognitive series of consciousness to arise.
- 2. Mahanta-rammana = 5 sense-objects with great intensity causing a long congnitive series of consciousness to arise.
- 3. Parittä-rammana = 5 sense-objects with slight intensity causing a short congnitive series of consciousness to arise.
- 4. Atiparittá-rammana = 5 sense-objects with very slight intensity causing no congnitive series to arise.
 - (b) Visayappavatti at Mano-dvāra

(Presentation of sense-objects at the mind-door)

- 1. Vibhūtā-rammana = clear presentation of sense objects.
- 2. Avibhūtā-rammaņa = obscure presentation of sense objects.

Vithi-cittas and Vithi-vimutti Cittas

(Vithi-consciousness and Vithi-freed consciousness)

Those cittas which participate in the cognitive series of consciousness are called vithi-citias.

Those cittas which do not participate in the cognitive series of consciousness are called vithi-vimutti cittas.

The 19 cittas— namely, 2 upekkhā-santirana cittas, 8 mahā-vipāka cittas and 9 mahaggata-vipāka cittas, are not involved in the cognitive series while they are performing rebirth-function, life-continuum function or death-function. So they are known as vīthi-vimutti cittas— i.e., the number of vīthi-freed consciousness is 19. (That these 19 cittas are dvāra-vimutti— i.e., door-freed— has been mentioned in Chapter III.)

Of the above 19 cittas, the 2 upekkhā—santirana cittas are involved in the cognitive series when they perform the invesitigating function or the registering function, and the 8 mahā-vipāka cittas take part in the cognitive series when they perform the registering function. So these 10 cittas must be included in counting vīthi-cittas.

Since only the 9 mahaggata-vipāka cittas are totally free from the cognitive series, the total number of vithi-cittas is 89-9=80.

Three Types of identical Cittas

The life of a living being begins with a rebirth consciousness (patisandhi-citta). After the dissolution of this consciousness, bhavanga cittas (life-continuum) arise and dissolve continuously till death performing the function of life-continuum.

The last *bhavanga-citta* is known as death consciousness (cuti-citta), because it performs death-function.

For a living being, these three cittas, namely, the patisandhi-citta, the bhavanga-citta and the cuti-

citta are the same in jāti (birth), in concomitants and in the sense-object they take. For a normal human being, one of the 8 mahā-vipāka cittas functions as paţisandhicitta, bhavanga-citta and cuti-citta. These three cittas are identical in a person, because they are the resultants of the same 'kamma' associated with a kusala citta. If the kusala citta is 'somanassa-sahagatam nāṇa-sampayuttam asankhārika mahā-kusala citta', then 'somasassa-sahagatam nāṇa-sampayuttam asankhārika mahā-vipāka citta will function as paṭisandhi-citta, bhavanga-citta and cuti-citta.

The sense-object that these cittas take is the maranāsanna-nimitta which appeared just before death in the immediate past life. The nimitta is in the form of 'kamma', 'sign of kamma' or 'sign of destiny'. These phenomena will be explained further below.

Maranasanna Nimitta

(Kamma-related Objects at the dying Moments)
In the persent life a person will be alive as long as the kusala-kamma (wholesome deed), which has given him rebirth in this life, keeps on supporting him, i.e., keeps on producing bhavanga cittas (life continuum) as kamma-resultant.

Just before that supporting kamma fades out, of the many kusala-kammas and akusala-kammas which compete with one another to have the chance of bearing kamma-resultant, one kamma will emerge as the winner.

This successful kamma may appear in the life-continuum (mind-door) of the person as kamma-object. When this happens the person may recollect the good or bad action which he has performed in the past in

connection with the successful *kamma*. The moral or immoral consciousness, experienced at that particular moment, arises now as a fresh consciousness.

In other words, it is a recurring of the consciousness which one has experienced in performing the action.

At times it may be a sign or symbol associated with the successful kamma that appears at one of the sense-doors. It may be one of the five physical objects viewed through one of the five doors as a present object, or viewed through the mind door as a past object. This past or persent object associated with the successful kamma is called 'kamma-nimitta' or 'sign of kamma'.

For example, let us suppose that a person listens to the Dhamma at his dying moment and this good kamma becomes the successful kamma to bear kamma-resultant for the next life. In this case, the persent audible Dhamma words grasped through the ear becomes the 'kamma-nimitta'.

In another case, let us suppose that a dying teacher sees through his mental eye (mano-viññāna) the students he has taught. This is also 'kamma-nimitta' in the form of a past object which appears at the mind-door.

Or say, in another case, a dying butcher hears the groans of the cattle he has killed. This past audible object is also 'kamma-nimitta' presented to him through the mind-door.

At times some symbol of the place in which he is to be reborn according to the successful kamma may appear at the mind-door.

For example, celestial beings or celestial mansions, etc., may appear to the dying person if he

is to be reborn in one of the celestial abodes, or miserable people in hell or hellhounds, etc., may appear to him if he is to be reborn in hell. These objects related to the place of rebirth are known as 'gati-nimitta' or 'sign of destiny'.

Thus, when a person is dying, one of the three types of maranāsanna-nimitta, namely, 'kamma', 'kamma-nimitta' or 'gati-nimitta', will always appear at one of the six sense-doors. The person will die soon after and will be reborn in the next life. Then his patisandhi-citta, bhavanga-citta and cuti-citta in the new life will all grasp the maranāsanna-nimitta of the past life.

Three Types of Bhavanga Cittas

In the persent life the bhavanga cittas take the maranāsanna-nimitta of the immediate past life as their object. As this object is not the new external object that appears in one of the sense doors in the present life that gives rise to a cognitive series of consciousness, we are not aware of it. So when we are asleep or when we do not know anything, these bhavahga-cittas will be arising and dissolving at a tremendous speed of more than a thousand billion (10¹²) times per eye-wink.

Now suppose that a sense-object appears at one of the sense-doors. It is necessary to know this new object so that we can react to it as the need arises. In order to turn the stream of consciousness towards this new object, the stream of bhavanga-cittas must be arrested or cut off first.

The bhavanga-stream cannot be arrested suddenly as soon as the new sense object appears in one

of the sense-doors. As a man, running very fast, cannot stop suddenly at a point and at least a few steps must be allowed before he comes to rest, so also two bhavanga-cittas must pass after the appearance of the sense-object before the bhavanga-stream can be arrested.

These two bhavanga-cittas, in trying to give away the old maranāsanna-nimitta and take the new, sense-object, vibrate somewhat from their normal situation. So they are known as vibrating life-continuum (bhavanga-calāna). But, as the bhavanga-stream is arrested or cut off after the second bhavanga-calāna, this citta is renamed as bhavangu-paccheda.

Now the five physical sense-objects do not appear or become distinct at the sense-doors as soos as they are in contact with the sense-doors. Even the object of very great intensity (atimahantā-rammana) takes one conscious-moment (cittakkhana) to develop itself into prominence so as to appear at the sense-door.

So one bhavanga-citta must pass from the time of contact of the sense-object with the sense-door to the time the object appears at the door. This citta is called atita-bhavanga (past life-continuum).

When the sense object is of great intensity (mahantā-rammana), 2 or 3 bhavanga-cittas must pass by from the time of contact of the sense-object with the sense-door to the time the object appears at the door. These 2 or 3 bhavanga-cittas are also called atita-bhavanga.

Thus we have 3 kinds of bhavanga-cittas:

1. Atitā-bhavanga = those bhavanga-cittas which pass by from the time the sense-object strikes the sense-door to

the time the object appears at the door.

2. Bhavanga-calána

= vibrating bhavanga which arises when the sense object appears at the door.

3. Bhavangupaccheda = arresting bhavanga that follows the bhavanga-calāna.

After this, the bhavanga-stream is cut off and vithi-citta starts arising.

Cakkhu-dvara Vithis (Cognitive Series at the Eye-door)

1. The Occurrence of Atimahanta-rammana Vithi

When a visible object of very great intensity strikes the eye-door, atimahantā-rammana vīthi arises. The cognitive series may be represented by the following symbols:

Bha-"Ti-Na-Da-Pa-Ca-Sam-Na-Vo-Ja-Ja-Ja-Ja-Ja-Ja-Ja-

Dā-Dā-"Bha-

çoo çoo uppāda appear

dissolve

Bha = bhavanga = life-continuum

At first there is a stream of bhavanga cittas (life-continuum).

Ti = atīta-bhavanga (the three small circles represent three small instants that make up a cittakkhana).

At the arising instant of this citta, the visible object and the cakkhu-pasāda arise simultneaously.

This is the arising instant (uppāda) of rūpārammaņa (visible object).

- Na = bhavanga-calāna (vibrating life-continuum)

 At the arising instant of this citta, rūpā-rammana
 appears (becomes distinct) at cakkhu-pasāda
 - appears (becomes distinct) at cakkhu-pasāda (eye-door).
- Note that atimahantārammaņa takes one cittakkhaņa for its full development after uppāda.
- Da = bhavangupaccheda (arresting life-confinuum)

 Bhavanga-stream is cut off after the dissolution of this citta.
- Pa = pañca-dvārāvajjana (five-door-adverting consciousness).

It is always the first citta in the cognitive series of pañca-dvara vithis. It adverts the consciousness, stream towards the sense-object.

- Ca = Cakkhu-viññāṇa = eye consciousness
 It sees the visible object. It makes the sense impression and transmits the impression to the next consciousness before it dissolves.
- Sam= sampaticchana = receiving cosciousness

 It receives the visible object together with the sense impression and relays them to the next consciousness.
- Na = Santirana = investigating consciousness

 It investigates the object and the impression.
- Vo = votthapana (mano-dvārāvajjana) = determining consciousness
 - It determines whether the object is good or bad.
- Ja = javana = impulsive consciousness enjoying the taste of the sense object.

 One of the 20 kāma impag pittae as conditioned

One of the 29 kāma-javana cittas, as conditioned by manasikāra and votthapana, arises mostly seven times, i.e., it runs for seven conscious moments.

Dā= tadālambaṇa = registering consciousness

It immediately follows javana and runs for two conscious moments enjoying the taste of the sense-object. At the dissolving instant of the second tadālambaṇa citta, the visible-object and the cakkhu-pasāda dissolve together because their life-time of 17 conscious moments is now complete.

Bha = bhavanga = life-continuum

Since the visible object no longer exists, the cognitive series ends and the consciousnessstream sinks into life-continuum (subconsciousness).

Note: The atimahantā-rammaņa vithi is also known as "tadālambaņa-vāra vithi" as it terminates with tadālambaņa-citta.

2. The Occurrence of Mahanta-rammana Vithi

When a visible object of fairly great intensity strikes the eye-door, two mahantā-rammaṇa vīthis may arise. The cognitive series may be represented as follows.

(1) "Ti-Ti-Na-Da-Pa-Ca-Sam-Na-Vo-Ja-Ja-Ja-Ja-Ja-Ja-Ja-Bha"-Bhaçoo çoo

(2) "Ti-Ti-Ti-Na-Da-Pa-Ca-Sam-Na-Vo-Ja-Ja-Ja-Ja-Ja-Ja-Ja-Ja-Ja-Ja-Bha
çoo çoo ooç

Explanation

(1) In the first mahantā-rammana vithi the sense-object and the cakkhu-pasāda (eye-door) arise (uppāda)

together at the arising instant of the first atitabhavanga. The sense-object takes two consciousmoments (Ti-Ti) for its full development and it becomes distinct at the mind-door at the arisinginstant of bhavanga-calana (Na).

Then the life-continuum (bhavanga) vibrates for 2 conscious moments (Na-Da) and becomes arrested or cut off at the dissolving instant of bhavangupaccheda (Da). Then the cognitive series proceeds as follows:

Pa = Pañca-dvārāvajjana (five-door-adverting consciousness)

It adverts the consciousness - stream towards the sense-object.

Ca = Cakkhu-viññāṇa (eye-consciousness)

It sees the object and makes the sense-impression.

Sam = sampaticchana (receiving consciousness)

It receives the object together with the sense impression.

Na = Santirana (investigating consciousness)

It investigates the object and the impression.

Vo = Votthapana (determining consciousness)

It determines whether the object is good or bad.

Ja = javana (impulsive consciousness)

One of the 29 kāma-javana cittas arises seven times enjoying the taste of the sense-object.

So far 16 conscious-moments have elapsed since the genesis of the sense-object at the mind-door, and only one conscious-moment is left before the object dissolves. So two tadā-lambaṇa cittas (registering consciousness) can no longer arise. (Tadālambaṇa citta arises instead, and the sense-object and the cakkhu-

pasāda, which have arisen together, dissolve together at the dissolving instant of that bhavahga citta. After that the life-continuum flows on as usual.

(2) In the second mahantā-rammaṇa vithi, the intensity of the sense-object is a little weaker than the intensity of the object in (1). So after the genesis of the sense-object at the mind-door, three atīta-bhavaṇa cittas pass by before the object becomes well developed and distinct at the eye-door. Then the life-continuum vibrates and becomes arrested (Na-Da). After that the cognitive series proceeds as in (1), i.e., in the order of pañca-dvārāvajjana, cakkhu-viñāna, sampaticchana, santiraṇa, votthapana and seven javanas. At the dissolving instant of the seventh javana the object and the cakkhu-pasāda (eye-door) also dissolve. So the cognitive series terminates and life-continuum proceeds as usual.

Thus there are two mahanta-rammana vithis which end with javana-citta; they are known as javana-vāra vithis.

3. The Occurrence of Paritta-rammana Vithi

When a visible object of slight intensity strikes the eye-door, parittā-rammaņa vithi arises. The cognitive series may be represented as follows:

- (1) "Ti-Ti-Ti-Ti-Na-Da-Pa-Ca-Sam-Na-Vo-Voçoo çoo Bha-Bha-Bha-Bha"-
- (2) "Ti-Ti-Ti-Ti-Ti-Na-Da-Pa-Ca-Sam-Na-Vo-Vogoo Vo-Bha-Bha-Bha-"
- (3) "Ti-Ti-Ti-Ti-Ti-Ti-Na-Da-Pa-Ca-Sam-Na-Vopoo poo Vo-Vo-Bha-Bha-"

- (4) "Ti-Ti-Ti-Ti-Ti-Ti-Na-Da- ?a-Ca-Sam-Na-Vo-Vo-Vo-Bha-"
- (5) "Ti-Ti-Ti-Ti-Ti-Ti-Ti-Na-Da- Pa-Ca-Sam-Na-Vo-Vo-Vo-"Bha-
- (5) "Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Na-Da- Pa-Ca-Sam-Na-Vo-Vo"-Bha-"

Explanations

(1) In the first parittā-rammaņa vithi, the sense object and the cakkhu-pasāda (eye-door) arise together at the arising instant of the first atita-bhavanga. The sense-object takes 4 conscious moments for its full development and it becomes distinct at the arising instant of bhavanga-calāna (Na). The continuum (bhavanga-stream) vibrates twice and becomes arrested (Na-Da). Then the cognitive series proceeds in the order of pañca-dvārāvajjana, cakkhu-viññāṇa, sampaṭicchana, santirana voithapana. At this point, 11 conscious moments have elapsed since the genesis of the sense-object and the object can last for only 6 more consciousmoments.

In normal situations, the javana usually occurs for 7 conscious-moments and if there is no enough time, it does not occur at all. In other words, as the object is not distinct and not known precisely, no javana arises to enjoy the taste of the object.

So two more votthapana cittas arise in place of javana to determine two more times whether the object is good or bad. After that the conscious-stream sinks into life-continuum. The sense-object and the eye-door dissolve at the

dissolving instant of the fourth bhavanga, and lifecontinuum flows on as usual after that.

(2-6) In the next five successive vithis, atitabhavanga (Ti) is increased one by one as the object becomes weaker and weaker, and accordingly the cittas in the rear have to be cut off one by one as the total conscious-moments cannot exceed the life-time (i.e., 17 conscious-moments) of the sense-object. Thus at the sixth vithi, the congnitive series terminates after two votihapana cittas.

The number of voithapana cittas cannot be reduced turther as there must be at least two voithapana cittas in functioning in the place of javana. So there are 6 parittā-rammana vūthis which all end with voithapana; they are known as voithapana-vāra vīthis. As there are no javanas in these vūthis, there is no enjoyment of the taste of the sense-object. The object is not precisely known—it seems to be known very roughly. These vīthis occur in babies whose cakkhupasāda is weak; so, even when the sense-object is of great intensity, its appearance is not distinct.

4. The Occurrence of Atiparitta-rammana-Vithi

000

- (2) "Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Na-Na-Bhagoo Bha-Bha-Bha"--
- (3) "Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Na-Na-Bha-Bha-Bha"--
- (4) "Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Na-Na-Bha-Bha"--
- (5) "Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Ti-Na-Na-Bha"--

Explanation

As usual the sense-object and the cakkhu-pasāda (mind-door) arise together at the arising instant of the first atīta-bhavanga. The sense-object, being of very slight instensity, takes 10 to 15 conscious moments for its full development. When it is well developed, it appears at the mind-door. But, being very weak, it can cause the life-continuum only to vibrate twice without breaking the stream of the life-continuum. Thus, after two bhavanga-calāna cittas, only bhavanga-cittas keep on flowing. The sense-object and the cakkhu-pasāda (mind-door) will dissolve together at the end of 17 conscious - moments after their genesis.

The object is not known at all as no vitthi-cittas arise. Because these vithis are deprived of vithi-cittas, they are known as "mogha-vāra-vithis" (futile cognitive series).

75 Pańcadvara-vithis

In the process of cognition at the eye-door, there

are:

(1) one tadārammaņa-vāra vilhi fot atimahantārammaņa,

(2) two javana-vāra vithis for mahantā-rammana,

(3) six votthapana-vāra vithis for parittā-rammana,

(4) six mogha-vāra vithis for atiparittā-rammana.

All together there are 15 vithis at the eye-door. Similarly, there are 15 vithis each at the ear-door, at the nose-door, at the tongue-door and at the body-door. Thus the total number of panca-dvara-vithis at the five doors is $15 \times 5 = 75$.

In writing the vithi-forms and explaining the forms for the ear-door, sota-viññana (So) should be inserted in place of cakkhu-viññāna, and 'sound' and 'sota-pasāda' should replace 'visible-object' and 'cakkhu-pasāda', respectively. Similar proper changes should be made for the remaining three doors.

The Simile of a Mango-fruit

The atimahantā-rammana may be compared with the falling of a mango-fruit. Suppose a weary traveller is asleep at the foot of a mango-tree. This state of being asleep is analogous to the quiet flow of life-continuum in atimahantā-rammana.

Now a ripe mango-fruit drops to the ground near the traveller. This event is similar to the striking of a visible object of very great intensity at the eye-door.

The sound of the mango-fruit striking the ground awakens the traveller and causes him to raise his head. This event is similar to the appearance of the visible object at the eye-door causing the life-continuum to vibrate twice and become arrested.

The traveller opens his eyes and looks around to enquire what causes the sound. This conduct is similar

to the pañcadvāra-vajjana adverting the consciousnessstream towards the sense-object.

The traveller sees the mango-fruit. This is analogous to the eye-consciousness seeing the object. The man picks up the mango-fruit. This is similar to the sampaticchana receiving the visible object.

The man then inspects the mango-fruit whether it is suitable for eating. This is similar to the santirana investigating the sense-object.

The man decides that the mango-fruit is good and edible. This is similar to the votthapana deciding that the sense-object is good.

Being hungry, the man bites the mango-fruit seven times eating and enjoying the taste. This is similar to the occurrence of seven javana-cittas enjoying the taste of the sense-object.

Then the man gathers the remnants of the fruit and the juice sticking on the teeth with his tongue and swallows twice. This is similar to the two tadālambaņa cittas following javanas and enjoying the taste of the sense-object.

Then the man lies down and falls asleep. This is similar to bhavahaga cittas sinking into life-continuum.

Pańcadvara-Vithi Cittas

If we examine the *pañcadvāra vithis*, we shall notice that seven types of consciousness participate in the vithis. The seven types of consciousness are:

"Pañca-dvārāvajjana, pañca-viññāṇa, sampaticchana, santiraṇa, voṭṭhapana, javana and tadālambaṇa".

The numbers of cittas that participate in the longest vīthi: i.e., the atimahantā-rammana vīthi, are: 1 pañca-dvārāvajjana, 1 pañca-viññāna, 1 sampaticchana, 1 santirana, 1 voţthapana, 7 javanas and 2 tadālambanas, totalling 14.

The total number of cittas that can participate in the pañcadyāra vithis are:

,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	
(a) pañca-dvārāvajjana citta	1
(b) pañca-viññāṇa cittas	10
(10 sense - impressions)	
(c) sampaticchana cittas	2
(d) santirana cittas	3
(e) votthapana citta	1
(mano-dvārāvajjana)	
(f) kāma-javana cittas	29
(g) tadālambaņa cittas	8
total =	54

These are the 54 kāmāvacara cittas. If we count the cittas for a single door, e.g. eye-door, we get two cakkhu-viññāṇa cittas instead of 10 pañca-viññāṇa cittas in (b); so the total number of cittas is 46. This agrees with the number shown on pagel22of chapter III. Note that bhavanga cittas are not included in vīthi cittas.

The Object and the Vatthu taken by each Vithi-Citta

All the pañcadvāra-vīthi cittas grasp the present sense-object that exists at the sense-door. The pañca-viñnāna cittas are borne by pañca-vatthus, i.e., cakkhu-viñnāna cittas are borne by cakkhu-vatthus, sota-viñnāna cittas are borne by sota-vatthus, etc., while

the mano-viññana cittas are borne by hadaya-vatthus.

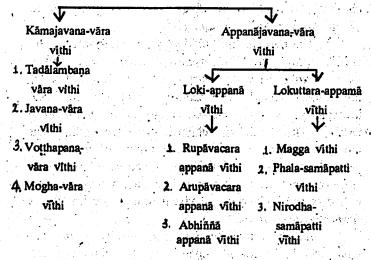

For illustration, all the cakkhu-dvāra-vithi cittas of atimahantā-rammana grasp the visible object that appears at the eye-door at the arising instant of bhavanga-calāna and dissolves at the dissolving instant of the second tadālambana citta.

The two cakkhu-viññāna cittas are borne by the cakkhu-vatthu (cakkhu-pasāda) which has arisen together with the visual object at the arising instant of the afita-bhavanga. This vatthu, which has the same life-span as the visual object, is called, "majjhimāyuka-vatthu". Those vatthus, which have arisen earlier than the visual object and thus will dissolve earlier than the visual object, are known as "mandāyuka-vatthus". Those vatthus, which arise later than the visual object and thus will dissolve later than the visual object, are known as "amandāyuka-vatthus".

All the remaining pañca-dvāra-vīthi cittas are mano-viññāna cittas; they are individually and respectively borne by the hadaya-vatthu which has arisen along with the preceding citta, i.e. the hadaya-vatthu which has lasted for one conscious-moment. For example, pañcadvārāvajjana is borne by the hadaya-vatthu which has arisen along with bhavanga-calāna; sampaṭicchana is borne by the hadaya-vatthu which has arisen along with cakkhu-viññāna, santirana is borne by the hadaya-vattlu which has arisen along with sampaticchana, and so on.

Mano - dvára Víthi

Mano - dvara Vithi

When one of the six senses enters the avenue of the mind-door, manodvāra vithi ensues. Manodvāra vithi may first be divided into two classes.

- 1. Kamājavana-vāra vīthi— here one of the 29 kāma-javana cittas takes the function of javana, i.e, enjoying the taste of the sense-object.
- 2. Appanajavana-vara vithi—here one of the 26 appana-javana cittas takes the function of javana.

Kāmajavana-vāra vithi may turther be divided into four types as desribed in the above scheme whereas appanā-javana-vāra vithi may be subdivided into two types—namely, loki-appanā vīthi and lokuttara appanā vīthi. All these vīthis will be explained below.

Kama-javana Mano-dvara Vithis

- 1. Ativibhūtā-rammaņa vithi (Tadālambaņa-vāra vithi)
 - "Na-Da-Ma-Ja-Ja-Ja-Ja-Ja-Ja-Dã-Dã" Bha-
- 2. Vibhūtā-rammaṇa vithi (Javana-vāra vithi)
 "Na-Da-Ma-Ja-Ja-Ja-Ja-Ja-Ja" Bha-Bha-
- 3. Avibhūtā-rammaņa vithi (Votthapana-vāra vithi)
 "Na-Da-Ma-Ma-Ma" Bha-Bha-
- 4. Ativibhūtā-rammaņa vithi (Mogha-vāra vīthi)
 "Na-Na" Bha-Bha-Bha-

Explanation

One of the six sense-objects which may be present, past, future or time-freed, must enter the avenue of the mind-door to initiate the kāma-javana mano-dvāra vīthis.

1. When the sense-object is of very great intensity, the life-continuum vibrates twice and becomes arrested (Na-Da) on the appearance of the sense-object at the mind-door. Then mano-dvāra-vajjana (Ma) adverts the consciousness-stream towards the sense-object, observes the object and decides whether it is good or bad.

In accordance with this decision, one of the 29 kāma-javana cittas performs the javana function for seven conscious moments enjoying the taste of the sense-object. Then two tadālambana cittas follow suit enjoying the taste of the sense-object further. After that, bhavanga cittas sink into life-continuum.

This vithi is known as "ativibhūtā-rammaņa vīthi" or tadālambaņa-vāra vīthi as it terminates with tadālambaņa citta.

- 2. When the sense-object is of fairly great intensity, the cognitive series occurs as above but terminates with javana citta without tadālambaṇa. This vīthi is known as "vibhūtā-rammaṇa vīthi" or "javana-vāra vīthi".
- 3. In the "avibhūtā-rammaṇa vīthi", the sense object is of slight intensity and its appearance at the mind-door is not clear as in the above two cases. Thus after the life-continuum is arrested, mano-dvārāvajjana citta occurs three times trying to observe and decide the sense-object. But the object is not precisely known and consequently no javana cittas occur to enjoy the taste of the sense object. After mano-dvārāvajjana, bhavanga citta sinks into life-continuum.

This vithi is known as "votthapana-vāra vithi" as it terminates with votthapana citta.

4. In the atiavibhūtā-rammaņa vīthi, the sense-object is of very slight intensity. It can only cause the life-continuum to vibrate twice without becoming arrested. So no vīthi cittas occur and the sense-object is not known.

This vithi is called "mogha-vāra vithi" as it is deprived of vithi cittas.

- Notes: 1. The mind-door (mano-dvāra) is not a physical door; one of the 19 bhavanga-cittas is functioning as the mind-door in a person.
 - 2. All the six sense-objects which may be past, present, future or time-freed, can appear at the mind-door.

- 3. As the mind-object such as cittas, cetasikas, kasiņa-nimittas or nibbāna itself may appear at the mind-door, no atīta-bhavanga need occur; the object appears at the mind-door as soon as it strikes the door.
- 4. The objects that appear at the mind-door should not be differentiated as atimahantā-rammana or mahantā-rammana; they should be differentiated as vibhūta-rammana (clear object) or avibhūta-rammana (obscure object).

Kāma-javana-Mano-dvāra-vithi Cittas

In mano-dvāra vithis there are only 3 types of consciousness — namely, "avajjana, javana and tadālambana".

The numbers of cittas in the longest mano-dvāra vīthi are: 1 mano-dvārāvajjana citta, 7 javana cittas and 2 tadālambana cittas, totalling 10 in all.

The numbers of cittas that can participate in mano-dvāra vīthis are: 1 mano-dvārāvajjana citta, 29 kāma-javana cittas and 11 tadālambana cittas, totalling 41 in all.

Secondary Mano-dvara Vithis

When one of the six sense-objects enters the avenue of the mind-door directly, we get primary mano-dvāra vithis as described above. But there are secondary mano-dvāra vithis which follow each and everyone of the pañca-dvāra vithi.

In a panca-dvara vithi, the sense-impression is processed only to the extent to be known roughly whether it is good or bad. The form, the shape, the

158 THE ESSENCE OF BUDDHA ABHIDHAMMA detailed features and the name of the object are not known yet.

Thus, after a pañca-dvāra vīthi, a mano-dvāra vīthi quickly follows it retaking the sense-object of the pañca-dvāra vīthi as a past object.

Then the second mano-dvara vithi follows suit observing the new image and the old impression together.

Then the third mano-dvāra vithi quickly follows again observing the form and the shape of the sense-object.

Then the fourth mano-dvāra vithi follows considering the name associated with the object. If necessary many mano-dvāra vithis quickly occur in succession considering the features of the object in detail and also the time and the place connected with the object if he has encountered it before.

Only after these many secondary mano-dvara vithis, does one know the object together with form, shape, name and other details.

Considering the fact that cittas can occur at a tremendous rate of more than a thousand billion times per eye-wink and a mano-dvāra vīthi contains only about 10 vīthi cittas, more than a billion vīthis can occur in a fraction of a second. So we can know the objects we see or hear almost instantly and we even think that we see and hear simultaneously.

Practical Verification

That pañca-dvāra vithis and mano-dvāra vithis are occuring at a tremendous rate incessantly in a person can be verified by the person himself. As cittas are

invisible even under the best microscope an instrument more powerful than the latest electronic microscope will be necessary to observe the cittas. This instrument is none other than the mind itself accompanied by upacāra-samādhi (neighbourhood- or access-concentration) or better by jhāna-samādhi (meditative absorption).

I have interviewed many meditators in Pa-auk Forest Meditation Center near Mawlamyine where samatha and vipassanā-bhāvanā (tranquility- and insight-meditation) are properly taught according to the instructions given in Buddhist canons.

Here meditators are required to develop concentration first. After they attain the required concentration, they are taught to meditate on rūpa (corporeality) analysing it in detail into 27 kinds in a person so as to see the ultimate realities with regard to rūpa.

Then meditators are taught to meditate on nāma (consciousness and its concomitants). They have to focus their attention on each physical base (vatthu) in turn, observe a sense-object striking the base and notice the cognitive series of consciousness that arise in pañcadvāras (five doors) as well as in the mind door.

They can see the vithi-cittas occuring exactly as described in this book, and later on can also differentiate the various cetasikas associated with each citta. The results are very satisfactory. If the reader has some doubt, he or she is invited to come and meditate in Pa-auk Forest Meditation Center at any time convenient to him or her.

Appanā-javāna Mano-dvāra Vithis

In tranquility and insight-meditations, appanaiavana mano-dvāra vīthis arise when jhāna or magga is realized. In these vīthis, one of the 26 appanā-javana cittas takes part in the javana-function.

26 appanā-javana cittas = 5 rūpāvacara kusala cittas

- + 4 arūpāvacara kusala cittas
- + 9 mahaggata kiriya cittas
- + 8 lokuttara cittas

If a person, who is not yet an arahat, practises tranquility meditation, he may attain 5 rūpāvacara kusala jhānas and 4 arūpāvacara kusala jhānas, which are collectively called "9 mahaggata kusala cittas". If an arahat undertakes tranquility meditation, he may attain 5 rūpāvacaru kiriya jhānas and 4 arūpāvacara kiriya jhānas which are collectively called "9 mahaggata kiriya cittas."

If a person, endowed with three roots—namely, alobha, adosa and amoha—undertakes insight-meditation properly and strenuously, he may attain the four maggas and the four phalas (the four paths and their fruitions) which are known as the 8 lokuttara cittas.

Five Rūpāvacara Appanā Vīthis

(Manda-paññā) Na-Da-"Ma-Pa-U-Nu-Go-Jhā"-Bha-Bha-

(Tikkha-paññā) Na-Da-"Ma-U-Nu-Go-Jhā"-Bha-

1. When the patibhāga-nimitta of kasina appears at the mind-door, the life-continuum vibrates twice and becomes arrested (Na-Da). Then mano-dvārāvajjana (Ma) adverts the consciousness-stream towards the patibhāga-nimitta, observes and decides the

sense-object whether it is good or bad.

Then one of the two somesassa-sahagatam nāna-sampayuttam mahā-kusala cittas performs the upacāra-samādhi javana-function four times in the persons of slow or dull wisdom (manda-panānā) under the names of

Pa = parikamma = preparation of jhāna, U = upacāra = proximity of jhāna,

Nu = anuloma = adaptation or connection between parikamma and jhāna; it acts as a bridge harmonising the lower cittas with the higher cittas,

Go = gotrabhu = the citta that cuts the kāmalineage to form the exalted- or mahaggata-lineage.

These four cittas are known as upacārasamādhi javanas. In the case of a person of quick or bright wisdom (tikkha-paññā), parikamma (Pa) is excluded.

Immediately after gotrabhu, rūpāvacara kusala first-jhāna citta arises just once as appanā-javana. After the dissolution of this first-jhāna citta, bhavanga-stream flows on as usual.

2. The second rūpāvacarā-appanā vīthi arises as above allowing rūpāvacara kusala second-jhāna citta to function as appanā-javana just once.

3. The third rūpāvacara-appanā vīthi also arises as in (1) allowing rūpāvacara kusala third-jhāna citta to function as appanā-javana just once.

4. The fourth rūpāvacara-appanā vīthi again arises as in (1) allowing rūpāvacara kusala fourth-jhāna citta to function as appanā-javana just once.

5. The fifth rūpāvacara-appanā vīthi arises as in (1), but instead of one of the two somanassa-sahagatam nānasampayuttam mahākusala cittas, one of

the two upekkhā-sahagatam ñāṇa-sampayuttam mahākusala cittas performs the upacāra-samādhi javana-function four or three times and rūpāvacara kusala fifth-jhāna citta arises just once to function as appanā-javana.

Notes: -1. When one is meditating on kasina, either somanassa or upekkhā mahākusala citta will perform

the javana function.

2. When one enters the meditative absorption, the upacāra-samādhi javanas and the jhāna-javana must agree in feeling (vedanā). Since the first four jhānas are accompanied by sukha (pleasant feeling) they are regarded as somanassa cittas. So, in these cases, the upacāra-samādhi javanas must be somanassa-sahagatam. In the case of the fifth jhāna, it is upekkhā-sahagatam, so the upacāra-samādhi javanas must be also upekkhā-sahagatam.

3. A moral javana (kusala citta) is followed by

a moral javana.

Four Arūpāvacara Appanā Vithis (Manda-paññā) Na-Da - "Ma-Pa-U-Nu-Go-Jhā" -

Bha-Bha-

(Tikkha-paññã) Na-Da- " Ma-U-Nu-Go-Jhã"-

Bha-Bha-

These vithis are the same in form as rūpāvacara appanā vithis. But arūpāvacara jhānas are higher than rūpāvacara jhānas in the degree of concentration, tranquility and sublimity. One has to use the fifth jhāna as the base to step higher to arūpāvacara jhāna and also has to concentrate on an object which is not associated with rūpa.

In practice, one has to develop the fifth jhāna first by meditating on the paţibhāga-nimitta of kasina. Then he comes out of the ecstatic absorption, ignores the patibhāga-nimitta which is associated with rūpa (kasina in this case), concentrates on the infinite space (ākāsa) that exists beyond the paṭibhāga nimitta, and meditates: "Ākāsa, ākāsa". When the subtle attachment to the patibhāga-nimitta is eliminated, the nimitta disappears suddenly unfolding infinite space. He meditates on: "Ākāsa, ākāsa", and when the degree of concentration is high enough, the appanās-vīthi will come into effect.

- 1. When the object of infinite space (ākāsa) appears at the mind-door, the bhavanga-stream vibrates twice and becomes arrested (Na-Da). The mind-door consciousness, i.e. mano-dvārāvajjana, observes the object and decides whether it is good or bad. Then one of the two upekkhā-sahagatam nāṇa-sampayuttam mahā-kusala cittas functions as parikamma (Pa), upacāra (U), anuloma (Nu) and gotrabhu (Go) in a person of slow wisdom (manda-paṇṇā), or as upacāra, anuloma and gotrabhu in a person of quick wisdom (tikkha-paṇṇā). Then ākāsānaṇcāyatana-kusala citta arises once as appanā-javana and bhavanga cittas sink into life-continuum.
- 2. In going up the ladder to the second arūpāvacara jhāna, the meditator meditates on the ākāsānāncāyatana-kusala citta. When the degree of concentration is high enough, the second arūpāvacara-appanā vīthi will ensue.

The object that appears at the mind-door is ākāsānancāyatana-kusala citta which causes the cognitive series of bhavanga-calana, bhavangu-paccheda,

mano-dvārāvajjana, parikamma (omit in tikkha-pannā person), upacāra, anuloma, gotrabhu and vinnānancāyatana kusala citta as appanā-jayana to arise. Life-continuum then flows on as usual.

- 3. In the case of the third arūpāvacara jhāna, the object that appears at the mind-door is nothingness which results from the omission of ākāsānañcāyatana-kusala citta. The cognitive series of consciousness arise as before terminating with ākincaññāyatana kusala citta as appanā-javana.
- 4. In going up to the fourth arūpāvacara jhāna, the meditator concentrates on the ākincaññāyatana kusala citta as the object of meditation. On realising the fourth arūpāvacara jhāna, this object of ākincaññāyatana kusala citta appears at the mind-door causing the cognitive series of consciousness to arise as before. In this case neva-saññā-n'asaññāyatana kusala citta arises once as apanā-javana and then bhavanga cittas sink into life-continuum.

Note: - The reader should review the description on "arūpa jhānas" on pages 49 - 50 as an aid to the study of the arūpāvacara appanā vūhis.

Jhana Samapatti Vithis

'Samāpatti' means 'attainment'. A person, who has attained the rūpāvacara first jhāna, may enter the ecstatic absorption corresponding to that jhāna whenever he wishes. If he practises well, he may attain the esctatic trance instantly and remain in the trance for one hour, two hours, three hours, etc., up to seven days. During this trance, the *jhāna citta* occurs repeatedly and spontaneously focussing the attention on the *paṭibhāga*-

nimitta of kasina. So he will not hear any sound nor know any other sense-object during the trance.

A person, who attains all the rūpāvacara and the arūpāvacara jhānas, may enter the meditative absorption corresponding to any jhāna. But he must enter the first jhāna first; then, by eliminating vitakka, he enters the second jhāna; then, by eliminating vicāra, he enters the third jhāna, and so on.

The jhāna-samāpatti vīthi runs as follows: (Manda-paññā) Na-Da-"Ma-Pa-U-Nu-Go-Jhā-Jhā-Jhā-many times" -Bha-

(Tikkha-paññā) Na-Da-"Ma-U-Nu-Go-Jhā-Jhā-many times"-Bha-

1. For attainment of rupavacara jhana:

The patibhāga-nimitta of kasina appears at the mind-door causing the life-continuum to vibrate twice and become arrested (Na-Da). Then mano-dvārāvajjana observes the patibhāga-nimitta and decides whether it is good or bad. Then one of the two somanassa-sahagatam nāṇasampayuttam mahākusala cittas (take upekkhā-sahagatam to enter the fifth jhāna) functions as parikamma (omit for tikkha-paññā person), upacāra, anuloma and gotrabhu. Then rūpāvacara kusala first jhāna (or second, third, fourth or fifth jhāna) citta functions many times as appanā - javana. When the ecstatic absorption is over, bhavahga cittas sink into life-continuum.

2. For attainment of arūpāvacara jhāna:

The infinite space (äkäsa) unfolded by the disappearance of the patibhāga-nimitta (take the

corresponding object for the higher arūpāvacara jhāna) enters the avenue of the mind-door causing the life-continuum to vibrate twice and become arrested. Then mano-dvārāvajjana observes the infinite space and decides whether it is good or bad. Then one of the two upekkhā-sahagatam nānasampayuttam mahākusala cittas functions as parikamma (omit for tikkha-pañnā person), upacāra, anuloma and gotrabhu. Then ākāsānanācāyatana-kusala citta (or higher arūpāvacara kusala citta) functions many times as appanā-javaṇa. When the ecstatic absorption is over, bhavangā cittas sink into life continuum.

Abhiñña Appana Vithis

Those who have attained all the rūpāvacara jhānas and all the arūpāvacara jhānas may practise further according to the instructions given in Visuddhimagga or other Buddhist canons to attain the five lokiya Abhinānās (mundane supernormal knowledges). These supernormal powers are attainable through the utmost perfection in mental concentration, and they are related to the higher knowledge associated with the fifth rūpāvacara jhāna. What are they?

1. Iddhi-vidha Abhinnana = various divine powers, such as being one he becomes manifold, and having become manifold he again becomes one. Without being obstructed he passes through walls and mountains, just as if through the air. In the earth he dives and rises again, just as if in the water. He walks on water without sinking, just as if on the earth. Crosslegged he floats through the air, just as a winged bird.

- 2. Dibba-sota Abhiññana = divine ear that can hear sounds both heavenly and human, far and near.
- 3. Dibba-cakkhu Abhiññana = divine eye that can see objects both heavenly and human, far and near, hidden or exposed. It can see beings in the apāya (lower) abodes as well as in the celestial abodes. It sees beings vanishing and reappearing, low and noble ones, beautiful and ugly ones. It sees how beings are reappearing according to their deeds (kamma).
- Pracitta-vijjānana Abhiññāņa or Ceto-pariyañāṇa = The ability to know others' minds in many ways or to penetrate the minds of others.
- 5. Pubbe-niväsänussati Abhiññāna = the ability to remember manifold former existences, such as one birth, two, three, four or five births.... one hundred thousand births; to remember many formations and dissolutions of worlds: "There I was, such name I had,....and vanishing from there I entered somewhere else into existence.....and vanishing from there I again reappeared here."

The abhinna vîthi is of the form:

Na-Da-"Ma-Pa-U-Nu-Go-Bhiñ"-Bha....

Suppose a person, who has attained the mundane supernormal powers, wants to become manifold. He meditates on the pathavī-kasiņa and develops the rūpāvacara kusala fifth jhāna for a few moments. Then he comes out of the jhāna absorption and, having arrested his life-continuum, makes a will: "Let there be 1000 identical but separate forms of myself."

He has complete confidence in his will. The nimitta-forms appear at his mind-door causing the life-

continuum to vibrate twice and become arrested. The mano-dvārāvajjana observes the nimitta-forms and decide whether the visual object is good or bad. Then one of the two upekkhā-sahagatam nāṇa-sampayuttam mahākusala cittas functions as parikamma, upacāra, anuloma and gotrabhu. Then observing the 1000 nimitta-forms, the rūpāvacara kusala fifth-jhāna arises once functioning as abhināā-javana. Then, bhavanga citta follows up and the person comes out of the jhāna. As soon as abhināna javana occurs, the 1000 nimitta-forms come into existence.

Other mundane supernormal powers are brought into play in a similar way.

Magga Appana Vithis

Those, who undertake insight-meditation, meditate on the three characteristics of existence (ti-lakkhana) namely, impermanence (anicca), suffering or misery (dukkha) and not-self (anatta). After developing ten insight-knowledges (vipassanā-ñānas), the realization of the Path and its Fruition (magga and phala) follows up. There are four levels of magga and phala. The maggaappanā vithis run as follows.

(Manda-paññā) Na-Da-"Ma-Pa-U-Nu-Go-Mag-Pha-Pha-" Bha-

(Tikkah-paññā) Na-Da-"Ma-U-Nu-Go-Mag-Pha-Pha-Pha-Pha-Bha-Bha-

1. When one of the three characteristics of existence enters the avenue of the mind-door of a puthujjana (worldling or one who is bound by all ten fetters), the life-continuum vibrates twice and becomes arrested (Na-Da). Then, observing and considering the

characteristics of existence, mano-dvārāvajjana (Ma) arises once. Then one of the four nāṇa-sampayuttam māhā-kusala cittas, observing the characteristics of existence, functions three times as parikamma (Pa), upacāra (U), anuloma (Nu), and then, observing Nibbāna, functions once more as gotrabhu (Go). Then sotāpatti-magga javana arises once observing Nibbāna. Then, without any lapse in time, the fruition of the magga, i.e., sotāpatti-phala citta, functions twice as appanā-javana. Then bhavanga cittas sink into lifecontinuum and the person comes out of magga-vūthi. (If the person is of tikkha-nāṇa, parikamma is omitted and phala-javana occurs threee times.)

Note: - In the above magga-vīthi, parikamma, upacāra, anuloma and gotrabhu signify the following things:-

Pa = parikamma = preparation of magga,

U = upacāra = proximity of magga,

Nu = anuloma = adaptation or connection; it harmonises the lower cittas with the upper cittas.

Go = gotrabhu = the citta that cuts the puthujjana - lineage to form the ariya-lineage (ariya=holy).

Once a person becomes an ariyā, he is never reverted back to a puthujjana again. Thus gotrabhu has to cut the puthujjana-lineage only once. So in later magga- and phala-vūthis, Vo = vodānā (meaning purification) is inserted in place of Go = gotrabhu.

· 2. To realize the second magga and phala, the sotāpanna or sotapan (stream-winner who has realized the first magga and phala) has to meditate on the three characteristics of existence again. When the second magga-vīthi arises, it runs as above—the only changes

necessary are: 'vodāna' in palce of 'gotrabhu', 'sakadāgāmi-magga' in place of 'sotāpatti-magga' and 'sakadāgāmi-phala' in place of 'sotāpatti-phala'.

After this second magga-vithi, the person becomes a sakadāgāmi or sakadāgam (once-returner, i.e. he will return to the kāma-abodes just once).

3. If the sakadāgam undertakes insight-meditation further, he may develop the third magga-vīthi which runs as the second magga-vīthi—just change 'sakadāgāmi into 'anāgāmi'.

The person now becomes an anagami or anagam (non-returner, i.e, he will not be reborn in the

kāma-abodes again).

4. If the anagam undertakes insight-meditation further, he may develop the fourth magga-vīthi. This vīthi again runs as before—just change 'anagami' into 'arahatta'.

The person now becomes an arahat (the perfect one).

Phala-samapatti Vithis

There are four noble individuals (ariya-puggala): the stream-winner (sotāpanna), the oncereturner (sakadāgāmi), the non-returner (anāgāmi) and the perfect one (arahat).

Each noble individual may enter the ecstatic absorption corresponding to the fruition of the path he has attained. By doing so, he is enjoying the peace of Nibbana, and during this absorption phala-samāpatti vithis occur as follows.

(Manda-paññā) Na-Da-"Ma-Pa-U-Nu-Vo-Pha-Pha-many times"-Bha-

(Tikkha-paññā) Na-Da-"Ma-U-Nu-Vo-Pha-Pha-many times"-Bha-

In developing the *phala-samāpatti vithis*, the noble individuals have to meditate on the three characteristics of existence until the *phala-samāpatti* vīthi arises.

- 1. When one of the three characteristics of existence enters the avenue of the mind-door of a sotāpanna, the life-continuum vibrates twice as bhavahga-calaña and bhavangupaccheda and becomes arrested. Then mano-dvārāvajjana considers the object and decides whether it is good or bad. Then one of the four hāṇa-sampayuttam mahā-kasala cittas, observing the ti-lakkhaṇa object, functions three times as parikamma (omit in tikkha-paññā person), upacāra and anuloma, and, observing Nibbāna, functions once as vodāna. After that sotāpatti-phala citta, observing Nibbāna, functions as appanā-javana many times as long as the person wishes up to seven days. Then bhavanga cittas sink into life-continuum and the person arises from phala-samāpatti;
- 3. When one of the three characteristics of existence enters the avenue of the mind-door of an anagami

4. When one of the three characteristics of existence enters the avenue of the mind-door of an

172 THE ESSENCE OF BUDDHA ABHIDHAMMA arahat one of the four ñāṇa-sampayuttaṁ mahā-kiriya cittas arahatta-phala citta

Nirodha-samapatti Vithi

'Nirodha-samāpatti' means 'attainment of extinction'. This vithi is developed to suspend temporarily all consciousness and mental 'activity, following immediately upon the sémi-conscious state called 'sphere of neither-perception-nor-nonperception' (neva-saññā-n'āsaññā-yatana jhāna).

Only anagami or arahat who has mastered all the eight absorptions (jhānas) is able to develop the nirodha-samāpatti vithi. The procedure for developing the nirodha-samāpatti vithi is as follows.

First of all the person enters the rūpāvacara first-jhāna, comes out of it and meditates on the jhāna components as to their characteristics of impermanence, suffering and non-self. He repeats this procedure with the rūpāvacara second-, third-, fourth- and fifth-jhānas, and then also with the arūpāvacara first-, second- and third-jhānas.

Then he makes four resolutions (adhitthana).

- 1. May I remain in *nirodha-samāpatti* for one hour, two hours,....., one day, two days....., or seven days (provided the period does not exceed his life span which he can know).
- 2. May my body, the things I am using and the building I am living be not harmed nor destroyed by any means (he can demarcate the area as mush as he likes).

- 3. May I come out of the *nirodha-samāpatti* as soon as Lord Buddha wishes to see me (this is at the time when Buddha is alive).
- 4. May I come out of the *nirodha-samāpatti* as soon as the congregation of monks wishes my presence (this is done out of respect for the congregation of monks).

Now the person develops the arūpāvacara fourth-jhāna and soon after the occurence of nevasaññā-n'āsaññā-yatana citta as appanā-javana for two conscious moments, the stream of consciousness is cut off—no cittas, cetasikas and cittaja-rūpa (corporeality formed by citta) arise any more.

The person will remain in this state of extinction of consciousness, its concomitants and cittaja-rūpa till the end of the period he has resolved to remain in nirodha-samāpatti. Though he does not breathe, eat, drink or know anything, he is still alive. When he comes out of the nirodha-samāpatti, anāgami-phala citta arises once as appanā-javana if he is an anāgāmi, or arahatta-phala citta arises once as appanā-javana if he is an arahat. Then bhavanga cittas sink into lifecontinuum.

Vipāka Niyāma

'Niyama' means 'law'. As vipāka cittas are the resultants of kammas (deeds), they arise in vithis regularly according to the kammas just as the immage appears in the mirror in accordance with the person in front of the mirror.

Now one comes across unpleasant objects such as a decaying carcass, night-soil, etc., on account of

akusala kamma (unwholesome deed). So at such moments, akusala vipāka cittas — namely, cakkhu-viññāna, sampaţicchana, santirana and tadālambana-rise in the vithi.

When one comes across fairly good objects, kusala vipāka cittas—namely, cakkhu-viññāna, sampaṭicchana, upekkhā-santirana and upekkha-tadālambaṇa arise in vīthis. When the object is very good, somanassa-santirana and somanassa-tadālambana arise instead of the upekkhā-ones.

Kusala- and akusala-javanas do not occur regularly as vipāka cittas. Yoniso-manasikāra (wise reflection) leads to the arising of kusala-javanas whereas ayoniso-manasikāra (unwise reflection) gives rise to akusala-javanas.

Frequency of Kama-javanas

Normally kāma-javana arises seven times in a vīthi. But in young babies and unconscious persons, the hadaya-vatthu is weak and, accordingly, kāma-javana arises six or five times in a vīthi.

In maranāsanna vithi, which occurs at the time of dying, kāma-javana occurs only five times.

In paccavekkhana-vīthis (retrospective cognitive process), the person is examining the jhāna-factors very rapidly and so kāma-javana occurs only four or five times per vīthi.

In upacāra-samādhi javana, kāma-javana occurs four times as parikamma, upacāra, anuloma and gotrabhu in persons of slow knowledge, or three times as upacāra, anuloma and gotrabhu in persons of quick knowledge.

Frequency of Appana-javanas

In all the rūpāvacara-jhāna and arūpāvacara-jhāna vithis, the corresponding appanā-javana occurs only once in a person who attains that jhāna for the first time. In order to enter the ecstatic absorption corresponding to that jhāna, he can develop jhāna-samāpatti vīthi in which appānā-javana occurs repeatedly many times.

In abhiññā appanā-vīthis, the rūpāvacara kusala fifth-jhāna arises once functioning as abhiññā-javana. In an arahat, the rūpāvacara kiriya fifth-jhāna arises once as abhiñña-javana.

In magga appanā-vīthis, the corresponding magga-javana arises only once followed by either two phala-cittas as appanā-javanas in a person of slow knowledge or three phala-cittas as appanā-javana in a person of quick knowledge.

In phala-samāpatti vīthis, the corresponding phala-citta occurs many times without break functioning as appanā-javanas.

In nirodha-samāpatti vīthi, neva-saññā-n' āsaññā-yatana citta arises twice just before extinction of consciousness and all mental activity. During the nirodha-samāpatti, cittas as well as cetasikas and cittaja-rūpa are extinct; so no javaņa exists. In coming out of the nirodha-samāpatti, anāgāmi-phala citta occurs once as appanā-javana in an anāgāmi or

176 THE ESSENCE OF BUDDHA ABHIDHAMMA arahatta-phala citta occurs once as appana-javana in an arahat.

As a regular procedure of javana, immediately after a somanassa (pleasant) kāma - javana, a somanassa appanā-javana should be expected, and after a kāma-javana, accompanied by equanimity, an appanā-javana, accompanied by equanimity, is to be expected.

Procedure of Tadalambana

Tadālambaņa (retention) occurs only in kāmapersons when they are observing kāma-sense objects with kāma-javana-vāra vīthis.

Generally upekkhā-javana or domanassa-javana is followed by upekkhā-tadālambaņa whereas somanassa-javana is followed by somanassa-tadālambaṇa. In practice the following procedure is observed.

- 1. After 4 mahā-kiriya upekkhā-javanas and 2 domanassa-javanas, 4 mahā-vipāka upekkha-tadālambaņas and 2 santiraņa-upekkhā tadālambaņas may arise.
- 2. After 4 mahā-kiriya somanassa-javanas and hasituppāda-javana, 4 mahā-vipāka somanassa-tadālambaņas and one somanassa-santirana tadālambaņa may arise.
- 3. After the remaining 10 akusala-javanas and 8 mahā-kusala javanas, all the 11 tadālambanas may arise.

Ágantuka Bhavanga

For a person whose rebirth-consciousness is a somanassa-citta, his life-continuum must also be a somanassa-bhavanga for life. The rebirth-consciousness and the bhavanga citta of a person must agree in bhūmi, citta, sampayutta-dhamma (concomitants), vedanā and sankhāra.

When that person is angry, his domanassajavanas cannot be followed by somanassa-tadālambaņa and somasassa-bhavanga because domanassa-vedanā opposes somanassa-vedanā just like fire opposing water. But according to his rebirth-consciousness, somanassa-tadālambaņa and somanassa-bhavanga must arise.

In this difficult situation, upekkhā-santirana arises once as an āgantuka-bhavanga (āgantuka means 'guest' or stranger) performing bhavanga-function and not the santirana-function.

The upekkhā-vedanā can be matched with both domanassa-vedanā and somanassa vedanā. The agantuka-bhavanga cannot perceive the sense-object which is observed by the domanassa-javana; it perceives a kāma-object which has been observed serveral times in the past.

Bhūmi and Cittas

'Bhumi' means 'plane of existence'. In kamaplane, 80 cittas with the exception of 9 mahaggatacittas may participate in vithis. The 9 mahaggata-cittas function as rebirth-consciousness, life-continuum and

death-consciousness in the respective brahma-planes.

In rūpa-planes, 2 ghāna-viññāna cittas, 2 jivhāviññāṇa-cittas, 2 kāya-viññāṇa-cittas, 8 mahā-vipāka cittas, 2 domanassa-cittas and 4 arūpa-vipāka cittas, totalling 20 in all, do not arise. So the remaining 69 cittas, may arise in rupa-planes. Of these 69 cittas, the five rūpa-vipāka cittas do not take part in vīthis; thus only the remaining 64 cittas will participate in vithis.

In arupa-planes, the 42 cittas which may or may not depend on hadaya-vatthu for their arising as mentioned in the 'Pakinnaka' Section' (Chapter 3) together with 4 arupa-vipāka cittas, totalling 46 in all, may arise. Of the 46 cittas, the 4 arūpa-vipāka cittas do not take part in vithis; thus only the remaining 42 cittas will participate in vithis.

Puggala-bheda

(Classification of Individuals)

'Puggala' means 'person' or 'individual'.

There are 4 types of puthujjana (worldlings) and 8 types of ariya-puggala (noble individuals).

- 1. Duggati ahetuka puggala
- 2. Sugati-ahetuka-puggala = 4 puthujjana persons
- 3. Dvi-hetuka-puggala
- 4. Ti-hetuka-puggala
- 5. Sotapatti-maggattha
- 6. Sakadāgāmi-maggattha = 4 maggattha persons
- 7. Anāgāmi-maggattha
- 8. Arahatta-maggattha

- 9. Sotapatti-phalattha
- 10. Sakadāgāmi-phalattha
- 11 Anāgāmi-phalattha
- 12. Arahatta-phalattha

= 4 phalattha persons

'Duggati' means 'woeful course of existence' while 'sugati' means 'happy course of existence'.

'Duggati-ahetuka-puggala' refers to persons in apāya, i.e. the four 'lower worlds' — namely, the animal world, the ghost-world, the demon-world and hell (niraya).

"Sugati-ahetuka-puggala" refers to persons who are retarded, blind or deaf by birth in the human-world and the catumahārājika-deva abode.

'Dvi-hetuka-puggala' refers to human beings and devas who are born with nāṇa-vippayutta mahā-vipāka cittas which lacks wisdom. These persons cannot attain jhānas and maggas in the present life however much do they try. They may, however, become 'ti-hetuka-puggala' in the next life as the result of their meditation efforts in the present life, and then attain jhānas and maggas easily if they will meditate again.

'Ti-hetuka-puggala' refers to human beings and devas who are born with nana-sampayutta mahayipaka cittas which contain wisdom. These persons may attain all the jhanas and all the maggas if they strennously undertake tranquility- and insight-meditations.

The four maggattha-persons and the four phalattha-persons are ti-hetuka-puggala. The maggattha persons last for just one conscious moment while they are realizing the corresponding magga-ñānas. After the magga-ñānas, they become phalattha- persons.

180 THE ESSENCE OF BUDDHA ABHIDHAMMA Puggala and Cittas

The cittas that can arise in various persons in different abodes are tabulated below.

Puggala	Kāma-bhūmi	Rûpa-bhûmi	Arūpa-bhūmi
Duggati-	Akusala cittas 12	ar∙ ya karang ki	
C 773 To Trans.	Ahetuka cittas	Nil	Nil

Chapter V

VITHIMUT OR BHŪMI

(Planes of Existence)

Vithimutta Cittas

In the previous chapter the functions of vithi-cittas have been described. Now in this chapter, we shall deal with the functions of 19 vithimutta cittas, i.e. process-freed consciousnesses.

The 19 vithimutta-cittas include 2 upekkhā-santiraņa cittas, 8 mahā-vipāka cittas and 9 mahaggata-vipāka cittas.

These cittas function as rebirth-consciousness for all living beings to be reborn in appropriate planes of existence; then they function as life-continuum for the whole existence of each living being and finally as death-consciousness of the being.

As the planes of existence are involved in describing the functions of these vithimutta-cittas, this chapter is entitled as "Bhūmi" as well as "Vīthimut".

Fourfold Catukkas

'Catukka' means 'a group of four'. The fourfold catukkas that will be dealt with in this chapter are:

- 1. Bhumi-catukka four planes of existence,
- 2. Patisandhi-catukka = four modes of rebirth.
- 3. Kamma-catukka four kinds of action, and
- 4. Maranuppatti-catukka = fourfold advent of death.

Four Planes of Existence

The plane of existence (bhûmi) is the place where living-beings come into existence, go around for a

182 THE ESSENCE OF BUDDHA ABHIDHAMMA living, and finally die.

The four planes of existence are:

- 1. Apaya-bhumi or Kamaduggati-bhumi = the plane of misery,
- 2. Kāmasugati-bhūmi = sensuous blissful plane,
- 3. Rupa-bhumi = plane of fine material, and
- 4. Arūpa-bhūmi = plane of non-material.

 Among these, the apāya-bhūmi is again fourfold—

Among these, the apāya-bhūmi is again fourfold-namely,

- (i) niraya (hell) or woeful state,
- (ii) tiracchana (animal kingdom);
- (iii) peta world (unhappy ghosts) and
- (iv) the host of asuras (demons).

(apaya = devoid of happiness)

(kāmaduggati = enjoy sensual pleasures but miseries abound)

The kamasugati-bhumi consists of the human realm and 6 deva-planes making 7 planes in all. (kamasugati = sense-pleasures abound)

Rūpa-bhūmi consists of 3 first-jhāna planes, 3 second-jhāna planes, 3 third-jhāna planes and 7 fourth-jhāna planes totalling 16 planes altogether.

Arūpa-bhūmi is fourfold-namely,

- (i) Ākāsānatīcāyatana-bhùmi = the realm of infinite space,
- (ii) Viññānañcāyatana-bhūmi = the realm of infinite consciousness,
- (iii) **Āķińcaňňáyatana-bhūmi** = the realm of nothingness, and
- (iv) N'evasañña-n'asaññayatana-bhumi = the realm of neither perception nor non-perception.

Counting all the separate planes, we get 4 apaya planes, 7 kamasugati-planes, 16 rupa-planes and 4 arupa-planes, making 31 planes in all.

Situation of Bhumis

- 1. The human realm, the animal realm, the peta realm and the asura realm exist on the surface of the earth. These realms are not separated, but the beings move about in their own worlds.
- 2. Niraya represents several woeful states where beings atone for their evil kamma. They are not eternal hells. Upon the exhaustion of the evil kamma, beings may be reborn in good states as the result of their past good actions.

There are 8 major nirayas or narakas which exist below the surface of the earth. Their names, in order of distance from the surface of the earth, are Sanjiva, Kalasutta, Sanghata, Roruva, Maharoruva, Tapana, Mahatapana and Avici.

(The reader may refer the Bhumi-chart attached at the back of this book. The chart also mentions the distances between planes in Yojana which is about 8 miles.)

Each major niraya has the form of a square. On each side of the square there are again four minor nirayas—namely, sewage swamp, field of hot ash, forest of thorny trees and hot river with canes.

Thus there are 16 minor nirayas on the four sides of a major niraya and 128 minor nirayas for the eight major nirayas.

3. The six sensuous celestial planes (deva-planes) are situated above the ground and high up in the sky.

- (i) Catumahārājika = The lowest of the heavenly realms where the four guardian deities reside with their followers. Some lower beings of this plane have their dwellings on earth.
- (ii) Tāvatimsā = The realm of 33 gods and their followers. Sakka, the king of the gods, reside in this celestial plane.
- (iii) Yāmā = The realm of the Yāmā gods.
- (iv) Tusita = The heaven of delight.
- (v) Nimmānarati = The heaven of the gods who rejoice in their own creations.
- (vi) Paranimmita-vasavati = The heaven of the gods who bring under their sway things created by others.

These six celestial planes are temporary blissful abodes where beings live happily enjoying sensual pleasures as the results of their good kammas.

Superior to these sensuous planes are the Brahma realms where beings delight in jhāna - bliss achieved by their rūpāvacara - and arūpāvacara - kusala kammas.

- 4. The 16 planes of fine material (Rūpa-bhūmi) are situated much higher than the 6 sensuous blissful planes.
- (i) The 3 planes-of first jhana are:

Brahma-parisajjā = The realm of Brahma's retinue,

Brahma-purohita = The realm of Brahma's ministers,

Mahá-brah mā = The realm of great Brahmās.

(ii) The 3 planes of second jhana are:

Parittäbhä = The heaven of minor lustre.

Appamänäbhä = The heaven of infinite lustre,

Abhassará = The heaven of radiant gods.

(iii) The 3 planes of third jhana are:

Paritta-subhā = The heaven of the gods of minor aura,

Appamána-subhá = The heaven of the gods of infinite aura,

Subha-kinhā = The heaven of the gods full of steady aura.

(iv) The 7 planes of fourth jhana are:

Vehapphala = The heaven of the gods of great reward,

= The heaven of Brahmas Asañña-satta with just rupa and no imir is the nama, which is larger to

Suddhavasa = The heaven of pure abodes — only anāgāmis and arahats are found in these abodes.

Suddhavasa is made up of 5 planes:

Avihā = The durable heaven.

Ātappā= The serene heaven,Sudassā= The beautiful heaven,Sudassī= The clear-sighted heaven,Akanittha= The supreme heaven.

5. The 4 planes of non-material (Arūpa-bhūmi) are situated high above the planes of fine material. The names of the 4 Arūpa-planes have been mentioned above.

Bhumi and Persons

Twelve types of persons (puggala) have been mentioned just before the conclusion of chapter IV. We shall now locate these persons in the various planes of existence to which they belong.

- 1. In the four apāya abodes, only the duggatiahetuka person is found.
- 2. In the human realm and catumahārājika realm, eleven types of persons with the exception of the duggati-ahetuka person are persent.
- 3. In the five higher sensuous blissful planes, ten types of persons with the exception of the duggatiahetuka person and the sugati-ahetuka person are persent.
- 4. In the ten rūpa-brahma planes with the exception of asañña-satta and five sudhāvāsas, one tihetuka-puthujjana person and eight ariya persons are present.
- 5. In the asañña-satta heaven, only one sugatiahetuka person who is born with jivita rūpa only is present.

6. In the five sudhāvāsa heavens, anāgāmiphalattha person, arahatta-maggattha person and
arahatta-phalattha person are present. The anāgāmis,
who attained the fourth jhāna in the human realm, are
born here after their expiration in the human realm. In
due course they attain the arahatship in the sudhāvāsa
heavens.

7. In the four arupa-planes, seven ariya persons (with the exception of sotāpatti-maggaţtha person) and one tihetuka-puthujjana person are persent. Sotāpatti-magga is not attainable in these planes. Sotāpanna persons, who attain arupa-jhāna in the human realm, may be reborn in arūpa-planes and they may attain higher maggas and phalas in due course.

Four Modes of Rebirth

(Patisandhi - catukka)

1. Apāya-paţisandhi = Akusala-vipāka upekkhā (woeful rebirth) santiraņa ahetuka citta

2. Kāma-sugātipatisandhi (Sensuous blissful rebirth) (a) Kāma-sugati ahetukapaṭisandhi = kusala-vipāka santirana ahetuka-citta.

(b) Kāma-sugati sahetukapaṭisandhi = 8 mahā-vipāka cittas.

3. Rūpa-paţisandhi = 5 Rūpāvacara-vipāka cittas + (rebirth in Rūpa- jīvita-navaka- kalāpa rūpa-paţisandhi.

4. Arūpa-patisandhi = 4 Arūpavacara - vipaka cittas. (rebirth in the Arūpa planes)

Notes: (1) One apāya-patisandhi, one kāma-sugati ahetuka-patisandhi and 8 kāmasugati sahetuka patisandhis together make up 10 kāma-patisandhis.

(ii) Five rūpāvacara-vipāka cittas and jivitanavaka-kalāpa rūpa-paṭisandhi together make up 6

rūpa-patisandhis.

(iii) Ten kāma-paţisandhis, 6 rūpa-paţisandhis and 4 arūpa-paţisandhis together make up 20 types of patisandhi (rebirth).

The number of patisandhi exceeds the number of rebirth-consciousness by one, because there is one rupa-patisandhi.

Person and Patisandhi

1. The four apāya-persons in niriya, tiracchana, peta and asura planes are born with akusala-vipāka upekkhā santiraņa ahetuka citta.

This citta is the resultant of immoral kamma. It becomes the relinking (rebirth-consciousness) at the moment of descent into the woeful state. Then it lapses into life-continuum (bhavanga) and finally it becomes the death-consciousness and is cut off.

- 2. In the human realm and catumahārājika realm, degraded human beings such as those who are blind, deaf, dumb, retarded or deformed by birth, and earth-bound degraded asurās such as ghosts are born with kusala-vipāka upekkhā santiraņa ahetuka citta.
- 3. In all the seven sensuous blissful planes, normal human beings and deities (devas) are born with any one of the eight mahāvipāka cittas. Thus the eight

great resultants act as the relinking (rebirthconsciousness), the life-continuum and the death consciousness everywhere in the blissful sensesphere.

Among humans and deities, dvi-hetuka persons are born with four mahā-vipāka nāṇa-vippayutta cittas whereas ti-hetuka persons are born with four mahā-vipāka nāṇa-sampayutta cittas.

4. Among the rūpa-brahmās the brahmās of the 3 first-jhāna planes are born with the rūpāvacara first-jhāna vipāka citta,

the brahmas of the 3 second-jhāna planes are born with either the rūpāvacara second-jhāna vipāka citta or the rūpāvacara third-jhāna citta,

the brahmas of the 3 third-jhana planes are born with the rupavacara fourth-jhana citta,

the brahmas of the fourth-jhāna planes, with the exception of asañña-satta brahmas, are born with the rūpāvacara fifth-jhāna citta, and

Asañfina-satta brahmas are born with jivita-navaka-kalāpa rūpa.

5. Ākāsānañcāyatana-brahmas are born with ākāsānañcāyatana-vipāka citta,

Viññānañcāyatana-brahmas are born with viññānañcāyatana-vipāka citta,

Ākincannāyatana-brahmas are born with ākincannāyatana-vipāka citta, and

Nevasaññā-nāsaññāyatana-brahmas are born with nevasaññā-nāsaññāyatana-vipāka citta.

The Method of Naming Rupa-planes

The reason for some disagreement in the names of the rupa-planes and the rebirth consciousness of brahmas is that there are two ways of counting rupaìhānas.

For persons of slow wisdom, after attaining the first rūpāvacara jhāna, they have to eliminate the jhāna factors one by one in going up to the higher jhanas. Thus, for this type of person, there are five rupavacara

For persons of quick wisdom, after attaining the first jhāna, they eliminate vitakka and vicāra together in going to the second jhāna. Thus their second jhāna is equivalent to the third jhāna of the slow-wisdom people, and their fourth jhana is equivalent to the fifth ihāna of the slow-wisdom people.

So there are only four rupavacara ihanas for

quick-wisdom people.

In practice, as is observed in Pa-auk Meditation Centre near Mawlamyine, almost all people eliminate vitakka and vicāra together. Hence the method of counting rūpāvacara jhānas up to the fourth level is the more common one, and consequently the jhanaplanes are named according to this method.

In the Bhūmi Chart (i.e. Chart No. 5.1 attached at the back of this book), the rebirth-consciousness is described according to the five rūpāvacara-ihāna method whereas the Rupa-planes are described according to the four rūpāvacara-jhāna method.

The two methods of counting rūpāvacara jhānas, together with the names of the rūpa-planes, are

illustrated in Table 5.1.

Table 5.1 Dual Method of Counting Rüpávacara Jhánas

Jhāna factors	Five-jhāna method	Four-jhāna method	Name of Rupa-plane
tak, cā, pi, su, ekaggatā	first jhāna	first jhäna	first jhāna
cã, pi, su, ek pi, su, ek	second jhāna	second ihāna	second jhäna
su, ek	fourth jhāna	third jhāna	third jhāna
up, ek	fifth jhāna	fourth jhāna	fourth jhäna

Four Modes of Conceiving

- 1. Andaja-patisandhi = conceiving in egg shell
- 2. Jalabuja-patisandhi = conceiving in the womb
- 3. Samsedaja-patisandhi = conceiving in the hollow of a tree-trunk, in a fruit, in a flower or in marsh.
- 4. Opapatika-patisandhi = rebirth in the form of a fully grown-up person about 16 years of age as if jumping out of no where.

Note: Andaja-pațisandhi and jalābuja-pațisandhi are also collectively known as gabbhaseyaka-pațisandhi.

Applications

- 1. Woeful persons in *niraya* are born by the way of opapātika-patisandhi only.
- 2. Petas and asurās are born by either jalābujapaţisandhi or opapātika-paţisandhi.

- 3. Animals are born by all the four modes of conceiving.
- 4. Human beings are first born by opapatika-patisandhi at the beginning of the world, and later by either jalābuja-patisandhi or samsedaja-patisandhi.
- 5. Ghosts or earth-bound asurās are born by either jalābuja-patisandhi or opapātika-patisandhi.
- 6. Celestial devas and brahmas are born by opapātikapatisandhi only.

Life-spans of Beings

1. Woeful persons in the four apāya abodes do not have fixed life-spans. They suffer in woeful states in accordance with their kammas. Their age-limit differs according to their evil deeds. Some are short-lived and some are long-lived.

During Buddha's time the monk *Tissa*, on expiring, became a flea for seven days in the new robe, which was offered to him by his sister and which he was attached to at the time of expiring.

Again, Mallika, the queen of king Kosala, had to suffer in a woeful state only for seven days due to an immoral deed, and then she was reborn in the sensuous blissful plane for her good deed. On the other hand, Devadatta is destined to suffer for an aeon in niraya for his serious bad kamma of causing a chasm in the Order of Brotherhood.

2. The human beings also do not have fixed lifespan; the age-limit rises from ten years to uncountable time (asankheyya) and then falls to ten years again.

The interim period, when the age-limit of human beings rises from ten to uncountable time and then falls to ten again, is known as an antara-kappa. In other

words, an antara-kappa is measured by the time required by the pendulum of the life-term of generations to swing from a ten-year-term to an asankheyya-term and back again to the ten-year-term.

Sixty-four such antara-kappas equal one asankheyya-kappa, literally an incalculable cycle. An asankheyya-kappa exceeds the time required to exhaust a big box a yojana each in length, breadth, and height, filled with mustard seeds, by throwing away a seed once in every hundred years. An asankheyya-kappa may be taken as an aeon.

Four asankheyya-kappas equal one mahā-kappa, literally a great cycle. One mahā-kappa is also known as a world-cycle.

- 3. The earth-bound deities and degraded asurās both belong to the catumahārajika plane. They do not have fixed life-spans.
- 4. Devas and brahmas in celestial planes have fixed life-spans.

Table 5.2 Life Spans of Celestial Devas

Deva-plane	Respective deva-year	Human year
Catumahārājika	<i>5</i> 00	9,000,000
Tavatimsā	1000	36,000,000
Yāmā	2000	144,000,000
Tusitã	4000	576,000,000
Nimmänarati	8000	2314,000,000
Paranimmita vasavati	16000	9216,000,000

- Notes: (i) A celestial day in upper Catumahār-ājika is equal to 50 human years; a celestial day in Tāvatimsā is equal to 100 human years; a celestial day in Yāmā is equal to 200 human years; and so on. Thirty celestial days make a month and 12 months make a year.
- (ii) As we go up from a lower plane to a higher plane, the life-term is doubled and the length of the celestial day is also doubled. So the time in human years is increased by four times. This is the key to remember the life-spans of different deva-planes double the celestial years and multiply the human years by 4 as one goes up the ladder.
- (iii) Lord Buddha preached Abhidhamma-desanā in Tavatimsā for three months at a stretch without stopping. No human beings would be able to listen to that long sermon without break. But a period of 90 days on earth is just 3.6 minutes in Tavatimsā. So the gods have no trouble to listen to Lord Buddha.

Destruction of the World

According to the Buddhist canon, there are infinite numbers of worlds and no world is permanent. Our own earth will come to an end one day. This is somewhat co-related to the observations through the most powerful telescope that old stars are being burnt out and new stars are being formed.

The world may be destroyed by fire, water or wind. When it is destroyed by fire, all the world up to the 3 first-jhāna planes will be burnt out. After being destroyed seven times consecutively by fire, the world will be destroyed by water on the eighth time when all the world up to the 3 second-jhāna planes will be destroyed.

Table 5.3 Life-spans of Brahmas

Brahma-plane Name of plane		Life span	
First – jhāna 3 pļanes	Brahma-parisajjā Brahma-purohitā Mahā-brahmā	1/3 asankheyya-kappa 1/2 asankheyya-kappa 1 asankheyya-kappa	
Second jhäna 3 planes	Parittābhā Appamānābhā Abhassarā	2 world – cycles 4 world – cycles 8 world – cycles	
Third-jhāna 3 planes	Paritta-subhā Appamāna-subhā Subha-kinhā	16 world – cycles 32 world – cycles 64 world – cycles	
Fourth-jhāna 7 planes	Vehapphala Asañña-satta Avihā Ātappā Sudassā Sudassī Akanittha	500 world – cycles 500 world – cycles 1000 world – cycles 2000 world – cycles 4000 world – cycles 8000 world – cycles 16000 world – cycles	
Arūpāvacara 4 planes	Äkäsänañcäyatana Viññänancäyatana Akiñcaññäyatana N'evasaññä— näsaññäyatana	20000 world – cycles 40000 world – cycles 60000 world – cycles 84000 world – cycles	

After being destroyed in regular cycles 7 times by fire and one time by water, the world will be destroyed by wind on the 64th time when all the world up to the 3 third-jhana planes will be destroyed.

Usually Lokapāla-devas (guardian-deities of the world) inform the people in advance about the coming destruction of the world. So the people, out of fright, perform good deeds and undertake samatha (tranquility) meditation to attain the higher jhānas in order to be reborn in higher celestial planes so as to escape the calamity.

Four Kinds of Kamma

(Kamma-catukka)

Kamma, Sanskrit karma, literally means action or deed. As a rule good actions bear good results and bad actions bear bad results.

Now action may be performed by bodily movement (kāya), by words of mouth (vact), or by thought (mano). But the body and the mouth cannot move on their own accord; they have to be moved by the mind (citta) through cittaja-rūpa.

Again citta is just the awareness of a sense—object; it does not give the order or direction to perform an action on its own accord. It is the volition (cetanā) which directs the citta and its concomitants to perform the action. So cetanā is responsible for carrying out an action.

Thus, strictly speaking, kamma means all moral and immoral volitions (cetanās). The volition having the root in ignorance (moha), greed or attachment (lobha) or anger (dosa) is evil. The volition, which is accompanied by generosity (alobha), good-will (asdosa) and wisdom

(paññā), .is wholesome.

In other words, the cetanās present in the 12 akusala cittas are immoral kammas whereas the cetanās present in 8 mahā-kusala cittas, 5 rūpāvacara-kusala cittas are moral kammas.

Now cetanā and its concomitants (i.e. citta and cetasikas other than cetanā) perish after performing their respective purposes. But before they perish, they leave their kammic property in the citta- stream. This kammic property is the potential kamma which will produce its due effect in some proper time, and the effect will fall on the doer himself.

It is somewhat analogous to Newton's third law of motion in Physics. The law states: "To every action, there is an equal and opposite reaction". Thus a person, who performs a good or bad action, should expect an equal and opposite reaction either in this life or in some future life.

Furthermore, that opposite reaction may come many times as the *kamma* has been multiplied to more than a billionfold by the property of *citta*. How? As mentioned earlier, *cittas* can occur at the rate of more than a trillion times per eye wink. So many billion cittas accompanied by the *volitions* of killing a mosquito will arise in striking the mosquito. These many billion *cittas* together with the voilitions of killing will deposit many-billion *kamma* seeds in the citta-stream.

As a vegetable seed gives rise to a new plant of the same kind of tree which gives the seed, so also a kamma seed will produce a new being in a plane appropriate to the original kamma. An immoral kamma will give rebirth in a woeful plane whereas a moral

kamma will give rebirth in a blissful plane.

Just as many-billion immoral kammas are produced in a single act of killing a mosquito, so in performing a wholesome deed , such as giving charity, many-billion moral kammas are produced.

Thus the number of moral as well as immoral kammas accumulated in this life as well as in uncountable past lives are so numerous that it cannot be handled by a super-computer. Yet all these kammas are in the citta stream of each individual following him wherever he emerges in a new life.

Just as every object is accompanied by a shadow, even so every *kamma* is accompanied by its due effect. *Kamma* is action and *vipāka* (fruit or result) is its reaction. It is the cause and the effect. Like a seed is *kamma*, like a plant is *vipāka*. As we sow, so we reap either in this life or in a future life. What we reap today is what we have sown either in the present or in the past.

Kamma is a law in itself, and it operates in its own field without any intervention of an external ruling agency. Inherent in kamma is the potentiality of producing its due effect. Kamma is the cause; vipāka is the effect. The cause produces the effect; the effect explains the cause. The law of cause and effect rules everywhere.

Though we cannot know the individual kammas in a person, we can classify the kammas into several types as described by Buddha, and predict when, where and how each type will bear its result.

(a) Kicca-kamma Catukka
With respect to function, there are four kinds

of kamma:-

- 1. Janaka-kamma = reproductive kamma which produces mental aggregates and material aggregates at the moment of conception as well as throughout the life-time of the individual;
- 2. Upatthambhaka-kamma = supportive kamma which supports the janaka-kamma as well as the effect of the jhanaka-kamma throughout the life-time of the individual;
- 3. Upapīlaka-kamma = obstructive kamma which weakens, interrupts or retards the fruition of the janaka kamma;
- 4. Upaghātaka-kamma = destructive kamma which not only cuts off the effect of the janaka kamma but also destroys the janaka kamma and produce its own effect. In other words, the person dies abruptly and is reborn in accordace with the upaghātaka-kamma.

As an example of the operation of the above four kammas, the case of Devadatta may be cited. His good janaka-kamma conditioned him to be born in a royal family. His continued comforts and prosperity were due to the action of the janaka-kamma as well as the supportive kamma. The obstructive kamma came into play when he was excommunicated from the Sangha and subject to much humiliation. Then his serious immoral kamma causing a schasm in the Sangha operated as the destructive kamma which sent him down to the avici hell.

(b) Pākadānapariyāya-kamma Catukka
With respect to the priority in bearing results, there
are four kinds of kamma:—

1. Garuka-kamma = weighty kamma which is so

strong that no other kamma can stop its function in the next life. In other words, it certainly produces its results in the next life.

Bad weighty kammas are pañcānantariya kamma – namely, (i) creating a schasm in the Saṅgha, (ii) wounding a Buddha, (iii) murdering an arahat, (iv) matricide, and (v) parricide. Niyata-micchāditthi (permanent false view) is also termed as one of the weighty kammas.

On the other hand, 5 rūpāvacara-kusala kammas and 4 arūpāvacara-kusala kammas are good weighty kammas. Lokuttara- magga is also a weighty force for it closes the doors of the four apāya abodes for ever.

- 2. Asanna-kamma = proximate kamma that is performed or remembered just before death.
- .3. Acinna-kamma = habitual kamma which is performed regularly, or it may be a kamma which is performed once and is recollected and remembered all the time.
- 4. Katattā-kamma = unspecified kamma which is done once and soon forgotten.

Now if we have any garuka-kamma, it will produce its result when we die and condition our next life.

If we do not have any garuka-kamma, which is often the case, then we must rely on āsanna-kamma to condition our next life. To get a good āsanna-kamma, sons and daughters or relatives and friends should arrange wholesome deeds such as offering robes to monks or listerning to Dhamma-preaching for the person on his or her death-bed. The dying person should also be reminded of his past good deeds.

A good example is Reverend Sona's father in Ceylon. The father made a living by hunting. When he was too old to go hunting, he became a monk in his son's monastery. Soon he fell ill and had a vision that hell hounds were coming up the hill to bite him. He was frightened, and so he asked his son to drive away the hounds.

His son, who was an arahat, knew that his father was having a gati-nimitta to be cast away in niraya. He asked his disciples to gather flowers quickly and spread them all over the pagoda in the monastery. Then they carried his father together with his bed to the pagoda. Rev. Sona reminded his father to pay homage to the pagoda and to rejoice in the offering of flowers on his behalf.

The old monk calmed down, paid respect to the pagoda and was delighted in seeing the flowers being offered to the pagoda on his behalf. At that moment, his gati-nimitta changed. He told his son, "Your beautiful step-mothers from celestial abode come to take me along". The son was satisfied with the result of his efforts.

This is a very good way of repaying the gratitude we owe to our parents.

To be sure to get a good āsanna-kamma, however, we should develop an ācinna-kamma while we are alive. The best ācinna-kamma is tranquility- or insight-meditation which can be performed all the time. When it becomes habitual, it will be remembered and practised near the time of death.

King Dutthagamani of Ceylon was in the habit of giving alms to monks before he took his meals. Once his brother rose against him and drove him into the forest. While hiding in the forest, he asked his attendant

whether they had anything to eat. His attendant replied that he had brought a bowl of royal meal.

The king divided the meal into four portionsone portion is for him, one for the attendant, one for the horse and one for offering. He then asked the attendant to invite monks or recluses to come and collect his offering.

Of course they could see no one around. But on the king's insistence, the attendant invited aloud. Lo! A reverend monk came moving in the air. The monk was an arahat with the knowledge of abhiññā. The king was so delighted that he offered not only the fourth portion of the meal but also his portion. The attendant followed suit and offered his share. On looking at the horse, it nodded indicating that it wanted to offer its share as well.

The king was in ecstasy for some time and then felt hungry again. Knowing that the arahat could hear him with his divine ear (dibba-sota), he made a wish to send him any remnant of the meal. The arahat sent him the begging-bowl which came flying in the air. The king took the bowl and found it full of food. The food can be multiplied by iddhi-vidha-abhināā (super-normal power). The king, the attendant and the horse could eat to their full.

Later the king regained power and donated a tremendous amount of his wealth to Buddha-sāsanā (Buddhist religion) for building the great thūpa called Mahā-cetiya, many monasteries and other religious buildings. He had all his good deeds recorded. When he was on his death-bed, he listened to the records, which were read to him. On coming to the item of offering a meal to the arahat in the forest, he asked

the reader to stop the reading. He was in great joy and, remembering that deed, he died. This good *kamma* gave him rebirth in *Tusitā* realm.

Cunda, a butcher, made a living by slaughtering pigs cruelly for more than fifty years. When the time was up, the fire from *niraya* came up and burnt him making him squeal like a pig for seven days. He was in *niraya* as soon as he died. Thus ācinna-kamma becomes āsanna-kamma and produces its result.

The Simile of a Cattle-shed

Suppose that many cattle are kept in a big shed for the night. In the morning the door of the shed is opened to let the cattle go out to the pasture. Now which one will come out first?

All the cattle want to get out as soon as possible. If there is an exceptionally strong big one, this one will walk majestically to the door and come out first. This one is like a garuka-kamma which is uncontested to bear its result in the next life.

Now, if there is no exceptionally strong big one, the one nearest the door may come out first. This is similar to the *āssanna-kamma* bearing its fruit in the next life.

Sometimes a vigilant one, which has regularly noticed the time when the shed is opened, may walk to the door just before it is opened and come out first when the door is opened. This is like the ācinna-kamma producting its result in the next life.

Sometimes an unexpected frail one, by being pushed by stronger ones, may come out of the shed first. This is similar to the case when an unexpected kajattā-kamma has the chance to condition the next life.

Queen Mallika led a righteous life, but she remembered a lie, which she had told King Kosala long ago, at her death moment. So this bad katattā-kamma cast her down to a woeful state for seven days.

(c) Pākakāla-kamma Catukka

With respect to the time of taking effect there are four kinds of kamma:

- Ditthadhammavedaniya-kamma = immediately effective kamma which bears fruits in the present life;
- Upapajjavedaniya-kamma = subsequently effective kamma which bears fruits in the next (second) life;
- 3. Aparāpariyavedaniya-kamma = idefinitely effective kamma which bears fruits from the third life till the last life when the person realizes Nibbāna;
- 4. Ahosi-kamma = defunct kamma which no longer bears fruits.

In studying vithis, we notice that mahā-kusala citta or akusala citta functions seven times as javana in normal situations. The cetanā (volition) associated with the first javana is named dithadhammavedaniya-kamma which will produce its result in this very life. If it does not operate in this life, it becomes defunct.

Devadatta and Cunda were burnt by niraya fire in their present lives. Poor Kākavaliya couple, after offering boiled rice to Venerable Sariputta, became very rich in seven days.

Of the seven javanas, the first javana is the weakest. The next weakest is the seventh-javana. The cetanā associated with this javana is called

upapajjavedaniya-kamma. It produces its result in the next (second) life. If it does not operate in the second birth, it too becomes defunct or ineffective (ahosi).

The five intermediate javanas are strong, and the cetanās associated with them are known as aparapāriya-vedaniya-kamma. As millions of vithis occur in an act of wholesome or unwholesome deed, there will arise many millions of this type of kamma during the action. So this kamma will operate indefinitely from the third birth till the last one when the individual attains Nibbāna. No one, not even Buddhas and arahats, is exempt from this class of kamma.

So for every action we have performed we should expect the consequences not only in this life but in indefinite lives in the future in the course of our wanderings in Samsāra. So — be careful!

(d) Pakathana-kamma Catukka

With respect to the place where the kammic effect takes place, kamma is divided into four classes:—

- 1. Akusala kamma = immoral action which produces its effect in the four apāya abodes.
- Kāmāvacara-kusala kamma = moral action in the sense-sphere that produces its effect in the seven sensuous blissful 'realms' (Kāmaloka);
- 3. Rūpāvacara-kusala kamma = moral action in the fine-material sphere that produces its effect in the sixteen rūpa-realms (Rūpaloka);
- 4. Arūpāvacara-kusala kamma = moral action in the non-material sphere that produces its effect in the four arūpa-realms (Arūpaloka).
- Notes:— (i) In essence, it should be noted that:

 Akusala-kamma = 12 cetanās associated with

12 akusala cittas.

Kāmāvacara-kusala kamma = 8 cetanās accompained with 8 mahā-kusala cittas.

Rūpāvacara-kusala kamma = 5 cetanās accompanied with 5 rūpāvacara kusala cittas.

Arūpāvacara-kūsala kamma = 4 cetanās accompanied with 4 arūpāvacara kusala cittas.

(ii) The kammic effect is of two kinds - Vipākanāmakkhandha and kaṭattā-rūpa.

Vipāka-nāmakkhandha = vipāka citta and its concomitants

Katatta-rupa = kammaja-rupa and utuja-rupa Kammaja-rupa is corporeality produced by kamma. Utuja-rupa is corporeality produced by temperature.

Furthermore the kammic effect occurs at paţisandhi-kāla (i.e. the arising moment of paţisandhi citta) as well as at pavatti-kāla (i.e. from the existing moment of paţisandhi-citta till death).

Kamma-dvara and three Types of Camma

The place where kamma occurs or one means by which kamma arises is called kamma-dvāra. There are three kamma-dvāras.

- 1. **Kāya-dvāra** = special bodily movement called kāyaviñāatti where bodily action (kāya-kamma) occurs.
- Vacī-dvāra = speech-producting movement of the mouth called vaciviññatti where verbal action (vacikamma) arises.
- Mano-dvāra = all cittas where mental action (mano-kamma) arises.
 In accordance with three kamma-dvāras, there are

three types of kamma.

- Káya-kamma = bodily action generally performed by special bodily movement called kāyaviññatti.
- 2. Vaci-kamma = verbal action generally performed by special movement of the mouth called vaciviññatti.
- 3. Mano-kamma = mental action performed by the mind through thinking, plotting, meditating, etc.

Ten Akusala Kamma-pathas

" Kamma-patha' means ' course of action'. It is the name for a group of 10 kinds of either unwholesome or wholesome actions. The unwholesome actions may be divided into three groups in accordance with three types of kamma.

1. Akusala-kāya-kamma

There are 3 unwholesome bodily actions:—

1. Pānātipātā = killing any living being,

2. Adinnādānā = stealing or taking others' property unlawfully,

3. Kamesu-micchācārā = sexual misconduct such as unlawful sexual intercourse.

Akusala-vacī-kamma

There are 4 unwholesome verbal actions:—

Musāvādā = lying,

Pisunavācā = slandering,

Pharusavācā = rude or harsh speech,

Samphappalāpa = vain talk or foolish babble.

Akusala-mano-kamma

There are 3 unwholesome mental actions:—

8. Abhijjhā = covetousness,

9. Vyāpāda = ill-will,

10. Micchaditthi = wrong view.

The ten unwholesome actions are also called "ten ducaritas", meaning "evil conduct".

Of the ten, killing, harsh speech and illwill are accomplished by dosa-mūla cittas.

Sexual misconduct, covetousness and wrong view

are accomplished by lobha-mula cittas.

Stealing, lying, slandering and vain talk may be accomplished by either lobha-mūla or dosa-mūla cittas.

Ten Kusala-kamma-pathas

These are ten wholesome actions also known as "ten sucaritas", meaning "ten types of good conduct". They are also divided into three groups in accordance with three types of kamma.

1. Kusala-kãya-kamma

There are three wholesome bodily actions:

- 1. Pānātipātā-virati = avoidance of killing,
- 2. Adinnādānā-virati = avoidance of stealing,
- 3. Kamesu-micchācārā-virati = avoidance of sexual misconduct.

2. Kusala-vaci-kamma

There are four wholesome verbal actions:—

- 4. Musāvādā-virati = avoidance of lying,
- 5. Pisunavācā-virati = avoidance of slandering,
- 6. Pharusavācā-virati = avoidance of harsh speech,
- 7. Samphappalāpa-virati = avoidance of vain talk. In other words, one should make use of true speech, concilliatory speech, mild speech and wise speech.

3. Kusala-mano-kamma

There are three wholesome mental actions:—

- 8. Anabhijjhā = absence of covetousness (unselfishness),
- 9. Avyāpāda = good-will,
- 10. Sammā-ditthi. = right view.

Puñña-kiriya Vatthu

(Bases of Meritorious Action)

If one likes to accumulate wholesome *kamma* in this life, there are ten bases of meritorious actions which produce good effect and which should be done by all means.

- 1. Dāna = giving charity or generosity
- 2. Sila = morality; observing five precepts, eight precepts, ten precepts, etc.
 - 3. Bhāvanā = meditation both tranquility and insight
- 4. Apcayana = reverence to elders and holy persons
- 5. Veyāvacca = service in wholesome deeds
 - 6. Pattidana = transference of merit
 - 7. Pattānumodana = rejoicing in others' merit
 - 8. Dhamma-savana # listening to the Doctrine
 - 9. Dhamma-desanā = expounding the Doctrine
- 10. Ditthijjukamma = straightening one's right view

 The above ten puñān-kiriya-vatthus can be classified into three groups:—
 - 1. Dana group = Dāna, Pattidāna, Pattānumodana,
 - 2. Sila group = Sila, Apacayana, Veyavacca,
 - 3. Bhāvanā group = Bhāvanā, Dhamma-savana, Dhamma-desanā, Diţthijjukamma.

Ditthijjukamma may also be included in all the three groups, because one will perform dana, sīla and bhāvana only if one has the right view about kamma

and its effect.

The dāna group represents "alobha = generosity", and opposes "issā = jealousy" and "macchariya = stinginess". It is compared to the legs.

The sīla group represents "adosa = good-will" and opposes "lobha = attachment" and "dosa = anger".

It is compared to the body.

The bhāvanā group represents "amoha = wisdom" and opposes "moha = ignorance". It is compared to the head.

To have a complete set of legs, body and head, one must perform all the three groups of puñña-kiriya-vatthu.

The ten puñña-kiriya-vatthus are performed with 8 mahā-kusala cittas unless one attains jhāna or magga in meditation. So they generally give rise to kāmāvacara-kusala kamma.

Rūpāvacara-kusala kamma and arūpāvacarakusala kamma are purely mental actions and they belong to the bhāvanā group.

Dvihetuka and Tihetuka Kusala Kamma

If one performs a wholesome deed with the knowledge of kamma and its effect, i.e. kammassakatañāṇa, then ñāṇa-sampayutta mahā-kusala cittas arise.

The cetanās associated with these cittas are accompanied by three good roots – namely, alobha, adosa and amoha. So tihetuka-kusala kamma is acquired:

Better still, if during the action of moral deeds, one can develop vipassanā-nāṇa by reasoning that everything is impermanent, unsatisfactory and not -self. The kusala-kamma acquired is again accompanied by three good roots.

On the other hand, if one performs a wholesome deed without any knowledge of kamma and its effect or without vipassanā-nāna, he is doing it with nāna-vippayutta mahā-kusala cittas. Thus his cetanās will be accompanied by two good roots — namely, alobha and adosa. So he acquired only dvihetuka-kusala kamma.

Ukkattha and Omaka Kusala Kamma

'Ukkattha' means 'best or supreme' whereas 'omaka' means 'inferior'.

If one can develop kusala cittas before and after a moral action, then the moral cetanā, which is kamma acquired during the action, will be surrounded by good cetanās and consequently its potentiality will be enhanced. Thus this type of kamma is called ukkattha kamma.

To acquire this type of kamma, one should think of the moral action in advance and feel glad for having the chance to do it. Again, after performing the action, one should be full of joy thinking about the good aspects of the action.

On the other hand, if one feels idle or reluctant or jealous or stingy before a moral action such as giving charity, and becomes repentant after the moral action, then the moral cetanā will be surrounded by akusala cetanās and consequently its potentiality will be decreased. The kusala kamma acquired in this case is called omaka kamma.

How Kammas Bear Results

The reader should refer to the Chart No. 7 with this title attached at the back of this book. The four types of kamma are mentioned in the first column. Only vipāka-cittas are described in the chart as the direct

resultants of these kammas. It should be understood that these vipāka-cittas will be accompanied by the respective cetasikas which arise along with the cittas.

A vipāka citta together with its concomitantcetasikas furnishes vipāka-nāmakkhandha, i.e. the four resultant nāma-groups. Kamma also produces kammajarupa at every short instant (small khana) incessantly, and based on this kammaja-rūpa, utuja-rūpa also arises.

The four *nāma*- groups (*nāmakkhandhas*) and the coporeality group (*rūpakkhandha*) together form the five groups of existence (five *khandhas*) which make up an individual.

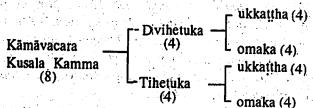

1. Effects of Akusala Kammas

The 11 akusala cetanās, the weak cetanā associated with uddhacca-sampayutta citta being excepted, at paţisandhi-kāla produce akusala-vipāka upekkhā-santiraņa citta which forms the apāya paṭisandhi in the four apāya abodes:

All the 12 akusala cetanās, at pavatti-kāla, produce 7 akusala vipāka cittas in the 11 Kāma-planes. They produce 4 akusala vipāka cittas with the exception of ghāna-vināna, jivhā-vināna and kāya-vināna, in the 15 Rūpa-planes excluding Asanna-satta realm.

2. Effects of Kamavacara-kusala Kammas

First there are two types of kāmāvacara-kusala kamma: dvihetuka and tihetuka. Divhetuka kamma is again divided into two sub-groups: ukkattha and omaka. Similarly tihetuka kamma is divided into two sub-groups: ukkattha and omaka. So, taking all together, we get 4 sub-groups:

Now 4 nāṇa-vippayutta mahā-kusala cittas give rise to 4 dvihetuka-mahā-kusala kammas whereas 4 nāṇa-sampayutta mahā-kusala cittas give rise to 4 tihetuka-mahā-kusala kammas.

As the 4 dvihetuka-mahā-kusala kammas can be either omaka or ukkattha, we get.

(i) 4 dvihetuka-omaka mahā-kusala kammas, and

(ii) 4 dvihetuka-ukkattha mahā-kusala kammas.

Similarly, from 4 tihetuka-mahā-kusalà kammas, we get

(iii) 4 tihetuka-omaka mahā-kusala kammas, and

(iv) 4 tihetuka-ukkattha mahā-kusala kammas.

Of the four sub-groups, (i) is the poorest, (ii) and (iii) are somewhat equal and (iv) is the best. The effects they produce are as follows.

(i) The 4 dvihetuka-omaka mahā-kusala kammas, at patisandhi-kāla, produce kusala-vipāka upekkhā-santiraņa citta which forms kāma-sugati ahetuka-paṭisandhi in the human realm and the lower catumahārājika realm.

At pavatti-kāla, they produce 8 ahetuka-kusala vipāka-cittas in the 11 kāma-planes; in the 15 rūpa-planes with the exception of Asañña-satta realm, they produce 5 ahetuka-kusala vipāka-cittas, excepting ghāna-viñnāna, jivhā-viñnāna and kāya-viñnāna.

(ii) and (iii) The 4 dvihetuka-ukkattha mahakusala-kammas and the 4 tihetuka-omaka

mahākusala—kammas, at patisandhi-kāda, produce 4 nāṇa-vippayutta mahāvipāka-cittas which form 4 kāma-sugati dvihetuka-patisandhi in the 7 kāma-sugati planes.

At pavatti-kāla, they produce 8 ahetuka-kusala vipāka-cittas and 4 nāṇa-vippayutta mahāvipāka cittas in the 7 kāma-sugati planes;

they produce 8 ahetuka-kusala vipāka-cittas in

the 4 apāya-planes; and

they produce 5 ahetuka-kusala vipāka-cittas, excluding ghāna-vinnāna, jivhāvinnāna and kāya-vinnāna in the 15 rūpa-planes with the exception of the Asanna-satta realm.

(iv) The 4 tihetuka-ukkattha mahākusala kammas, at patisandhi-kāla, produce 4 nāna-sampayutta mahāvipāka-cittas which form 4 kāma-sugati tihetuka-patisandhi in the 7 kāma-sugati planes;

they produce 8 ahetuka-kusala vipāka cittas

in the 4 apāya-planes; and

they produce 5 ahetuka-kusala vipāka-cittas, excluding ghāna-vihīnāna, jivhāvinīnāna and kāya, vinīnāna, in the 15 rūpa-planes with the exception of the Asanna-satta realm.

3. Effects of Rūpāvacara-kusala Kammas

Among chanda, citta, vīriya and paññā which associate with jhāna-citta, one usually becomes predominant (adhipati). Based on the quality of this predominant factor, the jhānas can be differentiated as paritta (inferior), majjhima (moderate) and panita (superior).

(1) Paritta-first-jhāna kusala-kamma gives birth in Brahma-parisajjā realm with first-jhāna vipāka-citta

as rebirth-consciousness.

Majjhima-first-jnāna kusala-kamma gives birth

in Brahma-purohitā realm with first-jhāna vipāka-citta as rebirth-consciousness.

Paņīta-first-jhāna kusaļa-kamma gives birth in Mahā-brahma realm with first-jhāna vipāka-citta as rebirth-consciousness.

(2) Paritta - second-jhāna kusala-kamma and paritta-third-jhāna kusala-kamma give birth in the Parittābhā realm with second-jhāna vipāka-citta and third-jhāna vipāka-citta as rebirth-consciousness, respectively.

Majjhima-second-jhāna kusala-kamma and majjhima-third-jhāna kusala-kamma give birth in the Appamānābhā realm with second-jhāna vipāka-citta and third-jhāna vipāka-citta as rebirth-consciousness.

Panita-second-jhāna kusala-kamma and panitathird-jhāna kusala-kamma give birth in the Abhāssarā realm with second-jhāna vipāka-citta and third-jhāna vipāka-citta as rebirth-consciousness, respectively.

(3) Paritta-fourth-jhāna kusala-kamma gives birth in Paritta-subhā realm with fourth-jhāna vipāka-citta as rebirth-consciousness.

Majjhima-fourth-jhāna kusala-kamma gives birth in Appamāna-subhā realm with fourth-jhāna vipāka-citta as rebirth-consciousness.

Paņita-fourth-jhāna kusala-kamma gives birth in Subha-kinhā realm with fourth-jhāna vipāka-citta as rebirth-consciousness.

(4) Fifth-jhāna kusala-kamma gives birth in the Vehapphala realm with fifth-jhāna vipāka-citta as rebirth-consciousness.

After attaining the fifth-jhāna, if one practises saññā-virāga-bhāvanā (meditation which develops no desire for perception and consciousness) to completion,

then this kamma will give birth in Asañña-satta realm with rūpa-patisandhi.

Fifth-jhāna kusala-kamma in anāgāmi person gives birth in the Suddhāvāsa planes with fifth-jhāna vipāka-citta as rebirth-consciousness.

Here again, depending on the predominant faculty, rebirth takes place in the 5 Sudhāvāsa planes as follows:

Faculty of saddhā (faith) ... Avihā realm
Faculty of viriya (effort) ... Atappā realm
Faculty of sati (mindfulness) ... Sudassā realm
Faculty of samādhi (concentration) ... Suddassī realm
Faculty of pañāā (wisdom) ... Akanitha realm

4. Effects of Arūpāvacara-Kusala Kammas

Ākāsānaficāyatana-kusala kamma gives birth in Ākāsānaficāyatana realm with ākāsānaficāyatana vipākacitta as rebirth consciousness.

Viññānañcāyatana-kusala kamma gives birth in Viññānañcāyatana realm with viññānañcāyatana-vipāka citta as rebirth consciousness.

Ākiñcaññāyatana-kusala kamma gives birth in Ākiñcaññāyatana realm with ākiñcaññāyatana-vipāka citta as rebirth consciousness.

Nevasaññā-nāsaññāyatana-kusala kamma gives birth in Nevasaññā-nāsaññāyatana realm with nevasaññā-nāsaññāyatana-vipāka-citta as rebirth consciousness.

(d) Fourfold Advent of Death (Maranupatti-catukka)

The fourfold advent of death may be compared to the four ways of extinguishing a lighted oil-lamp.

The flame of the oil-lamp may go out when:

- (1) the wick burns out;
 - (2) the oil burns out,
- (3) both the wick and the oil burn out, or
- (4) the wind blows suddenly or the light is put out purposely even though the wick and the oil still remain.

In the same way, a person may die in one of the following ways:

- (1) Ayukkhaya-marana = death due to the expiration of the age-limit,
- (2) Kammakkhaya-marana = death due to the expiration of the reproductive kammic force,
- (3) Ubhayakkhaya-marana = adeath due to the expiration of both the age-limit and kamma.
- (4) Upacchedaka-marana = death due to the intervention of a destructive kamma. It is sudden death such as the one encountered in car-accident or suicide.

Appearance of Kamma-related Objects

Now, to those who are about to die, by the power of *kamma* that is going to condition the next birth, one of the following three objects always presents itself through one of the six doors:-

- (1) Kamma object = the kamma that produces rebirth in the subsequent life enters the mind door;
- (2) Kamma-nimitta = sign of kamma, i.e. the scenes, the sound, the smell, etc., that are or were observed during the performance of the kamma which is going to bear result;
- (3) Gati-nimitta = sign of destiny, i.e. the scenes of people or buildings in connection with the

place where one is going to be reborn according to the successful kamma.

cetanā, it presents itself through the mind-door.

If the kamma-nimitta belongs to the past kamma, it also presents itself through the mind-door. If it belongs to the present kamma, it can enter through any of the six doors depending on its form. If it is a visual object, it will enter through the eye-door; if it is an audible sound, it will enter through the ear-door; and so on.

Gatinimitta belongs to the present. So, depending on its form, it may present itself through any of the six doors.

(Readers are requested to review the "Maranāsanna Nimitta" described on page: 138.)

Maranāsanna Vithi

Now, when the maranāsanna-nimitta appears at one of the six doors, the avajjana-citta (adverting consciousness) will pick up the sense object and a stream of consciousness, known as maranāsanna-vithi, flows on. In accordance with the kamma that is going to produce next rebirth, an akusala or kusala citta normally functions 5 times as javanas in these vithis. These javanas are known as "maranāsanna-javanas".

(a) Ati-mahantā-rammana Cakkhu-dvāra Maranāsanna Vithis

Two typical maranāsanna-vīthis for a visible object of very great intensity striking the eye-door:

(1) Ti-Na-Da-" Pa-Ca-Sam-Na-Vo-Ja-Ja-Ja-Ja-Dā-Dā-Bha-Cuti-Paṭi"-Bha(2) Ti-Na-Da-" Pa-Ca-Sam-Na-Vo-Ja-Ja-Ja-Ja-Dā-Dā-Cuti-Paṭi"-Bha-

the gati-nimitta strikes the eye-door at the arising instant of the first atita-bhavanga (Ti). Being of very great insensity, it becomes distinct at the arising instant of bhavanga-calana (Na). The life-continuum (bhavanga) vibrates for two conscious moments (Na-Da) and is cut off. Then, observing the nimitta, pañcadvārāvajjana (Pa), cakkhu-viññāṇa (Ca), Sampaticchana (Sam), santiraṇa (Na), votthapana (Vo), five javanas (Ja), two tadālambaṇas (Dā) and one bhavanga (Bha) arise in series. Then the death-consciousness (Cuti) occurs when the person dies. In the second vithi, cuti follows tadālambaṇa directly without any intervention of a bhavanga-citta.

Immediately after the dissolution of the death-consciousness, the rebirth-consciousness (patisandhicitta) arises in the next life without any break in the stream of consciousness and without any lapse in time. The next life may appear in a very far place like a brahma realm, yet there is no lapse in time.

Thus for the stream of consciousness to flow on, there is no barrier in time and space. The idea of timeless and spaceless is realized here. Also the idea that the soul wanders around before it enters the next life is not correct. There is no soul nor person in Abhidhammu—there are only incessant flows of nāma-stream and rūpa-stream in accordance with the Law of Dependent Origination (Pariccasamuppāda) which will be explained in Chapter VIII,

(b) Mahanta-rammana Cakkhu-dvara Maranasanna Vithis

(1) Ti-Ti-Na-Da-" Pa-Ca-Sam-Na-Vo-Ja-Ja-Ja-Ja-Ja-Bha-Cuti-Pati"-Bha-

(2) Ti-Ti-Ti-Na-Da-" Pa-Ca-Sam-Na-Vo-Ja-Ja-Ja-Ja-Cuti-Pati"-Bha-

(1) Ati-vibhūta-rammana Mano-dvāra Maranāsanna Vithis

- (1) Na-Da-" Ma-Ja-Ja-Ja-Ja-Ja-Dā-Bha-Cuti-Pati"-Bha-
- (1) Na-Da-" Ma-Ja-Ja-Ja-Ja-Dā-Dā-Cuti-Pati"-Bha-

Explanation: When the kamma which is going to produce next rebirth or the kamma-nimitta or the gati-nimitta related to that kamma appears at the mind door, the life-continuum vibrates twice and is cut off (Na-Da). Then mano-dvārāvajjana adverts the stream of consciousness towards the object, observes the object and makes its decision. Then come five javanas followed by two tadālambanas and one or no bhavanga. Then the death-consciousness (Cuti) occurs when the person dies. Immediately after death, the rebirth-consciousness (patisandhi) arises in the next life without any break in the stream of consciousness. After that

(d) Vibhūtā-rammana Mano-dvāra Maranāsanna Vīthis

the life continuum (bhavanga) flows on in the next life.

- (1) Na-Da-"Ma-Ja-Ja-Ja-Ja-Bha-Cuti-Pati"-Bha-
- (2) Na-Da-"Ma-Ja-Ja-Ja-Ja-Ja-Cuti-Pați" Bha-

Rebirth-consciousness

Rebirth-consciousness arises in the new life as the resultant of the *kamma* which has the chance to condition the new life. Rebirth-consciousness joins the new existence with the old one; so it is called *patisandhi-citta*.

The rebirth-consciousness will be accompained by its concomitants (cetasikas). It is the nucleus as well as the foregoer and leader of its associates. It will have a physical base (hadaya-vatthu), provided by the same kamma, if the new existence takes place in pañca-vokāra-planes (planes of five khandhas). If the new existence takes place in catu-vokāra-planes (planes of four-khandhas, i.e. arūpa-planes), there will be no physical base.

The rebirth-consciousness grasps the senseobject which the maranā-sanna javanas have observed. If the javanas observed kamma-nimitta, the rebirthconsciousness also observes kamma-nimitta. Moreover, all bhavanga cittas in the new life also observe the same sense-object.

The object of rupa-patisandhi is kamma-nimitta which may be the patibhaga-nimitta of kasina that usually appears at the mind-door at the time of death.

The object of arūpa-patisandhi is also kammanimitta which may be either concepts such as infinite space (ākāsa) or mahaggata-cittas.

Planes of Rebirth after Death

Death is the temporary end of a temporary phenomenon. By death is meant the extinction of psychic life (jivitindriya), heat (usma = tejodhātu) and consciousness (viññāṇa) of one individual in a particular existence.

But death is not the complete anihilation of a being. Death in one place means rebirth in another place so long as the causes for the next life are not extinct.

Now the possible planes where rebirth could take place after death in a particular plane are enumerated as follows.

- 1. When a brahma in an arūpa-plane dies, he may be reborn in the same plane or a higher plane but not in a lower arūpa-plane. Moreover he may be reborn in the sense-sphere with three roots either as a deva or a human being. Thus
- (i) After the death in Akāsānancāyatana-plane, 4 arūpa-patisandhis and 4 kāma-tihetuka-patisandhis are possible.
- (ii) After the death in Viññānañcāyatana-plane, 3 arūpa-paţisandhis (Ākāsānañcāyatana-paṭisandhi is excepted) and 4 kāma-tihenika-paṭisandhis are possible.
- (iii) After the death in Akiñcaññāyatana-plane, ākiñcaññāyatana-patisandhi, nevasaññā-nāsaññāyatana-patisandhi and 4 kāma-tihetuka patisandhis are possible.
- (iv) After the death in Nevasaññā-nāsaññāyatanaplane, nevasaññā-nāsaññāyatana-paṭisandhi and 4 kāmatihetuka paṭisandhis are possible.
- 2. When a brahma in a rupa-plane (except Asaññā-satta and Sudhāvāsas) dies, he may be reborn in any plane except the four apāya-abodes depending on his kamma. Also he will not be reborn either as a degraded human being or a degraded asurā. In other words, 4 kāma-dvihetuka-patisandhis, 4 kāma-tihetuka-patisandhis, 6 rupavacara patisandhis and 4 arupavacara patisandhis with the exception of 2 aheiuka-patisandhis are possible.

When Asaññā-salia brahma dies, he will be

reborn in the sense-sphere either as a human or as a deva. Thus 4 kāma-dvihetuka patisandhis and 4 kāma-tihetuka patisandhis are possible.

3. Now, when a human being or a deva from the sense-sphere dies, he may be reborn in any plane if he is a tihetuka-person, because he can develop jhānas to be reborn as a brahma or he may commit immoral actions to be cast into the apāya abodes.

When a human being or a deva of dvihetuka person dies, any one of the 10 kāma-patisandhis is possible.

4. When ahetuka-persons in the human realm is well as in the lower catumahārājika realm die, all 10 kāma-patisandhis are possible.

When woeful persons from the four apāya abodes die, again all 10 kāma-patisandhis are possible.

A B. Shir Shirth Barrain Main

Chapter VI RŨPA (Matter)

Introductory

Of the four ultimate realities (paramatthas). consciousness (citta) and mental factors (cetasikas) have been described in the first five chapters of this book. We have seen 89 or 121 types of consciousness, 52 mental factors, association of these factors with cittas, the dependence of nāma (mind) on sense objects (arammana) as well as on physical bases (vatthus), the arising of congnitive processes to be aware of the sense objects, the 31 planes of existence and the types of persons who occupy them, the different types of kamma and their operations through their resultants such as rebirth-consciousness, life-continuum and death-consciousness, and finally death and rebirth.

Now in the present chapter, we shall deal with the two remaining ultimate realities namely, rupa and Nibbāna.

What is Rupa?.

Rūpa has been translated as 'matter', corporeality', 'material', 'body', 'form', etc., but none is exact. To judge from the various aspects of rūpa. 'matter' is the nearest equivalent. But rūpa comprises the characteristics of matter as well as those of energy.

Rūpa may change state, form and colour on account of heat and cold just as matter does. Although form, shape and mass become apparent when a lot of rūpa has accumulated, in the ultimate sense rūpa is

formless, shapeless and massless just as energy is. Scientists now know that matter and energy are interconvertible and identical in the ultimate sense.

But, unlike the law of conservation of mass and energy, which states that matter and energy can neither be created nor destroyed, we find in Abhidhamma that rūpa arises and perishes incessantly at very short intervals measured by "small instant' called small khana. Rūpa is incessantly produced from four main sources—namely, kamma, citta, utu (heat) and āhāra (nutriment). And rūpa is very short lived—it endures only for 17 conscious moments. What is formed is almost instantly gone. It is very probable that the rate of formation and the rate of dissolution of rūpa cancel each other making the law of conservation of matter and energy to hold as aggregates.

Besides rūpa and nāma are interdependent. We shall understand rūpa better by studying the various aspects of rūpa which are described below.

Enumeration of Rupa (Rupa-samuddesa)

First rupa is twofold - namely,

- (1) Bhūta-rūpa = essentials, and
- (2) Upādāya-rūpa = derivatives.

The bhūta-rūpa is more prominent than the upādāya-rūpa. Great masses like the earth and the sun are formed when a lot of bhūta-rūpa has accumulated. Consequently bhūta-rūpa is also called mahābhūta (great essentials).

Four great Essentials (Four Mahahbūtas)

- 1. Pathavi = the element of extension with the characteristics of hardness and softness. Extension means occupation in space. Tri-dimensional extension gives rise to the idea of a solid-body. As no two bodies can occupy the same space at the same time, Buddhists derive the idea of hardness from pathavi. The dual characteristics of hardness and softness implies relativity. For example, a rock may be said to be 'hard' if compared with clay, but 'soft' if compared with iron. Pathavi serves as a support or nucleus for the other co-existing rūpas.
- 2. Āpo = the element of cohesion with the characteristics of cohesiveness and fluidity. It is the āpo element that makes different particles of matter cohere and hold them together. It is like the force of attraction between the positive charge and the negative charge of electricity. When we add a little water to flour, the flour-particles cohere into a lump. If we add more water, the mixture becomes fluid and flows away.
 - 3. Tejo = the element of heat or heat energy with the characteristics of hotness and coldness. Vivacity (liveliness), maturity, hotness and coldness are due to tejo. Both heat and cold are the properties of tejo or heat-energy. When heat flows into our body we feel hot; when heat flows out of our body to the surroundings, we feel cold.

4. Váyo = the element of motion or kinetic energy with the characteristics of pushing and supporting. When we blow air into a balloon, the air pushes the walls of the balloon outwards, and if there is no balancing force exerted by the walls of the balloon, the balloon will bust. Remember that there is action and reaction at every point.

Motion, vibration; oscillation, rotation and pressure are caused by vāyo.

Notes:— The four great essentials are also known as the four great elements.

Dhātu in Pāli means that which carries its own characteristic marks or attributes. Element is the closest equivalent for dhātu.

Now pathavi-dhātu literally means the earthelement, āpo-dhātu the water-element, tejo-dhātu the heat element, and vāyo-dhātu the wind-element. But pathavī is not the earth, neither is āpo water nor vāyo the wind.

The four great essentials are the fundamental material elements which exist together and which are inseparable. Every material substance, whether earth, water, fire or wind, ranging from the minutest particles to the most massive object, is made up of these four elements which possess specific characteristics as described above.

From this, one can easily see that Buddhists are not dealing with Thales' water, Anaximenes' air, Herakleitus' fire, or the Peripatetics' matter, of Greek philosophy.

(2) Pathavi, āpo, tejo and vāyo are formless and massless in the ultimate sense. In insight-meditation, we meditate only on their characteristics in the body-

228 THE ESSENCE OF BUDDHA ABHIDHAMMA viz., hardness and softness, cohesion and fluidity, hot and cold, pushing and balancing.

Twenty-four Derivatives (24 Upādā-rūpas)

There are 24 derivatives or secondary material properties dependent on the four great essentials. Like the earth are the essentials; like trees are the derivatives that spring there from.

The 4 great essentials together with the 24 derivatives make up 28 kinds of rūpa with different

properties.

They may be counted as 11 kinds of material qualities as follows:—

1. Essential material qualities – pathavī, āpo, tejo,

vãyo.

 Sensitive material qualities – eye, ear, nose, tongue and body.

3. Material qualities of sense-objects – visible form,

sound, odour, taste and tangibility.

4. Material qualities of sex – femininity and masculinity.

5. Material quality of base - heart-base.

6. Material quality of life - vital force.

7. Material quality of nutrition - edible food.

8. Material quality of limitation – the element of space.

D. Material qualities of communication – bodily

intimation and vocal intimation.

10. Material qualities of mutability – material lightness, pliancy, adaptability together with the two forms of intimation.

11. Material qualities of characteristics - material

productivity, continuity, decay and impermanence.

(a) Five Pasada-rupas

(Sensitive Material Qualities)

They are the sensitive parts of the organs – eye, ear, nose, tongue and body. They tend to clarify the co-existing material qualities. They receive the impressions of the sense-objects.

- 1. Cakkhu-pasada = sensitive part of the eye; it spreads in 7 layers in the pupil of the eye where images appear.
- 2. Sota-pasada = sensitive part of the ear; it spreads in the place shaped like a ring inside the ear-holes.
- 3. Ghāna-pasāda = sensitive part of the nose; it spreads in the place shaped like the leg of a goat inside the nostrils.
- 4. **Jivhā-pasāda** = sensitive part of the tongue; it spreads in the middle upper surface of the tongue.
- 5. Kāya-pasāda = sensitive part of the body; it spreads throughout the whole body sensitive to touch, excluding head-hair, body-hair, fingernails, toe-nails and hard dried skin.

(b) Seven Gocara-rūpas

(Material Qualities of Sense Objects),

They are the five sense-objects observed and frequented by pañca-viññanas.

- 1. Rupá-rammana = visible form (vanna)
- 2. Sadda-rammana = sound (sadda)
- 3. Gandhá-rammana = smell (gandha)
- 4. Rasa-rammana = taste (rasa)

- 5. Photthabba-rammana = tangible object (pathavi, tejo, vayo)
- Notes:— (1) The names in brackets are the essential elements of the five senses. Note that there are 7 elements in all.
- (2) Owing to its subtlety, apo cannot be felt by the sense of touch. For instance, when we put our hand in water, the cold felt is tejo, the softness is pathavi, and the pressure is vayo. Thus only these three fundamental elements are regarded as tangible.

(c) Two Bhava-rupas

(Material Qualities of Sex)

1. Itthi-bhava = material quality that imparts femaninity;

it spreadds all over the body of the female.

2. Purisa-bhava = material quality that imparts masculinity;

it spreads all over the body of the male.

Note: These two rūpas differentiate the male from the female.

(d) Hadaya-vatthu

(The Heart Base)

Hadaya-vatthu is the heart-base which spreads in the blood inside the heart. It is the seat of consciousness (mano-viññāṇa). Hadaya-vatthu is not one — there are billions of hadaya-vatthus spread in the blood of the heart.

(e) Jivita-rūpa

(Material Quality of life)

It is jivitindriya-rūpa - the vital force of

kammaja-rūpa which spreads throughout the body.

It should be noted that there is vitality both in mind and matter. The vitality of the mind is "jivitindriya", which is one of the seven sabbacitta-sādhārana cetasikas. The vitality of matter is jivitarūpa.

Jivitindriya may be regarded as psychic life and jivita-rûpa as physical life.

(f) Āhāra-rūpa (Ojā)

(Material Quality of Nutrition)

The gross food which is taken in by making into morsels is called *kabalikārāhāra*. Here *āhāra-rūpa* means the nutritive essence (ojā) which sustains the body.

(g) Pariccheda-rūpa (Ākāsa-dhātu) (Material Quality of Limitation)

Pariccheda-rūpa is the inter-atomic or intraatomic space that limits or separates material groups (rūpa-kalāpas). As there is space between the eggs ina basket, so there is space between the rūpa-kalāpas (very tiny particles) as they are produced by four causes — namely, kamma, citta, utu and āhāra. So pariccheda-rūpa is also assumed to be produced by the same four causes.

Pariccheda-rūpa is also called 'ākāsa-dhātu'. Ākāsa is space, which in itself is nothingness. Ākāsa is a dhātu in the sense of a non-entity (nijjīva), not as an existing element like the four great essential elements. As one of the 28 rūpas, ākāsa-dhātu means not so much the outside space as the inter-atomic space or intraatomic space that separates rūpa-kalāpas.

(h) Two Viñnatti-rûpas

(Material Qualities of Communication)

Viññatti-rūpas are special behaviours of the body and the mouth which one uses to communicate one's ideas to another and by means of which one understands another's intentions.

1. Kāya-viñnatti = action by hand, head, eye, leg, etc.,

which let others underestand one's intentions.

2. Vaci-viñnatti = movement of the mouth to produce speech to let others understand one's intentions.

Kāya-viñnatti and vaci-vinnatti are caused by the vāyo-dhātu produced by the mind, and they last only for one conscious-moment.

(i) Five Vikara-rupas

(Material Qualities of Mutability)

Ledi Sayadaw explained 'vikāra-rūpa' as 'peculiar distinctive condition'. Rev. Narada took it as "changeability of rūpa." So we may regard 'vikāra-rūpa' as special condition of rūpa.

1. Rūpassa-lahutā = physical lightness or bouyancy;

it suppresses the heaviness in the body.

- Rupassa-mudutá = physical elasticity;
 it removes stiffness in the body and is comparable to a well-beaten hide.
- 3. Rūpassa-kammaññatā = physical adaptability; it is opposed to the stiffness of the body, and is comparable to well-hammered gold.

These three rapas together with the two viññattirapas make up five vikāra-rapas.

(j) Four Lakkhana-rūpas

(Material Qualities of Characteristics)

There are three common characteristics of rūpa and nāma— viz., arising (uppāda), existing (thūti) and dissolving (bhanga). The rūpas that denote these instants in real rūpas are called lakkhana-rūpas. 'Lakkhana' literally means 'sign or symbol'.

1. Upacaya-rupa = arising of rupa at the moment of conception, and continued arising of rupa till the required rupas in life are completely formed.

2. Santati-rūpa = subsequent arising of rūpas throughout the life-term.

3. **Jaratá-rūpa** = $r\overline{u}pa$ that denotes development and decay during the existing period of 15 conscious moments.

4. Aniccatá-rūpa = rūpa that denotes dissolution at the dissolving moment of real rūpa.

Notes: (1) Upacaya and santati are sometimes treated as jāti (birth). Then the number of rūpas amounts to 27 instead of 28.

(2) With the exception of the five rūpas—viz., two viññattis, jāti, jaratā and aniccatā, all the remaining rūpas last for 17 conscious-moments.

(3) Strictly speaking there are only three lakkhaṇa-rūpas-namely, jāti, jaratā and aniccatā. Jāti refers to rūpa at the arising instant, jaratā refers to rūpa at the existing period, and aniccatā refers to rūpa at the dissolving instant.

Eighteen Nipphanna-rūpas

The eighteen rūpas comprising 4 great essentials, pasāda-rūpas, 7 gocara-rūpas (to be counted as 4, iuding tangibility), 2 bhāva-rūpas, hadaya-vatthu.

jîvita-rūpa and āhāra-rūpa are caused and conditioned by kamma, citta, utu (tejo) and āhāra (ojā). So they are called nipphanna-rūpas.

Each of these 18 rūpas have their innate properties such as hardness for pathavī and heat for tejo. So they are also called sabhāva-rūpas.

Each of these 18 rūpas also have the three sankhāta-lākkhaņas (innate signs or marks) — viz., jāti (birth), jarā (decay) and aniccatā (death). So they are also called sa-lakkhana-rūpas.

Because they may change in state, form and colour, etc., due to heat and cold, etc., they are known as rūpa.

Because they should be comtemplated as anicca (impermanence), dukkha (unsatisfactoriness) and anatta (not-self), they are called sammasana-rūpa.

Ten Anipphana-rūpas

The ten rūpas comprising pariccheda-rūpa, 2 viññatti-rūpas, 3 vikāra-rūpas and 4 lakkhana-rūpas are not caused and conditioned by kamma, citta, utu and āhāra. So they are known as anipphanna-rūpas.

They are also known as asabhāva-rūpas because they do not have innate properties, asalakkhana-rūpas because they do not have sankhata-lakhanas, as arūpa because they are not changeable by heat or cold, etc., and as asammasana-rūpa because they should not be comtemplated in insight meditation.

Criticism on Rûpa (Rûpa-vibhāga)

All the *rūpas* are just one in the following aspects:—

- 1. Ahetuka all are rootless;
- 2. Sappaccaya all are related to the causes (kamma, citta, utu, and thāra);
- 3. Sāsava all serve as objects for defilements;
- 4. Sankhata all are conditioned by the four causes;
- 5. Lokiya all are connected with the world of five aggregates of attachment;
- 6. Kāmāvacara all come within the range of sense objects;
- 7. Anarammana all do not perceive objects;
- 8. Appahātabba all are not eliminated by Maggas. However, when rūpa is distinguished as internal, or external, and so forth, rūpa becomes manifold. Readers may consult the chart on rūpa for a quick review of such criticism.
- 1. Ajjhattika-rūpa--- The five pasāda-rūpas are called ajjhattika (internal), and the remaining 23 rūpas are called bāhira (external), because the five sensitive organs are essential for seeing, hearing, smelling, etc.. People value them highly. Without them they are inanimate logs.
 - 2. Vatthu-rūpa— The five pasāda-rūpas together with hadaya-vatthu are named vatthu-rūpa while the rest are called avatthu-rūpa. They act as seats of consciousness.
 - 3. Dvāra-rūpa--- The five pasāda-rūpas together with the two viññatti-rūpas are called dvāra-rūpas while the rest are called advāra-rūpas. The five pasāda-rūpas serve as doors which give rise to pañca-dvāra-vūthis whereas the two viññatti-rūpas are the places and the means for performing bodily actions (kāya-kamma) and verbal actions (vaci-kamma).
 - 4. Indriya-rūpa--- The five pasāda-rūpas,

the two bhāva-rūpas and jīvita-rūpa together form eight indriya-rūpas while the remaining 20 rūpas are termed anindriya-rūpas.

'Indriya' means 'faculty' which has controlling power in its sphere. For instance, cakkhu-pasāda controls seeing, sota-pasāda controls hearing, and so on: Itthi-bhāva controls femininity and purisa-bhāva controls masculinity.

5. Olārika-rūpa-- The five pasāda-rūpas and the seven gocara-rūpas together form 12 olārika-rūpas while the remaining 16 rūpas, are termed sukhuma-rūpas.

'Olārika' means 'gross or coarse'; 'sukhuma' means 'subtle or fine'. Because of their grossness and coarseness, the sensitive organs and the five sense objects can be easily seen and understood. And because they are easily understood, they are regarded to be close to the wisdom-mind. So the olārika-rūpas are also called santike-rūpas (santike=near) whereas the sukhuma-rūpas are called dūre-rūpas (dūre=far).

Moveover, the sensitive organs and the sense-objects can strike one another—the visual object strikes the eye-door, the audible sound strikes the ear-door, and so on. So the 12 olārika-rūpas are also called sappatigha-rūpas whereas the 16 sukhuma-rūpas are called appatigha-rūpas. 'Sappatigha' literally means 'with striking' whereas 'appatigha' means 'without striking'.

6. Upādinna-rūpa--- The 18 kammaja-rūpas are called upādinna-rūpas; the rest are termed anupādinna-rūpas. The 18 rūpas produced by kamma are grasped by the kamma as it's resultants in collaboratiom with craving (tanhā) and false view (ditthi).

- 7. Sanidassana-rūpa.— Rūpārammaṇa (vanṇa) is called sanidassana-rūpa, because it can be seen by the eye. The remaining rūpas are called anidassana-rūpas, because they cannot be seen by the eye.
- 8. Gocaraggāhika-rūpa---The five pasāda-rūpas can take external sense-objects as pasture. So they are called gocaraggāhika-rūpas while the rest are called agocaraggāhika-rūpas.

Of the five sense organs, the eye and the ear cognize distant objects without any direct contact. We can see a flower without the flower coming in contact with the eye. We can hear what a man says without the man coming in contact with the ear.

On the other hand, the smell must come in contact with the nostril, the taste must directly touch the tongue, and something must actually touch the body in order to cognize these senses.

Thus, cakkhu-pasāda and sota-pasāda are called asampatta-gāhaka whereas the remaining three pasāda-rūpas are called sampatta-gāhaka.

9. Avinibbhoga-rūpa --- The eight rūpas comprising pathavi, āpo, tejo, vāyo, vanna. gandha, rasa and ojā are bound together and are inseperable and indivisible. So they are called avinibbhoga-rūpas whereas the rest are called vinibbhoga-rūpas.

The definition of 'avinibbhoga-rūpa' sounds like the original definition of the 'atom'. But atoms are later found to be divisible into electrons, protons and neutrons.

According to Abhidhamma, these sub-atomic particles can be regarded as avinibbhoga-rūpas. The four essentials and their innate four derivatives are produced together in nature as kalāpas which are fundamental units of matter.

These *kalāpas* have about the same size as electrons. So, however small a particle may be, it is always made up of the *avinibbhoga-rūpas* which are really indivisible and inseperable.

Fire in Water, and Water in Fire!

Now a dust particle or the whole earth is made up of avinibbhoga-rūpas. So the earth must contain all the eight rūpas-viz., pathavī, āpo, tejo, vāyo, vaṇṇa, gandha, rasa and ojā; of these pathavī is predominant.

Similarly, water must also contain all the eight avinibbhoga-rūpas, but here āpo is predominant. As water contains tejo—the element of fire, we may say there is fire in water.

In the same way, fire must contain all the eight avinibbhoga-rūpas, tejo being predominant. As fire contains āpo — the element of water, we may say that fire contains water.

The Abhidhamma statement that 'water contains fire and fire contains water' is not in disagreement with the facts of science. We know that water contains heat which is the same substance as fire. Also in burning of wood or paper, which is cellulose containing carbon, hydrogen and oxygen, heat is evolved due to the combination of carbon with oxygen forming carbon dioxide and also due to the combination between hydrogen and oxygen forming water. The intense mass of heat appears as a flame which really contains water-vapour.

The Causes of Material Phenomena (Rūpa-samutthāna)

There are four causes which produce rūpa. They are: (1) kamma, (2) citta, (3) utu and (4) ūhāra.

(1) Material Phenomena arising from Kamma

There are 25 types of kamma which produce rūpa internally in the bodies of beings for their own continuity of material phenomena. The 25 types of kamma comprise 12 akusala cetanās, 8 kāmāvacara-kusala cetanās and 5 rūpāvacara-kusala cetanās. These immoral and moral kammas produce rūpas in the kāma- and the rūpa-spheres at every small instant starting from the arising instant of rebirth consciousness till death. The rūpa produced by kamma is called kammaja-rūpa.

Note that arūpāvacara kammas do not produce rūpas.

(2) Material Phemomena arising from Citta

The cittas that produce rupa number 75, excluding the 10 dvi-pañca-viñāṇa cittas and 4 arupavacara-vipāka cittas. All paṭisandhi-cittas and the death-consciousness of arahats also do not produce rupa.

Starting from the first bhavanga-citta of the life-continuum till death, the 75 cittas mentioned above produce cittaja-rūpa at every arising instant of the respective cittas. The rūpa produced by citta is known as cittaja-rūpa.

Of the 75 cittas, the 26 appanā-javana cittas not only produce cittaja-rūpa but also support the four bodily postures – viz., standing, sitting, lying and walking.

The 32 cittas comprising mano-dvārāvajjana, 29 kāmāvacara javanas and 2 abhiññās (supernormal knowledges) produce cittaja-rūpa, support the bodily postures and also produce two viññatti-rūpas for bodily actions and vocal actions.

Of the 32 cittas mentioned above, the 13 somanassa javanas also produce smiles and laughters whereas the

2 domanassa javanas, i.e., the 2 dosa-mūla cittas, produce moaning and weeping.

Hasituppāda and 4 somanassa-mahā-kiriya cittas produce smiles in Buddhas and arahats.

Two lobhamūla-ditthigata-vipayutta -somanassa cittas and 4 somanassa-mahā-kusala cittas produce smiles and laughters in sekha-persons-i.e., sot apannas, sakadāgāmīs and anāgāmīs.

Four lobhamūla-somanassa cittas somanassa-mahā-kusala cittas produce smiles and laughters in puthujjanas (worldlings).

Three mano-dhātus, 11 tadālambanas and 5 rūpāvacara vipāka cittas (totalling 19) produce only ordinary cittaja-rūpa.

(3) Material Phenomena arising from Utu

The heat-element, tejo, which comprises both cold and heat and which is present in all rūpa-kalāpas, on reaching its static stage, produces utuja-rūpas and continues producing utuja-rūpas at every small instant both internally and externally.

(4) Material Phenomena arising from Ahara

The nutritive essence, oja, is present in all rūpakalāpas both inside the body (internal) and outside the body (external). The external food, which is eaten, is digested in the stomach and dispersed through blood to all parts of the body. So the internal ojā and the external ojā meet in every part of the body. The time they meet is called the arising instant (uppāda). After this instant, the static instant (thiti) is reached. From this static instant the combination of internal and external ojās starts producing āhāraja-rūpas and goes on producing them at every small instant until the combination terminates.

Types of Rupa

Ekaja-rūpa = r**ū**pa produced by a single cause **Dvija-rūpa** = r**ū**pa produced by two causes **Tija-rūpa** = r**ū**pa produced by three causes **Catuja-rūpa** = r**ū**pa produced by four causes **Anekaja-rūpa** = r**ū**pa produced by more than one cause or by many causes

1. Five pasāda-rūpas, two bhāva-rūpas, hadaya-vatthu and jīvita-rūpa (totalling 9) are produced by kamma alone.

Two viññatti-rūpas are produced by citta alone. So the total number of ekaja-rūpas is 11.

- 2. Saddā is the only avija-rūpa produced by citta and utu. Vocal sounds such as speech, laughter, moaning, crying, singing, and whistling are produced by citta. Non-vocal sounds such as thunder, musical notes from instruments, speeches from the radio, songs from cassettes, noises made be cars and trains, etc., are produced by utu.
- 3. There are three tija-rūpas namely, rūpassa-lahutā, rūpassa-mudutā and rūpassa-kammañātā. They are produced by citta, utu and āhāra. These rūpas are responsible for the pleasant bouyant feeling we experience when our mind is clear or when the weather is pleasant or after we have a light pleasant meal.
- 4. There are 9 catuja-rūpas which are produced by all the four causes. They are the eight avinibbhoga-rūpas and ākāsa-dhātu which arises when material groups (kalāpas) of avinibbhoga-rūpas are formed.
- 5. Kammaja-rūpas (18) = 9 kammaja-ekaja rūpas + 9 kammaja-

242 THE ESSENCE OF BUDDHA ABHIDHAMMA anekaja rūpas (i.e. the 9 catuja-rūpas)

- 6. Cittaja-rūpas (15) = 2 cittaja-ekaja-rūpas + 13 cittaja-anekaja rūpas

 The 13 cittaja-anekaja rūpas are the 9 catuja-rūpas + sadda + 3 tija-rūpas.
- 7. Utuja-rūpas (13) = 13 utuja-anekaja rūpas which are the same as the 13 cittaja-anekaja-rūpas
- 8. Ähäraja-rūpas (12) = 12 āhāraja-anekaja rūpas = 8 avinibbhoga-rūpas +
 - = 8 avinibbhoga-rūpas + pariccheda rūpa + 3 tijarūpas.
 - Notes:(1) The three tija-rūpas viz., lahutā, mudutā and kammaññatā are also called lahutādi-rūpas.
 - (2) The four lakkhana-rūpas are not produced by any cause. They just denote the arising (birth), existing (decay) and dissolving (death) nature of real rūpas.

Grouping of Material Qualities (Rūpakalāpa)

The 28 types of *rūpa* are not found seperately in nature. They are produced by the four causes in the form of tiny material groups called *kalāpas*. *Kalāpas* have the following four features:—

- 1. All the rupas in a kalāpa arise together, i.e. they have a commom genesis.
- 2. They also cease or dissolve together, i.e. they

have a common cessation.

3. They all depend on the four great essentials present in the *kalāpa* for their arising, i.e. they have a common dependence.

4. They are so thoroughly mixed that they cannot be distinguished, i.e. they co-exist.

It should be noted that *kalāpas* are so small that they are invisible even under electronic microscopes. The size of *kalāpa* in the human realm is just a 10⁻⁵ th of a *paramānu*, which is smaller than an atom. So *kalāpas* are comparable to electrons, protons and neutrons in size.

There are 21 types of kalāpas — 9 kammaja kalāpas + 6 cittaja kalāpas + 4 utuja kalāpas + 2 āhāraja kalāpas.

(1) Nine Kammaja-kalāpas

These are formed from the 18 kammaja-rūpas. In all kalāpas, the 8 avinibbhoga-rūpas form the nucleus. All the kammaja-rūpas contain jīvita-rūpa which is the physical life. So a group of 8 avinibbhoga-rūpas and jīvita-rūpa forms the simplest unit of kammaja-rūpa. It is called jīvita-navaka-kalāpa meaning 'group of 9 rūpas including jīvita'. It may be shortened to 'jivita-nonad'.

By adding the remaining 8 kammaja-ekaja-rūpas one at a time to this basic unit of 'jīvita-nonad' we get the remaining 8 kammaja-kalāpas.

- 1. Cakkhu-dasaka = 8 avinibbhoga-rūpas + (eye-decad) jīvita-rūpa + cakkhu-pasāda
- 2. Sota-dasaka = 8 avinibbhoga-rūpas + (ear-decad) jivita-rūpa + sota-pasāda

THE ESSENCE OF BUDDHA ABHIDHAMMA 244 3. Ghāna-dasaka 8 avinibbhoga-rūpas + jivita-rūpa + ghāna-pasāda (nose-decad) 4. Jivhā-dasaka = 8 avinibbhoga-rūpas + jīvita-rūpa + jivhā-pasāda (tongue-decad) = 8 avinibbhoga-rapas + 5. Kāya-dasaka iivita-rūpa + kāya-pasāda (body-decad) 6. Itthibhava-dasaka = 8 avinibbhoga-rūpas + jivita-rūpa + itthibhāva-(female-decad) rūpa 7. Pumbhāva-dasaka = 8 avinibbhoga-rūpas + jīvita-rūpa + pumbhāva-(male-decad) rūpa (purisabhāva) 8. Hadaya-dasaka = 8 avinibbhoga-rūpas + jīvita-rūpa + hadaya-(heart-decad) vatthu 9. Jivita-navaka = 8 avinibbhoga-rūpas + jivita-rūpa (vital-nonad) navaka = 9: Note: Atthaka = 8; dasaka = 10 ; Ekādasaka = 11 ;

(2) Six Cittaja-kalāpas

 $dv\bar{a}dasaka = 12$; terasaka = 13

They are formed by grouping the 14 cittajarūpas (excluding pariccheda-rūpa) together as may be required.

- 1. Cittaja-suddhatthaka = 8 avinibbhoga-rūpas (pure octad) produced by citta
- 2. Kāyaviññatti-navaka = 8 avinibbhoga-rūpas + (bodily intimation kāyaviññatti nonad)
- 3. Vaciviññatti-sadda-dasaka = 8 avinibbhoga (vocal intimation + vaciviññatti decad) + sadda (sound)

- 4. Lahutādi-ekādasaka = 8 avinibbhogas (un-decad of + lahutā + mudutā mutability) + kammañnatā
- 5. Kāyaviññatti-lahutādi = 8 avinibbhogas + kāyadvādasaka viññatti + 3 lahutādi-(do-decad of rūpas mutability)
- 6. Vaciviññatti-sadda— = 8 avinibbhogas + vacilahutādi-terasaka viññatti + 3 lahutādi-(tri-decad of rūpas + sadda mutability)

(3) Four Utuja-kalāpas

They are formed by grouping the 12 utujarūpas (excluding pariccheda-rūpa) together as may be required.

- 1. Utuja-suddhatthaka = 8 avinibbhoga-rūpas (pure octad) = produced by utu
- 2. Sadda-navaka = 8 avinibbhoga-rūpas + (sound-nonad) saddha
- 3. Lahutādi-ekādasaka = 8 avinībbhogas + 3 (un-decad of lahutādi-rūpas mutanility)
- 4. Sadda-lahutādi— = 8 avinibbhogas + saddha dvādasaka + 3 lahutādi-rūpas (do-decad of sound and mutability)

(4) Two Ähāraja-kalāpas

They are formed by grouping together the 8 avinibbhoga-rūpas and the 3 lahutādi-rūpas produced by āhāra.

1. Āhāraja-suddhatthaka = 8 avinibbhoga-rūpas (pure octad) produced by āharā

2. Lahutādi-ekādasaka = 8 avinibbhoga- rūpas
(un-decad of 3 lahutādi-rūpas
mutability)

· Internal and External Kalapas

All the 21 rūpa-kalāpas mentioned above occur internally in living beings. Itthibhāva-dasaka does not occur in males. Similarly pumbhāva-dasaka does not occur in females. For those who are born blind or deaf, cakkhu-dasaka or sota-dasaka should be eliminated.

(Note that of the 28 types of rāpa, itthibhāvarūpa is absent in males and purisabhāva-rūpa is absent in females. So only 27 types of rāpa will be present in each species.)

"Ajjhatta" refers to 'internal or within the

individual'.

'Bahiddha' refers to 'external or outside the individual'.

Now in the external (bahiddha) world, only two utuja-kalāpas are found. All inanimate things such as trees, stones, earth, air, water, fire, corpses, etc., are made up of utuja-suddhatthaka kalāpas. The sounds produced by beating two sticks together or by rubbing of branches in the wind or by musical instruments such as violin, piano, radio, cassettes, etc., are utuja-saddanavaka kalāpas.

Arising of Material Phenomena in Individuals

(Rūpa-pavattikkama)

Before reading this section, readers are advised

to review the "four modes of conceiving" on page 191.

All the 28 material qualities occur undiminished, if circumstances permit, in an individual during a life-time in kāmaloka (sense-sphere).

But at the moment of rebirth (patisandhi-kāla), in samsedaja-persons and opapātika-prersons, at most seven kammaja-kalāpas comprising eye-decad, ear-decad, nose-decad, tongue-decad, body-decad, sex-decad and heart-decad are manifested. However, the eye, ear, nose, and sex-decads are sometimes not manifested.

In gabbhaseyaka-persons (womb-born creatures) only three kammaja-kalāpas comprising body-decad, sex-decad and heart-decad are manifested at the moment of conception (paţisandhi-kāla). Here again the sex-decad may not be manifested in some particular individuals. After conception, during life (pavatti-kāla), the eye-decad and the rest are manifested slowly in due order.

Of the groups of material qualities which are produced in four ways, kammaja-rūpa starts to form at the moment of conception and it goes on forming incessantly at every minor-instant.

Cittaja-rūpa begins to form from the second moment of consciousness, i.e. from the arising instant of the first bhavanga which follows the rebirth-consciousness. Cittaja-rūpa continues to be formed at every arising instant of the subsequent cittas for the whole life-time.

Utuja-rūpa starts to form from the existing instant of rebirth-consciousness. The reason is that the tejo-dhātu (utu) present in the first kammaja-kalapas come to the static stage (thūti) at that instant. From that time onwards the tejo-dhātu then produces utuja-rūpa

at every minor-instant. Since tejo-dhātu is present in every kalāpa, every kalāpa, from the time it reaches the static stage, produces new utuja-kalāpas at every minor instant. And the new utuja-kalāpas, from the time they reach the static stage, again produce new utuja-kalāpas at every minor instant. So this process will go on for ever.

Every kalāpa also contains the nutritive essence, ojā. But āhāraja-rupa starts to form when internal ojā meets external ojā at the time of diffusion of nutritive essence and the combination of internal and external ojā comes to the static stage. From that instant, āhāraja-rūpa is also formed at every minor interval.

As new groups of material qualities are incessantly produced, old groups dissolve and disappear when their life-time of 17 conscious-moments is over. Thus the material phenomena go on uninterruptedly in the sense-sphere till the end of life like the flame of a lamp, or the stream of a river.

Material Phenomena at Death

At the time of death, psychic life and physical life must cease together. This means that all *kammaja-rūpa* which contains physical life must cease at the time of death.

So at the arising instant of the seventeenth citta reckoned backward from the death-consciousness (cuticitta), the last kammaja-rūpa is formed. This last kammaja-rūpa will cease at the dissolving instant of the death-consciousness.

Cittaja-rūpa is formed till the arising instant of the cuti-citta. This last cittaja-rūpa will have lasted for a conscious-moment at the dissolution of cuti-citta, and thus will perish in another sixteen conscious-moments which happens almost instantly.

 $\bar{A}h\bar{a}raja-r\bar{u}pa$ is formed till the dissolving instant of the *cuti-citta*, because the support required for the formation of $\bar{a}h\bar{a}raja-r\bar{u}pa$ can be furnished by *citta* up to that time. So at death, that last-formed $\bar{a}h\bar{a}raja-r\bar{u}pa$ has lasted for only one minor-instant. However in another fifty minor instants ($r\bar{u}pa-life-=51$ minor instants or 17 conscious-moments), that $\bar{a}hr\bar{a}ja-r\bar{u}pa$ also ceases.

Thus at the time of death, kammaja-rūpa, cittaja-rūpa and āhāraja-rūpa cease almost instantly. But utuja-rūpa goes on forming and dissolving till the corpse is converted into dust. A corpse consists of only utuja-rūpa.

So when a person dies and is reborn in another life, material phenomena similarly arise starting from the instant of conception and go on arising till the time of death.

Arising of Material Phenomena in Rupa-planes

In the rūpa-plane, nose-decad, tongue-decad, body-decad, sex-decad and āhāraja-kalāpas do not arise. At the time of opapātika-rebirth, there arise four kammaja-kalāpas—namely, eye-decad, ear-decad, heart-decad and vital-nonad. During life, however, cittaja-kalāpas and utuja-kalāpas also arise.

To the Asañña-satta brahmas, eye-decad, heart-decad and sound-nonad (sadda-navaka) do not arise. Also cittaja-kalāpas do not arise. Therefore, at the time of their opapātika-rebirth, only the vital-nonad (jivita-navaka) arises. During life, utuja-kalāpas, with the exception of the sound-nonad, arise in addition.

Thus in kāma-loka and rūpa-loka, the process of the arising of material phenomena should be understood in two ways, that is (1) at rebirth and (2) during life.

Summary of Material Phenomena
In summary, it should be noted that

(1) all the 28 rūpas arise in the kāma-sphere;

(2) in the 15 rūpa-planes, with the exception of Asañña-satta, 23 rūpas arise (ghāna-pasāda, jivhā-pasāda, kāya-pasāda, itthi-bhāva and purisa-bhāva being excluded);

(3) only 17 rūpas arise in the Asañña-satta plane; they are 8 avinibbhogas, jivita, pariccheda, 3

lahutādi, 4 lakkhaṇa-rūpas;

(4) no material arises in the arupa-planes;

(5) eight rūpas comprising sadda, five vikāra-rūpas, jaratā-rūpa and aniccatā-rūpa, do not arise at the moment of birth (paṭisandhi-kāla) whereas, during life-time, there is no rūpa which is not formed.

Practical Observations

All the material phenomena described in this chapter can be observed and verified by an interested person who will undertake tranquility— and insight—meditations strenuously.

Although rūpa-kalāpas are invisible under powerful microscopes, they can be observed by samādhi-eye which is the mind-eye accompanied by access-concentration or better by jhāna-concentration.

One shall observe with samādhi-eye that there are six types of kalāpas in the eye – namely, the eyedecad, the body-decad, the sex-decad and three pure

octads produced by citta, utu. and āhāra, respectively. In the same way one shall observe six types of kalāpas each in the ear, the nose, and the tongue—just substitute the eye-decad with the ear-decad, the nose-decad, the tongue-decad, respectively, in enumerating these kalāpas. Note that kāya-pasāda, bhāva-rūpa, cittaja-rūpa, utuja-rūpa and āhāraja-rūpa spread all over the body, and so they will be present in the eye, the ear, the nose, the tongue and in every part of the body.

Observing kalāpas does not mean that one sees the ultimate rupa. If the rūpas are observed in the form of particles, however small they may be, the rūpas observed are not ultimate yet. The ultimate rūpa is formeless and massless. So one has to analyse each type of kalāpa to observe its contents just as one does a qualitative analysis of a brass sample to know its contents.

Ledi Sayadaw has written in Myanmar in the book entitled "Kammathan, Kyan Gyi" on page 240 that:

"When one looks through a microscope or a telescope, one sees easily without troubles the originally invisible, subtle and far-away objects. In the same way if one develops *jhāna*, makes the jhāna-concentration the base and undertakes insight meditation, one can easily see without troubles the signs of impermanence, suffering and not-self, which are very deep, subtle, very far and very hard to see. Consequently there arise magga-ñāṇa and phala-ñāṇa that can anihilate the four āsavas (cankers) completely.

The four Noble Truths and Nibbana, which are very deep, subtle, very far and very hard to see, are also observed."

Recently I have interviewed many yogis in Pa-auk Meditation Centre near Mawlamyine in lower Myanmar, where samatha-vipassanā-meditation is taught according to Visudhi-Magga and Pitaka Canons. I have the opinion that these yogis can observe the kalāpas and analyse them to the ultimate state. Of course, one could see the ultimate realities if one is properly guided by an able teacher.

Nibbana

1. Nibbāna is supramundane (lokuttara), that is, beyond the 31 planes of existence, beyond the world of mind and body (i.e. the five aggregates).

2. Nibbana is realized through the knowledge belonging to the Four Paths and the Four Fruits. It is

observed by magga-ñāna and phala-ñāna.

3. Nibbana is the object of the four Paths and their Fruits.

In Samskrit, Nibbana is called Nirvana which is composed of 'ni' and 'vana'. 'Ni' implies 'to be free from', and 'vana' means 'weaving or craving'. It is this craving (tanhā) which acts as a cord to connect the series of lives of an individual in the course of his wanderings in Samsara—the external cycle of birth and death.

As long as one is entangled by craving, one accumulates fresh kammas which will give rise to new birth and death repeatedly. When all forms of craving areannihilated by the four Paths, kammic force ceases to operate and one escapes from the cycle of birth and death. Then one is said to attain Nibbāna. The Buddhist concept of 'Deliverance or Liberation' is this escape from the ever-recurring cycle of birth and death and all the misery associated with them.

By nature or intrinsically Nibbana is peaceful

(santi). As such it is unique. Though it is single by santi-lakkhana, Nibbana is viewed as twofold according to the way it is experienced before and after the death of an arahat,

(1) Sa-upádisesa-Nibbána

Sa = with, upādi = the five aggregates grasped

by craving and false view; sesa = remaining.

In Buddhas and arahats, though all defilements (kilesas) have been annihilated, vipāka-cittas and their concomitants (together known as vipāka-namakkhandha) and kammaja-rūpas still remain. Yet Buddhas and arahats can experience Nibbana fully. The element of Nibbana which is realized by Buddhas and arahats before death with vipāka-namakkhandha and kammaja-rūpas remaining is called sa-upādisesa Nibbāna-dhātu.

(2) Anupädisesa-Nibbana

This is the Nibbāņa experienced by Buddhas and arahats after death. The element of Nibbāna which is realized without any vipāka-namakhandha and kammaja - rūpa remaining is called anupādisesa Nibbāna-dhātu.

Sa-upādisesa Nibbāna = Kilesa Nibbāna, i.e.

it is attained by the annihilation of kilesās.

Anupādisesa Nibbāna = Khandha Nibbāna, i.e. it is attained by the annihilation of the five aggregates.

Three Modes of Nibbana

Suññata-Nibbana

Nibbāna is devoid of lust, hatred and ignorance; it is also devoid of groups of rapa and nāma. So it is called Suññata-Nibbāna.

Suñña = void or zero; here it means that lust, hatred, ignorance, rūpa and nāma are zero, but it does

254 THE ESSENCE OF BUDDHA ABHIDHAMMA not mean that Nibbana is 'nothingness'.

2. Animitta-Nibbana

Material groups, which are composed of rūpa-kalāpas, have different forms and shapes. Mental groups consistint of citta and its concomitants may be assumed to have some kind of form for they can be seen by certain persons who have developed super-normal power (abhinīnās). Nibbāna, however, has no form and shape at all. Thus it is called Animitta-Nibbāna.

3. Appanihita-Nibbana

Nibbana has no nama and rupa nor any form and shape to be longed for by tanhā (craving or lust). Neither is there any lust or craving in Nabbana. Nibbana is absolutely free from lust as well as from the hankerings of lust. So it is known as Appanihita-Nibbana.

Some more Definitions of Nibbana

Nibbana may also be characterised by the following virtues.

- (1) Accutam = It has past death, and thus no death occurs in Nibbana.
- (2) Accantain = It has past the end called death, so it is endless.
- (3) Asańkhatam = It is not conditioned by the four causes—viz., kamma, citta, utu and āhāra. Hence it is eternal and is neither a cause nor an effect.
- (4) Anuttaram = It is superior to and more noble than any Dhamma.
- (5) Padam = It is an objective reality (vatthu-dhamma) that can be realized by ariyas (noble persons).

Chapter VII

SAMUCCAYA (Compendium of Ultimate Entities)

Introductory

Seventy-two kinds of ultimate entities, called vatthu-dhammas because they have their own characteristics, have been described so far. They are citta, 52 cetasikas, 18 nipphanna-rūpas and Nibbāna.

- Citta All the 89 or 121 types of consciousness are regarded as one as they all possess the characteristic of 'awareness'. Actually they are 89 or 121 types of combinations of citta with various cetasikas.
- Cetasikas All 52 mental factors are viewed separately as they possess different characteristics.
- Nipphanna-rūpas All the 18 rūpas which are caused and conditioned by kamma, citta, utu and āhāra are regarded to be real and viewed separately as they possess different characteristics.
- Nibbana It is one with regard to its characteristic of peacefulness (santi-lakkhana).

Thus the total number of vatthu-dhammas

= 1+52+18+1

= 72

All these 72 are subjective and objective realities. The related ones will be grouped into categories in the present chapter.

Compendium of Categories

The compendium of categories that will be treated here is fourfold:-

- 1. the compendium of immoral categories,
 - 2. the compendium of mixed categories,
- 3. the compendium of categories that pertain to enlightenment, and
- 4. the compendium of the whole vatthu-dhammas

(1) Compendium of Immoral Categories

(Akusala – sangaha)

There are nine immoral categories— viz. Āsava, Ogha, Yoga, Gantha, Upādāna, Nivārana, Anusaya Samyojana and Kilesa.

1. Four Āsavas

(Four Cankers or Intoxicants)

Asava' means intoxicant, defilement corruption, tain, stain, canker, etc. We know that fermente liquor which has been left in the fermenting pot for a long time can strongly intoxicate men. Similarly the asavas, which have been being fermented in the khandhu stream of beings for aeons, i.e., a samsāra, make me drunk and forgetful of their liberation. There are for asavas.

- 1. Kāmāsava= attachment ot sensual pleasures in the sense-sphere; it is lobha associated with 8 lobha-mūla cittas.
- 2. Bhavasava= attachment to rūpa-jhāna and arūpajhāna as well as to the existence
 rūpa- and arūpa-planes; it is lobi
 associated with 4 lobha-mūla ditthigat
 vippayutta cittas.

3. Ditthäsava = 62 kinds of false views; it is ditthi present in 4 lobhamūla ditthigata-sampayutta cittas.

4. Avijjāsava= ignorance with regard to the four Noble Truths, past life, future life, both past and future lives, and the Law of Dependent Origination. It is moha associated with 12 akusala cittas.

Note: The essential elements of the four āsavas are just three-namely, lobha, ditthi and moha. These three strongly intoxicate beings and make them wander in samsāra.

2. Four Oghas (Four Floods)

' Ogha' means flood, torrent, whirlpool, overwhelm or suffocate.

Just as great floods sweep away men and animals into the sea, overwhelm, suffocate and drown them, so also the four oghas sweep away beings, overwhelm, suffocate and drown them in the great ocean of samsāra. Like four great whirlpools in the broad ocean, they can pull down any being who comes over them, and so it is very difficult to cross over them. The four Oghas are similar to the four āsavas, their essential elements being the same.

. Kāmogha= the flood of sensual desire,

- Bhavo-gha= the flood of desire for jhānas and existence in rūpa-and arūpaplanes,
- 3. Ditthogha= the flood of false views,
- 4. Avijjogha= the flood of ignorance.

3. Four Yogas (Four Bonds)

'Yoga' means junction, union, application, devotion, attachment, bond, glue or 'to yoke'.

The oxen which are yoked to the cart cannot get away from the cart. Similarly the beings who are yoked to the machine of existence and firmly attached to the wheel of samsāra by means of four yogas, cannot get away from the machine of existence and from samsāra.

The four oghas are again similar to the four asavas, the essential elements being the same.

- 1. Kāmayoga= attachment to sensual pleasure,
- .2. Bhavayoga= Attachment to jhānas and to the existence in rūpa-and arūpa-planes,
- · 3. Ditthiyoga= attachment to false views,
- 4. Avijjayoga= attachment to ignorance.

4. Four Ganthas (Four Ties)

'Gantha' means 'a tie' or 'a bond'. The four ganthas are the strong bonds which tie the groups of rūpa and nāma of this existence to those of future existences.

In the following names of ganthas, 'kāya' is used in the sense of group or mass implying both mental and physical.

1. Abhijjhā-kāyagantha = all forms of craving (tāṇhā); it is lobha present in the 8 lobha-mūla cittas.

2. Vyápáda-káyagantha = All forms of anger or illwill.

It is dosa present in the 2 dosa-mula cittas,

- 3. Silabbataparāmāsa-kāyagantha = adherence to the false view that one becomes pure and thus be liberated by bovine and canine morality or conduct; it also includes adherence to rites and ceremonies; it is ditthi present in the 4 lobha-mūla ditthi-sampayutta cittas.
- 4. Idamsaccábhinivesa-káyagantha = dogmatic belief that only one's view is true and all the others are futile or that "this alone is truth". It is also ditthi present in the 4 lobha-mula ditthi-sampayutta cittas.

5. Four Upadanas (Four Graspings)

'Upādāna' means strong attachment or clinging or grasping; it is like a snake grasping a frog without letting it go. Upādāna is stronger than taṇhā (craving). Taṇhā is like a thief groping in the dark to steal something whereas upādāna is like the actual stealing.

1. Kāmupādāna = sense-desire or clinging to the five sense-objects;

it is lobha present in the 8 lobha-milla cittas.

- 2. Ditthupādāna = clinging to all false views except the two views to be mentioned in (3) and (4); it is ditthi present in the 4 lobha-mūla ditthisampayutta cittas.
- 3. Silabbatupādāna = clinging to the false view that one becomes pure and thus be liberated by

260 THE ESSENCE OF BUDDHA ABHIDHAMMA bovine and canine morality or conduct; clinging to rites and ceremonies; it is also ditthi present in the 4 lobha-mula ditthi-sampayutta cittas.

4. Attavādupādāna = clinging to the theory that the soul exists, and that I, you, he, she, persons, etc., exist; it is synonymous with 'sakkāya-ditthi' which is 'personality-belief'. It is also ditthi present in the 4 lobha-mūla ditthi-sampayutta cittas.

Note: The latter three upādānas represent diţihi cetasika alone. They are differentiated as three because the ways and the objects of clinging are different.

6. Six Nivāranas (Six Hindrances)

'Nivārana' means 'hindrance' or 'obstacle'. Nivāranas hinder and prevent the arising of good thoughts and good deeds, jhānas and maggas. Thus they obstruct the way to celestial and Nibbānic bliss.

Especially the first five nivāranas blind our mental vision and obstruct our moral actions. We have to wrestle with them whenever we try to perform some good deed whether it be saying some prayers or undertaking meditation. In the presence of them we cannot reach neighbourhood-concentration (upacāra-samādhi) and full concentration (appanā-samādhi), and are unable to discern clearly the truth.

1. Kamacchanda = sense-desire; it is lobha in the 8 lobha-mula cittas.

- 2. Vyāpāda = ill-will; it is dosa in the 2 dosa mūla cittas.
- 3. Thina-middha = sloth and torpor; they are thina-cetasika and middha-cetasika.
- 4. Uddhacca-kukkucca = restlessness and brooding or worry; they are uddhacca-cetasika and kukkucca-cetasika.
- 5. Vicikiccha=sceptical doubt or perplexity; it is vicikiccha-cetasika.
- 6. Avijjā= ignorance; it is moha present in the 12 akusala cittas.

Notes:- (1) Both sloth and torpor, restlessness and brooding are grouped together because their functions (kicca), their causes (hetu) and their opposing factors are the same.

The function of sloth and torpor is mental inactivity, their cause is laziness, and they are opposed to energy (viriya).

The function of restlessness and brooding is disquietude, their cause is vexation about the loss of property, etc., and they are opposed to tranquility.

(2) In the beautiful similes given by Buddha in Anguttara Nikāya, sense-desire is compared with water mixed with manifold colours, ill-will with boiling water, sloth and torpor with water covered by mosses, restlessness and brooding with agitated water whipped by the wind, and sceptical doubt with turbid and muddy water. Just as in such water one cannot perceive one's own reflection, so also in the presence of these five mental hindrances, one cannot clearly discern one's own benefit, nor that of others, nor that of both.

7. Seven Anusayas

(Seven Latent Defilements)

'Anusaya' means 'to lie dormant' or 'to remain latent'. The seven anusayas are the seeds or potentiality of defilements (kilesās) that lie dormant in the khandha—streams of beings life after life throughout the long samsāra. They are like the potentiality of a tree to bear fruits; the potentiality cannot be found anywhere within the tree, but we know it is there by seeing the fruits it bears when the time is ripe.

Anusayas are no-where to be seen. They do not have distinct appearances, and they are not specified by such characteristics as arising-existing-dissolving. But they remain ready to come to the surface as real defilements at an apportune moment when they are in contact with the corresponding sense-objects.

- 1. Kāmarāgānusaya = attachment to sense-objects; it is lobha present in the 8 lobhamūla cittas.
- 2. Bhavarāgānusaya = attachment to rūpa-jhānas, arūpa-jhānas, and the existence in rūpa-and arūpa-planes; it is lobha in the 4 lobhamūla dithi-vippayutta cittas.
- 3. Patighānusaya = ill-will or hatred; it is dosa present in the 2 dosamūla-cittas.
- 4. Mānānusaya = pride; it is māna-cetasika present in the 4 lobha-mūla diţthi-vippayutta cittas.
- 5. Ditthanusaya = false views; it is ditthi-cetasika present in the 4 lobha-mula ditthi-sampayutta cittas.

- 6. Vicikicchānusaya = sceptical doubts; it is vicikicchācetasika present in moha-mūla
 vicikicchā-sampayutta citta.
- 7. Avijjānusaya = ignorance; it is moha present in the 12 akusala cittas.

8. Ten Samyojanas

(Ten Fetters)

'Samyojana' means fetter that binds beings to the wheel of existence and to the rounds of misery. There are ten fetters which bind each individual to the wheel of existence.

- (a) Ten Fetters according to Sutta Pitaka:
- 1. Kamaraga-samyojana = Attachment to senseobjects,
- 2. Rüparäga-samyojana = attachment to rūpa-jhanas and rūpa-existence,
- 3. Aruparaga-samyojana = attachment to arupaihāna and arupa-existence,
- 4. Patighā-samyojana = ill-will or hatred,
- 5. Mana-samyojana = pride,
- 6. Ditthi-samyojana = false views,
- 7. Silabbata-parāmāsa-samyojana = adherence to the false view that one becomes pure by bovine and canine morality or by rites and ceremonies.
 - 8. Vicikicchā-samyojana = sceptical doubt,
 - 9. Uddhacca-samyojana = restlessness,
- 10. Avijjā-samyojana = ignorance.

The essential elements for the above ten fetters are lobha (for 1,2,3), dosa, māna, ditthi (for 6,7). vicikicchā, uddhacca and moha— i.e., 7 cetasikas in al!.

(b) The Fetters according to Abhidhamma - Pitaka:

- 1. Kāmarāga-samyojana = attachment to sense-objects,
- 2. Bhavaraga-samyojana = attachment to rūpa- and arūpa-jhānas and rūpa- and arūpa-existences,
- 3. Patigha-samyojana = ill-will or hatred,
- 4. Mãna-samyojana = pride,
- 5. Ditthi-samyojana = false views,
 - 6. Silabbata-parāmāsa -samyojana = as above,
 - 7. Vicikicchä-samyojana = septical doubt,
 - 8. Issā-samyojana = envy,
 - 9. Macchariya-samyojana = avarice,
 - 10. Avijjā-samyojana = ignorance.

The essential elements for the Abhidhamma ten fetters are lobha (for 1,2), dosa, māna, ditthi (for 5,6) vicikicchā, issā, macchariya and moha—i.e. 8 cetasikas in all.

The essential elements for both Sutta and Abhidhamma fetters are 9 cetasikas — the 7 for sutta fetters + issā and macchariya.

9. Ten Kilesās (Ten Defilements)

'Kilesā' means 'defilement or torment'. Kilesās defile, burn and afflict the mind. There are ten kilesās.

- 1. Lobha = greed or attachment,
- 2. Dosa = hatred or ill-will,
- 3. Moha = delusion or ignorance,
- 4. Māna = pride or conceit,
- 5. Ditthi = false views,

6. Vicikicchá = sceptical doubt or indecision,

7. Thina = sloth.

8. Uddhacca = restlessness,

9. Ahirika = moral shamelessness,

10. Anottappa = moral fearlessness.

1500 Kilesäs

One citta, 52 cetasikas, 18 nipphanna-rūpas and 4 lakkhana-rūpas together add up to 75 entities. These . 75 nāma and rūpa entities exist both internally and externally. So if we multiply 75 with 2 for ajihattika (internal) and bahiddha (external), we get 150. As these 150 entities are the objects of operation for each kilesā. we multiply 150 with 10 kilesas when we get 1500 kilesās.

108 Modes of Tanha

Tanhā is craving. It is the chief root of suffering, and of the ever continuing cycle of rebirths. First, craving is of three kinds:-

1. Káma-tanhá = craving for sense-objects.

2. Bhava-tanhã = craving for rupa- and arupajhānas and rūpa- and arūpaexistences,

3. Vibhava-tanhã = craving for non-existence.

Corresponding to the six sense-objects, there are six kinds of craving:-

1. rūpa-tanhā = craving for visible objects,

2. sadda-tanhā = craving for sounds,

3. gandha-tanhã = craving for odours,

- 4. rasa-tanhã = craving for tastes,
- 5. photthabba-tanhā = craving for bodily impressions.
- 6. dhamma-tanha = craving for mental impressions.

If we multiply the first group of 3 kinds of craving with the second group of 6, we get 18 kinds of craving. Again multiplying this by 2 as they may be included internally and externally, we get 36 kinds of craving.

Now these 36 kinds of craving can occur in the past, in the present and in the future. So they total to 108 kinds of tanhā.

Guide to reading Table 7.1

(a) Reading longitudinally

- Lobha occurs in all the 9 departments as Asava, Ogha, Yoga, Gantha, Upādāna, Nivārana, Anusaya, Samyojana and Kilesā.
- 2. Ditthi occurs in 8 departments as Asava, Ogha, etc., as shown in the Table.
- 3. The rest can be read in a similar way.

(b) Reading vertically

- 4. Four Asavas have 3 essential elements lobha, ditthi, and moha. The same is true for oghas and Yogas.
- 5. Four Ganthas also have 3 essential elements lobha, ditthi and dosa.
- 6. The rest can be read in a similar way.

Table 7.1 Akusala-sangaha

14 Akusala Cetasikas (Immoral Categories)	Department	4 Āsavas	4 Oghas	4 Yogas	4 Ganthas	4 Upādānas	6 Nivaranas	7 Anusayas	10 Samyojanas	10 Kilesas

(2) Compendium of mixed Categories (Missaka-sangaha)

There are seven mixed categories – viz., Hetu, Jhānanga, Magganga, Indriya, Bala, Adhipati and Āhāra.

1. Six Hetus (Six Roots)

'Hetu' means root, cause, condition or root-condition. As the roots make a tree firm, prosperous and well-established, so in the same way the six hetus make cittas and cetasikas associated with them firm, prosperous and well-established at the sense-objects.

There are 3 moral roots and 3 immoral roots. The three immoral roots (akusala-hetus) are:-

- 1. Lobha = greed or attachment,
- 2. Dosa = ill-will or hatred,
- 3. Moha = ignorance or delusion.

Three moral roots (kusala-hetus) are:

- 4. Alobha = non-attachment,
- 5. Adosa = good-will, loving-kindness
- 6. Amoha = wisdom.

The moral roots also associate with sobhana kiriya-cittas and vipāka-cittas. Thus they are also known as indeterminate roots (avyākata-hetus) because kiriya-cittas and vipāka-cittas are called indeterminate (avyākata).

2. Seven Jhanangas (Seven Constituents of Jhana)

'Jhānangas' means 'jhāna-factors' or 'constituents of absorptions'. The jhāna-factors help the cittas and their associated cetasikas to observe an object, either bad or good, keenly, closely and fixedly.

1. Vitakka = initial application,

2. Vicara = sustained application,

3. **Piti** = Joy,

4. Ekaggata = one-pointedness,

5. Somanassa-vedana = pleasant feeling,

6. Domanassa-vedaņā = unpleasant feeling,

7. Upekkhā-vedanā = neutral feeling or equanimity.

3. Twelve Maggangas (Twelve Constituents of the Path)

'Magga' means 'path' and 'maggangas' means 'constituents of the path'. Unwholesome constituents combine to form a path leading to the woeful state whereas wholesome constituents combine to form a path leading to the blissful state up to Nibbana.

- 1. Sammā-ditthi = right view, it is paññā present in 8 mahā-kusala cittas, 8 mahā-kiriya cittas and 26 appanā javanas.
 - 2. Sammā-sankappa = right thought; it is vitakka present in the above 42 cittas.

- 3. Sammā-vācā = right speech; it is sammā-vācā cetasika present in 8 mahā-kusala cittas and 8 lokuttara cittas.
- 4. Sammā-kammanta= right action; it is sammākammanta cetasika present in 8 mahā-kusala cittas and 8 lokuttara cittas.
- 5. Samma-ājīva = right livelihood; it is sammāājīva cetasika present in 8 mahākusala cittas and 8 lokuttara cittas.
- 6. Sammā-vāyāma = right effort; it is viriya present in 8 mahā-kaisala cittas, 8 mahā-kiriya cittas and 26 appanā-javanas.
- 7. Sammā-sati = right mindfulness; it is saticetasika present in the above 42 cittas.
- 8. Sammā-samādhi = right concentration; it is ekaggatā present in the above 42 cittas.
- 9. Miccha-ditthi = wrong view; it is ditthi present in 4 lobha-mūla ditthi-sampayutta cittas.
- 10. Micchä-sankappa= wrong thought; it is vitakka present in 12 akusala-cittas.
- 11. Micchà-văyāma = wrong effort; it is viriya present in 12 akusala-cittas.
- 12. Micchā-samādhi= wrong concentration; it is ekaggatā present in 12 akusala cittas.

4. Twenty-two Indriyas

(Twenty-two Faculties)

'Indriya' means 'faculty' or 'controlling power'. As the ministers control their respective ministries, the indriyas control their associates (sampayutta-dhammas) in their respective fields of influence. The 22 indriyas are partly physical and partly mental.

- 1. Cakkhundriya = cakkhu-pasāda = sensitive part of the eye.
- 2. Sotindriya = sota-pasāda = sensitive part of the ear,
- 3. Ghanindriya = ghāna-pasāda = sensitive part of the nose,
- 4. **Jivhindriya** = jivhā-pasāda = sensitive part of the tongue,
- 5. **Kāyindriya** = $k\bar{a}ya$ - $pas\bar{a}da$ = sensitive part of the body,
- 6. Itthindriya = itthibhāva-rūpa = femininity,
- 7. Purisindriya = purisa-bhava-rūpa = masculinity,
- 8. **Jivitindriya** = jivita rūpa and jivitindriya-cetasika = vitality
- 9. Manindriya = 89 or 121 cittas,
- 10. Sukhindriya = sukha-vedanā = bodily pleasant feeling,
- 11. Dukkhindriya = dukkha-vedanā = bodily pain,
- 12. Somanassindriya = somanassa vedanāā = gladness,
- 13. Domanassindriya = domanassa vedanā = sadness,
- 14. Upekkhindriya = upekkhā vedanā = indifference,

- 15. Saddhindriya = $saddh\bar{a}$ = faith,
- 16. Viriyindriya = viriya = effort,
- 17. Satindriya = sati = mindfulness,
- 18. Samadhindriya = ekaggatā = concentration,
- 19. Paññindriya = paññā = wisdom,
- 20. Anaññátiññassámītindriya = paññā associated with sotāpatti-magga,
- 21. Afinindriya = paññā associated with 3 upper maggas and the 3 lower phalas,
- 22. Aññātāvindriya = paññā associated with arahatta phala.
- Notes: (1) Please note that the sensitive part of the eye controls seeing, the sensitive part of the ear controls hearing, and so on. The two bhāvarītpas control the primary and the secondary characters of sex. Vitality controls the life-terms of its associates. The cittas control their concomitants in the collective efforts of taking and knowing the objects.

- (2) List No. 1-7 indrivas are physical, 8 is both physical and mental and the rest are mental.
- (3) List No. 1-5 and 9 represent 6 bases. List No. 6,7 are two bhāva-rūpas. List No. 10-14 represent 5 feelings. List No. 15-19 represent 5 spiritual faculties.

The last three are supermundane faculties.

(4) The number of *indrivas* present in a male or a female worldling is 18, excluding the opposite sex-rupa and the last 3 supermundane faculties.

5. Nine Balas

(Nine Powers)

- "Bala" means "power". The nine "powers' are strong and firm and they cannot be shaken by the opposing forces. Besides they strengthen their concomitants or associates.
- 1. Saddhā-bala = faith; it is saddhā present in sobhana cittas:
- 2. Vîriya-bala = energy; it is *vîriya* present in the 73 cittas associated with *vîriya*.
- 3. Sati-bala = mindfulness; it is sati present in sobhana cittas.
- 4. Samādhi-bala = concentration; it is ekaggata present in 72 cittas, excluding the 16 cittas not associated with viriya and also the vicikicchā-sampayutta citta.

- 5. Paññã-bala = wisdom; it is paññã present in the 47 tihetuka cittas.
- 6. Hirt-bala = moral shame; it is hiri-cetasika present in sobhana cittas.
- 7. Ottappa-bala = moral dread; it is ottappa present in sobhana cittas.
- 8. Ahirika-bala = moral shamelessness; it is ahirika present in 12 akusala cittas.
- 9. Anottappa-bala = moral fearlessness; it is anottappa present in 12 akusala cittas.

Of the 9 powers, the first seven may be regarded as moral whereas the last two as immoral. Ahirika and anottappa are prominent in wicked persons.

In accordance with the definition that *Balas* are unshakable by their opposites, (1) the power of Faith is unshaken by faithlessness, (2) Energy by laziness, (3) Mindfulness by forgetfulness, (4) Concentration by distractedness, (5) Wisdom by ignorance.

Hiri and ottappa strongly support moral actions whereas ahirika and anottappa lead the way to immoral actions.

6. Four Adhipatis

(Four Dominating Factors)

'Adhipati' means supreme, sovereign, lord, chief, king, etc. It is the chief among its associates and it has no equal. As there is one king in a country, so there is only one adhipati in a mental group of citta and its concomitants.

Adhipati should be differentiated from indriya. Adhipati may be compared to a king who, as the undisputed head of the state, lords over all his ministers and countrymen. Indriyas are like ministers who control only their

respective ministries without interfering with the others. Indriyas have equals and they have to follow the adhipati.

Adhipati may be regarded as the " dominating

factor" in a mental group.

1. Chandadhipati = intention or will; it is chandacetasika present in 18 dvi-hetuka javanas and 34 tihetuka-javanas.

2. Viriyādhipati = energy or effort; it is viriya present in 18 dvi-hetuka javanas and 34 tihetuka-javanas.

3. Cittadhipati = concsciousness or thought; it is the 18 dvi-hetuka javana cittas and the 34 tihetuka-javana cittas.

4. Vimamsādhipati = wisdom; it is paññā present in 34 tihetuka javanas. Vimamsā is the wisdom which can investigate and reason.

Notes: (1) Eighteen dvi-hetuka javanas = 8 lobhamüla cittas, 2 dosa-müla cittas, 4 nāṇa-vipayutte mahākusala cittas and 4 nāṇa-vipayutta mahā-kiriya cittas.

Thirty-four ti-hekuta javanas = 4 nāṇasampayutta mahā-kusala cittas, 4 nāṇa-sampayutta maha-kiriya cittas, 9 mahaggata-kusala cittas, 9 mahaggata-kiriya cittas, 4 maggas and 4 phalas.

(2) When one of the adhipatis is very strong, all its associates come along to support it, and they together will achieve the aim set for.

7. Four Aharas
(Four Kinds of Food)

'Ahāra' means nutriment, cause, sustenance. Any dhamma, which can produce and sustain its resultant as our body is sustained by edible food, is called an āhāra. There are four types of āhāra.

1. Kabalikārāhāra = edible food; it is ojā-rūpa. It produces and sustains the āharaja suddhaṭṭhaka — the eighthfold corporeality having nutriment essence as its eighth factor.

2. Phassāhāra = contact or sense-impact; it is phassa cetasika present in all cittas. It produces and

sustains, the five kinds of feeling (vedanā).

3. Manosancetanáhára = mental volition; it is the cetaná which manifests itself as the 29 types of kamma. It produces and sustains rebirth consciousness.

4. Viññanahara = consciousness; it represents the 89 or 121 types of citta, It produces and sustains its

concomitants (cetasikas) and cittaja-rūpas.

(3) Compendium of Enlightenment-factors (Bodhipakkhiya-sangaha)

'Bodhi' means enlightenment or magga-ñana. 'Bodhipakkhiya' means the components or factors of enlightenment. There are 37 such factors. If one can develop them fully, one will attain enlightenment. The 37 factors are thus regarded as the essence of Tipitaka.

The 37 Factors of Enlightenment are 4 Foundations of Mindfulness, 4 Supreme Efforts, 4 Foundations of Accomplishment, 5 Faculties, 5 Powers, 7 Constituents of Enlightenment and 8 Constituents of the Path.

1. Four Satipatthanas

(Four Foundations of Mindfulness)

'Sati' means mindfulness or attentiveness. 'Patthana' means establishment, application, fixing or foundation.

So the four satipathānas are the four 'foundations of mindfulness' by which one prevents the mind from wandering to other sense-objects and keeps the mind fixed attentively and firmly on the single object of meditation.

Ceylon commentary defines 'satipatthāna' as the mindfulness which is established on its object by penetration, so to speak, into it.

The four 'foundations of mindfulness' are indispensable for the development of tranquility and insight. In the two satipatthāna-suttas, the following weighty words are proclaimed both at the beginning and at the conclusion:

"The only way that leads to the attainment of purity, to the overcoming of sorrow and lamentation, to the end of pain and grief, to the entering of the right path, and to the realization of Nibbāna is the way comprising the four foundations of mindfulness."

- 1. Kāyānupassanā-satipatthāna = contemplation of the body or mindfulness of the corporeality group (rūpakkhandha).
- 2. Vedanānupassanā-satipatthāna = contemplation of the feelings or mindfulness of the feeling group (vedanākhandha).
- 3. Cittanupassana-satipatthana = contemplation of consciousness or mindfulness of the consciousness group (viñnānakkhandha).
- 4. Dhammanupassanā-satipatthana = contemplation of dhamma or mindfulness of the

perception group (saññakkhandha) and the group of mental formations (sañkhārakkandha).

Notes: (1) The essential element of the four satipatthānas is sati-cetasika present in 8 mahā-kasala cittas, 8 mahā-kariya cittas and 26 appanā-javanas as well as the sati present in 8 lokuttara cittas.

(2) The reasons why 'sati' has been described

as four satipatthanas are:

(i) the objects of contemplation are different as kāya, vedanā, citta and dhamma;

- (ii) the manner of contemplation on the four objects are different as asubha (disgusting), dukkha (suffering), anicca (impermanence) and anatta (not-self);
- (iii) the purpose of contemplation on the four objects are different as to eradicate the wrong views that they are *subha* (beautiful), *sukka* (pleasant), *nicca* (permanent) and *atta* (self), respectively.

2. Four Sammappadhānas

(Four Supreme Efforts)

'Sammappadhāna' signifies no ordinary effort, but the unfaltering concentrated effort of one who vows:

"Let me be reduced to skin and bone; let my blood and flesh dry up; let my life come to an end; but I will not stop till I succeed!"

Sammappadhāna represents viriya present in 8 mahā-kusala cittas, 9 mahaggata-kusala cittas and 4 lokuttara-kusala cittas (21 kusala cittas in all).

The four supreme efforts are:

1. The effort to discard evils that have arisen,

- 2. The effort to prevent the arising of unrisen evils.
- 3. The effort to bring about the arising of unrisen good,
- 4. The effort to further arisen good.

According to the above efforts, one must try to discard greed, hatred, envy, etc., as soon as they arise in the mind. One must develop dāna, sīla and bhāvanā as much as possible. And finally, to bring about the arising of the unrisen good which has never arisen in the long samsāra, one must purify one's mind stage by stage by tranquility and insight meditation till one enters the path of the stream-winner (sotāpanna) and the higher Paths (maggas).

Note: The reason why viriya is described as the four supreme efforts is that the function of viriya has been differentiated into 4 categories -viz., (1) to discard evils that have arisen, (2) to prevent the arising of unrisen evils, (3) to develop unrisen good, and (4) to further the arisen good.

3. Four Eddhipadas

(Four Foundations of Accomplishment)

'Iddhi' means 'accomplishment' while 'pāda' signifies 'foundation'. The 'accomplishment' here refers to the arising of jhanas, maggas and phalas. And the foundations to achieve these ends are chanda, viriya, citta and vimamsa – the same as the four adhipatis.

- 1. Chandiddhipāda = will; it is chanda present in 21 kusala cittas.
- 2. Viriyiddhipāda = energy or effort; it is viriya present in 21 kusala cittas.
- 3. Cittiddhipāda = consciousness or thought; it is 21 kusala cittas consisting of

8 mahā-kusala cittas, 9 mahaggata-kusala cittas and 4 lokuttara-kusala cittas.

4. Vimamsiddhipāda= wisdom, it is paññā present in 21 kusala cittas.

4. Five Indriyas (Five Faculties)

Of the twenty-two faculties mentioned earlier, the five spiritual faculties are taken here as factors of enlightenment.

- 1. Saddhindriya = faith or confidence; it is saddhā present in 8 mahā-kusala cittas, 8 mahā-kiriya cittas, and 26 appanā javanas.
- 2. Viriyindriya = energy or effort; it is viriya present in the above 42 cittas.
- 3. Satindriya = mindfulness; it is sati present in the above 42 cittas.
- 4. Samadhindriya = concentration; it is ekaggatā present in the above 42 cittas.

5. Five Balas (Five Powers)

The essential elements of the five Powers are the same as those of the five Faculties. It should be understood that each of these five elements has two distinct properties:- (1) the ability to control the mind, and (2) the ability to be firm and unshakable by the opposing force.

- 1. Saddhā-bala = faith or confidence,
- 2. Viriya-bala = energy or effort,

- 3. Sati-bala = mindfulness,
- 4. Samadhi-bala = concentration,
- 5. Pañña-bala = wisdom.

In practice, saddhā and paññā should balance each other, because too much faith leads to unreasonable belief and too much investigation leads to no concentration.

Similarly viriya and samādhi should balance each other, because too much effort may lead to restlessness and two much concentration may lead to drowsiness.

Sati need not be balanced by any factor; the more sati, there is, the better it is.

6. Seven Bojjhangas

(Seven Constituents of Enlightenment)

'Bojjhanga' is derived from 'bodhi-anga' in which bodhi = enlightenment and anga = constituent. Thus 'bojjhanga' means 'constituents of enlightenment'.

In sambojjhanga, 'sam' means 'good or exalted'.

- 1. Sati-sambojjhanga = mindfulness,
- Dhammavicaya-sambojjhanga = wisdom that investigates the truth;
- 3. Viriya-sambojjhanga = energy or effort,
- 4. Pîti-sambojjhanga = rapture.
- 5. Passaddhi-sambojjhanga = tranquility of the mind comprising citta and cetasikas,
- 6. Samādhi-sambojjhanga = concentration,
- 7. Upekkhā-sambojjhanga = equanimity.
 The essential elements of the seven bojjhangas are (1) sati (2) pannā, (3) viriya, (4) piti, (5) kāya-passaddhi and citta- passaddhi, (6) ekaggatā,

and (7) tatramajjhattatā, respectively—all being present in the 42 cittas comprising 8-mahā-kusala cittas, 8 mahā-kiriya cittas and 26 appanā javanas.

Dhammavicaya, vîriya and pîti are opposed to thina-middha (sloth and torpor); passaddhi, samādhi and upekkhā are opposed to uddhacca (restlessness).

7. Eight Maggangas

(Eight Constituents of the Path) .

They comprise the first eight maggangas out of the twelve mentioned in the compendium of mixed categories. The essential elements are also the same.

Paññā-maggangas (wisdom)

- 1. Sammā-ditthi = right view
- 2. Sammä-sankappa = right thought Sila-maggangas (morality)
- 3. Sammā-vācā = right speech
- 4. Sammā-kammanta = right action
- 5. Sammā-ājīva = right livelihood

 Samādhi-maggangas (concentration)
- 6. Sammā-vāyāmo = right effort
- 7. Sammä-sati = right mindfulness
- 8. Sammā-samādhi = right concentration

In developing the right constituents of the Path, one should start with the right speech, the right action and the right livelihood — the three sila-maggangas which constitute moral training (sila-sikkhā).

Based on sila, one then develops the right effort, the right mindfulness and the right concentration – the three samādhi-maggangas which constitute mental training (samādhi-sikkhā).

When one attains upacāra-samādhi (neighbour-hood-concentration) or better jhāna samādhi (concen-

tration associated with absorption), one can penetrate to the ultimate realities and investigate the true nature of mind and matter. Here sammā-sankappa — the right thought based on the right method of investigation — comes into play.

The right method of investigation and analysis reveals the truth which gives rise to the right view -sammā-diṭṭhi. The right view is the most important factor of enlightenment. It provides a really unshakable and safe foundation of the path. Starting from the tiniest germ of faith and knowledge, it gradually, step by step, develops into penetrating insight (vipassanā-nāna) and then further into the knowledge of the four Noble Truths when magga-nāna or enlightenment is attained.

Sammā-sankappa and sammā-ditthi together constitute paññā-sikkhā (wisdom-training).

All the eight constituents together constitute the Noble Path or the Middle Path which leads to Nibbāna.

Review on Bodhipakkhiya

Although there are 37 enlightenment-factors, the essential elements amount to only 14 – namely, sati, viriya, chanda, citta, paññā, saddhā, ekkaggatā, plti, passaddhi (both kāya and citta), tatramajjhattatā, vitakka, sammā-vācā, sammā-kammanta and sammā-ājiva.

Of these 14 essential elements, pîti, passaddhi, tatramajjhattā, vitakka, 3 viratis, chanda and citta occur only as one factor each.

Viriya occurs 9 times, i.e. as 9 factors; sati as eight factors; ekaggatā as 4 factors; paññā as five factors; and saddhā as 2 factors. Please see Table 7.2.

Table 7.2 Bodhipakkhiya-sangaha

14 essential elements of 37 factors of Enlightenment	4 Satipatthānas No of times	4 Sammappadhānas	4 Iddhipādas	5 Indriyas	5 Balas	7 Bojjhangas	8 Maggangas

(4) Compendium of the whole Vatthu-dhammas

(Sabba-Sangaha)

Five categories will be dealt with here. They are Khandha, Upādānakkhandha, Āyatana, Dhātu and Ariyasacca.

1. Five Khandhas (Five Aggregates)

'Khandha' means group or aggregate. Buddha has summed up all the physical and the mental phenomena of existence into five groups or aggregates.

Rupakkhandha = corporeality group consisting of 28 rupas.

2. Vedanākkhandha = feeling group consisting of sukha-vedanā, dukkha-vedanā, somanassa-vedanā, domanassa-vedanā and upekkhā-vedanā.

3. Saññakkhandha = perception group, comprising perceptions of form, sound, odour, taste, bodily impression and mental impression.

4. Sankhärakkhandha = group of mental formations; it consists of 50 cetasikas other than vedanā and sannā.

5. Viññanakkhandha = consciousness group; it consists of 89 or 121 cittas.

In grouping the components of each khandha, eleven aspects must be taken into account. These aspects are past, present, future, internal (ajjhattika), external (bahiddha), inferior (hina), superior (pantta), distant (dure), near (santike), gross (olarika) and subtle (sukhuma).

The purpose of analysing a being into five groups of existence is to eliminate the wrong perception and the wrong view that ego, self, personality or atta exists. This elimination will lead to the path of stream-winner.

2. Five Upādānakkhandhas

(Five Groups of Grasping)

In specifying the five khandhas, Buddha has taken into account all the physical and the mental phenomena. But in vipassanā-meditation one does not investigate the lokuttara cittas and their associated cetasikas.

The 81 lokiya-cittas, their concomitants and the corporeality group form the objects of grasping by lobha and ditthi. The division of these objects of grasping into five groups gives rise to five upādānakkhandhas.

1. Rűpupádánakkhandha = corporeality group consisting of 28 rupas.

- Vedanupādānakkhandha = feeling group consisting of vedanās associated with 81 lokiya cittas.
- 3. Saññupādānakkhandha = perception group consisting of saññās associated with 81 lokiya cittas.
- 4. Sankhārupādānakkhandha = group of mental formations; it consists of 50 lokiya cetasikas other than vedanā and sannā.
- 5. Viññanupadanakkhandha = consciousness group consisting of 81 lokiya cittas.

Reason for Classification of two Types of Khandha

- 1. In order to show that there are only five groups of existence and that there are no ego, self, persons or atta, Buddha classified all the physical and mental phenomena, whether lokiya or lokuttara, into five groups. This is His first khandha-desanā.
- 2. In insight-meditation, the lokuttara cittas and their concomitants are not investigated, because they do not belong to the group of suffering (dukkha-sacca). Only lokiya cittas and their concomitants as well as the corporeality group are investigated in insight meditation, because they are grasped by upādāna (lobha and dithi) and they are involved in the round of misery. Besides they possess the characteristics of impermanence (unicca), suffering (dukkha) and not-self (anatta).

So Buddha again classified the physical and the mental phenomena which are grasped by upādāna into five groups. This is His second upādānakkhandhadesanā.

Nibbana is Khandha-vimutti

In the classification of five groups of existence, Nibbāna is not included. The reason is that there is only one Nibbāna and it belongs to a class of its own. As it always exists, it cannot be differentiated as past, present and future. It cannot be differentiated as internal and external – it belongs to the external (bahiddha). It cannot be differentiated as base and supreme – it belongs to the supreme (panita). It cannot be differentiated as dure (distant) and santike (near) –

it is dure alone as it is far from ordinary knowledge. It cannot be differentiated as gross and subtle — it is subtle (sukhuma).

Bahiddha, sukhuma, panīta and dure do not imply different Nibbānas – they are the different attributes of the same Nibbāna.

So there are no two varieties of Nibbana. Thus Nibbana need not be classified as a khandha.

3. Twelve Ayatanas (Twelve Bases)

'Ayatana' means base, source or sphere. Here the twelve ayatanas means the 12 bases or sources from which consciousness and its concomitants arise.

The 12 bases are divided equally into two groups:

(a) ajjhattika (internal) and (b) bāhira (external).

(a) Ajjhattikāyatana (six internal bases)

1. Cakkháyatana = cakkhu-pasāda = eye-base

(sensitive part of the eye)

2 Sotāvatana = sota-pasāda = ear-base

2. Sotayatana = sota-pasada = ear-base (sensitive part of the ear)

3. Ghānāyatana = ghāna-pasāda = nose-base (sensitive part of the nose)

4. Jivhāyatana = jivhā-pasāda = tongue-base (sensistive part of the tongue)

5. Kāyāyatana = $k\bar{a}ya$ - $pas\bar{a}da$ = body-base (sensitive part of the body)

6. Mānāyatana = 89 or 121 cittas = mind-base
(b) Bāhirāyatana (six external bases)

7. Rūpāyatana = vanna = visible object

8. Saddayatana = sadda = sound

- 9. Gandhayatana = gandha = odour
- 10. Rasayatana = rasa = taste
- 11. Photthabbhayatana = pathavi, tejo, vāyo = tangible object
- 12. Dhammāyatana = mind-object consisting of 52 cetasikas, 16 sukhuma-rūpas and Nibbāna.
- Notes: (1) The six internal bases consist of the five physical sense-organs and consciousness. Manāyatana is a collective term for all consciousness.
- (2) The six external bases consist of the six sense-objects. Dhammāyatana is a little short of dhammā-rammana as it does not contain cittas, pasādarūpas, and concepts. Cittas and pasāda-rūpas are already described as the six internal bases whereas concepts do not belong to realities, so they are not included in dhammāyatana.
- (3) All cittas, all cetasikas, all rūpas and Nibbāna are included in the 12 āyatanas.
- (4) Cognitive processes arise from the contact between internal and external bases. When the visible object strikes the eye-base, cakkhu-dvāra vīthi arises. When the sound strikes the ear-base, sota-dvāra vīthi arises, and so on.
- the five upādānakkhandhas, may understand the twelve āyatanas and thus see the absence of an ego-entity called 'atta' or 'self'. This understanding may lead to their liberation.
- (6) One other reason why the 'ayatanas' are so-called is that they cause the long cycle of misery.

4. Eighteen Dhatus

(Eighteen Elements)

"Dhātu' is that which bears its own characteristics. It exists in nature and functions its purpose, but it

is not a living being.

Buddha has divided all the realities into 18 dhātus or elements for the benefit of those who could not understand upādānakkhandhas and āyatanas to show them clearly that there is no 'atta' nor 'a living being'. The eighteen dhatus are equally divided into three groups: (a) six subjective elements, (b) six objective elements, and (c) six intellectual elements.

(a) Six Subjective Elements (Dvāras)

Cakkhu-dhātu = cakkhu-pasāda = eye-door

= sota-pasāda = ear-door 2. Sota-dhatu

= ghāna-pasāda = nose-door 3. Ghāna-dhātu

= jivhā-pasāda = tongue-door 4. Jivhã-dhấtu

= kāya-pasāda = body-door 5. Käya-dhätu

= pañca-dvārāvajjana and 2 6. Mano-dhatu sampaticchanas.

(b) Six Objective Elements (Sense-objects)

= vanna = visible object 7. Rūpa-dhātu

8. Sadda-dhatu = sadda = sound

= gandha = odour 9. Gandha-dhátu

= rasa = iaste10. Rasa-dhātu

= pathavi, tejo, vāyo 11. Photthabba-dhatu

= tangible object

12. Dhamma-dhatu = 52 cetasikas, 16 sukhumarapas and Nibbana (the same as dhammayatana)

(c) Six Intellectual Elements

(Consciousness)

13. Cakkhu-viññāṇa-dhātu = 2 cakkhu-viññāṇa cittas

= eye-consciousness

14. Sota-viññāṇa-dhātu = 2 sota-viññāṇa cittas

= ear-consciousness

15. Ghana-viññana-dhatu = 2 ghana-viññana cittas

= nose-consciousness

16. Jivhā-viññāṇa-dhātu . = 2 jivhā-viñnāṇa cittas

= tongue-consciousness

17. Kaya-viññana-dhatu = 2 kaya-viññana cittas

= body-consciousness

18. Mano-viññana-dhatu = 76 cittas excluding

10 dvipanca-vinnāņa cittas and 3 mano-dhātu

cittas.

Notes: (1) Based on six doors and six senseobjects, six types of consciousness arise. Thus there are 18 dhātus or elements.

- (2) The 18 dhātus include all rūpas, all cittas, all cetasikas and Nibbāna just like the 12 āyatanas.
- (3) The 4 essential elements viz., pathavidhātu, āpo-dhātu, tejo-dhātu and vāyo-dhātu should not be counted among the 18 elements, which of course include the 4 essential elements.

5. Four Ariya-saccas

(Four Noble Truths)

'Sacca' means 'truth'. The truth that can be understood fully only by ariyās (noble persons) is called ariya-sacca (Noble Truth).

There are four Noble Truths which are the briefest synthesis of the entire teachings of Buddha. They encompass every thing and contain all those manifold doctrines of the threefold canon (Tipitaka).

They are truly universal laws of the highest form for those who see them clearly become ariyas.

The Abhidhamma names, the common names and the meanings of the four Noble Truths are described in Table 7.3.

Table 7.3 Four Noble Truths

Abhidhamma Name	Common Name	Meaning
1. Dukkha Ariya- sacca	Dukkha Sacca	the Noble Truth
2. Dukkha-samudaya Ariya-sacca	Samudaya Sacca	the Noble Truth of the Cause of
3. Dukkha-nirodha	Nirodha	Suffering the Noble Truth
Ariya-sacca	Sacca.	of the Cessation of Suffering
4. Dukkha-nirodha- gāminipatipadā	Magga Sacca	the Noble Truth of the Path leading
Ariya-sacca	m e	to the Cessation of Suffering

The essential Elements of each Noble Truth and What the Truth Teaches

1. Eighty-one lokiya cittas, 51 lokiya-cetasikas excluding lobha, and 28 types of rūpa are the essential elements of the Noble Truth of Suffering. They cause the long cycle of rebirth and misery in the three spheres – namely, Kāma-loka, Rūpa-loka and Arūpa-loka.

The first Truth teaches us that all forms of existence whatsoever are unsatisfactory as they are subject to suffering (dukkha).

2. The real essence of the Noble Truth of the Cause of suffering is tanhā which is lobha present in 12 akusala cittas. Tanhā brings about rebirth and misery in the unending chain of continuous existence.

The second Truth teaches us that all suffering, and all rebirth, is produced by craving (tanhā).

3. The real essence of the Noble Truth of the Cessation of Suffering is Nibbana which arises as the result of the cessation of craving.

The third Truth teaches us that extinction of craving necessarily results in Extinction (Nirodha) of rebirth and suffering. The extinction of rebirth and suffering results in eternal peace (santi-sukha) which is Nibbāna.

4. The eight maggangas present in magganānas are the essential elements of the Noble Truth of the Path leading to the Cessation of Suffering.

The fourth Truth teaches us that the eight maggangas are the real means by which the extinction of rebirth and suffering can be brought about.

5. The Noble Truth of Suffering and the Noble Truth of the Cause of Suffering are known as lokiya-saccas; the latter is the cause and the former is the effect.

The Noble Truth of the Cessation of Suffering and the Noble Truth of the Path leading to the cessation of suffering are known as lokuttara-sacca; again the latter is the cause and the former is the effect.

6. There is a general belief in Myanmar that one's life is not worth living if one does not know khandhas, āyatanas, dhātus and saccas. So we are fortunate to learn them now, and we should exert the right effort to know them by insight-wisdom (bhāvanāmaya-ñāṇa).

Chapter VIII

PACCAYA (Cause or Condition)

Introductory

'Paccaya' means 'cause or condition'. It is something on which something else, the so-called 'conditioned-thing' (paccayuppanna), is dependent, and without which the latter cannot be.

Paccaya is the cause of the conditioned thing.

Paccayuppanna is the effect or result of the cause.

In conditioning its paccayuppanna (effect or result), the paccaya (cause or condition) acts in two supportive ways:

- (1) it causes the effect which has not arisen to arise, and
- (2) it strengthens the effect which has already arisen.

There are two methods of conditioning:

- (1) Paticcasamuppāda-method

 the Law of Dependent Origination,
- (2) Patthāna-method = the Law of Causal Relations.

The first method describes the cause and the effect without mentioning how the cause conditions the effect to arise. However, paticcasamuppāda is a very important doctrine as it describes eleven causal relations which explain the conditionality and dependent nature of uninterrupted flux of manifold physical and

mental phenomena of existence. In other words it explains how each individual is involved in the Wheel of Existence undergoing the rounds of rebirth and misery in the long samsāra.

Patthāna method not only describes the cause and the effect but also explains how the cause conditions the effect to arise. It is wonderful to learn that there are 24 modes of conditionality which correlates all the physical and psychical phenomena, by cause and effect with specific illustrations occuring in real life.

(1) Paticcasamuppada Method

The paticcasamuppāda method of correlating the cause and the effect is generally known as the Law of Dependent Origination. The brief essential statement of the law runs like this:

- 1. Avijjā-paccayā sankhāra = Dependent on ignorance arise the rebirth-producing volitions or kamma formations.
- 2. Sankhāra-paccayā viñnāṇaṁ = Dependent on kamma formations (in past life) arises rebirth consciousness (in the present life).
- 3. Viññana-paccaya nama-rupam = Dependent on rebirth consciousness arise the mental and physical phenomena.
- 4. Nāma-rūpa-paccayā saļāyatanam = Dependent on the mental and physical phenomena arise the six (sense) bases.

- 5. Saláyatana-paccayá phasso = Dependent on thesix (sense) bases arise contact (between sense base, sense object and consciousness).
 - 6. Phassa-paccayá vedaná = Dependent on contact arises feeling.
 - 7. Vedaná-paccayá tanhá = Dependent on feeling arises craving.

8. Tanhā-paccayā upādānam = Dependent on craving arises grasping.

- 9. Upadana-paccaya bhavo = Dependent on grasping arises the rebirth-producing kamma (kamma-bhava) and the rebirth-process (upapatti-bhava).
- 10. Bhava-pacayā jāti = Dependent on the rebirth-producing kamma (in the present life) arises rebirth (in the future life).
- 11. Jäti-paccayā jarā-maranam-soka-paridevadukkha-domānass' upāyāsā sambhavanti =

Dependent on rebirth arise old age, death, worry, lamentation, pain, grief and despair.

Thus arises the whole mass of suffering again in the future.

Explanation of the Causal Relations 1. Avijjā-paccayā Sankhārā

Avijjā conditions sankhāra to arise or, in other words, sankhāra arises as a consequence of avijja.

Now avijjā is ignorance or delusion. Essentially

it is moha present in 12 akusala-cittas. As ignorance,

it veils man's mental eyes preventing him from seeing the true nature of things. As delusion it tricks beings by making life appear to them as permanent, pleasant, substantial (atta) and beautiful (subha) while everything

substance (I), and loathsome. There are eight important objects (departments) which are covered by avijja so that their true nature is not known. These are: (1) dukha sacca, (2) samudaya sacca, (3) nirodha sacca, (4) magga sacca, (5) the past khandha- and ayatana-groups, (6) the future

in reality is impermanent, liable to suffering, void of

khandha- and ayatana-groups, (7) the front end and the rear end of the present khandha- and ayatanagroups, and (8) Paticcasamuppāda causal relations which include kamma and its consequences.

Sankhāra means rebirth-producing volitions (cetanā). or kamma-formations. It refers to apuññābhisankhāra puññābhisankhāra. and aneniābhisankhāra.

(1) Puññābhisankhāra represents the cetaņās (volitions) present in 8 mahā-kusala cittas and 5 rūpāvacara-kusala cittas. It is so called because it conditions good vipāka-nāmakkhandha and katattārūpa to arise in Kāmā-loka and Rūpa-loka.

(2) Apuñnābhisankhāra represents the 12 cetanās present in 12 akusala cittas. It is so called because it conditions bad vipāka-nāmakkhandha and katattārapa to arise in the four Apaya abodes.

(3) Anenjābhisankhāra represents the 4 cetanās present in 4 arupāvacara-kusala cittas. It is so called because it conditions the arising of unshakable arūpa existence.

In short, sankhāra represents the 29 types of kamma associated with 17 lokiya kusala cittas and 12 akusala cittas.

How does avijjā condition sankhāra?

Because of ignorance about kamma and its effect, people - commit immoral actions for immediate self-benefit. Because of the delusion thinking that sensual pleasure and jhana-ecstasy are real forms of happiness, people perform dāna, sila and bhāvanā in order to attain such happiness either in the present life or in future lives. Thus people accumulate both moral and immoral kammas (sankhāra) as the result of ignorance or delusion (avijā).

2. Sankhara-paccaya Vinnanam

Sankhāra conditions viñnāna to arise or, in other words, viñnāna arises as a consequence of sankhāra.

Here sankhāra means the 29 wholesome and unwholesome cetanās (kammas) mentioned above. Viññāna means rebirth -consciousness which is the initial resultant of kamma-formations. But sankhāra goes on producing vipāka-cittas throughout the whole new life. So all the 32 lokiya-vipāka cittas are taken to represent 'viññāna' as the direct effect of sankhāra.

Thus the second causal relation should be interpreted as follows.

At patisandhi-kāla, 11 akusala cetanās (excluding uddhacca-cetanā) and the 17 lokiya kusala cetanās (excluding the 2 abhiññā-cetanās) condition the arising of the 19 rebirth consciousness. At pavatti-kāla all the 12 akusala cetanās and the 17 lokiya kusala cetanās

(excluding the 2 abhiññã-cetanãs) continue to condition the arising of the 32 lokiya-vipāka cittas. These can be split up as follows.

- (1) Apuññābhisankhāra (12 akusala cetanās) conditions the arising of 7 akusala-vipāka cittas.
- (2) Puññābhisankhāra (8' mahā-kusala cetanās and 5 rūpāvacara-kusala cetanās) conditions the arising of 8 kusala-ahetuka-vipāka cittas, 8 mahā-vipaka cittas and 5 rūpāvacara-vipāka cittas.
- (3) Ānenjābhisankhāra (4 arūpāvacara cetanās) conditions the arising of 4 arūpāvacar 1-vipāka cittas.

So it should be understood that from the very first moment of conception in the mother's womb the kamma-resultant consciousness of the embryonic being is functioning, and it goes on functioning as life-continuum and seeing consciousness, hearing consciousness, etc., throughout the whole new life. Of course, it terminates as death-consciousness finally.

3. Viññāṇa-paccayā Nāma-rūpam

Viññāṇa conditions nāma-rūpa to arise or, in other words, nāma-rūpa arises as a consequence of viññāna.

Viññāṇa here represents two entities: vipākaviññāṇa and kamma-viññāṇa. Vipāka-viññāṇa means the 32 lokiya-vipāka cittas mentioned in the second causal relation.

Kamma-viññāna means cittas associated with cetanā-kamma, and it refers back to the 29 wholesome and unwholesome kammas we have described as sankhāra. This back-reference is required because only kusala

and akusala kammas, and not the vipāka cittas, can produce 18 types of kammaja-rūpa.

In nāma-rāpam, nāma indicates the 35 cetasikas which associate with the 32 lokiya-vipāka cittas. In terms of groups of existence, the 35 cetasikas represent three mental groups-viz., vedanakkhandha, saññakkhandha and sankhārakkhandha. The second part, rūpam, means the 18 kammaja rūpas.

To summarise, 32 lokiya-vipāka-viññānas condition the arising of 35 cetasikas or three nāmakkhandhas, whereas 29 kamma-viññānas condition the arising of 18 kammaja-rūpas. These phenomena constitute the third causal relation.

We should remember that kamma starts producing kammaja-rūpas from the very first moment of conception in the mother's womb, and it keeps on doing so incessantly at every minor instant till death. We have learnt these in Chapter VI in connection with the arising of material phenomena in individuals (Page 247). Among these kammaja-rūpas, the vital nonad (i.e. jivita-navaka-kalāpa) serves as the rūpa-patisandhi of Asañña-satta brahmas.

So far, i.e. up to the third causal relation, we have seen that avijjā (ignorance) conditions the arising of various kammas, which in turn condition the arising of 32 lokiya-vipāka cittas and 18 kammaja-rūpas. The 32 lokiya-vipāka cittas, in their turn, condition the arising of 35 cetasikas, i.e. three mental groups.

Since vipāka cittas represent viññānakkhandha, and kammaja rūpas represent rūpakkhandha, we now have all the five groups of existence for the new embryo to manifest itself as a living being.

It should be noted, however, that only the 4 mental groups arise in Arūpa-planes, only the corporeality group in the mindless (Asañña)-plane, and all the five groups in Kāma— and Rūpa—planes.

4. Năma-rūpa-paccayă Salāyatanam

Nāma-rūpa conditions saļāyatana to arise, or in other words, saļāyatana arises as a consequence of nama-rūpa.

Nāma-rūpa here means the 35 cetasikas (three nāmakkhandhas) which associate with the 32 lokiya-vipāka cittas, and 18 kammaja-rūpas as stated in the third causal relation.

Salāyatana refers to the six ajjhattikāyātanas (six internal bases) – namely, cakkhāyatana, sotāyatana, ghānā-yatana, jivhā-yatana, kāyāyatana and manāyatana. The first five āyatanas represent the five pasāda-rūpas which are present in 18 kammaja-rūpas. Manāyatana here represents only the 32 lokiya-vipāka cittas as we are describing the causal relations.

We have seen in the third causal relation that 35 cetasikas arise as a consequence of the 32 lokiya-vipāka cittas. Now we see that the 35 cetasikas recondition the arising of the 32 lokiya-vipāka cittas. This illustrates añña-mañña-paccaya (condition by way of mutuality) between cittas and cetasikas.

5. Salāyatana-paccayā Phasso

Salāyatana conditions the arising of phassa or, in other words, phassa arises as a consequence of salāyatana.

Salāyatana means the six ajjhattikāyatanas (six internal bases) as above.

Phassa here indicates the phassa cetasika present in the 32 lokiya-vipāka cittas.

To describe the individual co-relations, cakkhāyatana conditions the arising of cakkhusamphassa (i.e., phassa associated with cakkhu-viññāna); sotāyatana conditions the arising of sotāsamphassa; ghānāyatana conditions the arising of ghānasamphassa; jivhāyatana conditions the arising of jivhāsamphassa; kāyāyatana conditions the arising of kāyasamphassa; manāyatana conditions the arising of manosamphassa. Samphassa is synonymous with phassa.

Cakkhāyatana (eye-base) is cakkhu-pasāda, the eye-door, where the visual object strikes to give rise to seeing consciousness (cakkhu-viññāna). Then the phassa associated with the seeing consciousness is said to be conditioned by the eye-base. The remaining five phassas are produced similarly.

Without the five physical bases or sense-organs, there can be no sense impressions; and without the sixth base, or consciousness, there can be no mental impression.

6. Phassa-paccaya Vedana

Phassa conditions the arising of vedanā or, in other words, vedanā arises as a consequence of phassa.

Here phassa is the phassa-cetasika associated with the 32 lokiya-vipāka cittas. Vedanā is also the vedanā cetasika present in the 32 lokiya-vipāka cittas.

Phassa and vedanā arise simultaneously in the same consciousness. Nevertheless phassa is regarded

as the cause, and *vedanā* as the effect. In accordance with the six types of *phassa* that have been enumerated in the previous causal relation, there are six types of *vedanā*.

Because of cakkhusamphassa, cakkhusamphassajā-vedanā arises. Because of sotasamphassa, sotasamphassajā-vedanā arises. Because of ghānasamphassa, ghānasamphassajā vedanā arises. On account of jivhā samphassa, jivhāsamphassajā-vedanā arises. On account of kāyasamphassa, kāyasamphassajā-vedanā arises. On account of manosamphassa, manosamphassajā-vedanā arises.

Cakkhusamphassajā-vedanā means the vedanā (feeling) in the eye-consciousness produced by cakkhusamphassa, which is the sense-impression or sense-contact in the eye-consciousness. The remaining vedanās should be similarly understood.

7. Vedanã-paccayã Tanhã

Vedanā conditions tanhā to arise or tanhā arises as a consequence of vedanā.

Vedanā here means the six vedanās enumerated above as cakkhusamphassajā-vedanā, sotāsamphassajā-vedanā, and so on: In the causal relations explaining how each individual is going round and round in the wheel of existence the cause produces the effect, and the effect becomes the cause to produce its effect again. Some authors, however, like to take all the vedanās associated with the 81 lokiya cittas as paccaya, since vedanā is playing the role of the cause here.

Now the tanhā (craving) which arises as the result of vedanā (feeling) is also of six types – viz., rāpa-tanhā (craving for visual object), sadda-tanhā (craving for sound), gandha-tanhā (craving for odour), rasa-tanhā (craving for taste), phothabba-tanhā (craving for tangible object), and dhamma-tanhā (craving for mind-object).

These six types of tanhā exist internally in oneself and externally in others. So together they make 12 types of tanhā. They become 36 when past, present and future are taken into consideration. When multiplied by the three types of tanhā enumerated as samudayasacca, they become 108 types of tanhā.

The three types of tanhā enumerated as Samudaya-sacca are:

- (1) Kāma-tanhā = craving for sensual pleasures;
- (2) Bhava-tanhā = craving for sensual pleasures associated with the view of eternalism, i.e., enjoying pleasures thinking that they are imperishable;
- (3) Vibhava-tanhā = craving for sensual pleasures associated with the view of nihilism, i.e., enjoying pleasures thinking that everything is annihilated after death.

Essentially all the different modes of tanhā represent lobha which is associated with the eight lobhamulacittas.

8. Tanhā-paccayā Upādānam

Tanhā conditions upādāna to arise or upādāna arises as a consequence of tanhā.

Tanhā here refers to the six types of craving for the six sense-objects – namely, rūpa-tanhā, sadda-tanhā, gandha-tanhā, rasa-tanhā, photthabba-tanhā and dhamma-tanhā or it may be taken as the 108 modes of tanhā as described in the seventh causal relation.

Upādāna stands for the four types of grasping – viz., kāmupādāna, ditthupādāna, sīlabbatupādāna and attavādupādāna – which have been described in Chapter VII.

Let us first consider the arising of kamupādāna as a consequence of tanhā. Kāmupādāna is the sensedesire or clinging to the five-objects, and essentially it is lobha present in the eight lobha-mūla cittas.

So we see that both the cause (tanhā) and the effect (kāmupādāna) respectively stand for lobha. How can lobha be the cause as well as the effect? The explanation is fourfold: —

- (1) Tanhā is weaker than kāmupādāna in intensity. When we see a beautiful object, first a weak attachment in the form of tanhā arises. When we think over and over how exceptionally beautiful the object is, the attachment grows stronger and stronger until it becomes intensive craving or firm grasping which is kāmupādāna.
- (2) Other commentators have the view that the desire to get an object is tanhā and the strong attachment or firm grasping which develops after getting the object is kāmupādāna.
- (3) Furthermore, tanhā is the opposite of appicchatā (frugality) whereas kāmupādāna is the opposite of santutihitā (contentment).

(4) Tanhā is the cause of suffering encountered in acquiring wealth whereas kāmupādāna is the cause of suffering encountered in guarding the wealth.

Thus it is appropriate to say that kāmupādāna arises as a consequence of tanhā.

We have to explain further how the remaining three-graspings arise as the results of tanhā. These graspings are: ditthupādāna (clinging to false views), silabbatupādāna (clinging to canine and bovine morality) and attavādupādāna (clinging to the 'atta' or 'soul' theory).

The clinging to the theory that "atta" or "I" exists is synonymous with "sakkāya-ditthi" which is "personality-belief" taking the five aggregates of existence as a person or as "I". This belief is clearly the outcome of the attachment (tanhā) to oneself.

Those, who practise the canine or bovine morality or other futile practices such as sleeping on thorns, are actually doing so for the betterment of their 'selves' out of the attachment to their 'selves'.

Thus the causal relation that tanhā conditions the arising of upādāna' is well justified.

9. Upádána-paccayá Bhayo

Upādāna conditions bhava to arise or bhava arises as a consequence of upādāna.

'Upādāna' here means the four graspings – kāmupādāna, ditthu-pādāna, silabbatupādāna and attavādupādāna – as described in the eighth causal relation.

308 THE ESSENCE OF BUDDHA ABHIDHAMMA

"Bhava" literally means "becoming" or "existence". But here it means the "kamma-bhava' as well as the 'upapatti-bhava'.

kamma. It includes all the wholesome and unwholesome deeds (kamma) performed in this life. To be more specific, it includes the 29 cetanās associated with 17 lokiya-kusala cittas and 12 akusala cittas. It is the same as sankhāra which is explained in the first causal relation. The only difference between sankhāra and kamma-bhava is that the former pertains to the past and the latter to the present.

of becoming whereas upapatti-bhava is the passive kamma-resultant process, the so-called 'rebirth-process'. In essence, upapatti-bhava stands for 32 lokiya-vipāka cittas, their associated 35 cetasikas and 18 kammaja rūpas. Note that these essential elements are the same as those symbolised by "viññāṇa" and "nāma-rūpa in the second and third causal relations.

As sankhāra conditions the arising of "vināāṇa" and "nāma-rūpa" in the past, so kamma-bhava will condition the arising of "upapatti-bhava" in the future.

Upādāna cannot condition the rebirth-process directly. It can only condition new kamma-processes of becoming. When one is strongly craving for something, he will act in one way or another to possess that thing, and in doing so, new kamma-processes are performed.

If he performs wholesome *kamma*, that will condition the rebirth-process in blissful planes. If he carries out unwholesome *kamma*, that will condition the rebirth - process in four *Apāya* abodes.

, 10. Bhava-paccayá Játi

Bhava conditions jāti to arise or jāti arises as a consequence of bhava.

'Bhava' here means the kamma-bhava which stands for the 29 types of wholesome and unwholesome kammas as described in the ninth causal relation.

'Jāti' refers to the arising or becoming of upapatti-bhava, the rebirth-process. Right at the first instant of conception (patisandhi-kāla), there arise 32 lokiya-vipāka cittas, 35 cetassikas associated with the lokiya-vipāka cittas and 18 kammaja rūpas which make up upapatti-bhava. The 32 lokiya-vipāka cittas and 18 kammaja rūpas comprise all the 20 forms of rebirth-process.

Thus through the wholesome and unwholesome kamma-processes (kamma-bhava) are conditioned the rebirth-processes (upapatti-bhava). The tenth causal relation combines the second and the third causal relations; they teach practically the same thing, namely that kamma is the cause of rebirth.

 Jāti-paccayā Jarā-marranam Soka Parideva Dukkha Domanassa Upāvāsa Sambhavanti

Jāti conditions jarā-maraņa to arise or jarā-marana arises as a consequence of jāti.

Now jāti refers to the arising of upapatti-bhava which is the same thing as the arising of 32 lokiya-

310 THE ESSENCE OF BUDDHA ABHIDHAMMA vipāka cittas, 35 associated cetasikas and 18 kammajarūpas.

Now every ultimate reality (paramattha) has the characteristics of arising (uppāda), existing (thīti) and dissolving (bhanga). Thus after uppāda, thīti and bhanga must inevitably follow. Uppāda is called jāti; thīti, jarā; and bhanga, marana. So jarā-marana must arise as a consequence of jāti.

As the arising, the existing and the dissolving of *upapatti-bhava* are designated as *jāti*, *jarā*, and *maraṇa*, respectively, we should note that beings are facing rebirth, decay (old age) and death at every instant according to Abbhidhamma.

Conventionally, we think that we are born just once, become old as the years pass became and then die just once in this life. The phenomenon that death arises as a consequence of rebirth at every conscious moment is known as 'khanika-marana'.

As the results of rebirth (jāti), worry (soka), lamentation (parideva), pain (dukkha), grief (domanassa) and despair (upāyāsa) may also arise. These five resultants are not primary nor inevitable; they are secondary and may or may not arise depending on conditions. They are absent in brahma-loka and may be also unknown to an embryo, which dies in the womb or in an egg.

Thus we should differentiate between primary and secondary effects of rebirth.

Jarā and marana are the primary and compulsory resultants of jāti: soka, parideva, dukkha,

domanassa and upayasa, are secondary and optional resultants of jāti.

Soka (worry or sorrow) is the unpleasant feeling (domanassa-vedanā) present in the 2 dosa-mūla cittas.

Parideva (lamentation) is cittaja-vipallāsasadda-rūpa which means mind-produced reversal sound.

Dukkha (pain) is the vedanā-cetasika associated with dukkha-sahagata kāya-viñnāna citta.

Domanassa (grief) is the vedanā-cetasika associated with the 2 dosa-mūla cittas.

Upāyāsa (despair) is the resentment produced by excessive mental suffering. It is anger (dosa) present in the 2 dosamūla cittas.

A comparison between grief, lamentation and despair states that grief is like the boiling of oil in a vessel; lamentation (viz., the outward expression of grief) is like the overflow (boiling over) from the vessel when the cooking is done by a fierce fire; despair is like the simmering in the vessel of what remains after boiling over until it is all boiled away.

Some Notable Aspects of the Law

In the Law of Dependent Origination, twelve factors (anga), three periods (kāla), twenty modes (ākāra), three connections (sandhi), four abridgments (sankhepa), three rounds (vatta) and two roots (mula) should be taken into consideration.

312 THE ESSENCE OF BUDDHA ABHIDHAMMA

1. Twelve Factors (Anga)

Avijjā, sankhāra, vinnāņa, nāma-rūpa, saļāyatana, phassa, vedanā, tanhā, upādāna, bhava, jāti, jarā-marana:

2. Three Periods (Kāla)

- 1. Past = avijjā, sankhāra
- 2. Present = viññāna, nāma-rūpa, saļāyatana, phassa, vedanā, taṇhā, upādāna, kamma-bhava
- 3. Future = jāti, jarā-maraņa.

In the past, because a person's mind is veiled by ignorance $(avijj\bar{a})$, he does not understand the misery of the round of rebirth $(sams\bar{a}ra)$. So he performs both wholesome and unwholesome kammas $(sankh\bar{a}ra)$. Thus $avijj\bar{a}$ and $sankh\bar{a}ra$ belong to 1 past.

The past kamma produces rebirth in the persent life. Thus starting from the very moment of conception till death, viññāṇa, nāma-rūpa, salāyatana, phassa, vedanā, tanhā, upādāna and kamma-bhava arise. So these eight belong to the present.

The kamma-bhava performed in this life produces rebirth in the form of upapatti-bhava in the subsequent life. The arising, the existing and the dissolving of upapatti-bhava are called jāti, jarā and marana, respectively. Thus jāti, jarā-marana belong to the future.

(Note that bhava has b'n divided into kammabhava and upapatti-bhava; the former belongs to the present and the latter, to the future.)

3. Twenty Modes (Akara)

- (1) Past Causes = avijjā, sankhāra, tanhā, (Atīta Hetu) upādāna, kamma-bhava.
- (2) Present Effects = viññāna, nāma-rupa, saļāya-(Vaṭṭamana Phala) tana, phassa, vedanā.
- (3) Present Causes = tanhā, upādāna, kamma-bhava, (Vattamana Hetu) avijjā, sankhāra.
- (4) Future Effects = viññāna, nāma-rūpa, salāya-(Anāgata Phala) tana, phassa, vedanā.

When we look at the past period, we see only avijjā and sankhāra to be taken as the past causes. But avijjā is kilesā-vatta-dhamma; so also are tanhā and upādāna. Since these vatta-dhammas occur together in the same citta, tanhā and upādāna must also be included in the past causes.

Again saikhāra is a kamma-vaita-dhamma, and so also is kamma-bhava. Thus when saikhāra is taken into account, kamma-bhava is also implicitly accounted for So we have five dhammas — viz., avijjā, saikhāra taṇhā, upādāna and kamma-bhava — as the past causes.

Viññāna, nāma-rūpa, salāyatana, phassa and vedanā in the present period are the present effects of the past causes.

Again in the present period, tanhā, upādāna and kamma-bhava can act as the present causes for future rebirth. As reasoned above, when tanhā and upādāna are taken into account, avijjā is also implicitly accounted for. Furthermore, sankhāra must also be grouped together with kamma-bhava. So we get tanhā,

314 THE ESSENCE OF BUDDHA ABHIDHAMMA

upādāna, kamma-bhava, avijjā and sankhāra as the present causes which will condition the rebirth-process in the subsequent life.

In the future period, only jāti and jarā-marana are present. They represent becoming, decay and death, respectively. The question arises here as to which entities come into being, decay and die. The answer is: 'Viññāna, nāma-rūpa, salāyatana, phassa and vedanā come into being, decay and die'. The arising, the existing and the dissolving phenomena of these entities are taken as jāti, jarā and marana, respectively. So we get viññāna, nāma-rūpa, salāyatana, phassa and vedanā as the future effects.

Thus it is stated in Visuddhi Magga (Path of Purification) that:

"Five causes were there in the past; Five fruits we find in present life; Five causes do we now produce; Five fruits we reap in future life."

We should note that, although Paticcasamuppāda states one cause for one effect, and the effect becomes the cause to give rise to another effect, actually many causes take part at the same time to give rise to many effects in real life.

The twenty modes discussed above may be illustrated as in Diagram 8.1 to show the relationship of dependence between three successive lives.

Diagram 8.1 Causal Relations between three successive Lives

Past	1. Avijjā (Ignorance) 2. Sankhāra (Kamma-formations)	Kamma-bhava (Kamma-process) 5 Causes: 1, 2, 8, 9, 10
Present	3. Viññāṇa (Consciousness) 4. Nāma-rūpa (Corporeality- Mentality) 5. Saļāyatana (6 Bases) 6. Phassa (Contact) 7. Vedanā (Feeling)	Upapatti-bhava (Rebirth-process) 5 Effects: 3, 4, 5, 6, 7
	8. Tanhā (Craving) 9. Upādāna (Grasping) 10. Kamma-bhava (Kamma-formations)	Kamma-bhava (Kamma-process) (5 Causes: 1, 2, 8; 9, 10
Future	11. Jāti (Rebirth) 12. Jarā-marana (Old age and Death)	Upapatti-bhava (Rebirth-Process) 5 Effects: 3, 4, 5, 6, 7

316 THE ESSENCE OF BUDDHA ABHIDHAMMA

4. Four Abridgments (Sankhepa)

The five Past Causes constitute an abridgment. The five Present Effects constitute an abridgment. The five Present Causes constitute an abridgment. The five Future Effects constitute an abridgment.

5. Three Connections (Sandhi)

In diagram 8.1 it will be seen that the connection between sankhāra and viññāna constitutes the connection between the Past Causes and the Present Effects; the connection between vedanā and tanhā constitutes the connection between the Present Effects and the Present Causes; and the connection between kamma-bhava and jāti represents the connection between the Present Causes and the Future Effects.

At present we are concerned with the middle link, that is the connection between vedana and taphā. If we are mindful at the six doors to note seeing as just seeing, hearing as just hearing, and so on and not to let vedanā develop into tanhā, then we are reconstituting the link as 'vedanā-paññā' instead of 'vedanā-tanhā'. This means that we are stopping the wheel of Paticcasamuppāda momentarily and trying to cut the link with mindfulness.

6. Three Rounds (Vatta)

'Vatta' means going round and round like the rotation of a wheel. The wheel of Paticcasamuppāda may be divided into three segments called 'three rounds' or 'three vattas'.

Kilesā-vatta = Re

= Round of Defilements

= Avijjā, tanhā, upādāna

Kamma-vatta

= Round of Kamma

= Kamma-bhava, sankhāra

Vipāka-vatta

= Round of Resultants

 Upapatti-bhava, viññāna, nāma-rūpa, saļayatana, phassa, vedanā, jāti, jarāmarana.

Explanation

Avijjā, taņhā, upādāna are defilements (kilesā). So they are grouped as kilesā-vatta.

Kamma-bhava and sankhāra are kamma-formations. So they are grouped as kamma-vatta.

Upapatti-bhava, vinnāna, nāma-rūpa, salāyatana, phassa, vedanā, jāti, jarā-marana are the resultants (vipāka) of kamma-formations. So they are grouped as vipāka-vatta.

In the past, because of ignorance (avijjā), we have false view and attachment (tanhā) to sense-objects. When the attachment and the false-view grow up to strong craving or grasping (upādāna), we perform wholesome or unwholesome deeds (kamma-bhava and sankhāra). This illustrates how kilesā-vatta gives rise to kamma-vatta in the past.

Now because of kamma-formations (kamma-bhava and sankhāra) in the past, vipāka-vatta – viz., upapatti-bhava, vināāna, nāma-rūpa, salāyatana, phassa, uedanā, jati, jarā-marana—arises in the present life. At the same time avijjā, tanhā and upādāna come along with vināāna as anusaya-kilesās (latent defilements).

When the six bases (salāyatana) are in contact with the sense-objects and phassa and vedanā arise, those anusaya-kilesās arise as full-fledged kilesās. So we get kilesā-vatta again.

As the result of kilesā-vatta, kamma-vatta arises. As the result of kamma-vatta, kelesā-vatta arises. And as the result of vipāka-vatta, kelesā-vatta arises again. So the rounds of vatta will keep on rotating, and so does the wheel of Paticcasamuppāda, for ever.

7. Two Roots (Mũla)

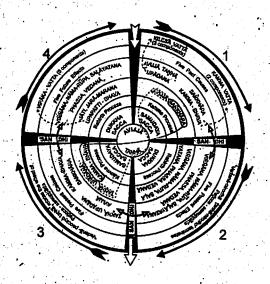

The wheel of *Paticcasamuppāda* (see Diagram 8.2) can be divided into two portions. The first portion starts from the Past Causes and ends at the Present Effects comprising avijjā, sankhāra, viññāna, nāmarūpa, salāyatana, phassa and vedanā. In this portion, avijjā is the root or origin (mūla).

The second portion starts from the Present Causes and ends at the Future Effects covering tanhā, upādāna, bhava, jāti and jarā-marana. In this portion tanhā is the root or origin (mūla).

So the two roots of *Paticcasamuppāda* are avijjā and tanhā. If we cut off these two roots, the wheel of *Paticcasamuppāda* will be destoryed for ever as far as we are concerned, just as a tree will die when its main roots are cut off.

We can cut off the two main roots of Paticcasamuppāda by tranquility and insight meditation. When we see all the true nature of mentality and corporeality and open up the eight departments which are covered up by avijjā, then tanhā has no place to attach to. So both avijjā and tanhā will be cut off and we shall be liberated from the round of samsāra.

Diagram 8.2 The Wheel of Paticcassamuppada

8. The Cause of Avijiã

In expounding the Law of Dependent Origination, Buddha began with avijjā (ignorance) and went on explaining that because of avijjā, sankhāra arises; because of sankhāra, vinnāṇa arises; and so on. So one would enquire whether avijjā is the first cause or there is another cause for avijjā.

The answer is definite: avijjā is not the first cause and the four āsavas (cankers or intoxicants) are the cause of avijjā.

The four āsavas are kāmāsava (attachment to sensual pleasures), bhavāsava (attachment to jhānas and brahma existence), dithāsava (false views) and avijjāsava (ignorance).

When a great loss in our property or close relatives occurs, great sorrow (soka), lamentation (parideva), grief (domanassa) nd despair (upāyāsa) arise in our mind. This shows how attachment to our property and relatives (kāmāsava) conditions sorrow, lamentation, grief and despair to arise.

Also when brahmās, who live in jhāna peace; approach death, they feel scared and sad. Thus sorrow, grief and despair also arise in them and this arising is

a consequence of bhavāsava.

Those, who cling to false views such as sakkāyaditthi (personality-belief) taking the body or the mind as 'I', feel sad or angry when something is wrong with the body or the mind. Thus ditthāsava also causes sorrow or worry, lamentation, grief and despair to arise.

Also on account of ignorance about the true nature of mentality and corporeality, sorrow, lamentation, grief and despair arise. Thus avijjāsava is also one of the causes for the arising of soka, parideva, domanassa, upāyāsa, etc.

Now when soka, parldeva, domanassa and upāyāsa arise, akusala cittas also arise. Since moha (avijjā) is associated with all these akusala cittas, avijjā

also arises.

Thus on account of the four asavas, soka, parideva, domanassa and upāyāsa arise, and when soka, parideva, domanassa and upāyāsa arise, avijjā also arises. Thus the four asavas are the cause of avijjā.

9. No Beginning in Samsara

'Samsāra' literally means 'perpetual wandering'. It is a name given to the continuous process of ever

again and again being born, growing old, suffering and dying. To put it more precisely, samsāra is the unbroken chain of the fivefold khandha-combinations which constantly change from moment to moment and continuously follow one upon the other through inconvecivable periods of time.

As no one can trace the limits of space, so also no one can trace back to the beginning of samsāra and nobody can conceive when it will end. Compared to the course of samsāra, a single lifetime constitutes only a tiny and fleeting fraction.

The 'round of rebirth' in the thirty-one planes of existence according to the causal relations has been explained by the Law of Dependent Origination. This law can be satisfactorily verified by insight meditation and I have seen this being done in Pa-auk Meditation Centre near Mawlamyine in Lower Myanmar.

When we draw a circle, we have to begin from some point, and when we have completed the circle, no beginning nor the end can be seen. Similarly, when the Law of Dependent Origination is explained, the explanation must start from some point, and avijjā is an appropriate point. When the explanation is over, we see that there is no beginning nor the end. The wheel of Paticcasamuppāda will keep on rotating for each indiviual until and unless he can cut off the two main roots, i.e. avijjā and tanhā.

In Digha Nikāya (Sutta 15) Buddha said: "Profound, Ānanda, is this Dependent Origination, and profound does it appear. It is through not understanding, not penetrating this law, that this world resembles a

322 THE ESSENCE OF BUDDHA ABHIDHAMMA

tangled ball of thread, a bird's nest, a thicket of reed, and that man does not escape from the lower states of existence, from the course of woe and perdition, suffering from the round of rebirth."

(2) Patthana Method

The twenty-four conditions (paccayas) are enumerated in Pāli as follows:

(1) Hetu-paccayo, (2) ārammaṇa-paccayo, (3) adhipati-paccayo, (4) anantara-paccayo, (5) samanantara-paccayo, (6) sahajāta-paccayo, (7) aññamañña-paccayo, (8) nissaya-paccayo, (9) upanisaya-paccayo, (10) purejāta-paccayo, (11) pacchājāta-paccayo, (12) āsevana-paccayo, (13) kamma-paccayo, (14) vipāka-paccayo, (15) āhāra-paccayo, (16) indriya-paccayo, (17) jhāna-paccayo, (18) magga-paccayo, (19) sampayutta-paccayo, (20) vippayutta-paccayo, (21) atthi-paccayo, (22) natthi-paccayo, (23) vigata-paccayo, (24) avigata-paccayoti.

This short *Pāli-gāthā* is very useful for demarcating a place of sanctuary to protect oneself from the attack of wicked men, wild beasts and ghosts.

The 24 Modes of Conditionality

1. Hetu-paccayo = Root condition

2. Arammana-pacayo = Object condition

3. Adhipati-paccayo = Predominance condition

4. Anantara-paccayo = Contiguity condition

5. Samanantara-paccayo = Immediacy condition

6. Sahajāta-paccayo = Co-nascence condition

	223
7. Аппатаппа-рассауо	= Mutuality condition
8. Nissaya-paccayo	= Dependence condition
9. Upanisaya-paccayó	= Powerful Dependence condition
10. Purejāta-paccayo	= Pre-nascence condition
11. Pacchājāta-paccayo	= Post nascence condition
12. Āsevana-paccayo	= Repetition condition
13. Катта-рассауо	= Kamma condition
14. Vipāka-paccayo	= Kamma-result condition
15. Āhāra-paccayo	= Nutriment condition
16. Indriya-paccayo	= Faculty condition

17. Jhāna-paccayo = Jhāna condition 18. Magga-paccayo = Path condition

19. Sampayutta-paccayo = Association condition
20. Vippayutta-paccayo = Dissociation condition
21. Atthi-paccayo = Paccayo

21. Atthi-paccayo = Presence condition 22. Natthi-paccayo = Absence condition 23. Vigata-paccayo = Disappearance condition

23. Vigata-paccayo = Disappearance condition
 24. Avigata-paccayo = Non-disappearance condition

The Property of each Condition

1. Hetu = Root condition

Hetu resembles the main root of a tree. As the main root supports the tree to be firm, alive and prosperous, so the six roots (lobha, dosa, moha, alobha, adosa, amoha) support the cittas and the cetasikas associated with them and also the cittaja-rūpa and patisandhi-kammaja-rūpa to be firm, strong and prosperous.

2. Árammana = Object condition

An invalid person may get up by pulling a ropeline and may stand with the support of a walking stick. Just as the ropeline and the walking stick give support to an invalid person, so also the six sense-objects give support to cittas and cetasikas to enable them to arise.

3. Adhipati = Predominance condition

'Adhipati' means supreme, sovereign, lord, chief, king, etc. The King of a country, by using his authority over all his country-men, can contribute to the peace and prosperity of his country to a great extent. This means that he can condition his country by way of his predominance over all others.

In natural phenomena, there are two kinds of predominance—namely, ārammaṇādhipati and sahajātādhipati. Ārammaṇādhipati is an outstanding object which can draw our attention to it. We cannot help but observe it or listen to it. Sahajātādhipati means a predominant factor that arises together with its associates. This factor refers to the four adhipatis — viz, chanda (concentrated intention), viriya (energy or effort), citta (consciousness) and vimamsa (investigating wisdom).

In one and the same state of consciousness, only one of these four adhipatis can be predominant. This predominant factor then conditions its associates (citta and cetasikas) to accomplish the goal set by it.

4. Anantara = Contiguity condition

Contiguity means proximity without any separation in time and space. When a King dies, his eldest son becomes King without any interruption in the lineage of monarchy. Thus we can say that the King helps his eldest son to become King by contiguity condition.

In the same way when a consciousness' together with its concomitants dissolves or perishes, another consciousness with its concomitants arises without any time-gap. This phenomenon arises because the former citta and cetasikas condition the next citta and cetacikas to arise without interruption by means of contiguity condition.

5. Samanantara = Immediacy condition

'Immediacy' means the same thing as 'contiguity'.

Anantara-paccaya and Samanantara-paccaya are identical; 'sama' means 'well'. They refer to any state of consciousness and the mental phenomenon associated with it, which are the condition for the immediately following stage in the process of consciousness.

6. Sahajāta = Co-nascence condition

Sahajāta-paccaya means the condition by way of simultaneous arising. Co-nascence means co-arising When an oil lamp is lighted, the light comes out simultaneously. Thus we may say that the lamp conditions the light to spread out as soon as the lamp lights up. This is an example of co-nascence condition.

326 THE ESSENCE OF BUDDHA ABHIDHAMMA

In general any phenomenon in which the cause conditions the effect to arise simultaneously with the cause is called co-nascence condition.

7. Aññāmañña = Mutuality condition

When three sticks are propped up together in the form of a pyramid, they balance one another. If one stick is removed, the other two will fall. This mutual or reciprocal support among the sticks illustrates mutuality condition.

In physical and psychical phenomena, in which the cause and the effect mutually conditions the arising of each other, then we say that the cause and the effect support each other by means of mutuality condition.

8. Nissaya = Dependence condition

Nissaya-paccaya is a condition which aids by means of support or dependence. For example, a man crosses a river by rowing a canoe. Then we say that the canoe helps the man to cross the river by means of dependence condition, and reciprocally the man aids the canoe to get over the other side of the river by means of dependence condition.

Let us consider another example. Plants and animals depend on the earth for their existence. Here the earth aids plants and animals by way of dependence condition, but no reciprocity exists.

9. Upanissaya = Powerful D pendence condition

Upanissaya is a powerful cause which aids by means of dependence condition. For example, the rain

is a powerful cause that suppports the growth of plants and animals. Similarly parents are a powerful support for their children.

In any phenomenon in which the cause is a powerful support for its effect, then we say that the cause aids the effect to arise by means of powerful dependence condition.

10. Purejata = Pre-nascence condition

Pre-nascence condition refers to something previously arisen, which serves as the cause for something arising later. For example, the sun and the moon have come into existence since the formation of this solar system. They give light to the people who are living on the earth now. So we may say that the sun and the moon aid the people by means of prenascence condition.

11. Pacchājāta = Post-nascence condition

This refers to the causal relation in which the cause (paccaya) arises later and the conditioned thing (paccayuppanna) arises earlier. It may be illustrated by an offspring of a vulture. Now the young off-spring, after being hatched from the egg, feels hungry. It expects that its mother will bring some food for it to eat. But the mother vulture, as a rule, never brings food for its off-springs.

So the young bird has nothing to eat. But nature comes in to help. The off-spring's volition (cetanā) for eating food causes its body to grow. Here the off-spring's body (paccayuppanna) has arisen earlier, and the

328 THE ESSENCE OF BUDDHA ABHIDHAMMA volition for eating (paccaya) arises later. Thus the volition aids the bird's body to grow by means of postnascence condition.

12. Asevana = Repetition condition

When we read a difficult passage, we may not understand it at first. But if we keep on reading it again and again, we usually understand it better. Also in learning by heart through constant repetition, the later recitation becomes gradually easier and easier. So we may say that earlier learning aids later learning by means of repetition condition.

Similarly in applying sandal-wood lotion or ake-up to the face, one should not apply a thick layer st once. One should apply a thin layer first, fan it to dry, and then apply another layer-----d another layer. The earlier applications will aid the later applications by repetition condition to be firmer and smoother and also to smell sweeter.

In cognition processes we have seen that the javana cittas usually occur seven times. Here all the preceeding javanas are for the succeeding ones a condition by way of repetition and frequency.

13. Kamma-paccaya = Kamma condition

A well preserved seed, when placed in a well watered ground, gives rise to an off-shoot. Similarly wholesome or un-wholesome kamma, with the support of avijjā and tanhā, gives rise to a new off-spring in the form of five aggregates of existence.

In the two accounts stated above, the seed or kamma is the cause (paccaya), and the off-shoot or the

five aggregates of existence is the result or conditioned thing (paccayuppana). The cause is said to condition the result to arise by way of kamma condition:

14. Vipaka = Kamma-result condition

Vipāka-citta and its concomitant-cetasikas are the kamma-result of a past kamma. As they are caused to arise by the force of the past kamma, they have no worry at all for their arising. When the time for their arising comes, they can arise peacefully and leisurely without any struggle.

Now a cool breeze makes a person in the cool shade feel cooler. Similarly vipāka citta and its concomitant cetasikas, which by nature arise peacefully, mutually aid one another by kamma-result condition to arise more peacefully and more leisurely.

15. Ahara = Nutriment condition

Parents produce children, support them and look after them so that they will grow up happily. A pole, supporting a leaning old house, makes the house stable and durable.

In the same way the four nutriments – namely, edible food $(oj\bar{a})$, contact (phassa), volition $(cetan\bar{a})$, and consciousness $(vi\bar{n}\bar{n}\bar{a}na)$ aid their resultants or conditioned things to arise, and keep on supporting them so that they are stable and durable. This type of conditioning process is known as 'nutriment condition'.

16. Indriya = Faculty condition

Indrivas, like ministers, have control over their respective departments or faculties, and by this virtue

they contribute to the progress and prosperity of the whole system. This contribution is said to take place by means of faculty condition.

Of the 22 indriyas we have come across in chapter VII, the two bhāva-rūpas do not participate as faculty condition. The five physical sense-organs, in their capacity as faculties, form a condition only for mental phenomena such as the arising of eye-consciousness, etc. Physical vitality (jivita-rūpa) and all the remaining faculties form a condition for the arising of the co-nascent mental and corporeal phenomena.

17. Jhana-paccaya = Jhana-condition

Jhāna-condition stands for the seven jhāna-factors called jhānangas. These jhāna-factors condition their co-nascent citta, cetasikas and cittaja-rūpa to focus on a particular object closely and fixedly. This type of conditioning is said to occur by way of jhāna-condition.

18. Magga-paccaya = Path-condition

Path-condition stands for the 12 constituents of the path called maggangas (see chapter VII). The wholesome path-constituents form a path conditioning their co-nascent citta, cetasikas and cittaja-rūpa to bear results in the blissful state. The unwholesome path-constituents similarly form a path conditioning their co-nascent citta, cetasikas, and cittaja-rūpa to bear results in the woeful state. This type of conditioning is said to take place by way of path-condition.

19. Sampayutta = Association condition

Tea-essence, milk, sugar and water are so

thoroughly mixed in a cup of tea that they cannot be differentiated and they give a combined pleasant taste.

Similarly consciousness and its concomitants, which together form the four mental aggregates, are so thoroug hly mixed that they cannot be differentiated. Besides they arise together, dissolve together, have a common physical base and a common object, and they mutually aid one another by being associated together. They are said to aid one another by way of 'association condition.'

20. Vippayutta = Dissociation condition

The six tastes – viz., tart, bitter, sweet, sour, salty, acrid – do not mix together; yet they support one another to give an agreeable taste in curry.

Again in a crown or neck-lace, the gold and the jewels do not mix up; they can be differentiated easily by sight. Yet the gold makes the jewels more beautiful, and the jewels make the gold more attractive.

Similarly corporeal group and mental groups do not mix, neither do they arise together nor dissolve together. Yet corporeal groups aid mental groups, and mental groups aid corporeal groups in many ways. They are said to aid one another by way of 'dissociation condition.

21. Atthi-paccaya = Presence condition

The earth can support plants to grow on it, because it is present. Parents can support and look after their children while they are present or living.

Such a phenomenon – either pre-nascent or conascent – which through its presence is a condition for other phenomena to arise is called 'presence condition'.

22. Natthi-paccaya = Absence condition

The absence of the sun contributes to the appearing of the moon; the absence of light contributes to the appearing of darkness; the death of a king contributes to the enthronement of his eldest son; so one can contribute something by being absent.

In mental phenomena, a consciousness and its concomitants which have just dissolved form the necessary condition called 'absence condition' for the immediate arising of the following consciousness and its concomitants.

23. Vigata-paccaya = Disappearance condition

When something disappears or dissolves, it no longer exists; it is absent. So vigata-paccaya is synonymous with natthi-paccaya.

Disappearance condition, like absence condition, applies only to mental phenomena in which a consciousness with its concomitants can arise only when the preceding consciousness together with its concomitants dissolves or disappears.

24. Avigata-paccaya = Non-disappearance condition

If something does not disappear, it is present. So 'avigata-paccaya' is identical with 'atthi-paccaya'. (presence condition).

The great ocean, by its non-disappearance, contributes to the happiness of the fish and the seaturtles which live in it.

Such a phenomenon — either prenascent or conascent — which through its non-disappearance is a condition for other phenomena to arise is called 'non-disappearance condition'.

Applications of 24 Conditions

The operations of the 24 conditions (paccayas) in mental and corporeal phenomena are illustrated in Patthāna-Niddesa Pāli. This Pāli is often recited singly or in groups as a form of veneration (pūjā) to Lord Buddha's Sabbañnuta-nāna (Omniscience).

Many wish to understand the meanings of this Pāli. Without the background of Abhidhamma, however, it would be very hard to understand them. But with the knowledge we have so far acquired from this book, it would not be difficult to understand them. A direct translation of the Patthāna-niddesa Pāli will be given here to enable the reader to understand the meanings in reciting the Pāli.

1. Root Condition (Hetu Paccaya)

The six roots (lobha, dosa, moha, alobha, adosa, amoha) are related to the cittas and the cetasikas associated with the roots and also to the corporeality produced by the cittas by root condition.

2. Object Condition (Arammana Paccaya)

(i) Visible object is related to eye-consciousness and its concomitants by object condition.

(ii) Sound is related to ear-consciousness and its oncomitants by object condition.

(iii) Smell is related to nose-consciousness and s concomitants by object condition.

(iv) Taste is related to tongue-consciousness and s concomitants by object condition.

- (v) Tangible object is related to body-consciousness and its concomitants by object condition.
- (vi) Visible object, sound, smell, taste and tangible object are related to mind-elements (sampaticchana-dvi and pañcadvārāvajjana) and their concomitants by object condition.
- (vii) All the six sense objects are related to mind-consciousness and its concomitants by object condition.
- (viii) Grasping any dhamma as object, these dhammas, viz. consciousness and its concomitants, arise; the former dhamma is related to the latter dhammas by object condition.

3. Predominance Condition (Adhipati Paccaya)

- (1) Predominant desire or will (chanda) is related to the citta and the cetasikas associated with the chanda and also to the corporeality produced by the citta by predominance condition.
- (ii) Predominant effort (viriya) is related to the citta and the cetasikas associated with the viriya and also to the corporeality produced by the citta by predominance condition.
- (iii) Predominant consciousness (citta) is related to its concomitants (cetasikas) and also to the corporeality produced by the citta by predominance condition.
- (iv) Predominant investigating-wisdom (vimamsa) is related to the citta and the cetasikas associated with it and also to the corporeality produced by the citta by predominance condition.

4. Contiguity Condition (Anantara Paccaya)

(Readers should refer to cognitive series to understand this causal relation.)

- (i) Eye-consciousness and its concomitants are related to sampaticchana (mind-element) and its concomitants by contiguity condition; sampaticchana and its concomitants are related to santiarana (mind-consciousness) and its concomitants by contiguity condition.
- (ii) Ear-consciousness and its concomitants are related to sampaticchana (mind-element) and its concomitants by contiguity condition; sampaticchana and its concomitants are related to santirana (mind-consciousness) and its concomitants by contiguity condition.
 - (iii) Nose-consciousness and its concomitants(as above).
 - (iv) Tongue-consciousness and its concomitants(as above).
 - (v) Body-consciousness and its concomitants(as above).
- (vi) Preceding javana kusala cittas and their concomitants are related to subsequent javana kusala cittas and their concomitants by contiguity condition.
- (vii) Preceding kusala cittas and their concomitants are related to subsequent avyākata (tadālambana or bhavanga) cittas and their concomitants by contiguity condition.
- (viii) Preceding javana akusala cittas and their concomitants are related to subsequent javana akusala cittas and their concomitants by contiguity condition.
- (ix) Preceding akusala cittas and their concomitants are related to subsequent avyākata

(tadālambaņa or bhavanga) cittas and their concomitants by contiguity condition.

(x) Preceding avyākata (kiriya or phala) cittas and their concomitants are related to subsequent avyākata cittas and their concomitants by contiguity condition.

(xi) Preceding avyākata (voṭṭhapana or mano-dvārāvajjana) citta and its concomitants are related to subsequent kusala citta and its concomitants by contiguity condition.

(xii) Preceding avyākata (votthapana or mano-dvārāvajjana) citta and its concomitants are related to subsequent akusala citta and its concomitants by contiguity condition.

5. Immediacy Condition (Samanantara Paccaya)

The causal relations are the same as in contiguity condition.

6. Co-nascence Condition (Sahajāta Paccaya)

- (i) The four incorporeal (i.e. mental) aggregates are mutually related to one another by conascence condition.
- (ii) The four great essentials (mahābhūtas) are mutually related to one another by conascence condition.
- (iii) At the moment of conception, mentality (patisandhi citta) and corporeality (kammaja-rūpa) are mutually related to each other by conscence condition.
- (iv) Consciousness and its concomitants are related to the mind-produced corporeality (cittaja-rūpa)

by conascence condition.

- (v) The great essentials are related to their derived matter (upādā-rāpa) by conascence condition.
- (vi) Material phenomena are sometimes related to immaterial (i.e. mental) phenomena by conascence condition and are sometimes not related by conascence condition.

7. Mutuality Condition

(Аппатаппа Рассауа)

- (i) The four incorporeal (i.e. mental) aggregates are related to one another by mutuality condition.
- (ii) The four great essentials are related to one another by mutuality condition.
- (iii) At the moment of conception, mentality (patisandhi citta) and corporeality (kammaja-rūpa) are related to each other by mutuality condition.

8. Dependence Condition (Nissaya Paccaya)

- (i) The four incorporeal aggregates are mutually related to one another by dependence condition.
- (ii) The four great essentials are mutually related to one another by dependence condition.
- (iii) At the moment of conception, mentality (patisandhi citta) and corporeality (kammaja-rūpa) are mutually related to each other by dependence condition
- (iv) Consciousness and its concomitants are related to the mind-produced corporeality (cittaja-

338 THE ESSENCE OF BUDDHA ABHIDHAMMA

rapa) by dependence condition.

(v) The great essentials are related to their derived matter (upādā-rāpa) by dependence condition.

(vi) Eye-base is related to eye-consciousness and its concomitants by dependence condition.

(vii) Ear-base is related to ear-consciousness and its concomitants by dependence condition.

(viii) Nose-base is related to nose-consciousness and its concomitants by dependence condition.

consciousness and its concomitants by dependence condition.

(x) Body-base is related to body-consciousness and its concomitants by dependence condition.

(xi) Depending on this corporeality (i.e. heart-base) mind-element and mind-consciousness element (mano-dhātu and mano-viññāṇa-dhātu) arise; that corporeality is related to the mind-element, the mind-consciousness element and their concomitants by dependence condition.

9. Powerful Dependence Condition

(Upanissaya Paccaya)

(i) Preceding wholesome dhammas (kusala cittas, saddha, alobha, etc.) are related to subsequent wholesome dhammas by powerful dependence condition.

(ii) Preceding wholesome dhammas are sometimes related to subsequent unwholesome dhammas (akusala cittas, lobha, dosa, etc.), by powerful dependence condition.

(iii) Preceding wholesome dhammas are related to subsequent indeterminate (avyākata=vipāka and kiriya) dhammas by powerful dependence condition.

(iv) Preceding unwholesome dhammas (akusala citta, lobha, dosa, etc.) are related to subsequent unwholesome dhammas by powerful dependence condition.

(v) Preceding unwholesome dhammas are sometimes related to subsequent wholesome dhammas (kusala cittas, saddhā, alobha, etc.) by powerful dependence condition.

(vi) Preceding unwholesome dhammas are related to subsequent indeterminate dhammas by powerful dependence condition.

(vii) Preceding indeterminate dhammas (vipāka cittas, kiriya cittas and their concomitants, etc.) are related to subsequent indeterminate dhammas by powerful dependence condition.

(viii) Preceding indeterminate dhammas are related to subsequent wholesome dhammas (kusala cittas and their concomitants, etc.) by powerful dependence condition.

- (ix) Preceding indeterminate dhammas are related to subsequent unwholesome dhammas (akusala cittas and their concomitants, etc.) by powerful dependence condition.
- (x) Also, weather, food, person and lodgingplace are related to beings by powerful dependence condition.

10. Prenascence Condition (Purejāta-Paccaya)

(i) Eye-base is related to eye-consciousness

340 THE ESSENCE OF BUDDHA ABHIDHAMMA and its concomitants by prenascence condition.

(ii) Ear-base is related to ear-consciousness and its concomitants by prénascence condition.

to nose-(iii) Nose-base is related

and its concomitants by prenascence consciousness condition.

Tongue-base is related to tongueconsciousness and its concomitants by prenascence condition.

Body-base is related to bodyconsciousness and its concomitants by prenascence condition.

related to eye-. (vi) Visible object is consciousness and its concomitants by prenascence condition.

(vii) Sound is related to ear-consciousness and its concomitants by prenascence condition.

(viii) Smell is related to nose-consciousness and its concomitants by prenascence condition.

(ix) Taste is related to tongue-consciousness and its concomitants by prenascence condition.

Tangible-object is related to body-consciousness and its concomitants by prenascence condition.

(xi) Visible object, sound, smell, taste and tangible object are related to mind-elements (pañcadvārāvajjana and sampaticchana dvi) and their concomitants by prenascence condition.

(xii) Depending on this corporeality (i.e. heartbase), mind-element and mind-consciousness element (i.e. mano-dhātu and mano-viññāna-dhātu) arise; that corporeality is related to the mind-element and its concomitants by prenascence condition; that corporeality. is sometimes related to the mind-consciousness element

and its concomitants by prenascence condition and is sometimes not related by prenascence condition.

11. Post-nascence Condition (Pacchājāta Paccaya)

The post-nascent consciousness and its concomitants are related to this prenascent corporeality (i.e. heart-base, eye-base, ear-base, etc.) by post-nascence condition.

12. Repetition Condition (Asevana Paccaya)

- (i) Preceding javana kusala cittas and their concomitants are related to subsequent javana kusala cittas and their concomitants by repetition condition.
- their concomitants are related to subsequent javana akusala cittas and their concomitants by repetition condition.
- (iii) Preceeding functional indeterminate dhammas are related to subsequent functional indeterminate dhammas by repetition condition.

13. Kamma Condition (Kamma Paccaya)

- (i) Kusala and akusala kammas are related to resultant mental aggregates and kamma-produced corporeality by kamma condition.
- (ii) Volition (cetanā) is related to its concomitants (i.e. citta and cetasikas) and to the citta-produced corporeality by kamma condition.

14. Kamma-result Condition

(Vipāka Paccaya)

The four incorporeal (i.e. mental) aggregates

342 THE ESSENCE OF BUDDHA ABHIDHAMMA are mutually related to one another by kamma-result condition.

15. Nutriment Condition (Ähāra Paccaya)

(i) Edible food is related to this body by nutriment condition.

(ii) The immaterial nutriments (phassa, viññāṇa and cetanā) are related to their concomitants (citta and cetasikas) and to the citta-produced corporeality by nutriment condition.

16. Faculty Condition

(Indriya Paccaya)

(i) Eye-faculty (cakkhu-pasāda) is related to eye-consciousness and its concon at by faculty condition.

(ii) Ear-faculty (sota-pasada) is related to ear-consciousness and its concomitants by faculty condition.

(iii) Nose-faculty (ghāna-pasāda) is related to nose-consciousness and its concomitants by faculty condition.

(iv) Tongue-faculty (jivhā-pasāda) is related to tongue-consciousness and its concomitants by faculty condition.

(v) Body-faculty (kāya-pasāda) is related to body-consciousness and its concomitants by faculty condition.

(vi) Physical life-faculty (jivita-rapa) is related to kamma-produced cor, eality by faculty condition.

(vii) The incorporeal (i.e. mental) faculties are related to their concomitants (i.e. citta and cetasikas)

and to the citta-produced corporeality by faculty condition.

17. Jhana Condition (Jhana Paccaya)

The *jhāna*-factors are related to their concomitants (i.e. *citta* and *cetasikas*) and to the *citta*-produced corporeality by faculty condition.

18. Path Condition

(Magga Paccaya)

The path-factors are related to their concomitants (i.e. citta and cetasikas) and to the citta-produced corporeality by faculty condition.

19. Association Condition

(Sampayutta Paccaya)

The four incorporeal (i.e. mental) aggregates are mutually related to one another by association condition.

20. Dissociation Condition

(Vippayutta Paccaya)

(i) Corporeal phenomena (dhammas) are related to mental phenomena by dissociation condition.

(ii) Mental phenomena are related to corporeal phenomena by dissociation condition.

21. Presence Condition

(Atthi Paccaya)

- (i) The four incorporeal aggregates are mutually related to one another by presence condition.
 - (ii) The four great essentials are mutually

344 THE ESSENCE OF BUDDHA ABHIDHAMMA related to one another by presence condition.

(iii) At the moment of conception, mentality (patisandhi-citta) and corporeality (kammaja-rūpa) are mutually related to each other by presence condition.

(iv) Consciousness and its concomitants are related to the mind-produced corporeality (cittaja-rdpa) by presence condition.

(v) The great essentials are related to their derived matter (upādā-rūpa) by presence condition.

(vi) Eye-base is related to eye-consciousness and its concomitants by presence condition.

(vii) Ear-base is related to ear-consciousness and its concomitants by presence condition.

(viii) Nose-base is related to nose-consciousness and its concomitants by presence condition.

(ix) Tongue-base is re! d to tongueconsciousness and its concomitants by presence condition.

(x) Body-base is related to bodyconsciousness and its concomitants by presence condition.

(xi) Visible object is related to eyeconsciousness and its concomitants by presence condition.

(xii) Sound is related to ear-consciousness

. (xiii) Smell is related to nose-conscious-

(xiv) Taste is related to tongue-consciousness

(xv) Tangible object is related to body-consciousness

(xvi) Visible object, sound, smell, taste and

tangible object are related to mind-elements (pañcadvārāvajjana and sampaţicchana dvi) and their concomitants by presence condition.

(xvii) Depending on this corporeality (i.e. heart-base) mind-element and mind-consciousness element (i.e. mano-dhātu and mano-viññāna dhātu) arise; that corporeality is related to the mind-element, the mind-consciousness element and their concomitants by presence condition.

22. Absence Condition (Natthi Paccaya)

Consciousness and its concomitants, which have just ceased in contiguity, are related to the present consciousness and its concomitants, which have arisen in a similar manner, by absence condition.

23. Disappearance Condition (Vigata Paccaya)

Consciousness and its concomitants, which have just disappeared in contiguity, are related to the present consciousness and its concomitants, which have arisen in a similar manner, by disappearance condition.

24. Non-disappearance Condition

(Avigata Paccaya)

The causal relations are the same as in presence condition. 'Non-disappearance' and 'presence' refer to similar conditions.

Summary of Causal Relations

1. Mind is related to mind in six ways - viz., anantara, samanantara, āsevana, sampayutta, natthi and

346 THE ESSENCE OF BUDDHA ABHIDHAMMA vigata. (Here 'mind' stands for 'nāma' which is a combination of citta and cetasikas.)

How is mind related to mind in six ways?

Citta and cetasikas which have just ceased are related to the present citta and cetasikas by way of anantara (contiguity), sammanantara (immediacy), natthi (absence) and vigata (disappearance) conditions:

Preceding javanas are related to subsequent javanas by way of asevana (repetition) condition.

Co-nascent citta and cetasikas are mutually related by way of sampayutta (association) condition.

2. Mind is related to mind and matter in five ways:—

viz., hetu, jhāna, magga, kamma and vipāka. How is mind related to mind and matter in five ways?

Hetu's (roots), jhānahgas (jhāna-factors) and maggangas (path-constituents) are related to co-nascent mind and matter by way of hetu (root), jhāna (absorption) and magga (path) conditions.

Co-nascent cetanā (sahajatā-kamma) is related to co-nascent mind and matter by way of kamma condition. So also asynchronous volition (nānakkhanika-kamma) is related to mind and matter born of kamma by way of kamma condition.

The four resultant mental groups (vipākanāmakkhandhas) are related to one another and also to co-nascent matter by way of vipāka (kamma-result) condition.

3. Mind is related to matter only in one way - that is pacchājāta (post-nascence).

Subsequent cittas and cetasikas are related to preceding and previous corporeal groups (heart-bases and sense-bases) by way of pacchājāta condition.

4. Matter is related to mind only in one way – that is purejāta (pre-nascence).

The six bases (vatthu) during life are related to the seven viññāṇa-dhātu's (i.e., all cittas) by way of purejāta condition. So also are the five sense-objects related to the five viññāṇa-vīthis (processes of sense-cognition) by way of purejāta-condition.

5. Concepts, mind and matter are related to mind in two ways —

viz., ārammaņa and upanissaya.

Ārammaṇa-paccaya consists of the six senseobjects which comprise concepts, mind and matter. They are related to cittas and cetasikas by way of ārammaṇa (object) condition.

Upanissaya-paccaya (powerful dependence condition) is threefold – namely, powerful dependence as object, powerful dependence as contiguity, and powerful dependence as intrinsic nature.

Of them the object itself, when it becomes prominent and attracts our attention, serves as a powerful dependence. Cittas and cetasikas, which have just ceased, act as the powerful dependence of contiguity.

The powerful dependence of intrinsic nature is of several kinds:— akusala dhamma such as rāga, dosa, etc., kusala dhamma such as saddhā, sati, etc., bodily pleasant feeling, bodily pain, person, food, weather, season, lodging places, etc. These are related by way of powerful dependence to moral states, immoral states,

resultant states (vipāka) and functional states (kiriya) which subsequently arise either internally (ajjhattika) or externally (bahiddha). Powerful kamma is also similarly related to its effects.

- 6. Mind and matter are related to mind and matter in nine ways viz., adhipati, sahajāta, aññamañña, nissaya, āhāra, indriya, vippayutta, atthi and avigata.
- (1) There in the relation of adhipati (predominence) is twofold:—
- (i) Very prominent object which draws one's attention is related to cittas and cetasikas by way of objective predominence (ārammanādhipati) condition.
- (ii) The fourfold co-nascent predominence (chandha, viriya, citta, vimamsa) is related to co-nascent citta, cetasikas and matter by way of co-nascent predominence (sahajātādhipati) condition.
- (2) The relation of sahajāta (co-nascence) is threefold:—
- (i) Co-nascent citta and cetasikas are related to one another and also to co-nascent matter by way of sahajāta condition.
- . (ii) The four great essentials (mahabhūta) are related to one another and also to co-nascent derived material qualities (upādā-rūpa) by way of sahajāta condition.
- (iii) At the moment of conception, the heartbase (hadaya-vatthu) is related to the rebirth consciousness and its concomitants by way of sahajāta condition
- (3) The relation of aññamañña (mutuality) is threefold:—

(i) Co-nascent citta and cetasikas are mutually related by way of aññamañña condition.

(ii) The four great essentials are mutually

related by way of aññamañña condition.

(iii) At the moment of conception, the heartbase is related to the rebirth-consciousness and its concomitants by way of aññamañña condition.

(4) The relation of nissaya (dependence) is,

threefold:--

- (i) Co-nascent citta and cetasikas are related to one another and also to co-nascent matter by way of nissaya condition.
- (ii) The four great essentials are related to one another and also to co-nascent derived material qualities by way of nissaya condition.

(iii) The six bases (vatthu) are related to the seven viññāna-dhātu's by way of nissaya condition.

(5) The relation of ahara (nutriment) is twofold:—

(i) Edible food is related to corporeal groups by way of āhāra-condition.

(ii) The three mental nutriments (phassa, cetanā, and viññāṇa) are related to co-nascent mind and matter by way of āhāra condition.

(6) The relation of indriya (faculty of control) is threefold:—

(i) The five sensitive organs (pasāda-rūpas) are related to paāca-viñāāna (eye-consciousness, ear-consciousness, etc.), by way of indriya condition.

(ii) Jivita-rūpa (material vitality) is related to kammaja-rūpas by way of indriya condition.

(iii) Mental indriyas (immaterial controlling factors) are related to co-nascent mind and matter by way of indriya condition.

350 THE ESSENCE OF BUDDHA ABHIDHAMMA

(7) The relation of vippayutta (dissociation) is threefold:—

(i) At the moment of conception, the heartbase is related to the rebirth-consciousness and its concomitants by way of sahajāta-vippayutta condition. Citta and cetasikas are also similarly related to conascent matter.

(ii) Subsequent cittas and cetasikas are related to preceeding and previous corporeal groups (heart-bases and sense-bases) by way of pacchājāta-vippayutta condition.

(iii) The six bases during life are related to the seven viññāṇa-dhātu's (i.e. all cittas) by way of purejāta-vippayutta condition.

(8) The relations of atthi (presence) and avigata

(non-disappearance) are each fivefold:—

The relations of sahajāta (co-nascence), purejāta (pre-nascence), pacchājāta (post nascence), āhāra (nutriment), and rūpa-jivitindriya (material vitality) also serve as the relations for atthi and avigata. Atthi and avigata are more or less identical.

A Generalised Summary

All the 24 relations are reducible to these four:— (1) ārammana, (2) upanissaya, (3) kamma and (4) atthi.

Division of Nama and Rupa

The corporeal group (rupakkhandha) consisting of 28 kinds of rupa is called rupa (matter).

The four mental groups (nāmakkhandhas) consisting of all cittas and all cetasikas, and Nibbāna are the five kinds of the immaterial called nāma. It is significant that Nibbāna is classed under nāma; this

PACCAYA (Cause or Condition) 351 is so because Nibbana serves as a sense object which causes lokuttara-cittas and cetasikas to bend towards it.

Paññatti (Conception)

Apart from nāma and rāpa, there is paññatti (conception). Paññatti is twofold:—

(1) Attha – paññatti = it is the name of something that makes the form, shape, mass, appearance, etc., of the thing be known in communication.

The thing we refer to may be a man, a dog, a house or a mountain which are not ultimate realities. Also the form, shape, mass, appearance, etc., of the thing are not real. They are just ideas or concepts which appear in the mind. Furthermore, the name is not a reality since various names can be chosen to refer to a particular thing.

(2) Sadda – paññatti = Since 'sadda' signifies "sound" 'sadda-paññatti' refers to spoken words in various languages. When we mention the names of various things in communication, we make the things known to others.

So by attha-paññatti something is made known by giving it an appropriate name, and by sadda-paññatti we are making that something known to others by speakig it out.

For illustration, the spoken word 'man' let others know that we refer to the form, shape, mass and appearance of a man. So it is a 'sadda-paññatti'. Now the form, shape, mass and appearance of the man which are made known by the word 'man' should be regarded as "attha-paññatti'.

Various Forms of Attha-paññatti
In discussing the various forms of attha-paññatti,

352 THE ESSENCE OF BUDDHA ABHIDHAMMA

the external octad (suddhatthaka-kalāpa) will be referred to as 'mahābhūta' (great essential).

1. Santāna-paññatti

Such words as 'land', 'mountain', 'hill', 'field' and the like, are so designated on account of the mode of linking and spreading out of mahābhūta. They are called 'santāṇa-pañnatti'.'

2. Samūha-paññatti

Such terms as 'house', 'school', 'charlot', 'cart' and the like are so named on account of the mode of combination of materials. They are called 'samūha-paññatti'.

3. Sandhäna-paññatti

Such terms as' plate', 'bowl', 'saucer', 'spoon', "tea-cup' and the like are so named on account of the form or shape of the material (porcelain in this case). They are called "sandhāna-pañnatti'.

4. Satta-paññatti

Such terms as man', 'woman', 'child', 'person', 'dog' and the like are so named on account of the five aggregates. They are called 'satta-paññatti'.

5. Disā-paññatti

Such terms as 'east', 'west', 'north', 'south', 'direction' and the like, are so named on account of the revolution of the sun and the moon, etc. They are called 'disa-pañāatti'.

6. Kāla-pañňatti

Such terms as 'morning', 'noon, 'afternoon', 'evening', 'night', 'time' and the like are so designated on account of time. They are called 'kāla-pañāatti'.

7. Äkāsa-paññatti

Such terms as 'cave', 'well', 'hole', 'tunnel', and the like, are so named on account of empty space (ākāsa). So they are called 'ākāsa-pañāatti'.'

8. Kasina-paññatti

Such terms as 'pathavi-kasiņa', 'āpo-kasiņa', 'tejo-kasiņa', 'vāyo-kasiņa', and the like, are so designated on account of the predominant element in mahābhūta. They are called 'kasiņa-pañāatti'.

9. Nimitta-pañsiatti

Such terms as 'parikamma-mimitta', 'uggaha-nimitta', 'patibhāga nimitta' and the like are so designated on account of the degree of concentration in meditation. They are called 'nimitta-paññatti'.

Note:— The various forms of attha-paññatti do not exist in the ultimate sense. They refer to objects made up of real things but appear in the mind as images.

Though they do not exist in the ultimate sense, they become objects of thought in the form of shadows of (ultimate) things. They are used in conversation to express one's view and to let others know one's wish.

Six Names for Sadda-paññatti

The spoken words of different languages are all sadda-paññatti. Each and every sadda-paññatti has the following six names.

1. Nama -It is the name of something and it is always bent towards the meaning it could express.

For example, the word 'bhāmi' could express the meaning of 'land' and so it is always bent towards that meaning. Moreover, because it could express so, it always let the meaning 'land' bend towards it as its own meaning.

2. Nāma-kamma — The name 'bhami' has been given to it by some important learned men

in the past. So it is also known as 'nāma-kamma'.

3. Năma-dheyya – The name 'bhūmi' has been long established by learned people. Thus it is also called 'nāma-dheyya'.

4. Nāma-nirutti — The name 'bhūmi' lies hidden before it is spoken, and it should be exposed by expressing it in language. So it is called 'nāma-nirutti'.

5. Nāma-byanjana — Because the name 'bhūmi' can show its meaning very clearly, it is called 'nāma-byanjana'.

should be spoken with the intention of expressing the meaning of it. So it is called 'nāmabhilāpa'.

Six Kinds of Sadda-paññatti

1. Vijjamāna-pañnatti = real concept
When a name is given to something which
exists in reality, then that name is called 'vijjamānapannatti'. All the names of the ultimate realities
(paramatthas) belong to this class.

e.g. Rūpa, città, cetasika, vedanā, sanna, vitakka.

2. Avijjamāna-pañnatti = unreal concept
When a name is designated to something which
does not exist in reality, then that name is called
'avijjamāna-pañnatti'. All the names of things which
are not ultimate realities belong to this class.

e.g. Man, dog, house, school, hill, cave:

3. Vijjamānena-avijjamāna-paññatti = real and unreal concept.

It is a sadda-paññatti which makes known a compound name formed by combining a real concept with an unreal concept.

e.g. Chalābhinna = a possessor of six super-knowledges.

In this compound name, 'sixfold abhinnā' is a real concept while 'possessor' is an unreal concept since it is a name given to the five agggregates.

e.g. Te-vijja = a possessor of three vijja-nāṇa.

4. Avijjamānena-vijjamāna-pañnatti =

unreal and real concept. It is a sadda-paññatti which makes known a compound name formed by combining an unreal concept with a real concept.

e.g. Itthi-sadda = woman's voice.

The voice does exist as a sound, so it is a real concept. But 'woman' is an unreal concept, because it is a name also given to the five aggregates.

Itthi-rūpam = woman's visual feature. e.g. Purisa-sadda = man's voice.

5. Vijjamänena-vijjamäna-paññatti =

real and real concept.

It is a sadda-paññatti which makes known a compound name formed by combining a real concept with a real concept.

Cakkhu-viññāṇa, e.g. sota-pasãda, ghāna-samphassa, rūpa-tanhā.

Avijjamanena-avijjamana-pannatti =

unreal and unreal concept. It is a sadda-paññatti which makes known a compound name formed by combining an unreal concept with an unreal concept.

Rāja-putta (king's son), movie-actress. e.g. Company-director, head-master.

Chapter

KAMMATTHÂNA (Subjects of Meditation)

Introductory

In 'kammatthāna', 'kamma' means the act of meditation and 'thana' means station, ground or place, implying subject or exercise.

So 'kammatthana' means 'working-ground' (for

meditation) or 'subject of meditation'.

This 'working ground' or 'subject of meditation' will serve as the training ground or the training tool for mental culture. There are two aspects of mental culture - one dealing with 'calm' and the other with 'insight'. Both aspects will be treated in the present

chapter.

The methods of mental training, i.e. meditation, as taught by Buddha are unique in that they can stop worry, relax mental tension, eradicate mental depression, offer instant peace of mind, and lead to samadhi (concentration), jhāna (ecstatic absorption), vipassanāñāna (insight), and the four paths and their fruits (maggas and phalas) which are the highest and noblest attainment in life.

This chapter will give a brief but authentic and fruitful account of samatha-bhavana (calm-meditation) and vipassanā-bhāvanā (insight-meditation).

Bhavana (Meditation)

'Bhavana' is generally rather vaguely translated as 'meditation'. It is better be called 'mental development'. It is a process of mental culture that produces so much good effect that it should be developed repeatedly in one's mind.

There are two kinds of bhavana:-

- (1) Samatha-bhāvanā = development of tranquility, and
- (2) Vipassanā-bhāvanā= development of insight.

Samatha-Bhavana

'Samatha' means ' tranquility' which is the concentrated, unshaken, undefiled and peaceful state of mind. It is called 'calm' because it calms down the five hindrances (nivāranas) including passions.

In essence, 'samatha' stands for the ekaggatācetasika (samādhi) present in lokiya-kusala cittas
or lokiya-kiriya cittas. It refers to that samādhi (concentration) which can calm down the five hindrances
and also to the higher jhāna-samādhi which can calm
down the lower jhāna factors — viz., vitakka, vicāra,
piti and sukha.

Vipassanā-Bhāvanā

'Vipassanā' means 'insight', i.e. the intuitive insight into the impermanency (anicca), misery (dukkha) and impersonality (anatta) nature of all bodily and mental phenomena of existence.

In essence, 'vipassanā' stands for the paññācetasika (wisdom) present in mahā-kusala cittas and mahā-kiriya cittas.

Kammatthana

Here 'kammatthāna' is taken to mean the object of meditation. As consciousness cannot arise without an object, we need suitable objects for mental training.

Buddha has prescribed 40 objects for samathabhāvanā. They are known as 'samatha-kammatthāna'. They comprise the following seven classes:

(1) Kasina - - 10 kasina objects

(2) Asubha - - 10 loathsome objects

(3) Anussati - - - 10 recollection objects

(4) Brahma-vihāra - 4 sublime abodes

(5) Aruppa - 4 immaterial spheres

(6) Āhāre-paţikāla-saññā - - - 1 object

(7) Catu-dhātu-vavatthāna - - - 1 object

The object of meditation for vipassanā-bhāvanā is 'tilakkhana', i.e. the triple symbol comprising anicca, dukkha and anatta of all bodily and mental phenomena of existence.

Ten Kasinas

'Kasina' means 'whole', 'all', 'complete'. It is so called because it should be observed wholly or completely in meditation, and also because the light issuing from the conceptualized image is extended to all directions without any limitation.

Because it should be observed wholly, the shape of kasina should be circular with its diameter equal to one span and four fingers, i.e. about a foot.

1. Pathavi-kasina = earth-circle, i.e. pure earth or ... dawn-coloured clay smeared on a canvas of optimum size.

water-kasina, i.e. water placed 2. Āpo-kasina in a suitable vessel or container.

fire-kasina; it may be prepared 3. Tejo-kasina = by placing evenly burning charcoal in an old tray, or

4. Väyo-kasina =

5. Nila-kasina ≐

6. Pîta-kasina =

7. Lohita-kasina =

8. Odáta-kasina =

9. Áloka-kasina =

10. Ákása-kasina =

one may look through a hole of an old-tray into the middle part of a big fire.

air-kasina; to develop it, one concentrates on the wind which blows the hair-tops or the grass-tops or which touches the cheek.

brown-kasina; take a brown circle of paper or cloth on a white background. yellow or golden-coloured

kasina; prepare as above. red-kasina; prepare as above. white-kasina; take a white circle of paper or cloth on a black background.

light-kasina; it may be developed by concentrating on the morning or evening sun, on the moon, or on a circle of light cast on the floor or wall by sunlight entering through a hole in the wall.

space-kasina; it may be developed by looking through a hole in the wall towards the outside space having sky as background.

An example of meditation on kasina will be illustrated soon. One can develop all the five rapavacarajhanas by meditating on a kasina. One can then procede

360. THE ESSENCE OF BUDDHA ABHIDHAMMA

on to develop four arūpāvacara-jhānas and five lokiyaabhiññāṇas (mundane super-knowledge) based on the ten kasinas.

Ten Asubhas

They refer to ten kinds of corpses which were found in ancient Indian cemeteris where dead bodies were not buried or cremated and where flesh-eating animals such as dogs, wolves and vultures frequent.

In modern days any kind of corpse which shows the loathsomeness of the body is a suitable object for meditation.

We are, as a rule, very strongly attached to our body as well as to others' bodies by rāga (lust). The best way to suppress that rāga and the best remedy to cure the rāga-disease is asubha-kam 'thāna. It was made a standard or compulsory kamnutthāna during the time of Buddha, especially for young monks.

Even now it is included in the four kammatthānas which serve as guardians or protectors. They are called caturārakkha-kammatthānas. One should master these four kammatthānas before one proceeds on to insight meditation.

The ten kinds of corpses are enumerated as follows.

- 1: Uddhumātaka =
- 2. Vinilaka =
- 3. Vipubbaka =
- 4. Vicchiddaka =

rotten and bloated corpse. discoloured corpse which becomes brownish black. one wit' cracked skin and pus oozing out.

one which has been cut into two or three pieces.

5. Vikkhāyitaka = one which has been gnawn and mangled by dogs, vultures, etc.

6. Vikkhittaka = one which has been bitten and scattered into pieces by dogs, vultures, etc.

7. Hatavikkhittaka = one which has been mutilated and cut by knife, axe, etc., and thrown away as fragments.

8. Lohitaka = a bloody corpse.

9. Puluvaka = worm-infested corpse.

10. Atthika = a skeleton.

Meditation on any kind of corpse will lead to the first *jhāna*. As the object is very disgusting, it is impossible to fix the mind on the object without vitakka. So vitakka cannot be removed in order to attain the second *jhāna*.

Ten Anussatis

'Anussati' means repeated reflection or constant mindfulness. It stands for sati-cetasika.

1. Buddhanussati = reflection on the virtues of Buddha. One may reflect on the 9 virtues one by one as, for example,

"Such indeed is the Evalted one worthwarfully.

"Such indeed is the Exalted one – worthy, fully enlightened, endowed with wisdom and conduct, well-farer, knower of the worlds, an incomparable charioteer for the training of individuals, teacher of gods and men, omniscient, and holy".

Or one may choose the virtue one likes best and reflect on it again and again as, for example, 'Araham, araham'. In so reflecting one should visualize the virtue as:

"Buddha is the holiest person as He has discarded all defilements completely, and thus He is worthy of worship by men and gods."

second method is more effective for

developing 'concentration.

2. Dhammanussati = reflection on the virtues of Dhamma (the Doctrine) as, for example, "Well-expound is the doctrine by the Exalted One, to be realized by oneself, of immediate fruit, inviting investigation, leading to Nibbana, to be understood by the wise, each one for himself".

Here again one may choose the virtue one likes

best and reflect on it repeatedly.

reflection on the virtues Sanghānussati = of Sangha - the order of Brotherhood of the Noble Ones. One may reflect on the nine virtues as follows:-

" Of good conduct is the order of the disciples of the Exalted One; of upright conduct is the Order of the disciples of the Exalted One; of wise conduct is the Order of the disciples of the Exalted One; of dutiful conduct is the Order of the disciples of the Exalted One. The four pairs of persons constitute eight individuals. This Order of the disciples of the Exalted One is worthy of offerings, is worthy of hospitality, is worthy of gifts, is worthy of reverential salutation, is an incomparable field of merit for the world."

Here also one may choose the virtue one likes

best and reflect on it repeatedly.

- 4. Silánussati = reflection on the perfection of one's morality (sila).
- 5. Căgănussati = reflection on one's own charitable offering (dāna).
- 6. **Devatanussati** = reflection on one's own virtues with a consideration on deities as witnesses.

For example: "Deities are born in such exalted states on account of their faith, morality, charity, knowledge, wisdom, moral shame and moral dread. I too possess these virtues.

- 7. Upasamānussati = reflection on the virtues of Nibbāna.
- 8. Maranánussati = reflection on the nature of one's own death as, for example, "My death is certain, my being alive is uncertain."
- 9. **Kāyagatāsati** = reflection on the 32 impure parts of the body such as

head-hair, body-hair, nails, teeth, skin, flesh, sinews, bones, marrow, kidneys, heart, liver, diaphragm, spleen, lungs, bowels, mesentery, stomach, faeces, brain, bile, phlegm, pus, blood, sweat, lymph, tears, grease, saliva, nasal mucus, articular fluid and urine."

In Buddha's time many monks attrained arahatship by meditating on these impure parts. Kāyagatāsati develops asubha-saññā (notion of loathsomeness) on the body just as asubha-bhāvanādoes. This loathsomeness of the body leads to dispassion, i.e. the suppression of rāga (lust).

10. Anápánassati = mindfulness on the in-breathing and out-breathing of one's respiration.

A brief Comment on Anussatis

Of the ten Anussatis, kāyagatāsati can lead to the first jhāna; ānāpānassati, to all the five rūpāvacara jhānas; and the rest, to neighbourhood concentration (upacāra:-samādhi).

Buddhānussati and maranānussati are included in the four guardian-kammatthānas. By reflecting on the virtues of Buddha repeatedly for a long time, one's body becomes venerable as a pagoda and so it may not be insulted by beasts, ghosts or wicked persons.

Also one has the notion of living together with Buddha, and thus one develops faith on Buddha, moral shame and moral dread to a greater extent.

Reflection on death repeatedly enables one to comprehend the fleeting nature of life. When one has the notion that one's death may come at any moment, one sheds all pride, anger, attachment, etc., and one endeavours to make the best use of one's life by working for self-development instead of wholly indulging in sensual pleasures.

Ânāpānassati is one of the best kammaṭṭhānas for developing concentration as well as insight. It is the staple kammatthāna practised by all Buddhas. It is easy to practise and can be practised anywhere at any time while sitting, standing, walking or lying. Breathing exists all the time and what is required is just to be mindful of it.

The mindfulness (sati) should be placed at the tip of the nose where the breath touches and pushes itself in and out. From that watch-point, one must be aware of the in-going breath and the out-going breath.

It is like sitting at the gate of entrance and checking the people going in and coming out.

In the suttas this simple method of mindfulness of respiration is explained as follows:—

- 1. "Attentively he breathes in, attentively he breathes out.
- 2. When making a long inhalation he knows:

 "I make a long inhalation"; when making a short inhalation he knows: "I make a short inhalation"; when making a long exhalation he knows: "I make a long exhalation"; when making a short exhalation he knows: "I make a short exhalation."
- I will inhale"; thus he trains himself; "clearly perceiving the entire body (breath) I will exhale"; thus he trains himself. (It means that one must be mindful to know every part of the breath; i.e. the whole breath.)
- 4. "Calming this breathing process I will inhale"; thus he trains himself; "calming this breathing process I will exhale"; thus he trains himself.

As breathing occurs rhythmically it can draw one's attention towards it and builds up concentration very quickly. If the mind wanders out to some external object such as tea-shop, cafeteria, movie-house, etc., note that it is there and focus it back on respiration. When the five hindrances (nivaranas) are suppressed completely, rapture (piti), tranquility of mind (passaddhi), pleasant feeling (sukha vedanā) and concentration (samādhi) will become distinct, and one experiences happiness one has never experienced before. One feels

366 THE ESSENCE OF BUDDHA ABHIDHAMMA very light in body and mind and very peaceful. Some even feel as if they were floating in the air.

About this time a conceptualized light immage (nimitta) in the form of a tube of rays or a sparkling diamond or a bright ruby or the like usually appears. The five jhana-factors also become distinct and strong, and one may be assured that one has attained neighbourhood-concentration. If one carries on the mindfulness exercise earnestly and intensely, very soon one may attain the first jhana and the higher jhanas.

Based on the jhana-concentration, one may carry on the insight-meditation by investigating the mental and the corporeal phenomena in mind and body in detail. Then by comtemplating on tilakkhana – i.e. the phenomena of impermanence, suffering and non-personality – one develops insight knowledge (vipassanā-ñāna) which will gradually lead to the Path and its Fruition.

Four Brahma-vihāras

'Brahma' means 'sublime' and 'vihāra' means 'abode' or 'state of living'. Thus 'Brahmavihāra' refers to 'sublime abode' or 'sublime state of living'. This 'sublime state of living' is similar to the moral living of celestial Brahmas. So it is called 'Brahmavihāra'.

The four *Brahma-vihāras* are also known as 'four **Appamaññās**' meaning 'four boundless states'. They are so called because those who practise these exercises are radiating loving-kindness or compassion or sympathetic joy to all beings without limit or obstruction.

1. Mettä = loving-kindness, benevolence, goodwill.

It is defined as that which softens one's heart. It is the wish for the good, safety and happiness of all beings. Benevolent attitude is its chief characteristic.

It is not carnal love (rāga) or personal affection (pema). Its direct enemy is hatred or illwill (dosa) or aversion (kodha). Its indirect enemy is pema (lobha). It has the ability to quench illwill.

The culmination of metta is the identification of oneself with all beings, i.e. one no longer differentiates between oneself and the others in the order of priority.

Metta stands for adosa-cetasika.

2. Karuná = compassion

It is defined as that which makes the hearts of the noble quiver when others are subject to suffering or that dissipates the sufferings of others. The wish to remove the sufferings of others is its chief characteristic.

Its direct enemy is cruelty or wickedness (himsa) and its indirect enemy is passionate grief (domanassa). It discards cruelty or wickedness.

Karunā embraces sorrow-stricken beings with the ardent wish to free them from all sufferings.

It istands for the karunā-cetasika.

3. Mudita = sympathetic joy, appreciative joy.

It is the congratulatory attitude of oneself.

Its chief characteristic is to be happy and full of joy in others' prosperity and success.

Its direct enemy is jealousy, and its indirect enemy is exhilaration (pahāsa). It eliminates dislike (arati).

368 THE ESSENCE OF BUDDHA ABHIDHAMMA

Mudita embraces all prosperous beings with the ardent wish that their prosperity will last for a long time. It stands for the mudita-cetasika.

4. Upekkhā = equanimity

It literally means 'to view impartially', that is with neither attachment nor aversion. Impartial attitude is its chief characteristic.

It is not hedonic indifference nor the neutral feeling (upekkhā-vedanā). It stands for tatramajjhattatā-cetasika and means perfect equanimity or a well-balanced mind. It stays in between karunā and muditā. It keeps the mind balanced and unwavering amidst vicissitudes of life such as praise and blame, pain and happiness, gain and loss, repute or disrepute.

Its direct enemy is passion (rāga) and its indirect enemy is callousness. It eliminates clinging and aversion.

Living in Sublime Abode

Any one who is practising one of the four *Brahma-vihāras*, is said to be living in the sublime abode.

To practise *mettā*, one extends one's loving-kindness towards all beings, sincerely wishing them to be happy and free from danger, free from bodily pain and mental suffering.

To practise *karuṇā*, one embraces all sorrow stricken beings, sincerely wishing them to be free from all miseries.

To exercise *muditā*, one embraces all prosperous beings, wishing them sincerely that all their gain and prosperity remain with them for a long time.

To exercise *upekkhā*, one embrances the good and the bad, the loved and the unloved, the sorrow-stricken or the prosperous, with equanimity comtemplating that "all beings are as they are conditioned by their own-kamma".

Meditational practice of the first three Brahmavihāras can lead to four rūpāvacara jhānas whereas upekkhā-exercise leads to the fifth jhāna. Remember that only the fifth jhāna is associated with equanimity and indifferent feeling (upekkhā-vedanā).

To develop one's concentration up to jhāna, it is advisable to choose a suitable person and concentrate on him pervading him with mettā, karunā or muditā. Even then it usually takes a long time to develop jhāna.

The faster way is to develop jhāna, preferably up to fifth jhāna, by meditating on respiration (ānāpānassati) or another kammatthāna in which the object of meditation is well defined. Then, making concentration associated with the fifth jhāna as the base, one undertakes mettā-exercise. In this way one can develop the four mettā-jhānas very rapidly. This method is being successfully practised in Pa-auk Tawya Meditation Centre in Lower Myanmar.

Only when one can pervade all beings with jhāna-mettā, jhāna-karunā, jhāna-muditā and jhāna-upekkhā, one is living truely in the sublime state.

The stereotype text on the development of these four sublime states of living is mentioned in the Suttas as follows:—

"There, O monks, the monk with a mind full of loving-kindness pervading first one direction, then a second one, then a third one, then a fourth one, just so above, below and all around, and everywhere 370 THE ESSENCE OF BUDDHA ABHIDHAMMA identifying himself with all, he is pervading the whole world with mind full of loving-kindness, with mind wide, developed, unbounded, free from hate and ill-will."

The same theme follows with compassion, sympathetic joy and equanimity.

Ahāre-patikula-saññā'

(Perception of Loathsomeness on Food)

It is the repeated contemplation to develop the perception of loathsomeness on the food and drinks we eat and swallow.

How do we develop the notion of loathsomeness on the food we are eating?

When the various dishes of food are arranged attractively, they appeal to our appetite. Note that when they are mixed up, their attractiveness is reduced. On chewing the food in our mouth, note how tiresome it is to lower the jaw and raise it repeatedly pounding on the food as if we are pounding chili in a mortar with pistle.

Also note that, while chewing, saliva, bile, phlegm and other digestive juices are produced at the bottom of the tongue, and that the tongue is mixing them with food which becomes sticky and loathsome. On swallowing the food, it reaches the stomach where it has to be further digested. The undigested food collects in the bowels and it has to be discarded from time to time in the lavatory. As the excrement is very loathsome, one has to hide shamefully in the lavatory to discard it.

Now attachment to food (rasa-tanhā) is a strong form of lobha which is a hindrance to the development of concentration. So Buddha advised His disciples to suppress it by means of Ahāre-paṭikula-saññā.

Catu-dhátu-vavatthána

(Analysis of the Four Elements)

'Catu-dhātu' means the four essential elements - namely, pathavī, āpo, tejo and vāyo.

'Vavatthāna' means the knowledge of characterizing (the elements).

As the four essential elements form the basis of all corporeal phenomena, their characteristics must be investigated and put into knowledge,

In chapter VI we have learnt that our body is made up of 21 kinds of corporeal groups called kalāpas, and each kalāpa comprises at least the four essential elements and their four material qualities – viz., visible form (vanna), smell (gandha), taste (rasa) and nutriment (ojā).

Thus the four great elements are present in every part and particle of our body. Pathavi must be characterized as the element of extension with the characteristics of hardness and softness. Apo must be known as the element of cohesion with the characteristics of cohesiveness and fluidity. Tejo is the element of heat with the characteristics of hot and cold. Vāyo is the element of motion with the characteristics of pushing and supporting.

We must investigate in the body that the characteristics of hardness and softness, cohesiveness and fluidity, hot and cold, pushing and supporting are present in every part and particle of the body. We

372. THE ESSENCE OF BUDDHA ABHIDHAMMA

must feel these characteristics and be conscious of them in the mind to be sure of their presence. When they become distinct in the mind, one keeps on concentrating on them and noting them to develop one's samādhi. The highest samādhi attainable here is neighbourhood concentration as the object of meditation is too deep and vast.

According to the results discovered in Pa-auk Tawya Meditation Centre, catu-dhātu-vavatthāna is a very effective kammatthāna for developing concentration very quickly. When one attains neighbourhood-concentration, one can see through the body to observe the flesh, the sinew, the bone, the heart, the liver, etc., as one should see in kāyagatāsati-meditation.

Then one can use the skeleton which one penetratively sees in the body of another person as the object of asubha-kammatthāna and meditate on it to raise the concentration to the level of first jhāna.

Furthermore, the whiteness of the bone, preferably the skull, can be used as the object of odāta-kasina. One meditates on it to raise the concentration further to the level of fifth jhāna.

These step-wise methods of developing concentration are described in Visuddhi Magga and they are successfully put into practice in Pa-auk Tawya Meditation Centre.

Four Aruppas

(Four Immaterial Spheres)

The four immaterial spheres of unbounded space (akāsa), unbounded consciousness, nothingness, and

neither-perception-nor-non-perception are employed as the objects of meditation to develop the four arūpā-vacara-jhānas, respectively.

In practice one has to develop the five rupāvacara-jhānds first on one of the kasinas, and then, making the fifth-jhāna as the base, one goes higher to the four āruppas to develop the four arūpāvacara-jhānas.

Six Caritas

(Six Types of Nature)

There are six types of persons according to their nature or temperament.

- 1. Raga-cartita = the greedy-natured who indulge in sensuous pleasure without shame;
- 2. Dosa-carita = the hate-natured who get angry easily even over trivial things;
- 3. Moha-carita = the stupid or dull-natured;
- 4. Saddha-carita = the faithful-natured who venerate the Triple-Gem piously;
- 5. Buddhi-carita = the intelligent-natured who rely on reason and would not believe easily;
- 6. Vitakka-carita = the ruminating-natured who think over this and that without accomplishing much.

374 THE ESSENCE OF BUDDHA ABHIDHAMMA

Kammatthana and Carita

The forty kammatthānas should be coupled with six caritas suitably for beneficial results.

- 1. The greedy-natured persons should exercise the ten asubhas and kāyagatāsati as these kammatthānas can suppress passion effectively.
- 2. The hate-natured persons should practise the four Brahmavihāras and the four colour-kasinas, i.e. nila, pīta, lohita and odāta kasinas. These kammatthānas are pure and serene and can delight persons who exercise them.
- 3. The stupid and dull-natured persons as well as the ruminating-natured persons should practise ānāpānassati. The minds of these people are restless and distracted because uddhacca, vicikicchā and vitakka. In ānāpānassati the inbreathing and the out-breathing have to be noted rhythmically. So ānāpānassati can control and calm down the restless minds.
- 4. The faithful-natured persons should practise Buddhānussati, dhammānussati, sanghānussati, silānussati, cāgānussati and devatānussati. Saddhā (faith) is already strong in these persons and it will be further strengthened to great benefits by practising these anussati-kammatthānas.
- 5. The intelligent-natured persons should practise maranānussati, upasamānussati, āhāre-patikūla-saññā and catu-dhātu-vavatthāna. The subjects of these kammatthānas are usep and subtle, and thus they can stimulate and strengthen the wisdom of the intelligent-natured persons.

6. The kammatthānas which are suitable to all types of persons are pathavi-kasiņa, āpo-kasiņa, tejo-kasiņa, vāyo-kasiņa, āloka-kasiņa, ākāsa-kasiņa and the four āruppas.

Three Stages of Bhavana

Bhavana (meditation) may be divided into three classes in accordance with the degrees of concentration or mental culture they can give rise to.

1. Parikamma-bhāvanā = the preparatory stage of meditation.

The kammatthāna-objects such as kasinas are called parikamma-nimitta, meaning, preparatory immage. By observing an earth circle, one may meditate: "Pathavi, pathavi" repeatedly either by murmuring it slowly or by just noting it in the mind. This early stage of meditation, that can develop 'parikamma-samādhi', is called parikamma-bhāvanā. It paves the way for the arising of higher-bhāvanās later on.

'Parikamma-samādhi' is 'preparatory concentration' which is the initial and still undeveloped concentration of mind. All stages of concentration starting from this initial stage up to the stage just below the neighbourhoodconcentration is termed 'parikamma-samādhi'.

2. Upacara-bhavana = the neighbourhood stage of meditation.

'Upacāra' means 'neighbourhood' or 'moment of access'. 'Upacāra-bhāvanā is that meditation which has come to the neighbourhood of jhāna, magga or phala. It may also be regarded as the meditation which

is about to enter the absorption-stage of meditation

called appanā-bhāvanā.

Parikamma-bhāvanā itself is developed into the upacāra-bhāvanā. The object of upacāra-bhāvanā is 'parikamma-nimitta': it is 'patibhagano longer nimitta', meaning 'counter-image'.

The concentration associated with upacarabhāvanā is called 'upacāra-samādhi' which is translated as 'neighbourhood- or access - concentration'. It represents the degree of concentration just before entering any of the absorptions (ihānas).

Appaná-bhávaná = the absorption stage of meditation.

The meditation, which has developed to jhāna, magga or phala, is called 'appanā-bhāvana' The ihāna. magga or phala remains absorbed or .. xed in their respective objects.

object of jhāna is 'patibhāga nimitta' The object of magga or phala is Nibbana. whereas the The concentration associated with the appana-bhavana

is called the 'appanā-samādhi'.

Bhavana and Kammatthana

Parikamma-bhāvanā is attainable in all the forty kammatthānas.

Parikamma-bhāvanā and upacāra-bhāvanā occur in the first eight anussatis and also in aharepatikūla-sannā and catu-dhātu-vavatthāna (tota'ling 10 kammatthānas).

All three types of bhavana occ n the remaining 30 kammatthanas- viz., 10 kasinas, 10 asubhas, 4 brahma-vihāras, 4 āruppas, kāyagatāsati and

ānāpānassati.

Jhana and Kammatthana Table 9.1 Differentiation of Kammatthanas by Means of Jhanas

Niotes: (1) There are 25 kammatihānas which can produce rūpāvacara first jhāna (add-1+2+3 in the above Table).

(2) Fourteen kammatthānas can give rise to rūpāvacara, second-third-fourth jhānas (add 1+3).

(3) Twelve kammatthanas can give rise to rūpāvacara fifth jhāna (add 1+4).

(4) Four *āruppas* can produce four arūpāvacara jhānas.

(5) Ten kammatthānas comprising the first 8 anussatis, āhāre-patikula-saññā and

catu-dhātu-vavatthāna cannot give rise to any jhāna. They can, however, help to attain neighbourhood concentration.

Bhavana-Nimitta

(Meditation Image)

Nimitta' means mark, sign, image, target, object, etc. Here it refers to the 'mental image' obtained in meditation. Three types of nimitta are to be noted.

1. Parikamma-nimitta = preparatory immage

It is the object of parikamma-bhāvanā. It is the object perceived at the early stages of meditations.

2. Uggaha-nimitta = acquired image

As the meditation proceeds, the meditator finds that he can see the object, e.g. kasina, without looking at it directly. He has acquired the image in his mind, and he can see it with eyes closed.

The acquired image is still unsteady and unclear; it arises when the mind has reached a weak degree of concentration.

3. Patibhaga-nimitta = counter image

As the meditation proceeds on, at the point when the concentation reaches upacāra-samādhi, the acquired image suddenly changes into a bright, clear and steady image. It is similar to the original object, but it is many times brighter and clearer than the acquired image. It is entirely free from faults such as unevenness, graininess, etc., that may be present in the original object. It is immovable as if it remains fixed in the eye.

As soon as this image arises, the stage of upacārabhāvanā and neighbourhood concentration is reached.

Nimitta and Kammatthana

Table 9.2 Differentiation of Kammatthanas by Nimittas

No.	Kammatthāna	Total	Nimitta attainable

	Catudhātuvavatthāna		not tollica.

Practical Coupling of Bhavana with Nimitta

Parikamma-bhāvanā takes as its object parikamma-nimitta and uggaha-nimitta. Upacāra-bhāvanā and appanā-bhāvanā take paṭibhāga nimitta as their object. This coupling of bhāvanā with nimitta will be illustrated by the meditation on pathavī-kasina.

Pathavi-kasina is prepared by covering a tray or a canvas about one span and four fingers (i.e. about 12 inches) in diameter with dawn-coloured clay. If there be not enough clay of dawn colour, some other clay may be placed underneath. The surface of the clay should be made as smooth as possible. This hypnotic circle is known as kasina-mandala.

Now this earth-circle is placed at a suitable height about two and a half cubits (i.e. about 45 inches) away from the place where one is going to sit. One should sit comfortably keeping the upper part of the body erect.

1. Parikamma-nimitta and Parikammabhāvanā

The meditator looks at the earth-circle attentively, saying mentally or inaudibly: "Pathavi, pathavi" or "earth, earth". Now, from this time onwards, the earth-circle that he is looking at is called 'parikamma-nimitta' and the meditation he is doing is called "parikamma-bhāvanā".

2. Uggaha-nimitta and Parikamma-bhavana

After meditating for some time, perhaps weeks or months, he would be able to close his eyes and

visualise the object. This means that he could see the earth-circle vividly in his mind as he has seen it with open eyes even though his eyes are closed. This visualised object or acquired image is called 'uggahanimitta'.

Although the image has changed, his bhāvanā does not change yet. At this stage he is meditating on uggaha-nimitta with parikamma-bhāvanā.

3. Patibhaga-nimitta and Upacara-bhavana

From the time the acquired image appears, it is no longer necessary to look at the original earth-circle, unless his concentration disperses. By concentrating on the acquired image, he keeps on meditating: "Pathavi, pathavi" or "earth, earth".

When his concentration reaches the level of upacāra-samādhi, the uggaha-nimitta changes into patibhāga-nimitta (counter-immage). This change is very distinct and is easily noticed as the patibhāga-nimitta is very different from uggaha-nimitta. The change is as distinct as taking out a mirror from its leather-case, or as a flock of herons flying out of dark clouds.

The parikamma-bhāvanā is now raised to the level of upacāra-bhāvanā, The meditation is now at the stage of patibhāga-nimita and upacāra-bhāvanā.

At this stage all the hindrances (nivaranas) are suppressed, and the five jhāna-factors become strong and function their duties efficiently. Therefore the mind is well fixed on the counter-immage. For this reason, upacāra-bhāvanā is also called "upacāra-jhāna".

4. Patibhaga-nimitta and Appana-bhavana

Concentrating on the patibhāga-nimitta, the meditator carries on his meditation, noting: "Pathavi, pathavi" as before. When the counter-image is firm and immovable, it is made to expand by will-power inch by inch until it fills every space in all directions. Concentrating on this new abstract image, he keeps on meditating: "Pathavi, pathavi". If he is an intelligent, quick-witted person, he soon reaches appanā-bhāvanā when the first jhāna arises. If he is a slow-witted person, he must try hard to maintain the patibhāga-nimitta with special care, and if he keeps on meditating, he too attains the first jhāna sooner or later.

He is now at the stage of patibhāga-nimitta and appanā-bhāvanā. This means that the object of appanā-bhāvanā is the counter-image of the earth-circle.

Towards the Second and Higher Jhanas

The yogi (meditator), who has attained the first jhāna, should develop five kinds of abilities with respect to that jhāna. These abilities are called 'vasitās', meaning literally 'habits'.

- 1. **Āvajjana-vasitā** = the ability to reflect on the *jhāna* factors quickly;
- Samāpajjana-vasitā = the ability to attain the jhāna quickly;
- 3. Adhitthāna-vasitā = the ability to remain in the jhāna as long as one wishes;
- 4. Vutthāna-vasitā = the ability to come out from the jhāna (ecstatic absorption) at the moment one has predetermined,

e.g. one hour after getting into jhāna;

5. Paccavekkhana-vasitä = the ability to review the jhäna factors quickly by reducing the number of bhavanga-cittas between vithis.

Now in order to eliminate vitakka to go up to the second jhāna, the yogi contemplates on the coarse nature of vitakka how it can divert the mind towards a sensuous object and thus destroy the jhāna. He also contemplates on the subtle nature of the second jhāna which is free from vitakka.

Then concentrating on the patibhāga-nimitta of pathavi-kasina, he tries to develop the three stages of bhāvanā in the normal order of parikamma, upacāra and appanā, without letting vitakka associate with the citta. This series of bhāvanā without a desire for vitakka is known as 'vitakka-virāga-bhāvanā'. The culmination of this bhāvanā is the attainment of the second jhāna.

The second *jhāna* contains only four *jhāna*-factors – viz., vicāra, piti, sukha, ekaggatā, which are subtler than those present in the first jhāna.

The yogi then tries to develop the five abilities called 'vasita' (habit) with respect to the second-jhana. He then eliminates vicāra in a similar way to attain the third jhāna. The fourth and the fifth jhānas are attained by eliminating piti and sukha respectively in a similar manner.

Towards Arūpa-Jhānas

Rūpāvacara fifth jhāna is used as the base for going up to arūpāvacara jhānas. First the five abilities called 'vasitā' with respect to the fifth jhāna must be developed. Then the yogi contemplates on the faults of corporeality (rūpa) to suppress his attachment to corporeality. He may reason like this:

"This body is subject to hot and cold, hunger and thirst, and to all kinds of diseases. Because of it, one quarrels with others. To clothe it, to feed it, and to house it, one has to go through many miseries."

The yogi should also contemplate how subtle and calm the arūpāvacara jhāna is to strengthen his desire to attain it.

Then he develops the five rūpāvaçara jhānas one after one on any of the nine kasinas, excluding ākāsa-kasina. Ha comes out from the fifth jhāna and, without paying attention to the paṭibhāga-nimitta, he concentrates on the space behind it and meditates repeatedly: "Space is infinite! space is infinite!" This is parikamma-bhāvanā— the pre-requisite for the arising of higher bhāvanās.

The patibhāga-nimitta will be in front of him so long as he still has a subtle desire (nikanti) for it. When that desire is gone, the patibhāga-nimitta is also gone unfolding infinite space. Concentrating on this space, he meditates on: "Space is infinite! Space is infinite!"

When his desire (nikanti) for the rupāvacara fifth jhāna disappears, he is said to reach upacārabhāvanā. If he goes on meditating earnestly and strenuously, he may soon reach the appanā-bhāvanaā

and attain the first artīpāvacara jhāna called 'ākāsānancāyatana kusala citta'.

He then develops the five abilities (vasitā) with respect to the first arāpa jhāna. Then to develop the second arāpa jhāna, he contemplates on the unsatisfactoriness of the first arāpa jhāna for being close to rāpāvacara-jhānas and being coarse compared to the second arupāvacara jhāna. Then concentrating on ākāsānaācāyatana kusala citta which focuses on infinite space, he meditates: "Consciousness is infinite; consciousness is infinite". This is the new parikamma-bhāvanā. When his subtle clinging (nikantī) to the first arupāvacara jhana disappears, he comes to upacāra-bhāvanā. When he attains the second arūpāvacara jhāna called 'viñāānaācāyatana-kusala citta', he reaches appanā-bhāvanā.

Similarly by practising the parikamma-bhāvanā on the non-existence of ākāsānancāyatana kusala citta, mentally repeating: "There is nothing whatsoever!", the third arūpāvacara jhāna, called "ākincannāyatana kusala citta", is attained.

Furthermore by practising the parikammabhāvanā on ākiñcaññāyatana kusala citta, mentally repeating: "This citta is calm! It's excellent!", the fourth arūpāvacara jhāna called "neva-saññā-nāsaññāyatana kusala citta" is finally attained.

Going higher to Abhiññã

'Abhiññā' is 'higher power' or 'supernormal knowledge'. Those who have attained five rūpāvacara jhānas and four arūpāvacara jhānas may further develop five mundane (lokiya) supernormal knowledges

by practising these *jhānas* in various ways based on ten *kasiņas*.

- 1. Iddhividha Abhiññā = Powers of creating forms, flying through the air, walking on water, diving into the earth, etc.
- 2. Dibba-sota Abhiñña = Divine ear or clairaudience, which enables one to hear subtle or coarse sounds far or near.
- 3. Paracitta-vijānana = Power of penetrating the (ceto-pariya nāṇa) mind of others to discern their thoughts.
- 4. Pubbenivāsānussati = Power to remember the former existences of oneself and the former worlds.
- 5. Dibba-cakkhu = Divine eye or clairvoyance, which enables one to see subtle or coarse things far or near and also the celestial worlds and the Apāya abodes.

The last one, i.e. dibba-cakkhu, may be extended to two more Supernormal Powers:-

- 6. Yathākammupaganāna = Power of seeing beings in the 31 planes of existence and knowing their respective kammas which have given rise to their rebirths.
- 7. Anágatamsanána = Power of knowing future existences and future worlds.

So we may say there are seven lokiya-abhiññās. But when we count five mundane supernormal knowledges (five lokiya abhiññās), (6) and (7) are included in dibba-cakkhu. Also cutūpāpatañāna, which

is the knowledge with regard to the dying and reappearing of beings, is included in dibba-cakkhu.

In counting six abhiññās, a supermundane power (lokuttara abhiññā) is added to the five lokiya abhiññās. This lokuttara abhiññā is called Āsavakkhayañāna.

8. Āsavakkhaya-ñāna = Arahatta-magga-ñāṇa, i.e.,
the knowledge associated with
Arahatta-magga that can extinct
all cankers (āsava).

Chalābhināa is an Arahat who possess the six super-knowledges mentioned above. It should be noted that the fine mundane supernormal knowledges are attainable through the utmost perfection of mental concentration (samādhi) and they are the culmination of samatha-bhāvanā (tranquility-meditation). The supermundane power, i.e. Āsavakkhaya-ñāna, is attainable through penetrating insight (vipassanā) and it is the culmination of vipassanā-bhāvanā (insight meditation).

Vipassanā Kammatthāna

In the exercises on *vipassanā-bhāvanā* (insight-meditation) one should have the knowledge of the following:-

- 1. Sevenfold Visuddhi = seven stages of purity,
- 2. Ti-lakkhana = three characteristic marks,
- 3. Threefold Anupassana = 3 methods of contemplation,
- 4. Ten Vipassanā-ñāņas = 10 insight-knowledges,
- 5. Threefold Vimokkha = 3 ways of emancipation,
- 6. Threefold Vimokkha-mukha = 3 doors of emancipation.

Sevenfold Visuddhi

(Seven Stages of Purity)

'Visuddhi' means 'purification' or 'purity'. There are seven stages in purifying the mind by insight-meditation.

- 1. Sila-visuddhi = purity of morality,
- 2. Citta-visuddhi = purity of mind,
- 3. Ditthi-visuddhi = purity of view,
- 4. Kankhā-vitarana-visuddhi = purity by transcending doubt,
- 5: Maggāmagga-ñāṇadassana-visuddhi = purity of vision in discerning the Path and not-Path,
- 6. Patipadā-nānadassana-visuddhi = purity of vision of the Path-progress,
- 7. Nānadassana-visuddhi = purity of vision of the knowledge of the four Paths.

In Majjhima Nikāya (Sutta 24) the simile of the stage-coach is mentioned comparing the sevenfold Visuddhi with seven stage-coaches. One mounts the first coach and travels to the second coach. Then one mounts the second coach and travels to the third coach, and so on.

In exactly the same way one purifies one's morality to get to the starting point of the purification of the mind. Then one purifies the mind in order to get to the starting point of the purification of view. Then one purifies one's view to arrive at the starting point of the purification by transcending doubt. One proceeds in this way until the four Paths and their Fruits are attained.

There in Majjhima Nikāya it is said that the real and ultimate goal does not consist in the purity of morality, or of mind, or of view, etc., but in total deliverence from and extinction of defilements.

Ti-lakkhana

(Three Characteristic Marks)

There are three characteristic marks of mental and corporeal phenomena, i.e. of the five aggregates of existence. They form the objects of insight-meditation.

- 1. Anicca-lakkhana = the characteristic mark of impermanence,
- 2. Dukkha-lakkhana = the characteristic mark of suffering,
- 3. Anatta-lakkhana = the characteristic mark of notself.

"Whether Perfect Ones (Buddhas) appear in the world or whether Perfect Ones do not appear in the world, it still remains a firm condition, an immutable fact and fixed law, that all formations are impermanent, that all formations are subject to suffering, that everything is without a self."

(Anguttara Nikaya, Book IV, Sutta 134)

Threefold Anupassana

(Three Methods of Contemplation)

This topic describes three methods for conducting insight-meditation on mental and corporeal formations, i.e. on the five aggregates of existence.

1. Aniccanupassana = repeated contemplation on the impermanent nature of mind

and matter in the five aggregates of existence.

- 2. Dukkhānupassanā = repeated contemplation on the unsatisfactory nature of mind and matter in the five aggregates of existence.
- 3. Annattanupassana = repeated contemplation on the selfless or no-soul nature of mind and matter in the five aggregates of existence.

Note: The meanings of the threefold anupassanā are described here as they are mentioned in most popular books. Actually these meanings can be misleading. The word contemplation itself is misleading.

'Contemplation' implies 'deep thought' or 'to be in a thoughtful state'. In vipassanā-meditation there is no place for thinking or for being thoughtful. With the help of concentration (samādhi), one penetrates into the ultimate realities and sees with one's own mind-eye the real nature of these realities — that is the three characteristic marks of nāma and rūpa.

By observing the incessant arising and dissolving of the ultimate nāma and rūpa, one understands the impermanent nature as well as the unsatisfactory nature of mental and corporeal formations. To be subject to incessant dissolving itself means suffering. Since the body and mind are made up of five aggregates and all these aggregates are incessantly forming and dissolving, leaving no single entity as permanent, one realizes that here is no self nor soul.

Thus in *vipaṣṣanā-bhāvanā*, one actually sees the ultimate things and knows their nature. This ultimate nature cannot be known by mere contemplation.

In aniccānupassana, one concentrates on the impermanent nature of the ultimate nama and rūpa, and note repeatedly "anicca, anicca, anicca, anicca," for ten to thirty minutes at a stretch.

Then one takes up dukkhānupassanā.

In dukkhānupassanā, one concentrates on the unsatisfactory nature of the ultimate nāma and rūpa and notes repeatedly "dukkha, dukkha, dukkha," for ten to thirty minutes at a stretch. Then one proceeds with anattānupassanā.

In anattānupassanā, one concentrates on the selfless or no-soul nature of the ultimate nāma and rūpa, and notes repeatedly "anatta, anatta, anatta, anatta," for ten to othirty minutes at a stretch. Then one takes up aniccānupassanā again.

As one carries on the *vipassanā* meditation in this manner, the ten insight-knowledges (*vipassanā-nāṇa*) will arise in due course. Soon after the last insight-knowledge arises, *magga-ṇāṇa* and *phala-ṇāṇa* (the Path and its Fruition) also arise.

Ten Vipassanā-nānas (Ten Insight-Knowledges)

1. Sammasana-ñána = The knowledge that can investigate the three characteristic marks of nāma and rāpa in the five aggregates of existence;

392 THE ESSENCE OF BUDDHA ABHIDHAMMA

- 2. Udayabbaya-ñāṇa = The knowledge that can investigate the arising and passing away of the ultimate nāma and rūpa in the five aggregates of existence;
- 3. Bhanga-ñana = the knowledge of the incessant dissolution of the ultimate nama and rūpa;
- 4. Bhaya-ñāṇa = The knowledge of realizing nāma-rūpa and the five aggregates of existence as fearful as they are dissolving incessantly;
- 5. Adinava-nana = The knowledge that realizes the fault and unsati ctoriness in nama-rupa as they have been known to be fearful;
- 6. Nibbidā-ñāṇa = The knowledge of disgust in nāma-rūpa as they have been known to be unsatisfactory;
- 7. Muncitukamyatā-ñāṇa = The knowledge of the desire to escape from the entanglement of nāma-rūpa;
- 8. Patisankhā-nāṇa = The knowledge to reinvestigate nāma-rūpa and the five aggregates of existence in order to escape therefrom;
- 9. Sankhārupakkhā-nāṇa = The knowledge of equanimity towards nāma-rūpa and conditioned things;
- 10. Anuloma-ñana = The knowledge of adaptation to the Path.

Threefold Vimokkha

(Three Ways of Emancipation)

'Vimokkha' means 'emancipation, liberation or deliverence'. It refers to the emancipation from the entanglement of nāma-rūpa, i.e. from the round of rebirth or the samsāra of misery.

Here 'vimokkha' stands for magga-phala (the Path and its Fruition) which has emancipated from defilements (kilesas).

1. Suññata-vimokkha = emancipation through the concept of void by anattānupassanā.

'Suññata = void or emptiness' here means the absence of 'atta' or 'self' or any permanent entity in nāma-rūpa and the five aggregates of existence. The yogi who practises anattānupassanā realizes this concept of void, and if he attains emancipation while practising anattānupassanā. his magga-phala or emancipation is known as 'Suññata-vimokkha'.

2. Animitta-vimokkha = emancipation through the concept of signlessness by aniccā-nupassanā.

'Nimitta' means mark, sign, image, object, etc. So 'animitta' means no mark, no sign, no image, no object, etc. While practising aniccānupassanā, the yogi is observing the incessant dissolution of nāma-rūpa in the five aggregates all the time. In the ultimate state the five aggregates, which are nothing but mental and corporeal groups, have no form and shape nor any sign or image. So while the yogi is observing the incessant dissolution of nāma and rūpa, he observes no form and sign at all; he is having the concept of signlessness. If he emancipates from defilements through

394 THE ESSENCE OF BUDDHA ABHIDHAMMA aniccānupassanā, his magga-phala or emancipation is known as 'Animitta-vimokkha'.

3. Appanihita-vimokkha = emancipation through the concept of desirelessness by dukkhānupassanā.

The yogi, while practising dukkhānupassanā, is observing the unsatisfactory or suffering nature of nāma-rūpa in the five aggregates all the time. So he has no desire for nor attachment to the nāma-rūpa. In other words he is having the concept of desirelessness (appanihita). And if he emancipates from defilements through dukkhānupassanā, his magga-phala or emancipation is called 'Appanihita-vimokkha'.

Threefold Vimokkha-mukha (Triple Gate-way to Liberation)

'Mukha' means 'door or gateway'. The three doors to emancipation or liberation from the entanglement of defilements refer back to the three anupassanās.

 Anattánupassaná is Suñňata-vimokkhamukha.

It realizes that the nāma-rūpa formations are void of 'atta' or 'self' or 'ego'. Suññata refers to 'void of atta'.

 Aniccanupassana is Animitta-vimokkhamukha.

It understands that the *nāma-rūpa* formations are formless, signless or imageless. *Animitta* refers to the signless state of *nāma-rūpa*.

 Dukkhä-nupassanä is Appanihitavimokkha-mukha.

It understands that the *nāma-rūpa* formations are just suffering or misery. So it develops

no desire (tanhā) for nāma-rūpa formation. Appanihita refers to the state of desire lessness.

In Visuddhi Magga (Chapter XXI, paragraph 70), the following message is given:-

- (1) "Whosoever being filled with determination (adhimokkha), considers all formations as impermanent (anicca), such a one attains the conditionless liberation.
- (2) "Whosoever being filled with tranquility, considers all formations as painful (dukkha), such a one attains the desireless liberation.
- (3) "Whosoever being filled with wisdom, considers all formations as not-self (anatta), such a one attaines the emptiness liberation.

The Seven Stages of the Path of Purification

It is clearly stated in Mahā-satipaṭṭhāna Sutta that the only way towards absolute purity and extinction of all sufferings is the Noble Eightfold Path (aṭṭhangika-magga).

The eight constituents of the Path can be divided into three groups called sikkhā. (learning or training):-

- 1. Síla-sikkhá = training in morality

 It comprises three maggangas (constituents of the Path):-
 - (1) Sammā-vācā = right speech
 - (2) Sammā-kammanıa = right action
 - (3) Samma-ājīva = right livelihood

396 THE ESSENCE OF BUDDHA ABHIDHAMMA

- 2. Samādhi-sikkhā = training in concentration.
 This also comprises three maggangas:-
- (1) Sammā-vāyāma = right effort
- (2) Sammā-sati = right mindfulness
- (3) Sammā-samādhi = right concentration
- 3: Paññā-sikkhā = training in wisdom
 This training consists of two maggangas:-
- (1) Sammā-diṭthi = right view
- (2) Sammā-sankappa = right thought

Though the right view (wisdom) should guide the way throughout the course of purification, one should begin with sīla-sikkhā for the purpose of laying down the foundation of the Path. Based on sīla-foundation, one shall develope concentration (samādhi-sikkhā), and based on concentration, one shall practise vipassanā to develop wisdom (pañāā).

So in the Path of Purification (Visuddhi Magga), sila-visuddhi (purity of morality) comes first, and citta-visuddhi (purity of the mind which refers to samādhi-sikkhā) comes next. The remaining five visuddhis correspond to pañāa-sikkhā (training in wisdom).

The progress along the Path will be marked by the seven visuddhis, the last visuddhi being the end of the Path. Each visuddhi is characterised by certain vipassanā-nāṇas (insight-knowledges). These phenomena together with the practical aspects of samatha-vipassanā meditation will now be described.

1. Sila-Visuddhi (Purity of Morality)

A lay-person can attain the purity of morality by fulfilling the three sila-maggangas:-

- (1) Right speech = abstaining from lying, slandering, harsh speech and vain talk;
- (2) Right action = abstaining from killing, stealing and sexual mis-conduct;
- (3) Right livelihood = abstaining from a livelihood connected with immoral speech or immoral action.

A person can fulfil the above moral requirements by observing the five precepts. It is better if he can observe eight, nine or ten precepts. Most meditation centres in Myanmar ask their yogis to observe eight or nine precepts. One main reason is to save all the troubles and the money for preparing and serving food in the afternoon. Another reason is that yogis will have more time to meditate and will meditate better without consuming food in the afternoon and in the evening. Fresh fruit-juices and certain light drinks without milk, barley or any cooked vegetables are, however, allowed.

For monks the purity of morals consists of four kinds of sila or discipline:-

(1) Pátimokkha-samvara-síla = moral discipline as prescribed by the Pátimokkha,

(2) Indriya-samvara-sīla = mindfulness to prevent the arising of defilements (kilesās) at the five doors (eye, ear, nose, tongue and body),

(3) Ajivapārisuddhi-sila = discipline as regards purity of livelihood,

(4) Paccayasannissita-sila = contemplation of the purpose of using the necessaries of life in order to prevent the arising of defilements in using them.

Lay-persons should also observe the above sīlas for these sīlas develop not only moral culture but also mental culture— both of which pave the way to the arising of concentration. Of course eight or nine precepts serve as Pātimokkha-samvara-sīla for lay-people.

2. Citta-Visuddhi (Purity of Mind)

For purity of mind, the yogis must develop the three samādhi-maggangas:-

(1) Right effort = undertaking tranquility meditation,

(2) Right mindfulness = being mindful on the object of meditation,

(3) Right concentration = concentrating one's mind on the object of meditation.

When the meditation progresses to the stage of upacāra-bhāvanā, neighbourhood or access-concentration is attained. At this stage, all the hindrances (nivaranas) are temporarily driven away from the mind. So the mind is free from defilements (kilesās) and it is pure. The yogi is said to attain citta-visuddhi at this stage.

If, however, the yogi can raise his concentration to jhāna-samādhi (ecstatic absorption) by continuing his meditation till appanā-bhāvanā is attained, then his mind will be free from defilements for longer periods of time. The jhāna-concentration is much more stable than access-concentration.

It is definitely stated in Abhidhamma that in order to attain purity of mind, one must attain either upacāra-samādhi (access-concentration) or appanā-samādhi (jhāna-concentration). Appanā-samādhi means the concentrations associated with the five rūpāvacara jhānas or the four arūpāvacara jhānas.

So to attain Purity of Mind, one must at least develop access-concentration. Without this concentration one cannot penetrate into the ultimate realities in insight-meditation, and so one cannot gain insight-knowledge.

A thorough investigation has been carried out in Pa-auk Tawya Meditation Centre that yogis cannot even penetrate through the body to see the internal organs, let alone to see the ultimate rūpa, the cittas in the cognitive series and the cetasikas associated therewith, if one is not equipped with the samādhi-eye—i.e. the mind-eye accompanied by access-concentration or jhāna-concentration. The investigation results show that the higher the concentration, the more powerfully can one penetrate into the ultimate realities, and so the better.

The reader should not forget the simile of the stage-coach. If one misses one coach, one cannot catch the remaining coaches.

If one cannot develop Moral Purity, one shall miss the Purity of Mind. If one cannot develop Purity of Mind, one shall miss the next coach, i.e. Purity of View, and so on.

3. Ditthi-Visuddhi (Purity of View)

Equipped with samādhi-eye, the yogi first looks into his body to see thousands and thousands of rupa-

kalāpas (corporeal groups) arising and dissolving incessantly. He analyses the kalāpas to know the ultimate rūpas — viz., pathavī, āpo, tejo, vāyo, vanna, gandha, rasa. ojā, jīvita-rūpa (physical vitality), cakkhu-pasāda, etc. Then he characterises each rūpa by means of its salient characteristic (lakkhana), its function or essential properties (rasa), the result of its function or the way it appears to the yogi's mind (paccupathāna), and the immediate causes which condition its arising (padatthāna).

Then he investigates his mind by observing the vitthi cittas as they occur in succession in cognitive series. He investigates thoroughly all the cittas arising in all six types of vithis (cognitive series). After differentiating each citta, he investigates the cetasikas which associate with each citta.

He then characterises each citta and each cetasika by means of lakkhana, rasa, paccupatthāna and padatthāna as he has done with each rūpa.

By characterising each type of citta, each type of cetasika, and each type of rūpa in his mind and body, he comes to know that only the feeling group (vedanā), the perception group (sanāa), the group of mental formations (sankhāra), the consciousness group (vināāna) and the corporeality group (rūpa) exist, and that nothing else, such as 'atta', 'self' or 'ego', ever exists.

He also understands that just as the combination of wheels, axie, vehicle-body, horse, etc., is called a carraige, so also the combination of the five groups (khandhas) is called 'I, you, he, she or person!

His view is now free from the wrong notion that 'I, you, he, she, atta, self or person exists'. He is said to attain the Purity of View (Ditthi Visuddhi).

The ability to characterise each type of citta, each type of cetasika and each type of rūpa by means of lakkhaṇa, rasa, paccupaṭṭhāna and padaṭṭhāna is called "nāma-rūpa-pariccheda-ñāṇa" (the knowledge of characterization of mental groups and corporeal group). This knowledge is the landmark of Purity of View.

Note: The characterization of cittas, cetasikas and rūpas by means of lakkhaṇa, rasa, paccupaṭṭhāna and padatthāna is systematically carried out in Pa-auk Tawya Meditation Centre.

4. Kankhā-vitarana-visuddhi (Purity by Transcending Doubt)

'Kankhā' means 'doubt'; it may be either intellectual or ethical doubt, i.e. methodical doubt or sceptical doubt. Only the sceptical doubt, which is identical with vicikicchā, is rejectable and kammically unwholesome, as it hinders the inner development of man.

The 16 doubts enumerated in the Suttas, such as the second Sutta in Majjhima Nikāya, are as follows.

- (a) Five doubts concerning the past:-
 - (i) Have I been in the past?
 - (ii) Or, have I not been in the past?
 - (iii) What have I been in the past?
 - (iv) How have I been in the past?
 - (v) From what state into what state did I change in the past?

THE ESSENCE OF BUDDHA ABHIDHAMMA

- (b) Five doubts concerning the future:-
 - (i). Shall I be in the future?
 - (ii) Or, shall I not be in the future?
 - (iii) What shall I be in the future?
 - (iv) How shall I be in the future?
 - (v) Form what state into what state shall I change in the future?
- (c) Six doubts concerning the present: (i) Am I ?
- (ii) Or, am I not?
 - (iii) What am I?
 - (iv) How am, I.?
 - (v) Whence has this being come?
 - (vi) Whether will it go?

'Kankhā-vitaraņa-visuddhi' means 'purity by transcending doubt or 'purification by overcoming doubt'. Thus in order to reach this stage of purity, one need to transcend or overcome the 16 doubts mentioned above as well as the 8 types of vicikicchā described in Abhidhamma (See chapter II, pp. 83-84).

So one need to know one's past lives as well as one's future lives and how the past, the present and the future are inter-related by the Law of Dependent Origination.

It is stated clearly in Visuddhi Magga (II, 221 Myanmar) and Abhidhamma-atthakathā Myanmar) that there is no one, even in dream, who got enlightened without seeing the causal relations of Dependent Origination with his own wisdom-eye.

In order to correlate the past mental and corporeal phenomena with those of the present, one must know the mental and corporeal groups of the past lives as well as those of the present life. Again to correlate the present with the future, one should also know the mental and corporeal groups of the future lives.

How can one know the past mental and corporeal phenomena which have already dissolved and the future phenomena which do not come into existence yet?

Well, the ability of the samādhi-mind is marvellous. We have learnt about pubbenivāsānussati-abhinā which can remember thousands of one's past lives and Anāgatamsanāna which can know one's future existences.

In the case of insight-meditation (vipassanā) we need not go to the Abhiññā-stage and we have no Abhiññā— the power of which we could make use of. But, if we have the necessary samādhi and the knowledge to characterize the mental and corporeal phenomena (nāma-rūpa) both internally (in one's self) and externally (in the others), then we can trace the current or stream of arising and dissolving nāma-rūpa backwards to the past lives. The method is described in Samyutta Nikāya (II, 71 Myanmar), in Khajjaniya Sutta, and it is being practised satisfactorily in Pa-auk Tawya Meditation Centre.

The future mental and corporeal groups may also be observed in a similar way by examining the probable results of the five causes of the present life. In Pa-auk Tawya Meditation centre, the yogi performs

404 THE ESSENCE OF BUDDHA ABHIDHAMMA

some meritorious deed at the shrine by offering candles and flowers. He makes the usual prayers and makes a wish as to the kind of person he wants to be in the next future life as the result of that good deed. He characterises the mental and corporeal phenomena which arise during this performance.

He then goes to the common meditation hall and meditates together with the other yogis. He develops concentration, recalls the previous performance of the meritorious deed and again analyses the mental and corporeal phenomena arising at that time. If he observes the same results as he has noted before, he is assured that he can characterise external nāma-rūpa phenomena.

Now based on the present five causes — viz., avijjā, tanhā, upādāna, sankhāra and kamma-bhava —, he tries to visualise the future life which will be formed as a result. He may see the same life as he has wished for at the shrine, or it may be a different one, which is more often the case. Whatever the new life may be, the yogi again analyses the nāma-rapa phenomena of the new person and correlates the five future effects—viz., viñāāna, nāma-rāpa, salāyatana, phassa and vedanā (see chapter VIII, page 313) with the five present causes. If he can actually observe the five future effects being formed as the results of the five present causes, then he is assured convincingly that the present and the future correlation of the Law of Dependent Origination holds.

The causal relations as described by the Law of Dependent Origination and the 24 conditions of Patthāna are the major causal relations which govern the arising and dissolving of mental and corporeal

phenomena occurring in ourselves as well as in others. There are certain immediate causes which the *yogi* has to investigate.

For example, four causes must be present for the arising of cakkhu-dvāra vithi (the eye-door cognitive series). These causes are the eye-door, the visible object, light and manasikāra (attention). Similar four causes are respectively required for the arising of the other doorcognitive series.

Again in each cognitive series (vīthi), vasala cittas (moral kamma-formations) arise as javanas if there is 'yoniso manasikāra' (wise reflection), and akusala cittas (immoral kamma-formations) arise as javanas if there is 'ayoniso manasikāra' (unwise reflection). Depending on these kamma-formations again, rebirth consciousness as well as other resultant consciousnesses arise in the next life.

The corporeal groups are produced by four causes — viz., kamma, citta, utu (tejo) and āhāra (ojā). These causes together with their resultants should be seen vividly by the samādhi-eye.

When the immediate causes as well as the major causes for the arising of mental and corporeal groups have been thoroughly investigated, the yogi knows definitely that the five groups of existence that constitute each living being are being produced by the respective appropriate causes. So he is able to eliminate the 'View of Uncausedness' (Ahetuka-ditthi) which believes in the arising of living beings without any cause, and also the 'View of the Wrong Cause' of existence (Visama-hetuka-ditthi) which believes in the creation of living beings by a Creator.

Furthermore, since the yogi has observed the continuous chain of cause and effect relations occurring in accordance with the Law of Dependent Origination, he can discard the 'View of the Inefficacy of Action' (Akiriya-ditthi), the 'View of Nihilism' (Natthika-ditthi), the 'View of Eternity of the Soul or Ego' (Sassata-ditthi) and the 'View of Annihilation of the Soul or Ego' (Uccheda-ditthi).

Numerous speculative opinions and theories, which at all times have influenced and still are influencing mankind, and which are not in accord with the causal relations, can all be eliminated.

Now the mind of the yogi is free from all false views. Thus the stage of the 'Purity of View' (Ditthi Visuddhi) is further reinforced. Besides since the yogi has now overcome all the 16 doubts (kahk...) mentioned above as well as the sceptical doubt (vicikicchā) with respect to the causal relations, he is said to overcome or transcend all doubts. So he has also attained the 'Purity by Transcending Doubt' (kahkhā-vitarana Visuddhi).

The landmark of this stage of purity is Yathā-bhūta-nāṇa (the knowledge which can discern the reality correctly) or Paccaya-pariggaha-nāṇa (the knowledge which embraces all the causes of mental and corporeal phenomena).

Cùla-Sotapanna (Junior Stream-Winner)

'Sontāpanna or Sotāpan' is a noble person (Ariyā) who has eliminated ditthi and vicikicchā completely. He will never be reborn in the apāya abodes

and he is destined to enter Nibbana in no more than seven rebirths in the kama-planes.

Now the yogi, who has attained Nāma-rūpa-pariccheda-nāṇa and Paccaya-pariggaha-nāṇa, has temporarily eliminated ditthi and vicikicchā as described above. So he resembles a sotāpanna but he is not a sotāpanna yet. He is called a cūla-sotāpanna meaning a junior-sotāpanna. He will not be reborn in the apāya abodes in his subsequent life.

The two knowledges, i.e. Nāma-rūpa-paricchedanāna and Paccaya-pariggaha-nāna, are very important.
They are the basic knowledges in insight-meditations and they constitute the foundations for the arising of ten vipassanā-nānas in later stages. They are not included in vipassanā-nānas because they do not concentrate on the three characteristic marks (Tilakkhana) of existence. Nevertheless they reveal the insight nature of the ultimate realities concerning nāma and rūpa.

They are important because they eliminate the wrong or evil views (micchā-ditthi) and strengthens the right view (sammā-ditthi). The wrong views are rejected for being a source of evil aspirations and conduct. It is stated in Anguttara Nikāya (Book II, Sutta 22) that:

"No other thing than evil views do I know, O monks, whereby to such an extent the unwholesome things not yet arisen arise, and the unwholesome things already arisen are brought to growth and fullness. No other things than evil views do I know, whereby to such an extent the wholesome things not yet arisen are hindered in their arising, and the wholesome things already arisen disappear. No other thing than evil views do I know, whereby to such an extent human beings

at the dissolution of the body, at death are passing to a way of suffering, into a world of woe, into hell."

Furthermore, in Anguttara Nikāyā (Book II, Sutta 23) it is stated that:

"Whatever a man filled with evil views performs or undertakes, or whatever he possesses of will, aspiration, longing and tendencies, all these things lead him to an undesirable, unpleasant and disagreeable state, to woe and suffering."

5. Maggamagga-nanadassana Visuddhi (Purity of Vision in discerning the Path and not-Path)

The criteria of this Purity of Vision is Sammasana-ñāṇa and the first part o Udayabbaya-ñāṇa. Samnasana-ñāṇa is the knowledge that can investigate the three characteristic marks of nāma-rūpa in the five aggregates of existence. Udayabbaya-ñāṇa is the knowledge that can investigate the arising and passing away of the ultimate nāma and rūpa.

Strictly speaking vipassanā-bhāvanā, which is the investigation of the three characteristic marks of nāma and rūpa in the thirty-one planes of existence, begins at this stage. There are four methods for investigating the three characteristic marks of existence.

(1) Kalapa-sammasana Method

This is the investigation of all conditioned things (sankhāra or nāma-rūpa) in the thirty-one planes of existence in terms of five groups or aggregates without differentiating them as belonging to the past, present or future.

Considering all the corporeal groups in the 31 planes that have arisen with causes, he meditates: "This material group has the nature to dissolve and pass away, so it is impermanent (anicca). It has the nature of fearfulness because of their incessant dissolution, so it is unsatisfactory or suffering (dukkha). It possesses no substantial entity which does not dissolve, so it is not 'I', not 'person', not 'ego' nor 'atta' (anatta).

Then he considers all the feeling group, the perception group, the group of mental formations and the consciousness group in turn and meditates in the same way as above.

(2) Addhana-sammasana Method

This method investigates the conditioned things in the 31 planes of existence by way of duration. He divides the conditioned things into the past, the present and the future group. He meditates like this:

"The material group in the past life has all dissolved in the past life. It does not proceed or pass on to the present. Because of its nature of dissolving and passing away, it is anicca. Because of its nature of fearfulness it is dukkha. Because of its nature of not 'ego or atta' it is anatta."

Then considering the fact that all the material group in the present life will dissolve in this life and will not pass on to the future life, he again meditates on the present material group as anicca, dukkha and anatta.

He meditates in the same way on the four mental groups, considering one group at a time.

(3) Santati-sammasana Method

This method investigates the conditioned things in the 31 planes of existence in terms of continuous series.

To practise this method the yogi divides the corporeal groups in one life as a series of hot rūpa, a series of cold rūpa, etc. He then meditates thus:-

"The hot series of rūpa has all dissolved. It does not pass on to the cold series of rūpa. Because of its nature of dissolution, it is anicca. Because of its nature of fearfulness, it is dukkha. Because of its nature of not 'ego or atta', it is anatta".

Similarly considering the various cognitive series of consciousness, he meditates that cakkhu-dvāra vithi-cittas dissolve soon after they are formed and they do not pass on to sota-dvāra vithi-cittas, that sota-dvāra vithi-cittas also dissolve soon after they are formed and they do not pass on to ghāna-dvāra vithi-cittas, and so on. So they are anicca, dukkha and anatta on account of their dissolution, fearfulness and not 'ego or atta' natures.

(4) Khana-sammasana Method

This method investigates the conditioned things in the 31 planes of existence by way of momentariness. He meditates like this:-

"The corporeal group which is formed in the past moment has all dissolved in the past. It does not pass on to the present moment. Because of its dissolution nature, it is anicca. Because of its nature of fearfulness, it is dukkha. Because of its nature of not 'ego or atta' it is anatta."

"The mental groups (citta and cetasikas) that have arisen at the moment of atita-bhavanga have all dissolved at that moment. They do not pass on to the moment of bhavanga-calana. Because of their nature of dissolution; they are anicca. Because of their nature of fearfulness, they are dukkha. Because of their nature of not 'ego or atta', they are anatta'.

"The mental groups (citta and cetasikas) that have arisen at the moment of bhavanga-calana have all dissolved at that moment. They do not pass on to the moment of bhavangu-paccheda. Because of their nature of dissolution, they are anicca. Because of their nature of not 'ego or atta', they are anatta"

The yogi can extend this method as far as his knowledge can embrace the natural phenomena of nāma and rūpa.

For those yogis, who have systematically investigated the five groups of existence in the present as well as in the past and the future lives, and have characterized each type of rūpa, citta and cetasiku by means of lakkhana, rasa, paccupatthāna, padatthāna, and have also correlated these ultimate realities according to the Law of Dependent Origination, they can vividly see the long chain of arising and dissolving of nāma-rūpa phenomena extending from the earliest past life they have investigated to the subsequent past lives; to the present life and then to the future lives. Since they can see the arising and the dissolution of individual nāma and rūpa in the chain, they can easily meditate on the three characteristics of existence.

According to the experience of Pa-auk Tawya yogis, the long chain of arising and dissolving of the mental and corporeal phenomena is so distinct that they just watch the arising and the dissolving of the phenomena and meditate on them by way of

aniccānupassanā for 10-15 minutes, then by way of dukkhānupassanā for another 10-15 minutes, and again by way of anattānupassanā for 10-15 minutes.

As they keep on meditating and rotating the anupassanās in turn, their ability to investigate the three characteristic marks of nāma and rūpa become better and better until they are able to see the arising instant, the existing instant and the dissolving instant of each nāma and rūpa. This is the culmination of Sammasana-hāna.

Then the conditioned things are investigated according to the causal relations. Because the cause arises, the effect arises. When the cause dissolves, the effect also dissolves. The causes that condition rūpa to arise are avijjā, tanhā, kamma and āhāra. The causes that condition the cetasikas to arise are avijjā, tanhā, kamma and phassa: The causes that condition the arising of cittas are avijjā, tanhā, kamma and nāmarūpa. These the yogi comes to know well.

By meditating in this way for thousands of times, the yogi's investigating knowledge improves more and more until he is able to see the arising instant and the dissolving instant of nāma-rūpa very clearly. At this stage, the yogi stops considering the cause-effect relations, and concentrates on the arising instant and the dissolving instant of nāma-rūpa. The arising and the dissolving phenomena of mental and corporeal groups become very distinct when the knowledge known as Udayabbaya-ñāṇa which observes these phonomena also arises.

As this knowledge gathers in strength, the ten *Upakkilesas* (impurities or corruptions) normally arise. These *upakkilesas* are very distinct, and so they represent a very good criterion for judging whether one has really attained *Udayabbaya-ñāna*.

Ten Upakkilesas (Ten Impurities of Vipassanā)

- 1. Obhāsa = rays emitting from the body on account of insight,
- 2. Piti = five kinds of rapture (unprecedented joy),
- 3. Passaddhi = both kāya- and citta-passaddhi = tranquility or quietude
- 4. Adhimokkha = the controlling faculty of strong faith,
- 5. Paggaha = intense effort which supports vipassanācitta,
- 6. Sukha = pleasant feeling in the whole body due to wholesome cittaja-rūpa,
- 7. Nana = quick insight wisdom,
- 8. Upatthāna = mindfulness fixed on kammatthāna,
- 9. Upekkhā = tatramajjatupekkhā and avajjanupekkhā,
 (the former represents tatramajjattatā
 cetasika which can observe phenomena
 effortlessly; the latter refers to the cetanā
 associated with avajjana-citta that can
 reflect on phenomena quickly)
- 10. Nikanti = mild attachment to vipassanā-nāņa which is accompanied by pīti, passaddhi, sukha and obhāsa.

Of the ten impurities mentioned above, only nikanti (attachment) belongs to kilesās (defilements). The remaining ones are wholesome qualities. Yet when one is presented with these qualities, especially the body-rays, unprecedented joy, quietude and happiness on account of pleasant feeling, strong religious fervour due to intense faith, the insight wisdom and the ability

to observe the arising and passing away of conditioned things quickly and effortlessly, one may develop grasping ditthi (the wrong view that they occur in me), vicious māna (the pride that I alone possess these marvellous qualities) and grasping tanhā (strong attachment that the qualities are mine). These ditthi, māna and tanhā really defile one's meditation because they are real defilements (kilesās).

Some yogis with poor knowledge of Dhamma even think that they attain Magga and Phala when they have the unusual aura, joy, tranquility and happiness.

All these people who have such a wrong view (ditthi) or a vicious pride (māna) or a grasping attachment (tanhā) are on the wrong Path; their meditation will be at a standstill and may even decline.

Those people, who have sufficient knowledge of Dhamma, know very well that these unusual phenomena of aura, joy, happiness, etc., are just upakkilesas and that they do not represent a Magga or Phala yet. To be on the right Path, one must meditate on the arising and passing away of the conditioned things.

This knowledge which can differentiate between the wrong Path and the right Path is called Maggāmagga-ñānadassana Visuddhi. The yogi who possesses this knowledge is said to attain the Purity of Vision discerning the Path and not-Path.

6. Paţipadă-ñānadassana-visuddhi (Purity of Vision of the Path-progress)

The Purity of Vision of the Path-progress ranges from the later part of *Udayabbaya-ñāna* to the last

vipassanā-nāṇa, covering nine insight knowledges ir all. These knowledges have to be developed one after another by earnestly and strenuously meditating on the three characteristic marks of the conditioned things (sankhāra = nāma-rūpa).

Udayabbaya-ñāṇa — After attaining the Purity of Vision discerning the Path and not-Path, the yog earnestly undertakes the vipassanā-meditation again meditating on the three characteristic marks of existence with particular attention to the arising phenomena and the dissolving phenomena of the conditioned things Gradually the yogi's Udayabbaya-ñāṇa become matured.

Bhanga-ñana — As the insight knowledge ce the yogi is gradually developed, the yogi is able to not the arising and passing away of nāma and rūpa morand more quickly. Since nāma and rūpa are arisin and passing away at a tremendous rate of many billior per second, no yogi would be able to observe all citta and cetasikas as they arise and perish. Even when the can note along fairly quickly, he will not observe the arising phenomena any more; all he observes is only the dissolving phenomena. Whatever he looks at, the observes the dissolution of conditioned things.

The knowledge that observes the incessa dissolution of the ultimate nāma and rūpa is calk Bhanga ñāna. If the yogi can observe the dissolvir instant of the Bhanga ñāna, that investigates the dissolving instant of a conditioned thing, with subsequent Bhanga ñāna, then his Bhanga-ñāna is sa to reach its culmination.

Bhaya-ñana — When the yogi observes the incessant dissolution of the conditioned things continuously, he realizes the fearful nature of nāma - rūpa and the five aggregates of existence. The yogi is said to attain Bhaya - ñāna which is the knowledge that realizes the fearful nature of nāma-rūpa.

Ādinava-ñāṇa - When the yogi possesses the knowledge that realizes the fearful nature of nāma-rūpa, he finds the faulty and unsatisfactory nature of nāma-rūpa. Thus he also attains Ādinava-ñāṇa, which is the knowledge that realizes the fault and unsatisfactoriness in nāma-rūpa.

Nibbidā-ñāṇa — When the yogi finds fault in nāma-rūpa and knows well how unsatisfactory the conditioned things are, he develops disgust in these things. He is no longer happy to possess them. He is said to develop Nibbidā-ñāṇa which is the knowledge of disgust in nāma-rūpa.

Muncitukamyatā-nāṇa — When the yogi has disgust in nāma-rupa, the conditioned things, he wants to escape from the entanglement of nāma-rupa just as the fish in the net of the fisherman and the little frog in the mouth of the snake want to escape. Thus Muncitukamyatānāṇa, i.e, the knowledge of the desire to escape from the entanglement of nāma-rupa, arises in the mind of the yogi.

Patisankhā-ñāna — The yogi, who wants to escape from the net of nāma-rūpa, finds no way out other than to meditate on the three characteristics of existence in the five aggregates both internally and externally.

There is a good example here. A fisherman uses a bell-shaped bamboo-basket with a wide opening at the bottom to catch fish. He lowers the basket into water in a creek until it touches the bottom of the creek, puts his hand in from a narrow mouth at the top of the basket, and stirs the water in the basket with his hand to see. whether the basket has enclosed some fish. If his hand touches a fish, he will catch it. Otherwise he lifts the basket and lowers it again and again into water a few steps away from the previous place.

Now his hand touches something like a fish. He graps it and pulls it out of water. When the upper part of the animal comes over the surface of water he sees three stripes around its neck and he knows it to be a water-cobra. Now the snake has poisonous venom. It can kill him if it has the chance to bite him.

At first he thought that he had caught a big fish and so he was delighted. Every worldling feels delighted in a similar way to possess mind and body because he does not know the fearful nature of nāmarupa yet.

When the fisherman saw the three stripes on the neck of the snake, he knew the snake to be a water-cobra and to be very dangerous. This is analogous to the situation when the yogi saw the three characteristic marks of existence and the fearful nature of the conditioned things (nāma-rūpa). This is the time when the yogi attained Bhaya-ñāna.

When the fisherman saw danger, he found the situation to be unsatisfactory and the snake to be disgusting. In the same way the yogi, who realized the fearful nature of the conditioned things, found them to be unsatisfactory and developed disgust on them. These

correspond to the times when the yogi developed Ādinava-ñāṇa and Nibbidā-ñāṇa, respectively.

Now the fisherman was no longer happy to have the snake in his hand and he developed a strong desire to escape from the snake. This is analogous to the situation when the yogi attained Muncitukamyatanana and wanted to escape from the entanglement of namarūpa.

The fisherman, who wants to escape from the snake, dares not free the snake, because it will bite him if he frees it. So, whether he likes it or not, he grips the snake, pulls it out of the water, raises it over his head, swirls it around three or four times, throws it away as far as he can and hurries to the high ground.

In the same way the yogi, who wants to escape from nāma and rūpa, cannot neglect them and forget them. He must take a firm grip on them by meditating on the three characteristic marks of existence. This corresponds to Pațisankhā-ñāna.

Sankharupekkhä-ñäna — The fisherman, who has thrown away the snake and hurried to the highground, soon feels safe and relaxed. In a similar manner, the yogi, who earnestly meditates on the three characteristics of the conditioned things, soon develops equanimity towards nāma-rūpa. He has neither disgust on nor attachment to nama-rūpa. He can keep a balanced mind even though he is observing the true nature of nama and rupa.

Here again there is a good illustration. A man had a beautiful wife. We might think that he was lucky. But his wife's beauty attracted the attention of other men, some of whom went out of their way to use every means to win her love. If she was not faithful or if her mind was not firm, she might commit adultery.

Now this man's wife was not faithful. She went out with several men. Her husband was very unhappy and he pleaded with her to be faithful to him. She refused to comply. She kept on going out with other men. The man was so upset that he couldn't bear it any more. So he divorced her at court.

After that, even though the man knew that she was going out with several men as usual, he did not feel upset as her conduct was not concerned with him any more.

Similarly the yogi, who has developed Sankhārupekkhā-ñāṇa, can maintain equanimity towards nāma-rūpa and conditioned things even though he is observing the incessant dissolution and the unsatisfactory nature of them.

Anuloma-ñana — The yogi, who can maintain equanimity towards nāma-rūpa and conditioned things, carries on his meditation on the three characteristics of existence by way of the three Anupassanās. However, his mind no longer wants to observe the conditioned things. His mind is looking out for Nibbāna, and so long as it does not find Nibbāna, it keeps on observing the conditioned things. When it finds Nibbāna, however, it departs from the conditioned things and enters the realm of Nibbāna.

Here again we find a beautiful simile. In the old days sailors used to take some crows with them on voyage. After sailing the ship for a certain number of days, they expected to see land. If no sign of land was

in sight, they set a crow free to fly in the direction the ship was sailing. The crow would fly as far as it could, and if it did not spot land, it came back to the ship and rested on the mast.

After sailing on for a couple of days, the sailors again set free another crow. The crow would fly as far as it could and, if it did not see land, it would come back. But if it saw land, it would fly on to the land without returning to the ship. Then the sailors knew that land was near and sailed the ship towards the land.

In the same way the investigating mind would keep coming back to Sankhārupekkhā-ñāṇa so long as it did not see Nibbāna. Once it saw Nibbāna, it did not come back; it proceeded on towards Nibbana through Magga-vithi. The Magga-vithi has been discussed on page 168 in chapter IV. It occurs like this:-

(a) Magga-vithi in manda-paññā (slow-witted) person:

Na-Da-Ma-Pa-U-Nu-Go-Magga-Phala-Phala-Bha--

(b) Magga-vithi in tikkha-paññā (quick-witted) person:

" Na-Da-Ma-U-Nu-Go-Magga--Phala-Phala-Phala" -Bha-In the above vithis the insight knowledge associated with 'Pa-U-Nu' is known as Anuloma-ñana.

Pa = parikamma = preparation for the arising of magga,

(It is absent in tikkha-paññā person.)

U = upacāra = proximity of magga,

Nu = anuloma = adaptation or connection,

Go = gottrabhu = the citta that cuts the putthujjana-lineage to form the ariyalineage.

In the above cognitive series, parikamma, upacāra and anuloma cittas take tilakkhaņa as their object and thus they are included in vipassanā cittas.

Gottrabhu-ñana

and not tilakkhana as its object. So it is not included in vipassanā cittas, The insight knowledge associated with gottrabhu is called Gottrabhu nāṇa.

Magga-ñāna and Phala-ñāna

As gottrabhu points the way towards Nibbāna, Magga-citta and Phala-cittas follow immediately taking Nibbāna as their object. The wisdom (paññā) associated with Magga and Phala are called Magga-ñāna and Phala-ñāna, respectively.

The Magga-ñāṇa, though it arises just once, is very powerful. It simultaneously accomplishes four functions — namely, (1) comprehension of the Truth of suffering, (2) eradication of craving which is the cause of suffering, (3) realization of Nibbāna and (4) full development of the eight constituents of the Path.

"As the traveller by night sees the landscape around him by a flash of lightening and the picture so obtained swims long thereafter before his dizzled eyes, so the individual seeker, by the flashing light of insight, glimpses Nibbāna with such clearness that the after picture never more fades from his mind."

(Dr. Paul Dahlke)

The Path (Magga) is immediately preceded by two or three Phalas, which are the Fruits of the Path. This is the reason why the Dhamma is called 'akālika' (immediately effective).

Paccavekkhana-nana

After the magga-vithi and a few bhavangacittas, five paccavekkhana-vithis normally arise. By these vithis the yogi (1) reflects on the Path, (2) reflects on the Fruit, (3) reflects a the Nibbana he has realized, (4)reflects on the defilements he has annihilated and (5) reflects on the defilements he has yet to annihilate.

The knowledge associated with paccavekkhanajavana cittas is called Paccavekkhana-ñāna.

Sixteen Nanas in Series

Up to now the yogi has attained 16 nanas viz., Nāma-rūpa-pariccheda-ñāṇa, Paccaya-pariggahanāņa, ten vipassanā nāņas (Sammasana-nāņa to Anuloma-ñāṇa), Gottrabhu ñāṇa, Magga-ñāṇa, Phalañāna, and Paccavekkhana-ñāna.

7. Ñãnacassana-visuddhi

(Purity of Vision of the knowledge of the four Paths)

The effort to purify the mind stage by stage begins with sîla-visuddhi. When Anuloma-ñāṇa attained, the first six stages are completed. On attainment of Magga and Phala, the final stage of purification called Nanadassana-visuddhi is reached.

Nānadassana-visuddhi comprises four maggas which comprehend the four Noble Truths directly and purify the mind from all defilements stage by stage as described below.

(1) Sotāpattimagga — It is the first magga attainable by yogis. It may be regarded as the first stage of Sainthood.

Sota = the stream leading to Nibbana; Apatti = entering for the first time, Magga = the noble Eightfold Path.

Sotāpattimagga annihilates two kilesās (defilements) — viz., ditthi and vicikicchā and three Fetters (Samyojana) — namely, sakkāya-ditthi, vicikicchā and sīlabbataparāmāsa.

Sakkāya-dit(hi = personality belief taking the complex combination of psycho-physical aggregates as person or self or I.

Vicikicchā = Sceptical doubt about (1) the Buddha, (2) the Dhamma, (3) the Sangha, (4) the Training, (5) the past lives, (6) the future lives, (7) both the past and the future lives, and (8) the Law of Dependent Origination.

Silabbataparāmāsa = adherence to the false view that one becomes pure and thus be liberated by bovine and canine morality or by rites and ceremonies.

(2) Sakadāgāmi-magga — It is the second magga attainable and may be regarded as the second stage of Sainthood. It does not annihilate any of the remaining kilesās and Fetters; but it reduces the strength of these defilements.

(3) Anāgāmi-magga — It is the third magga attainable and may be regarded as the third stage of Sainthood. It annihilates one more kilesā, i.e., dos (hatred), and two more Fetters—namely, kāmarāga and paṭigha.

Dosa = Patigha = hatred or illwill kāmarāga = attachment to sense-objects.

(4) Arahatta-magga — It is the fourth magga attainable by yogis and it may be regarded as the fourth, d last stage of Sainthood. It annihilates an the remaining kilesās and Fetters.

Ariyãs (Noble Persons)

There are eight types of ariyās - namely, four maggattha-persons and four phalattha-persons. The maggattha-persons, however, exist only for a conscious moment each, i.e., during the magga-citta they are experiencing. After the dissolution of the magga-citta, they become phalattha-persons.

For example, a person is called a sotapattimaggattha person while the sotapatti-magga citta is arising in him. After the dissolution of this citta, sotapatti-phala citta arises in him and he is known as a sotapatti-phalattha person or sotapanna from this

moment onwards.

If a sotāpanna again undertakes vipassanā meditation, he will attain sakadāgāmi-magga in due course. During this second magga-citta, he is called a sakadāgāmi-maggattha person. After the dissolution of this citta, sakadāgāmi-phala citta arises in him and he

is known as a sakadāgāmi-phlattha person or sakadāgāmi from this moment onwards.

A sakadāgāmi may again undertake vipassanā meditation. When he attains the third magga, he is known as an anāgāmi-maggattha person while that magga-citta lasts. As soon as the magga-citta dissolves, anāgāmi-phala citta arises in him and he is called an anagami-phalattha person or anāgāmi from that moment onwards.

Again an anāgāmi may undertake vipassanā meditation, and when he attains the fourth magga, he becomes an arahatta-maggaitha person. But as soon as the arahatta-magga citta dissolves, arahatta-phala citta arises and he becomes an arahatta-phalaitha person-or arahat from that moment onwards.

Thus the four maggatha persons exist for so short a duration that they cannot be pointed at. Only the four phalatha persons can be pointed at. Their distinct characteristics may be noted as follows.

1. Sotápanna or Sotápan

A sotāpanna is one who has attained sotāpattimagga and sotapatti-phala. He (or she) can enjoy the peace of Nibbāna whenever he wishes by developing the ecstatic absorption corresponding to sotāpatti-phalasamāpatti.

He is called a stream-winner because he has entered the stream that leads to Nibbana. The stream represents the noble Eightfold Path. He is no longer a worldling (putthujjana), but an ariyā (noble person).

A sotāpanna has eradicated the two worst defilements, i.e., ditthi and vicikicchā, and three basic

Fetters — namely, sakkāya-dithi, vicikicchā and silabbataparāmāsa. He has also eliminated the coarse properties of the remaining defilements — the properties that can cast a person to the apāya abodes. So to him, the doors of the apāya abodes are closed for ever, neither will he be reverted to a worldling again.

He has unwavering faith in Buddha, Dhamma and Sangha. He will also steadfastly observe the five precepts and will abstain from committing any of the ten akusala-kamma-pathas, i.e., ten ducaritas or unwholesome actions. The four lobha-mūla diṭṭhigata-sampayutta cittas and the moha-mūla vicikicchā-sampayutta citta will never arise in him.

He may, however, enjoy the sense pleasures as an ordinary person. But he will not be reborn more than seven times in the sense-sphere (kāma-loka). He will become an arahat in due course and after that last life, he will enjoy the peace of Nibbāna for ever.

There are three types of sotapanna:

- (1) Sattakkhattu-parama-sotāpanna = one who enters Nibbāna after seven lives,
- (2) Kolamkola-sotāpanna = one who enters Nibbāna after two to six lives,
- (3) Ekaviji-sotāpanna = one who enters Nibbāna after one life.

(2) Sakadāgāmi or Sakadagam

A sakadāgāmi is one who has attained sakadāgāmi-magga and phala. He (or she) can enjoy the peace of Nibbāna whenever he wishes by developing the esctatic absorption corresponding to sakadāgāmi-phala-samāpatti.

'Sakadāgāmi' literally means 'once returner'. A sakadāgāmi will be reborn only once in the sense sphere. He will then become an arahut and, after that last life, will be in Nibbāna for ever.

The cittas that arise in a sakadāgāmi are the same as those which arise in a sotāpanna with the only exception that a sakadāgāmi enjoys sakadāgāmi-phalasamāpatti instead of sotāpatti-phala-samāpatti.

Compared to a sotāpanna, a sakadagami has less rāga, (lust, greed), dosa (illwill, hatred) and moha (delusion). Thus he is nobler than a sotāpanna.

There are six kinds of sakadāgāmis, namely:

- (1) Those who attain sakadāgāmi in the human world and attain parinibbāna here,
- (2) Those who attain sakadāgāmi in the human world and attain parinibbāna in a heavenly realm,
- (3) Those who attain sakadāgāmi in a heavenly realm and attain parinibbāna there,
- (4) Those who attain sakadāgāmi in a heavenly realm and attain parinibbāna in the human world,
- (5) Those who attain sakadāgāmi in the human plane, and after being born once in a heavenly realm, attain parinibbāna in the human plane,
- (6) Those who attain sakadāgāmi in a heavenly realm, and after being born once in the human plane, attain parinibbāna in a heavenly realm.

3. Anagami or Anagam

An anāgāmi is one who has attained anāgamimagga and phala. He (or she) can enjoy the peace of Nibbāna whenever he wishes by developing the ecstatic absorption corresponding to anāgāmi-phalasamāpatti.

'Anāgāmi' literally means 'no returner'. An anāgāmi will not be reborn in the sense sphere. If he does not attain the arahatship in the present life yet, he will be reborn in a Brahma realm or Puré Abode (Suddhāvāsa), where he will attain arahatship and pass to Nibbāna.

Since the anāgāmi-magga eliminates the kilesā dosa (hatred) and the two Fetters—namely, kāmarāga (sense desire) and paṭigha (hatred or illwill), an anāgāmi will no longer experience anger, hatred, worry, despair, fright, and any unpleasant mental feeling, neither will he enjoy sense pleasures.

His mind will always be in peace and he will enjoy the ecstatic peace of Nibbana whenever he wishes by developing anagami-phala-samapatti. If he attains all the eight jhanas, he can also enjoy Nirodhasamapatti during which all consciousness and mental activity are temporarily suspended.

There are five types of anagamis:

- (1) Those who attain arahatship within the first half of the life of the Pure Abode where they are reborn,
- (2) Those who attain arahatship within the second half of the life of the Pure Abode where they are reborn,

- (3) Those who attain kilesa-parinibbāna (i.e., arahatship) without having to struggle very hard,
- (4) Those who attain kilesa-parinibbāna after struggling very hard,
- (5) Those who do not attain arahatship in the four lower abodes of the five Pure Abodes, but attain arahatship in the highest Pure Abode (i.e., Akanittha).

4. Arahat

An arahat is one who has attained arahatta-magga and phala. He (or she) can enjoy the peace of Nibbāna whenever he wishes by developing the ecstatic absorption corresponding to arahatta-phala-samāpatti. He can enjoy Nirodha-samāpatti if he attains the eight jhānas.

Since arahatta-magga eliminates all the defilements (kilesās), an arahat has no greed, ill-will, delusion, conceit, personality-belief and other bad mental factors. He has no attachment to anything; so he is free from all entanglements. He does not regard anything as his own; thus he has no reason to feel sad because something is taken or stolen from him.

Because he has uprooted all dosa (anger, hatred or ill-will) from his mind, he will never experience unpleasant mental feeling which accompanies dosamüla cittas. All the twelve akusala-cittas (immoral consciousness) will never arise in him.

As his mind is always free from all defilements, it is at the purest state, making him the noblest one.

He is a true Saint worthy of respect by men and devas and worthy of receiving alms which are offered to him with the intention of enjoying the benefits in the present life as well as in future lives.

An arahat, literally meaning a worthy one, does not accomplish fresh kammic activities, and he is not subject to rebirth because the conditions for his reproduction in matter have been destroyed.

Sotāpannas, sakadāgāmis and anāgāmis are called sekhas because they have yet to undergo a training. Arahats are called asekhas because they no longer need to undergo any training.

The arahat realizes that what is to be accomplished has been done. A heavy burden of misery has finally been thrown away, and all forms of craving and all shades of delusion have been annihilated. He now stands on heights higher than celestial, far removed from uncontrolled passions and the defilements of the world.

There are five types of arahais:

- (1) Paññāvimutta-arahat = one who is emancipated through paññā (wisdom),
- (2) Ubhatobhāgavimutta-arahat = one who is emancipated in two ways, namely by arūpajjhāna and by ariyāmagga,
- (3) Tevijja-arahat = one who possesses the three vijjās,
- (4) Chalābhināa-arahat = one who possesses the six abhināās (supernormal powers),
- (5) Patisambhidhāpatta-arahat = one who possesses the four sambhidhās, i.e., the knowledge

of the meaning of each word, the knowledge of the text (pāli), the knowledge of the origin of the words, and the determinate knowledge together with the accurate discrimination of the first three.

CONCLUSION

Cittena niyate loko.

The citta (consciousness) rules over all the world. The citta of every person controls the person, leads his every action and shapes his destiny.

Men's mind has produced modern science, has been developing it very rapidly and controls all the science technology including the atomic energy and the atomic weapons.

It is men's mind which has shaped various cultures of the world and it will be men's minds again which will direct the hands to pull the triggers of the atomic weapons which will wipe out the human civilization and the human race from the surface of the earth.

Indeed the mind is the most powerful agent in all the worlds. It is the mind which manipulates the late of each individual to be born in a woeful abode or in the human world or in a *celestial* realm.

So it is of paramount importance to understand the true nature of the mind and the function of each constituent of the mind.

There is no doubt that only the Buddha Abhidhamma can analyse the mind in detail and correctly describe the functions of the citta and the cetasikas which constitute the mind.

Moreover it is only the Buddha Abhidhamma which fully and correctly explains the co-relations between the various factors of mind and matter in the form of the majestic Law of Dependent Origination which vividly describes the rounds of rebirth undergone by each individual.

Furthermore, the Abhidhamma clearly exposes the theoretical as well as the practical aspects of the Noble Eightfold Path, also known as the Middle Path, by which the mind is purified from defilements in seven stages by developing mental concentration and vipassana insight.

The attainment of various blissful experiences which surpass sensual enjoyment and the realization of the unique peace of Nibbana in this very life are very real, and the Abhidhamma brightly illuminates the right path to be followed by every person for the attainment of the highest goal in life.

Everybody should study Abhidhamma very seriously and use the Abhidhamma knowledge as the guiding torch of his life.

May the guiding torch of Abhiddhamma shine for ever!

May the supreme knowledge of Abhidhamma ever enlighten the whole world!

Dr. Mehm Tin Mon

B.Sc.Hons., M.Sc., Ph. D. Saddhamma Jotikadhaja Adviser to the Ministry of Religious Affairs Union of Myanmar

He was born in kamawet village, Mudon township, Mon State, Union of Myanmar, on Ianuary 13, 1934.

His parents were U Yaw In and Daw Sein Tan who were devout Buddhists. They belonged to the Mon race and made their living by farming.

Mehm Tin Mon attended Kamawet Primary School and Mudon State High School where he topped his class every year.

He passed the High School Leaving Examination in 1951 with distinctions in Mathematics and General Science. He also passed the Matriculation Examination in the same year from the first division with distinction in Mathematics.

He joined the University of Yangon in 1951. In the Intermediate Examination held in 1953, he scored the highest marks in Mathematics and Chemistry, and he was awarded the University Hoe Wah Kain Gold Medal as well as the University Scholarship.

In the Bachelor of Science Examination held in 1955, he stood first with distinctions in Physics, Chemistry and Pure Mathematics. Again he was awarded a University gold medal called Esoof Bimiah Gold Medal.

In 1956 he passed the B.Sc. Honours Examination in Chemistry with flying colours and a third University

gold medal called U Shwe Lay Gold Medal was awarded to him.

In 1957 he went to the United States of America to study at the University of Illinois on a State Scholarship sponsored by the Government of the Union of Myanmar. Here also he was awarded the University Fellowship for two consecutive years for his outstanding scholastic record. He gained the Master of Science Degree in 1958 and the Doctorate Degree in 1960. He also won membership to Phi Lambaa Upsilon Society and Sigma Xi Society.

He served his country for more than 36 years from 1956 to 1992 working as Lecturer and Head of Department of Chemistry in several Institutes and finally as Professor of Chemistry in the University of Mawlamyine. He retired from Professorship on December 1, 1992.

During his service to the State, he headed the Buddhist Association of the Institute of Medicine (1), the Buddhist Association of the Institute of Education and the Buddhist Association of Mawlamyine University. He also served as Secretary and later as President of the Central Buddhist Association of Universities and Institutes in Yangon from 1983 to 1986. He succeeded in raising funds and building the beautiful two-storeyed Dhammayone (Community Hall for religious purposes) and the 'sacred Shrine (Pagoda) in the University of Mawlamyine.

Dr. Tin Mon also excelled in religious examinations. He stood first in the Abhidhamma Examination (Ordinary Level) in 1981. He also stood first in the Abhidhamma Examination (Honours Level) in 1983. Again in 1984 he stood first in the Visuddhi Magga

Examination. These examinations are held annually in Myanmar by the Department of Religious Affairs.

Dr. Tin Mon has written over thirty books on education as well as on Buddhism. He travelled throughout Myanmar delivering lectures on Buddhism and conducting short infensive classes on Abhidhamma. He was awarded the title of Saddhamma Jotakadhaja by the Government of the Union of Myanmar in 1994 for his outstanding antibution to the propagation of Buddhism.

Dr. Tin Mon was appointed as an Adviser to the Ministry of Religious Affairs on August 1, 1993, and he has been serving the State in this capacity ever since. He is also serving as Professor in the International Theravada Buddhist Missionary University, Yangon.

Lectures on Abhidhamma and Buddhism

Any interested society or organization may invite Dr. M. Tin Mon to Lecture on Buddhism or to teach Abhidhamma in any town or country.

A full course on Abhidhamma by Dr. M. Tin Mon takes about 56 lecturing hours.
